

# A World of Value

Hayleys PLC | Annual Report 2023/24

# A World of Value

Hayleys PLC has long cultivated a powerful reputation as an indomitable entity – one which exhibits unwavering resilience and strength even in the midst of considerable adversity.

Ours is a vast network of partnerships that spans the world – preserving, generating, and distributing value in every climate.

Strengthened by deep roots and robust structures, our sole purpose lies in safeguarding and sustaining our surroundings, while consistently generating economic growth and prosperity across an ever-shifting landscape.

Since inception, our dedication towards sharing and distributing resources across our vast network has remained the wellspring of our collective success. The pages that follow provide a detailed account of how in doing so, we have impacted countless sectors, individuals and entities – spurred onwards by our continuous quest to foster a sustainable future for the ever-expanding world of Hayleys.

**The World of Hayleys. A World of Value.**

*Across every territory in which they are present, forests represent a unique world that's teeming with life. Individual trees unite to create a shared network that burgeons into a vast canopy designed to protect and sustain countless lives, while generating a positive impact on its surroundings. Forests support an ongoing journey of natural expansion, growth, and development, with the inherent ability to create a world of value in more ways than one.*

- Hotels and Lodging (Pg 203)

## Providing... ...essential services

Our diverse capabilities are designed to facilitate our stakeholders with the right solutions to navigate their journey through life.

*Forests supply countless services to the species that reside within and around their territory and are integral towards building a healthier, self-supportive model of growth.*

## Connecting... ...countless lives

Over the years we have nurtured a vast, interdependent entity that relies on longstanding partnerships and connections to generate value.

*Forests are home to intricate, ecological processes, i.e., interactions between living and non-living materials that drive long-term stability and sustainability.*

## Learning... ...from the past and present

Our time-tested insights and experience empower us to respond to change effectively and in a timely manner.

*Trees possess the ability to learn from their experiences, and thus forests represent a vast repository of knowledge that enables them to remain responsive and resilient.*

## THE WORLD OF HAYLEYS

# Transforming our World

At Hayleys PLC, we create a dynamic, agile, and self-sustaining environment in which all life is protected, with infinite opportunities to thrive.

*Forests form microclimates that provide an indispensable service to the planet, by creating a constantly evolving ecosystem that influences and regulates external dynamics. This creates an optimised environment that protects and nurtures diverse communities and safeguards their future.*

### Nurturing... ...our future

We rely on an ongoing process of renewing, replenishing, and restoring our surroundings, while molding the next generation to ensure our continuity and long-term growth.

*Forests undergo a cyclical process that enables continuous regeneration, ongoing development, and a natural progression that ensures their ability to sustain for the foreseeable future.*

### Influencing... ...our surroundings

We continue to moderate and adjust our controls to ensure we maximise our impact and create an ideal space that's conducive for growth.

*The environment is often vastly different beyond the boundaries of a forest. Forests can even create rain, indicating the ecosystem's ability to nurture the ideal conditions for life even amid unfavourable circumstances, by merely regulating its internal climatic conditions.*

### Adapting... ...to changing dynamics

The world is changing, but so are we. We continue to remain in sync with changes

*Trees possess the ability to survive for thousands of years, surviving harsh conditions and the impact of an evolving world. Some forests date back hundreds of millions of years, demonstrating their adaptability and longevity in the face of adversity.*

# OUR INTEGRATED ANNUAL REPORT

Our 11th Integrated Annual Report articulates the Hayleys Group’s value creation story, demonstrating how the Group leveraged its resources and relationships to create and deliver stakeholder value while minimising value erosion. The report combines material information on our operating environment, strategy, performance, risks and opportunities, governance and future outlook in a holistic, yet concise manner.

## BASIS OF PREPARATION

**Reporting period:** The Group adopts an annual reporting cycle and this Report covers the period from 1st April 2023 to 31st March 2024 (herein referred to as 2023/24). Any material events after this date including board changes, macro-economic developments and post-balance sheet events up to the Board approval date of 17th May 2024 have also been included.

**Reporting boundary:** This Report covers the operations of Hayleys PLC and its 183 affiliates (collectively referred to as the “Group”) based in Sri Lanka and overseas (refer to Note 1 of the Finance statements on page 341). Significant changes to the Group’s organisational structure in 2023/24 were as follows:

- Following the acquisition of the majority stake of Horana Plantations PLC (HPL) by Hayleys subsidiary Hayleys Plantation Services (Private) Limited in March 2023, HPL has been consolidated into both the financial and non-financial reporting of the Group
- Four entities (including 2 listed entities) which previously operated as subsidiaries of Singer (Sri Lanka) PLC were amalgamated into the latter during the year under review.

### Sector classifications:

- Hayleys Fentons which was previously included in the ‘Others’ Sector will be classified as a separate Sector titled Projects & Engineering from this financial year, reflecting its increasing financial contribution to the Group and the significance of its impacts.
- Meanwhile, the Group’s tea export arms, Mabroc Teas (Pvt) Ltd and Martin Bauer Hayleys (Pvt) LTD which were previously categorised

in the Plantations Sector, have been classified separately as the Tea Exports Sector.

Accordingly, historical Sector-level information in both financial and non-financial reporting has been adjusted to reflect this reclassification.

**Non-financial/ESG metrics:** Excluding several companies acquired/formed during the financial year, the reporting boundary for financial and non-financial reporting remains consistent.

## STANDARDS AND FRAMEWORKS

 FINANCIAL STATEMENTS	 NARRATIVE REPORT	 SUSTAINABILITY REPORTING	 CORPORATE GOVERNANCE REPORT
<ul style="list-style-type: none"> <li>• Sri Lanka Financial Reporting Standards</li> <li>• Companies Act No.7 of 2007</li> <li>• Listing Requirements of the Colombo Stock Exchange</li> <li>• Sri Lanka Accounting Standards</li> </ul>	<ul style="list-style-type: none"> <li>• Integrated Reporting Framework</li> <li>• Guidelines for the presentation of Annual Reports issued by CA Sri Lanka</li> </ul>	<ul style="list-style-type: none"> <li>• SLFRS S1 and S2 IFRS Sustainability Reporting Standards (refer to page 13 for transitional relief adopted)</li> <li>• GRI Standards (2021) of the Global Reporting Initiative</li> <li>• Climate Disclosure Standards Board- Water related disclosures</li> <li>• Sustainability Accounting Standards Board (SASB)</li> <li>• Recommendations of the Task Force on Climate Related Financial Disclosures (TCFD)-Fully integrated into the SLFRS Sustainability Reporting Standards</li> <li>• Non-Financial Reporting Guidelines issued by CA Sri Lanka</li> <li>• Gender Parity Reporting Framework of CA Sri Lanka</li> <li>• Sustainable Development Goals (SDG)</li> <li>• 10 principles of the UN Global Compact</li> <li>• UNGC CEO's Water Mandate</li> </ul>	<ul style="list-style-type: none"> <li>• Listing Requirements of the Colombo Stock Exchange</li> <li>• Code of Best Practice on Corporate Governance issued by CA Sri Lanka (2023)</li> <li>• Transparency International's assessments on Transparency in Corporate Reporting</li> </ul>

## STATEMENT OF COMPLIANCE

The consolidated non-financial information/sustainability reporting information of the Group have been prepared in line with the Sri Lanka Financial Reporting Standards as issued by CA Sri Lanka; the new sustainability reporting standards designated as SLFRS S1 and SLFRS S2 represent localised versions of the IFRS S1 and S2 Sustainability Reporting Standards.

## ASSURANCE

We ensure the integrity of both our financial and non-financial information through a combined assurance model which includes oversight by the management and the use of an internal audit and external assurance providers as listed below.

	Internal assurance	External assurance
Financial information and relevant processes	Internal Audit Audit Committee	External assurance on financial information by Messrs.Ernst and Young (Page 326)
Integrated report	Group ESG Division Corporate Affairs Unit	External assurance on the Group's Integrated Reporting practices have been provided by Messrs. KPMG (Page 479)
Non-financial/ESG information	Group ESG Division Group ESG Steering Committee	
GHG inventory	Group ESG Steering Committee	Sri Lanka Climate Fund in line with ISO 14064-1(2018)

### Changes to reporting

The Group obtained external assurance on its GHG inventory for 2022/23 during the year; resultantly emissions for 2022/23 have been restated, while reporting and computational improvements recommended by the verifier (in line with ISO 14064:2018) are reflected in the GHG inventory for 2023/24.

# OUR INTEGRATED ANNUAL REPORT

## BOARD RESPONSIBILITY STATEMENT

Hayleys PLC's Board of Directors hold ultimate responsibility for ensuring the integrity of this Report. We hereby confirm that the 2023/24 Report addresses all relevant material matters and fairly represents the Group's integrated performance. We also confirm that the Report has been prepared in accordance with the Integrated Reporting Framework of the International Integrated Reporting Council. The Report is approved and authorised for publication.

## FORWARD LOOKING STATEMENTS

This Annual Report contains forward-looking statements which are based on the Group's current expectations and forecasts of future events. Readers can identify these statements through words such as anticipate, expect, estimate, intend, project, believe and other terms of similar meaning. These statements are subject to inherent risks and uncertainties and assumptions many of which relate to factors beyond the Group's control. The Group cautions investors that these factors could differ materially from those expressed in any forward-looking statement.

# OUR APPROACH TO REPORTING

## REPORTING IMPROVEMENTS

**Stakeholder feedback on our Annual Report:** During the year, we conducted a stakeholder survey on our 2022/23 Annual Report, the findings of which were a key input in the planning, content formulation and design of this year's Annual Report. Administered to both internal and external stakeholders, the survey sought to assess the Report on the following dimensions.

### KEY INSIGHTS IDENTIFIED

- Comprehensive disclosures and good use of graphical elements
- Require focus on simplifying information presented
- Require more concise, summarised information
- Stakeholders require more insight on the Group's way forward and projections for the future
- Increased preference for easily accessible digital platforms

Reporting improvements featured in this year's Annual Report include the following:

### CONTENT IMPROVEMENTS

- Separate supplement on the Group's climate-risk management, aligned to the reporting requirements of SLFRS S2 (based on IFRS S2)
- Compliance with new Listing Rules and voluntary adoption of Code of Best Practice on Corporate Governance 2023
- Risk Management report enhanced to widen disclosures on sustainability-related risks and opportunities (SRRO)

#### Climate Risk Report

Separate supplement capturing the Group's approach to identifying and managing climate-related risks and opportunities.

Qualitative approach to climate-scenario analysis

- Narrative structured and formulated to articulate the Group's holistic value addition process
- Improved disclosures relating to the Group's way forward

### REPORTING FRAMEWORKS

- Early adoption of SLFRS S1 and S2 (based on IFRS S1 and S2) with permitted transition relief (refer to page 13 for further information)
- Commenced reporting under the Climate Standards Disclosure Board- Water-related disclosures

### MATERIALITY

- The Group's materiality assessment tool was further refined throughout the year to reflect the early adoption of the SLFRS Sustainability Reporting Standards and the SASB Standards.

### NON-FINANCIAL REPORTING

- Increased accuracy and scope of the Group's GHG inventory following third-party verification.

The Group also widened its Scope 3 emission reporting. Accordingly the emissions for 2022/23 have been restated.

- Improved waste reporting to include waste by type, recovery method and disposal method

### DIGITAL INNOVATIONS

- First-of-its-kind virtual tour of the Annual Report with virtual reality capabilities
- Chatbot with generative AI capabilities stimulating human interaction
- Persona-based interactive Annual Report website, providing readers easy access to stakeholder-specific information

This tool utilises advanced Chat GPT 4.0 technology and advanced module in Gen AI through Document Intelligence providing improved accuracy and an enhanced experience to users

# ADOPTION OF SLFRS S1 AND S2 SUSTAINABILITY DISCLOSURE STANDARDS

GOVERNANCE >>	STRATEGY >>	RISK MANAGEMENT >>	METRICS AND TARGETS >>
<p>Establishment of Sector-level ESG Committees with Board representation</p> <p>Quarterly reporting of ESG metrics to Group Management Committee (GMC)</p> <p>Quarterly ESG risk reporting to Audit Committees</p>	<p>Formulation of Sector-level ESG Roadmaps by 4 key Sectors</p> <p>Climate strategy centered on,</p> <ol style="list-style-type: none"> <li>1 Operational interventions</li> <li>2 Value chain interventions</li> <li>3 Leveraging opportunities</li> <li>4 Integrating climate considerations</li> </ol>	<p>Sector-level ESG risk assessments conducted quarterly</p> <p>Integrated with business risk management processes</p>	<p>Group and Sector-level target setting through ESG Roadmaps</p> <p>three companies committed to Science-based-target-initiatives with 2 companies obtaining verification of their targets</p> <p>Improved emission reporting through,</p> <ul style="list-style-type: none"> <li>- Widening Scope 3 coverage</li> <li>- External assurance</li> </ul>

The Hayleys Group opted for early adoption of the SLFRS Sustainability Disclosure Standards S1 and S2, applying the following transitional relief announced by CA Sri Lanka, as well as the IFRS Foundation and ISSB for first-time adopters.

- **Climate-first reporting:** Application of IFRS S2 in accordance with IFRS S1, to the extent that IFRS S1 refers to climate-related information
- **Proportionality:** Qualitative approach to determine anticipated financial effects of SRROs and climate-related scenario analysis
- **Information is limited to what is reasonable, supportable and available without undue cost or effort** in measurement of Scope 3 emissions and determination of the scope of the value chain.

In aligning with the IFRS Sustainability Disclosure Standards, the Group strengthened its sustainability-related governance, monitoring and reporting mechanisms as summarised below and explained in further detail in subsequent sections of the Report.

## REPORTING CONSIDERATIONS

- **Time horizons:** The time horizons in which the Group classifies its short, medium and long-term sustainability-related-risks and opportunities (SRRO) and climate-related- risks and opportunities (CRRO) are as follows; short-term (less than 1 year), medium-term (1-5 years) and long-term (over 5 years)
- **Judgements and estimates:** In preparing the required disclosures under S1 and S2 the Group has used judgement in assessing SRROs and CRROs that are material to the Group as a whole (following Sector-level assessments), identifying material Scope 3 emission sources (refer to page 303 for further information) and selecting material information to be disclosed under each SRRO.
- **Sources of guidance:** In addition to the IFRS Sustainability Disclosure Standards, the Group has referred to the following sources in its disclosures.

### Sources of guidance

	Identification of SRROs	Disclosure requirements
7 SASB industry standards	✓	✓
CDSB Framework Application Guidance for Water	✓	✓
GRI Standards	✓	✓

- **Location of disclosures:** Detailed information required under IFRS S2 is given in the Group's Climate Risk Report on page 288 of this Annual Report. Other information relating to SRROs is integrated across several other sections of the Report including Corporate Governance, Strategic ESG Integration, Portfolio Reviews and Capital Management Reports among others.

### Roadmap for full implementation

The Group intends to gradually strengthen the processes, controls and reporting mechanisms required for the full implementation of IFRS S1 and S2, in line with the jurisdictional transitional relief announced for the implementation of the standards in Sri Lanka. The roadmap for full implementation is as follows:

#### 2024/25

- Widen disclosures of relevant SRROs
- Further improvements in Scope 3 emission reporting
- Commence quantitative disclosures on financial effects

#### 2025/26

- Quantitative disclosures on climate-related scenario analysis
- Complete reporting of Scope 3 emissions

#### 2026/27

- Strengthen reporting across all Group entities
- External assurance on IFRS Sustainability Reporting Disclosure Standards

# PORTFOLIO HIGHLIGHTS

## 01 Transportation & Logistics

The country's leading player in the transportation and logistics industry, offering the entire gamut of transportation-related services.

● 21% ● 11% ● 8% ● 22%

## 02 Consumer & Retail

### BASIS OF PREPARATION OF THE CONSOLIDATED STATEMENT OF ESG PERFORMANCE

**Principles of consolidation:** Environmental disclosures including energy consumption, emissions, water and waste covers all Group-wide manufacturing sites, plantations, corporate offices and other sites. Social and governance-related disclosures also relate to the Hayleys Group comprising all entities controlled by the Group.

**Materiality:** In assessing whether a disclosure is sufficiently material to be included in the Group's Statement of ESG Performance, the management considers its potential on the Group's ability to create value in the short, medium and long-term and the extent of its social and environmental impacts.

**Policies:** The methods of computation and information aggregation of the ESG disclosures are set out within the relevant capital reports and have been applied consistently in the preparation of the consolidated ESG Statement.

## OUR PURPOSE

TO INSPIRE AN INCLUSIVE  
WORLD AND A THRIVING  
PLANET

## VISION

TO BE SRI LANKA'S  
CORPORATE INSPIRATION  
AT ALL TIMES

## MISSION

DELIVERING SUPERIOR  
SHAREHOLDER VALUE BY  
UNLEASHING THE FULL  
POTENTIAL OF OUR PEOPLE  
AND ACHIEVING LEADERSHIP  
IN ALL OUR DOMESTIC AND  
GLOBAL BUSINESSES

## VALUES

- H** - Honesty and integrity - ethical and transparent in all our dealings.
  - A** - Accountability - holding ourselves responsible to deliver what we promise.
  - Y** - Yes, WE can! (Team Work) - working with each other and with our partners across boundaries, to make things happen.
  - L** - Love for humanity - treating everyone with respect and dignity, providing for the development of our people and rewarding them for good performance.
  - E** - Enduring Customer Value - enhancing experiences for every customer, from the rural farmer to the global consumer.
  - Y** - Yes, we WILL WIN! (a Will to win) - exhibiting the will to win that which is important to Hayleys and its shareholders.
  - S** - Social Responsibility as a Good Corporate Citizen - caring for the communities in which we work, actively supporting their growth and being environmentally responsible in all we do.
- &
- I** - Innovation - transforming ideas into products and services to create economic, social and environmental value in the pioneering spirit of Hayleys

# ADVANCING VALUE

## ELEVATING QUALITY OF LIFE

**Convenience, comfort and connectivity** through world-class consumer durable solutions

**143**

SKUs

**34**

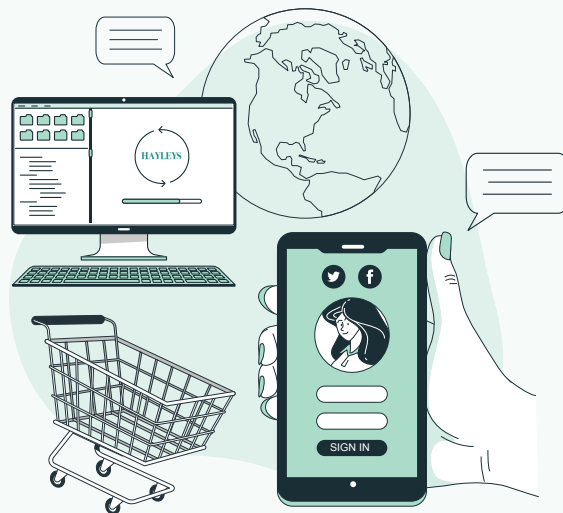

Global brands

**5,782**

Customers

**Enriching lifestyles** through

- Curating leisure experiences through our hospitality offerings
- Manufacture of high-quality, innovative fabrics

Purifying air and water through an array of activated carbon solutions in the Purification Sector.

**Safety, hygiene and protection** through producing an array of multi-purpose gloves catering to households and industries

**Nutrition and dietary wellness** through an array of sustainable, high-quality and innovative agricultural products including tea, spices, value-added vegetables and fruits.

The Group also plays a critical role in facilitating access to essential agricultural inputs and machinery, thereby strengthening the country's Agriculture industry.

## ACCELERATING THE TRANSITION TO A GREEN ECONOMY

**Leading the shift to renewable energy**

- 50 MW installed capacity of renewable energy through the Power & Energy Sector
- 200MW of solar power installations across Sri Lanka through Hayleys Fentons
- 196,166 MWh generations of renewable energy across the Group.

**Circularity**

- 56% use of recycled aluminium by the Construction Materials Sector
- Biodegradable gloves created by the Hand Protection Sector
- Waste to dye initiatives at Hayleys Fabric

**Commitment to reduce emissions**

- 3 companies in the Group have committed to SBTi with 2 obtaining verification of its targets
- 68% reliance on renewable energy

**Biodiversity**

- Biodiversity regeneration within a 9-acre wetland park
- Replenishing Sri Lanka's blue carbon ecosystems through Advantis Blue Carbon Drive
- >69,000 trees planted during the year by Sectors

**DRIVING NATIONAL ECONOMIC GROWTH**

One of Sri Lanka's largest value-added exporters, accounting for **5%** of the country's export income

Strengthening the country's foreign exchange position through generating USD **591** mn forex income

Accounts for **4.6%** and **4.1%** of Sri Lanka's respective tea and rubber production

Sri Lanka's largest exporter of processed fruits and vegetables

**Facilitating business growth through the development of essential infrastructure**

National and international **logistics and transportation services** through Hayleys Advantis

**IT and digital infrastructure** through HBSI

A range of **industrial inputs and infrastructure** offered through Hayleys Aventura

Engineering and building solutions including solar power installation through **Hayleys Fentons**

**PUSHING THE BOUNDARIES OF INNOVATION**

**Gloves**

Development of advanced sports gloves, specialised gloves for the electric vehicle industry and high-cut resistant gloves

**Purification**

Innovation in energy storage and hard carbon solutions

**Climate-smart agriculture solutions**

Innovation which seeks to build climate resilience in the country's agriculture sector

**Eco Solutions**

New applications of growing media solutions and coco-fibre

**Sustainable textiles**

Sustainable sportswear- Eco Stretch by Hayleys Fabric, centers on a closed-loop system and breaks away from traditional elastane

**Aluminium profiles and products**

Range of new solutions including balconies, fences, artificial walls and new satin finish product range

## ADVANCING VALUE

### SOCIAL AND ECONOMIC EMPOWERMENT

Injecting value across our extensive smallholder supplier base including,

**>11,900**

Out-growers

**>6,000**

Rubber farmers

**345**

Tea smallholders

Payments of over **Rs. 53.12 bn** made to **>36,200** employees

Payments of over **Rs. 325 bn** made to suppliers.

Suppliers and business partners developed through capacity building including,

**Fabricators**  
**Rubber farmers**  
**Solar installers**  
**Outgrowers**

**>129,000 estates communities**

and families supported through womb-to-tomb proposition

**Rs. 408 mn investments** in CSR activities including provision of medical equipment and infrastructure development

### DRIVING INDUSTRIES FORWARD THROUGH COLLABORATION

Facilitating dialogue on critical industry-specific issues through **knowledge sharing** which includes,

- International Plantations Sustainability Summit 2023
- Congress for Sustainable Materials 2024
- Supplier development forums

**Research and Development collaborations** with international and national universities, institutes and other government bodies in,

- Collectively achieving sustainability aspirations in decarbonisation, circularity and ecosystem preservation
- New product developments
- Process improvements and resource efficiency

Leadership positions in industry bodies held by our employees including,

- Board Member of United Nations Global Compact
- Chairmanship of Sri Lanka Planters' Association
- Chairman of Industrial Association of Sri Lanka

Active representation in cross-sector and multi-stakeholder partnerships including,

- UNGC- Hayleys PLC and 9 organisations within the Group are members of the UNGC
- Partnerships with government and like-minded organisations to drive environmental preservation including protecting natural habitats, regenerating mangroves and preserving habitats among others

# YEAR AT A GLANCE

## January 2024

- Hayleys Advantis named Best Transportation and Logistics Company in Sri Lanka and South by the Global Brands Magazine, UK
- Fentons Ltd transitions to Hayleys Fentons Limited

## March 2024

- Hayleys PLC triumphs as overall winner of ACCA Sustainability Reporting Awards
- Talawakelle Tea Estates PLC wins Best Corporate Citizen Award Sustainability Award 2023

## November 2023

- Talawakelle Tea Estates recognised in the UNGC SDG Stocktake report for 2023
- Haycarb joins Forces with Coconut Development Authority and Coconut Cultivation Board on major coconut tree planting drive

## February 2024

- Hayleys Aventura concludes Congress for Sustainable Materials 2024

## August 2023

- Hayleys Agriculture commences the manufacture of Polyethylene pipes
- Hayleys Fabric wins Best SDG Impact at ESG World Summit and GRIT Awards
- Haycarb launches holistic ESG Roadmap 'Activate'

## December 2023

- Hayleys Group sweeps Presidential export awards with 17 wins
- Advantis Group launches ESG Strategy, 'Helios'
- Hayleys shines at CA Sri Lanka TAGS Awards winning 18 awards including 'Overall Excellence in Corporate Reporting'

## June 2023

- Hayleys Solar partners with Crystal Martin for ground breaking solar installation project

## September 2023

- Hayleys Fabric partners Pro Green Lab to launch a range of upcycled construction materials

## April 2023

- DPL launches ambitious new venture into advanced sports gloves
- Haycarb initiatives Sisu Divi Pahana school meals programme

## July 2023

- Hayleys Plantations conducts world's first-ever Sustainability Summit in the plantations industry

## May 2023

- Advantis, in partnership with Cordelia Cruises launch the first-ever cruise sailing experience around the island

# PAST, PRESENT AND FUTURE

From its humble beginnings as a manufacturer of coconut fibre over 145 years ago, to Sri Lanka's most diversified conglomerate today, the Group's evolution has been characterised by a singular commitment to drive value addition and excellence across all spheres of its operations. Across its business lines, organic and inorganic growth has always centered on enhancing value through offering innovative and sophisticated solutions catering to increasingly complex customer needs. Today, our intrinsic link to every facet of the country's economy and our deep connections to international supply chains have allowed Hayleys to showcase the best Sri Lanka has to offer in the global arena

## OUR PAST

**1878**

Formation of Chas.P.Hayleys & Co. in Galle

**1913**

Hayley & Kenny purchase 400, Deans Road premises

**1954**

Hayleys becomes a public company

**1958**

Shipping agency department formed (forerunner of Advantis)

**1973**

Haycarb pioneers manufacture and export of activated carbon and export of activated carbon

**1976**

Dipped Products Ltd. Incorporated to manufacture rubber gloves

**2011**

Acquisition of Alumex Group

**2016**

Acquisition of Fentons Limited

**2017**

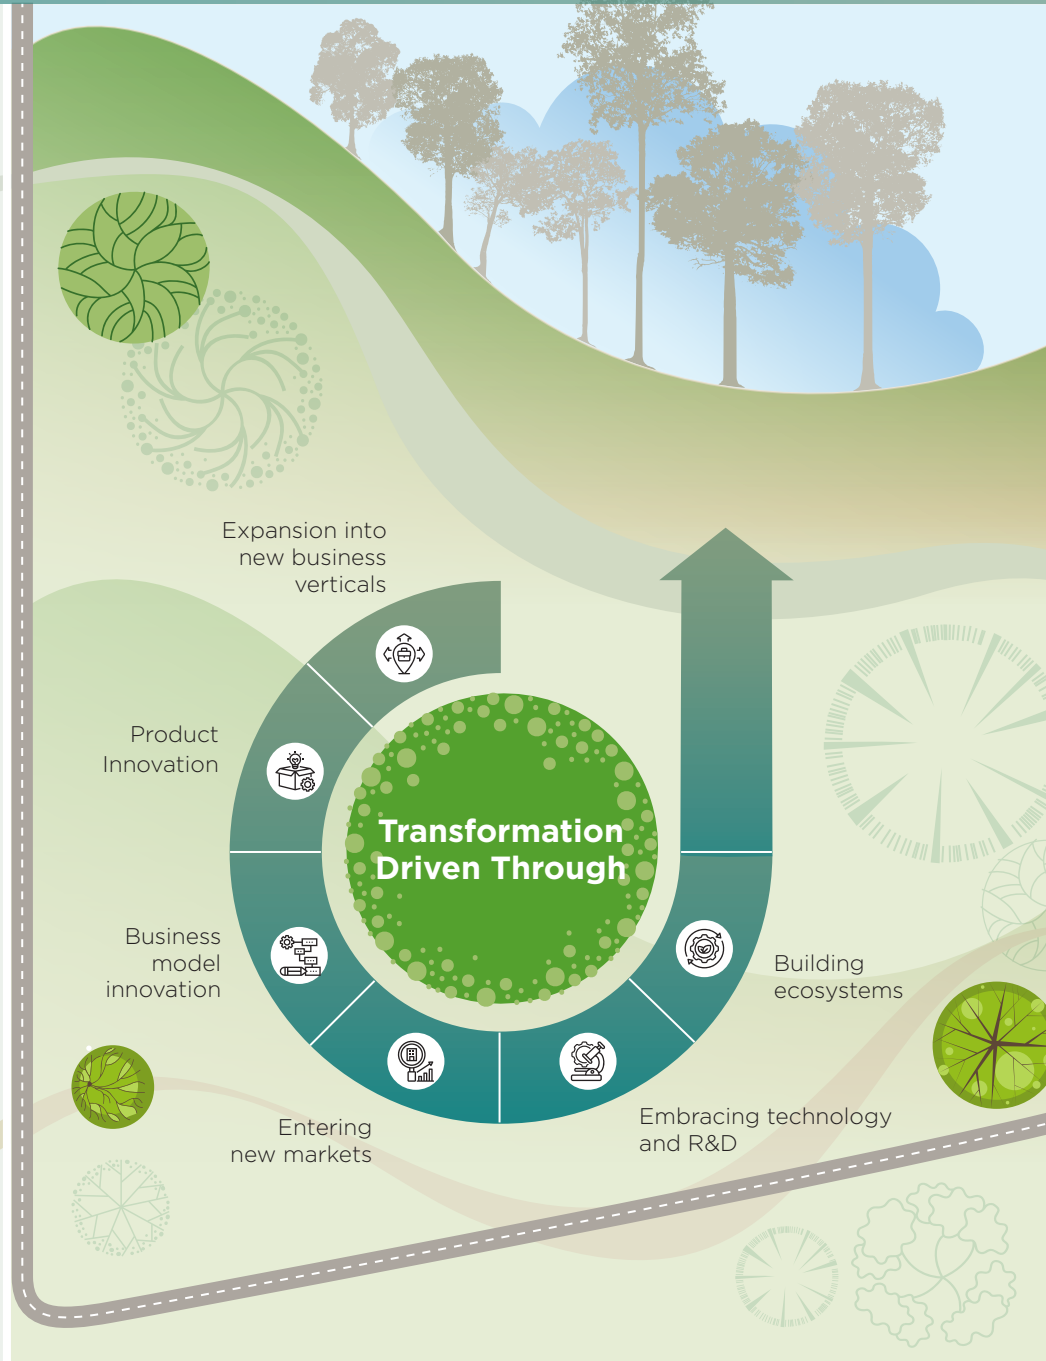

Acquisition of majority stake in Singer (Sri Lanka) PLC and Sri Lanka Shipping Company Ltd

**2021**

Hayleys Fabric acquires South Asia Textiles Ltd

**2023**

Acquisition of Horana Plantations PLC

## THE PRESENT

Sri Lanka's most diversified conglomerate with unparalleled socio-economic impacts

Global leader in coconut-shell based activated carbon

Serves 5% of global demand for household and industrial gloves

Sri Lanka's leading supplier of consumer durables

Sri Lanka's largest exporter of processed fruits and vegetables

Sri Lanka's leading provider of integrated transportation and logistics solutions

Sri Lanka's largest exporter of fibre-based value added products

## FUTURE

Maintain global market leadership positions in key verticals

Achieve maturity of new businesses entered into in recent years

Pursue new opportunities across verticals and customer segments

Value addition and contribution to the domestic economy

Strategic integration of ESG

Digitalisation and automation across key operations and processes

## PURPOSEFUL AND RESPONSIVE LEADERSHIP

# Guiding our World

**Our strong roots are the underlying structures that guide our future and support our resilience, enabling us to share our insights across our vast network, and respond to change.**

*Forests are built on an interconnected, complex and collaborative underground network known as the Wood Wide Web. This longstanding, mutualistic relationship empowers the real-time sharing of knowledge and resources, so that each entity within the network is able to rapidly anticipate and respond to external challenges and mitigate potential threats.*

## REFLECTIONS FROM THE CHAIRMAN & CHIEF EXECUTIVE

Mohan Pandithage

The Hayleys Group's evolution over the past 147 years has been inextricably linked to the country's trajectory and we have been privileged to witness and contribute to fostering Sri Lanka's resilience and unlocking its potential

Dear Stakeholder,

In my message to our valued stakeholders last year, I shared my optimism and hope for the future of Sri Lanka, the Hayleys Group and the economic climate we are operating in. As the country gradually but definitively emerges from the unprecedented economic vulnerabilities of 2022/23, today I am even more hopeful of what the future holds. I have experienced firsthand how remarkably our team persevered during this transitional and volatile period, relying on their characteristic spirit and agility to anchor the Group's value creation. Against this backdrop, it is my pleasure to present to you the 11th Integrated Annual Report and the Audited Financial Statements of Hayleys PLC for the financial year ended 31st March 2024.

With today's global reality being one in which ambiguity and constancy of change outweighs any semblance of certainty, the Hayleys Group performed credibly to generate a Consolidated Revenue of Rs. 436.83 bn and a Profit Before Tax of Rs. 25.34 bn. While these numbers represent a normalisation from the record highs of the previous year, I believe this year it is important to look beyond the financial statements to truly appreciate the Group's underlying achievements, which have strengthened the Group's resilience and positioned it for transformational growth. We entered new markets with significant upside potential, debuted exciting innovations, strategically embedded environmental and social considerations into our processes and continued to invest in developing the capabilities of our people as well as across industry value chains.

As Sri Lanka's corporate inspiration, the Group continued to be recognised for excellence across numerous aspects of its operations. Hayleys solidified its position as a leader in Sri Lanka's corporate reporting arena winning the Overall Excellence in Corporate Reporting for the 2nd

consecutive year at the TAGS Awards 2023 while securing 17 more awards across the Group. Hayleys was also ranked the overall winner at the ACCA Sustainability Reporting Awards 2023. Hayleys was also recognised for its contribution to exports at the 25th Presidential Export Awards, where the Group clinched an unmatched 17 awards across different industries.

Meanwhile, our plantation subsidiary Talawakelle Tea Estates PLC emerged victorious at the Best Corporate Citizen Sustainability Awards 2023 organised by the Ceylon Chamber of Commerce, marking the first time in history that a plantation sector entity achieved this feat.

#### OUR WORLD OF VALUE

The Hayleys Group's evolution over the past 147 years has been inextricably linked to the country's trajectory and we have been privileged to witness and contribute to fostering Sri Lanka's resilience and unlocking its potential. We are proud to be one of Sri Lanka's most socio-economically impactful organisations, with deep rooted relationships across value chains, customer networks and communities. We integrate rural farmers and outgrowers to global value chains of international brands, enabling Sri Lankan produce to reach the shelves of the world's leading retailers; our extensive product portfolio ranging from specialised gloves and advanced purification solutions to value-added agricultural products and consumer durables elevate quality of life across communities and facilitate the growth of industries; environmental interventions in our own operations as well as across value chains are accelerating the transition to a green economy and our strategic ESG initiatives are driving meaningful economic, social and environmental change across the country. At a time when social debate is rife on purpose vs profit, Hayleys has demonstrated how the two can go hand-in-hand. It is this ability to thrive as a business entity while injecting value across our

ecosystem and catalyzing positive change that truly defines who we are and make us an integral part of Sri Lanka's growth trajectory.

#### RESET, RECOVERY AND RESILIENCE

While globally, the year 2023 marked a return to relative stability after consecutive years of material COVID-related disruptions, businesses find themselves in cascading and connected crises, resulting in persistently volatile and complex conditions. Geopolitical tensions escalating to active conflict in several regions led to supply chain disruptions, triggering a surge in inflation and synchronised monetary policy tightening across key markets. Major economies, however, demonstrated surprising resilience contributing towards an estimated 3.1% growth in the global economy in 2023.

Sri Lanka is on a path to recovery, with the economy showing initial, yet definitive signs of stabilisation in 2023. Structural and policy reforms, implemented under the IMF's Extended Fund Facility (EFF) program which included cost-reflective utility pricing and fiscal consolidation measures have contributed to macro-economic stability. The successful completion of the domestic debt restructuring in September 2023 led to increased confidence. Subsequently, in November 2023 an Agreement in Principle for debt restructuring was reached with official creditors and negotiations are currently ongoing with commercial creditors.

As a result of these coordinated interventions, Sri Lanka's economic contraction slowed to 2.3% in 2023, compared to the sharp degrowth of 7.3% experienced in 2022. The economy reversed its decelerating trend in the 3rd quarter of the year, with GDP recording an expansion in the 2nd half of the year following six consecutive quarters of contraction. While demand remained subdued reflecting lower disposable incomes, external and fiscal balances improved;

## REFLECTIONS FROM THE CHAIRMAN & CHIEF EXECUTIVE

foreign exchange liquidity pressures eased significantly supported by the recovery of tourism and Workers' Remittances resulting in foreign exchange reserves improving to about 8-9 weeks of imports by end of 2023. The improved foreign exchange inflows led to the appreciation of the local currency, with the Sri Lankan Rupee appreciating by 8% during the financial year to close the year at Rs. 301.81/USD.

Following soaring prices in 2022, inflation decelerated in 2023 reflecting improved supply conditions, the appreciation of the Rupee and the easing of monetary financing. Resultantly, inflation levels as measured by the Colombo Consumer Price Index (CCPI) fell from 35.30% in the beginning of the financial year to 0.90% in March 2024. As inflation moderated, the Central Bank of Sri Lanka (CBSL) adopted an easing monetary policy stance; the reduction in the policy rates resulted in the Standing Deposit Facility rate and Standing Lending Facility rate decreasing to 9% and 10% respectively. Monetary easing together with better clarity on domestic debt restructuring resulted in market interest rates trending downwards; accordingly, the Average Weighted Prime Lending Rate decreasing to 10.69% from 21.40% a year ago.

While the stabilisation of the country's macro-economic fundamentals were largely conducive to business growth, as an export-oriented business the Group was adversely impacted by the appreciation of the Sri Lankan Rupee during the year as most input costs settled around LKR350-360 per USD. That said, Hayleys continued to leverage its diversity to mitigate external impacts to a large degree, as adverse effects on a particular sector are typically countered by opposing impacts on a different sector.

### PERFORMANCE OVERVIEW

Strategic interventions in recent years to build resilience through rationalising

and optimising its businesses enabled the Group to navigate the challenges of the year with agility. Key areas of strategic focus during the year included diversification the Group's geographical footprints and customer segments while relentlessly pursuing customer-centric innovation and service excellence. Following its acquisition by the Group in March 2023, Horana Plantations PLC has been included in the consolidated financial statements of the period under review.

Despite volatile exchange rate dynamics, the Group contained the y-o-y decline in top line to 10% delivering a Consolidated Revenue of Rs.436.83 bn during the year. The Transportation and Logistics Sector maintained its position as the largest contributor to Group Revenue with a share of 21%, followed by Consumer & Retail which accounted for 19%. The Group's key export-oriented sectors recorded Revenue declines amidst unfavourable exchange rate, while Projects & Engineering, Leisure, Consumer & Retail, Plantations, Industry Inputs, Power & Energy and Agriculture recorded Revenue growth.

Group Earnings Before Interest and Tax (EBIT) decreased by 30% to Rs.42.72 bn during the year reflecting cost escalations, appreciation of the Sri Lankan Rupee and subdued demand across key verticals. That said, the Projects & Engineering (Hayleys Fentons) Sector delivered an EBIT growth of 90% while the Textiles Sector also demonstrated strong resilience to achieve an EBIT growth of 37%. Net Finance Cost declined by 8% to Rs.17.24 bn reflecting the downward trajectory of interest rates during the year.

The Group demonstrated resilience in a challenging year to deliver Profit Before Tax of Rs.25.34 bn, with the Purification, Projects & Engineering and Hand Protection Sectors emerging as key contributors to profitability. It is noteworthy that the Projects & Engineering Sector achieved a near

tripling of Profits during the year led by the strong growth in solar energy, which saw the Sector moving up to the rank of 2nd highest profit contributor to the Group.

### STRENGTH AND STABILITY

The Group's Total Assets increased by 8% to Rs.446.34 bn during the year, with Non-Current and Current Assets expanding by 5% and 11% respectively. The expansion in Property, Plant and Equipment represents upgrades to research and manufacturing capabilities in the Hand Protection and Purification Sectors, establishment of a pipe manufacturing facility by the Agriculture Sector and geographical expansion of the Tea Exports Sector. The Group has sought to increasingly diversify its geographical presence, through pursuing investments in new geographical locations, thereby further widening its footprint, strengthening foreign exchange generation capabilities and enhancing the resilience of its operating model.

Total equity as at 31 March 2024 increased by 2% to Rs.125.53 bn, supported by profit generation and retention during the year. Total borrowings increased by 8% to Rs.171.88 bn, translating to a Debt-to-Equity ratio of 1.37 compared to 1.30 the previous year. Despite this increase, the Group's financial profile remains solid reflecting a prudent approach to debt-funded acquisitions in recent years, strong cash flow generation capabilities stemming from the Group's large and diversified businesses and relatively good debt coverage levels.

### LOCAL ROOTS, GLOBAL MINDSET

With nearly 54% of the Group's Revenue generated through exports during the year, Hayleys continues to masterfully harness local capabilities, products, technology and talent to compete effectively in the global arena, offering the best of Sri Lanka to the world. For instance, the Purification Sector leverages the unparalleled capabilities of its local scientists and its prowess in R&D to develop world-

class supercapacitor products and hard carbons. The Hand Protection Sector introduced a range of advanced sports gloves, scientifically designed to suit the specific requirements of a range of sports activities including mountain biking, golf, winter sports and functional fitness among others. Meanwhile, tea produced in our estates are globally renowned for their quality and sustainability, consistently commanding premium pricing at the Colombo Tea Auction. Our value-added tea exports are skillfully curated by our local artisans to suit the taste palettes of our diverse, global customer base. Through this strategic blend of local authenticity and universal thinking, Hayleys has uniquely positioned itself as a global player in key verticals, supplying to the world's leading brands.

#### REDEFINING THE FUTURE

Accelerating customer-centric innovation is key to our strategic agenda as we seek to sharpen our competitive edge through focus on value-added solutions. In recent years, sustainability has assumed a greater relevance in our innovation drive and we have sought to adapt product capabilities and processes to shape futures that address key sustainability issues. During the year, we invested over Rs.500 mn across sectors in strengthening product development and innovation capabilities. Key success stories for the year include new product development in the Hand Protection Sector which includes high chemical resistance gloves and specialised sports gloves. In the Textiles Sector, the Group launched innovative fabrics featuring recyclable properties. In Construction Materials, Alumex PLC launched a range of aluminium balconies, decking and artificial walls catering to the export market. These innovations are discussed in further detail on page 275 of this Report.

The surge in generative artificial intelligence (AI) has ushered in a

new era of technological innovation, with rapid advances in machine learning algorithms enabling AI systems to generate content across various domains. While potential job displacement, privacy issues and ethical concerns have prompted many people and organisations to view GenAI through a lens of doubt and uncertainty, at Hayleys we see it as a catalyst for efficiencies, richer data insights and new business opportunities. The Group's digital transformation roadmap which will be rolled out shortly seeks to proactively embed AI and data capabilities across our operations to support value creation through enhanced decision-making.

#### OUR PEOPLE: OUR POWERHOUSE

Today, for the Hayleys Group, nothing is more important than our people, from our team, and customers to value chain partners and communities across the localities in which we operate. It is these partnerships that drive everything of value, including profits, agility, sustainability, innovation and efficiency. The Hayleys Group's resilience and prosperity is driven by our remarkable team of over 36,000 employees who have the integrity, high standards of professional excellence and capabilities to ensure the Group's ongoing success and value creation. The world of work continues to evolve and during the year, the Group's people strategy centered on creating long-term value through equipping them with stronger skills enabling greater employability, nurturing talent pipelines to enable improved succession planning and increasing diversity around decision-making. During the year, we also introduced several initiatives aimed at creating a family-friendly work environment which included paternity leave, childcare support and access to counselling services, which is anticipated to support employees in effectively balancing their professional and personal responsibilities.

#### RESPONSIBLE AND RESPONSIVE GOVERNANCE

The Group's demonstrated ability to repeatedly rebound from disruption is anchored by its fit-for-purpose governance frameworks which have supported the creation of an organisational mindset centering on agility and adaptable leadership. Governance structures facilitate strong alignment and engagement between the Board and the GMC; the latter convenes weekly facilitating ongoing collaboration and collective decision-making. During the year, the Board heightened focus on navigating the volatile external environment, strengthening risk management and strategic integration of ESG. Board capabilities and composition were strengthened during the year with the appointment of Mr. Timothy Speldewinde and Mr. Yohan Perera as Independent Non-Executive Directors and I am certain that the knowledge, skills and experience they bring will further enhance the depth and effectiveness of Board deliberations.

The Securities and Exchange Commission announced revisions to the Corporate Governance Rules applicable to entities listed on the Colombo Stock Exchange, issuing Listing Rule No.9 on Corporate Governance. The Rules came into effect from 1st October 2023 with a phased timeline for compliance extending till 1st January 2025 and the Group is fully compliant with the provisions required by 1st April 2024. Changes effected included the implementation of a Bribery and Anti-Corruption Policy (which mandates a zero-tolerance approach) and Shareholder and Investor Communications Policy, formulation of a Nominations and Governance Committee, actioning meetings between the Senior Independent Director (SID) and the Non-Executive Directors and improved disclosures in the Annual Report.

## REFLECTIONS FROM THE CHAIRMAN & CHIEF EXECUTIVE

The Code of Best Practice on Corporate Governance (2023) by the Institute of Chartered Accountants of Sri Lanka was also revised during the year; key changes from the new Code include strengthening the assessment and management of ESG risks and opportunities, for which mechanisms are already in place within the Group.

### ESG INTEGRATION: THE WORLD AS IT 'SHOULD' BE

The record-high temperatures and erratic weather we have experienced this year is a humbling reminder that the earth is a complex and fragile system and that nature is more powerful than all of us. As we look to the future, I believe we have a unique opportunity to define a new era for sustainable business leadership by making sustainability progress integral to business strategy and accelerating our interventions for greater impact.

The Group remains committed to achieving its target of driving a 30% reduction in Scope 1 & 2 GHG emissions by 2030, a target we are pursuing aggressively through transitioning to renewable energy sources, reducing reliance on fossil fuels and other decarbonisation activities. To date the Group has invested close to Rs. 5.00 bn in solar power generation across the Group, with a total generation capacity of nearly 28MW. Furthermore, as the market leader in solar power installation in Sri Lanka, Hayleys Fentons is driving the country's transition towards clean energy with total installations of solar power crossing 200 MW during the year.

Strategic efforts were made to strengthen the Group's ESG framework with the formation of Sector-level ESG Committees. Formed with Board representation, these committees are tasked with identifying, managing and mitigating Sector-specific ESG risks while driving the ESG roadmaps of the Sector aligned to the aspirations of the Hayleys Lifecode. Hayleys PLC along with 9 other companies within

the Group have committed to the 10 principles of the United Nations Global Compact. Hayleys has also been an endorser of the CEO Water Mandate since 2008. The progress made against the Group's other environmental, social and governance targets are given on page 100 of this Report.

### STAYING THE COURSE: REVIEW OF BUSINESS VERTICALS

The Group's Revenue composition tilted towards the domestic market during the year, reflecting growth in the Consumer & Retail and Projects & Engineering segments as well as moderation in the export-oriented sectors due to the appreciation of the Sri Lankan Rupee. Resultantly, Revenue contribution from inland business increased to 46%, compared to 38% the previous year. Despite these short-term dynamics, the Group continued to pursue growth opportunities outside the country as it seeks to increase contributions from foreign exchange and drive geographical diversification.

The following sections provide a high-level overview of the performance of the Group's business sectors. Please refer to pages 114 to 245 for detailed Portfolio Reviews.

#### Purification

The Purification Sector delivered a commendable performance in a challenging year, sustaining customer relationships, widening its portfolio of value-added products and driving strategic interventions to improve the security and resilience of its supply chain. The appreciation of the Sri Lankan Rupee and a reduction in prices offered to customers resulted in the Sector's Revenue declining by 29% to Rs.42.74 Bn while Profit Before Tax declined by 26% to Rs 6.11 bn.

Key strategic priorities for the year included pursuing deeper penetration in key markets and ongoing emphasis on developing high-value energy storage carbon including hard carbon for sodium ion batteries. The Sector also strengthened its manufacturing

#### ECO SOLUTIONS

and R&D capabilities and engaged in proactive negotiations with raw material suppliers to optimise costs. In diversifying its raw material sources, the Sector's 7th manufacturing facility will be commissioned in the Philippines. During the year, the Sector also strengthened its commitment to embedding ESG through the launch of 'Activate' - a holistic ESG roadmap aligned to the Hayleys Lifecode. The outlook for the Sector remains positive, reflecting the global transition to a low-carbon economy which is driving demand for energy storage solutions as well as increasingly stringent water and pollution control regulations.

### Projects & Engineering

The Sector, represented by Hayleys Fentons delivered an impressive performance during the year, with Profit Before Tax more than tripling to Rs. 4.33 bn and emerging as the 2nd largest contributor to the Group. The Sector's performance was driven largely by significant growth in the renewable energy cluster; strategic foresight in entering the residential solar segment and pursuing aggressive penetration through the deployment of a stronger sales force augured well for the Company, as it reaffirmed its position as the market leader in the rooftop solar PV segment. Profitability margins also improved during the year reflecting scale efficiencies in line with volume growth.

The acquisition of Fentons, a family-owned company with an operating history of over 100 years in 2016, marked the beginning of a remarkable transformation. The Group revitalised Fentons through a strategic overhaul which included new leadership capabilities, nurturing a performance-driven organisational culture and a growth mindset. These interventions have enabled the Sector to record a dramatic turnaround in performance while emerging as a vibrant entity with significant growth potential. Reflecting Hayleys Fentons' growing significance to the Group's profitability, it has been classified as a separate

Sector in this Report. We believe there is tremendous potential for renewable energy in the mid-to-long term given the government's aspirations to shift to a low-carbon economy and reach net by 2030.

### Hand Protection

The performance of the Hand Protection Sector reflected the prevalent external pressures, with Revenue declining by 16% in view of the appreciation of the Sri Lankan Rupee and a marginal decline in volumes as global demand eased. Profitability margins were pressured by the increase in raw material and other cost escalations, resulting in the Sector's Profit Before Tax declining by 24% to Rs.4.01 bn during the year. The performance of the Sector's European operations were below expectations, reflecting subdued demand conditions from the region.

The Sector pursued penetration in to niche markets such as Middle East and Africa while India is also earmarked as a key market for growth. Innovation remains a strategic imperative and during the year, the Sector launched several exciting product propositions including a range of specialised sports gloves catering to leading international sports good retailers. With the launch of the Sector's ESG Roadmap, DPL Pulse, the Sector also intends to leverage ESG as a competitive edge to access new markets and customer segments. The medium to long-term outlook remains favourable given recovering demand conditions in key markets and the Sector's strategic interventions in strengthening product capabilities, particularly in specialised gloves.

### Textiles

The strength of its relationships with Tier 1 brands together with strategic foresight in building agility, enabled the Textiles Sector to deliver impressive growth in a challenging year. While Revenue declined by 18% in view of the increased volatility in key markets and the resultant deferment of orders

## CONSTRUCTION MATERIALS

## REFLECTIONS FROM THE CHAIRMAN & CHIEF EXECUTIVE

as well as increasing price pressure, the Sector's relentless pursuit of leaner and agile ways of working enabled it to considerably reduce lead time to customers, thereby sustaining customer relationships and maintaining orders. Meanwhile, ongoing and proactive negotiations with yarn suppliers and cost optimisations derived through a focus on sustainability enabled the Sector to widen its profit margins, resulting in the Sector's Profit Before Tax increasing by 23% to Rs.3.72 bn during the year.

With innovation-led growth remaining a key strategic pillar, the Sector has sought to pivot from basic, conventional cotton-based fabrics to premium, value-added products in both natural and synthetic fibres. The Sector's competitive edge is sharpened by its positioning as a pioneer and leader in sustainability in the industry, having gained international recognition for its sustainable product and process innovations. In a key achievement in its sustainability journey, the Company obtained verification of its emission targets under the Science Based Targets Initiative, one of the first Sri Lankan organisations to do so. As the industry landscape evolves rapidly, manufacturers will be required to build agile operating models which can swiftly adapt to changing market dynamics. The Sector's key priorities in the short-to-medium term include retention of Tier 1 customers, strengthening market share in synthetic fibre and increasing contributions from its portfolio of sustainable products.

### Plantations

The Sector demonstrated resilience to numerous adversities including persistent labour shortages and intensifying implications of climate change to record volume growth during the year. Revenue increased by 13% to Rs. 18.13 bn reflecting the consolidation of Horana Plantations PLC to the Sector. Profitability, was however affected by the normalisation

of tea prices from the previous year's record highs, with prices falling by a near 18% (in Rupee terms) during the year. This coupled with escalating costs resulted in the Sector's Profit Before Tax declining by 34% to Rs. 3.53 bn.

During the year, the Sector's strategy was directed towards driving transformation in plantation management by creating social business enterprises through more equitable remuneration models and regenerative agriculture practices. As an industry leader in environmental sustainability, the Sector has in recent years sought to embrace regenerative agriculture practices aimed at revitalising ecosystems, soil conditions and crops. The short-to-medium term outlook of the country's tea industry remains somewhat uncertain reflecting labour challenges, declining yields and escalating cost of production. Against this backdrop, ongoing efforts to modernise and transform our estate operations, drive increased labour productivity and sustainable agriculture practices will position the Sector in good stead, enabling all three RPCs to maintain their position as the most profitable, sustainable and high-quality producers of tea in Sri Lanka.

### Agriculture

The Agriculture Sector leveraged the diversity of its businesses and strength of its brands and relationships to remain resilient against external headwinds. Sector Revenue increased by 6% to Rs.34.88 bn during the year driven by the strong performance of the Crop Protection cluster and Overseas Operations. Profitability, however normalised from the record highs of last year, with the Sector's Profit Before Tax declining by 40% to Rs.3.02 bn during the year.

In Crop Protection, the Sector strengthened its product offering which swiftly gained traction to achieve market leadership status. Meanwhile, Overseas Operations (represented by Haychem Bangladesh)

### INDUSTRY INPUTS, POWER & ENERGY

#### Strategic focus

Overseas expansion  
Sustainable innovation  
Strengthening digital capabilities

Economic Value (Rs. mn)	4,631
PBT (Rs. mn)	1,339

Quality focus

Economic Value (Rs. mn)	1,480
PBT (Rs. mn)	824
No. of employees	312
Carbon footprint (tCO <sub>2</sub> e)	384

### OTHERS

Economic Value (Rs. mn)	12,023
PBT (Rs. mn)	2,380
No. of employees	387
Carbon footprint (tCO <sub>2</sub> e)	592

was a key contributor to earnings, as it increased its market share and widened its product offering in new segments. During the year, the Sector entered a new market segment, through establishing a polyethylene pipe manufacturing facility thereby offering advanced irrigation solutions to Sri Lanka's Agriculture industry. Investments were also made in upgrading and revamping the coconut milk facility which was acquired in the previous year and commercial production commenced during the year. The outlook for Sri Lanka's Agriculture Sector is promising given its critical role in ensuring food security and supporting livelihoods. Consistent, conducive and evidence-based policy remains a key prerequisite in ensuring the sustainability of the industry and the livelihoods that depend on it. As a leading player in the industry, we will continue to support its long-term survival through propagating modern and sustainable agriculture practices across our ecosystem of farmers.

### Transportation & Logistics

The Sector's performance reflects the multitude of challenges that prevailed during the year, including a decline in freight rates, appreciation of the Sri Lankan Rupee as well as volatile trade activity amidst escalating geopolitical tensions. Accordingly, Revenue declined by 32% to Rs.91.35 bn while Profit Before Tax also declined to Rs.3.67 bn from the record highs of Rs. 15.00 bn the previous year. Against this backdrop, the Sector's strategy reflected its efforts to consolidate operations while focusing on retaining relationships and building capabilities to drive future growth.

During the year, the Sector further refined its international expansion strategy, identifying the four markets of Bangladesh, India, Indonesia and Thailand as presenting the most significant opportunities for growth. The Sector intends to leverage its established relationships and market presence in these regions to offer a wider portfolio of services and

drive deeper penetration. In a key achievement during the year, the Sector (through the Travel & Aviation cluster) won a competitive bid for the General Sales Agency to represent Air India, the flag carrier airline of India.

The short-term outlook for the Sector is clouded by a degree of uncertainty given recent escalation in geopolitical tensions and regional conflicts. That said, Sri Lanka's port activity is poised for strong long-term growth, supported by the gradual recovery of the economy and policy thrust towards exports. The Sector's regional strategy, strong brand name and extensive customer and principal relationships has positioned Hayleys Advantis to effectively leverage upside potential, retaining its position as Sri Lanka's undisputed leader in transportation and logistics.

### Industry Inputs, Power & Energy

The Sector delivered a Revenue growth of 12% to Rs.9.73 bn, led by the Industrial Inputs cluster which saw good growth in regional markets for industrial raw materials. However, demand for domestic and export-oriented industries remained subdued given the decline in consumer spending, particularly during the first half of the year. Overall the Sector's Profit Before Tax declined by 10% to Rs.1.34 bn during the year.

In Industrial Raw Materials, the Sector continued to widen its sustainability-linked product portfolio, given the increasing consciousness of environmental factors in industries. It also widened its portfolio of global principals, successfully obtaining the Agency for Avery Weigh-Tronix (UK). The performance of Lifesciences improved during the year, while the performance of Engineering Solutions was dampened by weak demand, reflecting liquidity constraints across the construction value chains.

Meanwhile, the Power & Energy cluster saw Revenue declining marginally, although Profit Before Tax increased

by 2% supported by favourable weather supporting power generation.

### Tea exports

A new reporting segment that was constituted during the year, Tea Exports is represented by Mabroc Teas (Pvt) Ltd a leading value-added and bulk tea exporter and Martin Bauer Hayleys (Pvt) Ltd, an innovative manufacturer and exporter of Ceylon tea extract powders and tea aroma. The Sector demonstrated strong operational performance in a challenging year, with both Mabroc and Martin Bauer delivering volume growth through new customer acquisitions. Revenue, however, was impacted by the appreciation of the Sri Lankan Rupee which resulted in a 3% decline to Rs.12.20 bn. Sector profitability was further impacted by the relatively high cost of tea, amidst the low production volumes and escalating cost of production, which resulted in Sector Profit Before Tax declining by 41% to Rs.823.65 mn.

Mabroc maintained its position as the largest exporter of Sri Lankan tea to China, a market which is showing significant upside potential. The Company also pursued market expansion through an investment in a leading FMCG distributor in Poland while also establishing a fully-fledged tea export company in Mombasa-Kenya, thereby diversifying its supply chain. Meanwhile Martin Bauer strengthened its product capabilities to widen its portfolio of aroma and concentrations while leveraging the brand and market reach of the Martin Bauer Group to access new customers. The global demand dynamics for value-added tea and extracts remains favourable, although the short-to-medium term may be adversely impacted by complexities in the country's plantation sector. In navigating these challenges, the Sector will continue to focus on innovation and value-added offerings to sharpen its competitive edge while accessing new markets and diversifying its supply chains.

## REFLECTIONS FROM THE CHAIRMAN & CHIEF EXECUTIVE

### Construction Materials

Strategic foresight in pursuing growth in export markets augured well for the Sector during the year, enabling it to counter the subdued local demand. Export volumes increased by 21% during the year, which contributed towards an overall volume growth of 17% during the year. Revenue declined by 2% to Rs.9.94 bn as the Sector passed on the benefit of cost reductions to customers in order to ensure customer retention; overall profitability was however upheld by a significant reduction in finance costs and tax expenses resulting in the Company's Profit Before Tax increasing 51% to Rs.231.72 mn.

Growing exports was a strategic imperative during the year and the Sector pursued new customer acquisition in key markets in the USA and Europe. The Sector also broadened its product range with the addition of several value-added products catering to the export market as well as enhancing the do-it-yourself range and industrial solutions segment. The outlook for Alumex remains promising given the gradual recovery of Sri Lanka's construction sector and the anticipated revival of industrial and residential development projects. The Sector's priorities over the short-to-medium term include strengthening value-added product offerings and driving deeper penetration in key export markets, while maintaining its market leadership position in the domestic market.

### Consumer & Retail

The Sector is dominated by Singer (Sri Lanka) PLC which experienced two distinctly different halves of the financial year; the first half characterised by import restrictions and weak purchasing power of customers, while the second half benefitted from the relaxation of import controls, the appreciation of the Sri Lankan Rupee and the gradual recovery of economic conditions. Improving market conditions towards the latter part of the year, together

with proactive efforts to clear high-cost inventory enabled the Sector to generate a Revenue growth of 28% to Rs.81.60 bn. However, narrower profit margins together with a higher tax expense resulted in the Sector's Profit Before Tax falling by 12% to Rs.611.29 mn.

Singer continued to evolve its product and brand offerings to cater to emerging customer needs. The Company also launched the 'Singer Premium Furniture' brand, the initial response for which has been very encouraging. Meanwhile, Singer was once again recognised as the People's Brand of the Year at the SLIM-KANTAR People's Awards 2024, attesting to its status as a household brand in the country. During the year, Singer (Sri Lanka) PLC also sought to amalgamate its subsidiaries other than Singer Finance, into one legal entity with the aim of streamlining processes and generating efficiencies. Accordingly listed entities of Regnis (Lanka) PLC, Singer Industries were delisted and amalgamated with the parent company, along with 3 other unlisted subsidiaries.

Singer Finance (Lanka) PLC continued to perform relatively well amidst challenging industry conditions. During the year, 2 branches were added bringing the total network to 52. The Company also maintained healthy portfolio quality, liquidity and capitalisation levels in comparison to industry peers. The Company emerged as a key contributor to Sector profitability generating a Profit Before Tax of Rs.652.40 mn during the year.

As market conditions gradually improve, we believe the outlook for the Sector is promising; Singer will place strategic emphasis on embedding customer centricity and delivering manufacturing and supply chain excellence through digitalisation with the aspirations of being a world-class brand. The rapid growth of the grey market for consumer electronics remains a key challenge in the short-

to-medium term; the increase in the VAT rate has provided further impetus for the grey market, as the increasing price disparity between legal and illicit products serve as an incentive for consumers to shift towards the grey market.

### Eco Solutions

The Sector's performance weakened during the year, reflecting adverse macro-economic and market conditions. Despite a 28% growth in volumes the Sector's Revenue declined by 9% to Rs.13.85 bn due to unfavourable exchange rate dynamics. Meanwhile operating cost escalations amidst intense price competition eroded the Sector's profit margins, resulting in Profit Before Tax declining by 97% to Rs. 68 mn during the year.

In addressing these challenges, the Sector placed relentless focus on management and process efficiencies. The Sector also made considerable progress in its innovation drive with the launch of several new offerings in the growing media and value-added fibre products segment which present significant upside potential. Measures were taken to diversify raw material sources to build a more resilient supply chain, given the country's declining coconut production.

Long-term demand dynamics for the sector remain favourable particularly in categories such as growing media, erosion control and horticulture. The Sector will seek to aggressively pursue growth in new product applications and market segments while enhancing its value-added portfolio through innovation and product development.

### Leisure

The Sector's performance strengthened in line with the recovery of the country's tourism sector with Revenue increasing by 35% to Rs.9.02 bn reflecting an overall improvement in average occupancy levels. Improvements in the core performance of The Kingsbury and the Sri Lankan Amaya properties resulted

in the reduction of losses at operating level; however, overall profitability continued to be hampered by the weak performance of Amaya Kuda Rah which was partially closed for repairs during the year.

The Sector's strategy in recent years has centered on sharpening its competitive advantage through mastering product delivery, which has allowed the properties to consistently record high customer ratings. The Kingsbury reaffirmed its position as the preferred venue for restaurants in the city, as evidenced by increased restaurant footfall. Sri Lanka's tourism sector is positioned for a surge in arrivals in 2024 and our properties are aptly positioned to capture the opportunities emerging from this revival. Key areas of focus include enhancing the corporate proposition at The Kingsbury, strengthening the service culture and enhancing the employee value proposition in order to drive increased retention.

#### Others

The Others Sector comprising Hayleys' Business International Solutions and Group Services of Hayleys PLC recorded a decline in Revenue to Rs.1.44 bn during the year. This, together with a 49% increase in tax expense resulted in the Sector's Profit Before Tax declining by 16% to Rs.2.38 bn during the year.

HBSI remained resilient during the year delivering a top line growth of 13%, supported by strong growth in the BPO operations, which benefited from increased penetration to Australia and a wider portfolio of services. The appreciation of the Sri Lankan Rupee, however, had an adverse impact on profitability which saw the cluster's Profit After Tax declining to Rs. 272.31 mn from 301.88 mn.

#### SHAREHOLDER VALUE

Despite a decline in the Earnings per Share to Rs.9.19 (From Rs.21.80 the previous year) the Group continued to deliver on its shareholder commitments, declaring an interim

dividend of Rs.5.35 in March 2024. The Hayleys share price increased from Rs.72.50 in April 2023 to close the year at Rs.82.10, an increase of 13% during the period.

#### EXPECTATIONS AND AMBITIONS

The short-to-medium term is likely to be shaped by a large number of simultaneous and converging challenges and while this drives uncertainty in the short-term, it also allows room for hope. The reality is businesses such as Hayleys operate in dynamic, rapidly evolving, global markets in which conditions are rarely stagnant for long and in parallel to global risks and generational challenges lie unique opportunities to strengthen the resilience of our institutions.

The International Monetary Fund estimates global growth to continue at the same pace with GDP expanding by 3.2% in 2024. Despite the multitude of challenges and monetary and fiscal tightening by many economies, global economic activity has been surprisingly resilient. While downside risks include implications of geopolitical tensions and sticky inflation, the global economy is expected to approach a soft landing over the medium-term. On the domestic front, we are optimistic that the Sri Lankan economy will continue to stabilise in 2024, supported by the revival in the tourism industry, stronger remittance flows and improvements in fiscal and external balances. Notwithstanding the outcome of the upcoming national elections, continued implementation of a strong and credible structural reform program is vital for ensuring long-term economic resilience and stability. We firmly believe this is essential to encourage private sector investment which is a vital prerequisite for growth. Furthermore, a stable exchange rate and conducive tax policies are critical in fuelling the growth of export-oriented businesses and encourage reinvestments. We further reiterate the critical importance of establishing a conducive operating landscape for exporters through establishing

tax policies that enable exporters to compete effectively with neighbouring counterparts, thereby generating much-needed foreign exchange to the country.

While we are likely to be faced with critical choices and opportunities which require our attention, the consequences of inaction are more serious than ever. The complexity of the challenges does not mean that they are insurmountable and as always, I reiterate my belief that optimism is critical for resilient and adaptable leadership and better outcomes, particularly in times of rapid change. We will continue to leverage the Group's unmatched human capital, product capabilities, brands and relationships to drive deeper penetration in selected markets. Strategically embedding ESG to derive a competitive advantage, access new markets and optimise resources while effectively addressing critical social and environmental issues we face as a society will also be a crucial priority in the next financial year.

#### APPRECIATION

As I reflect on the past year, I am inspired by the significant strides we have made together as a team and the exciting future we are building together. On behalf of the Board, I extend my heartfelt appreciation to each and every member of the Hayleys family, for their spirit, passion and resilience. I thank my colleagues on the Board and members of the Group Management Committee for their authentic leadership in navigating the Group through a challenging landscape. I also appreciate the confidence and trust of our shareholders, customers, suppliers and business partners who have partnered us in this journey.

# CORPORATE GOVERNANCE

## BOARD COMPOSITION

- Appointment of two new Independent Non-Executive Directors, significantly strengthening the Board’s skill profile

### Skills added to the Board:

Corporate leadership, Finance and audit

## ETHICAL LEADERSHIP

- Board approval of new Bribery and Anti-Corruption policy

## RISK MANAGEMENT

- Introduction of Sector-level ESG risk assessments to identify and manage sustainability-related-risks and opportunities
- Strengthened IT and cyber security management framework

## STAKEHOLDER ENGAGEMENT

- Board approval of new Shareholders and Investor Communication Policy
- Year-round engagement calendar with diverse stakeholders

## STRUCTURES AND DELEGATION

- Widened the scope of the Audit Committee to expand risk-management related responsibilities
- Revised the Terms of Reference for Nominations and Governance Committee
- Formulation of Sector-level ESG Committees
- SID meetings with Independent/Non-Executive Directors

## APPROACH TO CORPORATE GOVERNANCE

The Group’s Board of Directors have long since embraced governance principles designed to ensure the longevity and continued excellence of the organisation to drive multi-stakeholder value creation. This approach has enabled the Group to move beyond incremental growth and advance transformational change-leveraging the power of an enterprise-wide approach to corporate governance to deliver on our purpose.

### Governance practices which support ethical and effective leadership

COMPOSITION	EFFECTIVE DELEGATION	BOARD ENGAGEMENT	POLICIES	RISK MANAGEMENT
All Non-Executive Directors are Independent  50% of all Directors are Non-Executive Directors	Clear lines of delegation to Committees, supported by Charters	Active engagement with business through Executive Director insights, common directors in subsidiaries, frequent meetings and ongoing knowledge sharing sessions	Comprehensive and robust policy framework approved by the Board of Directors	Enterprise risk management framework  Combined assurance model Embedding identification of Sustainability-Risks and Opportunities to existing risk management processes

## GOVERNANCE FRAMEWORK

Hayleys subscribes to a Group-wide governance framework which reflects our commitment to comply with relevant legislations and regulations as well as voluntary frameworks and standards as set out below. During the year, the framework was strengthened to align with key changes in the governance landscape as set out alongside.

### Developments in the governance landscape

- Enhanced corporate governance rules applicable to listed entities (Section 9)
- Issue of new Code of Best Practice on Corporate Governance by CA Sri Lanka (2023)
- Implementation of new Anti-Corruption Act No. 9 of 2023
- Issue of IFRS S1 and S2 sustainability reporting standards

 Regulatory frameworks	 Voluntary standards, codes and frameworks	 Internal mechanisms

## THE HAYLEYS WAY: ETHICAL ROADMAP FOR ALL EMPLOYEES

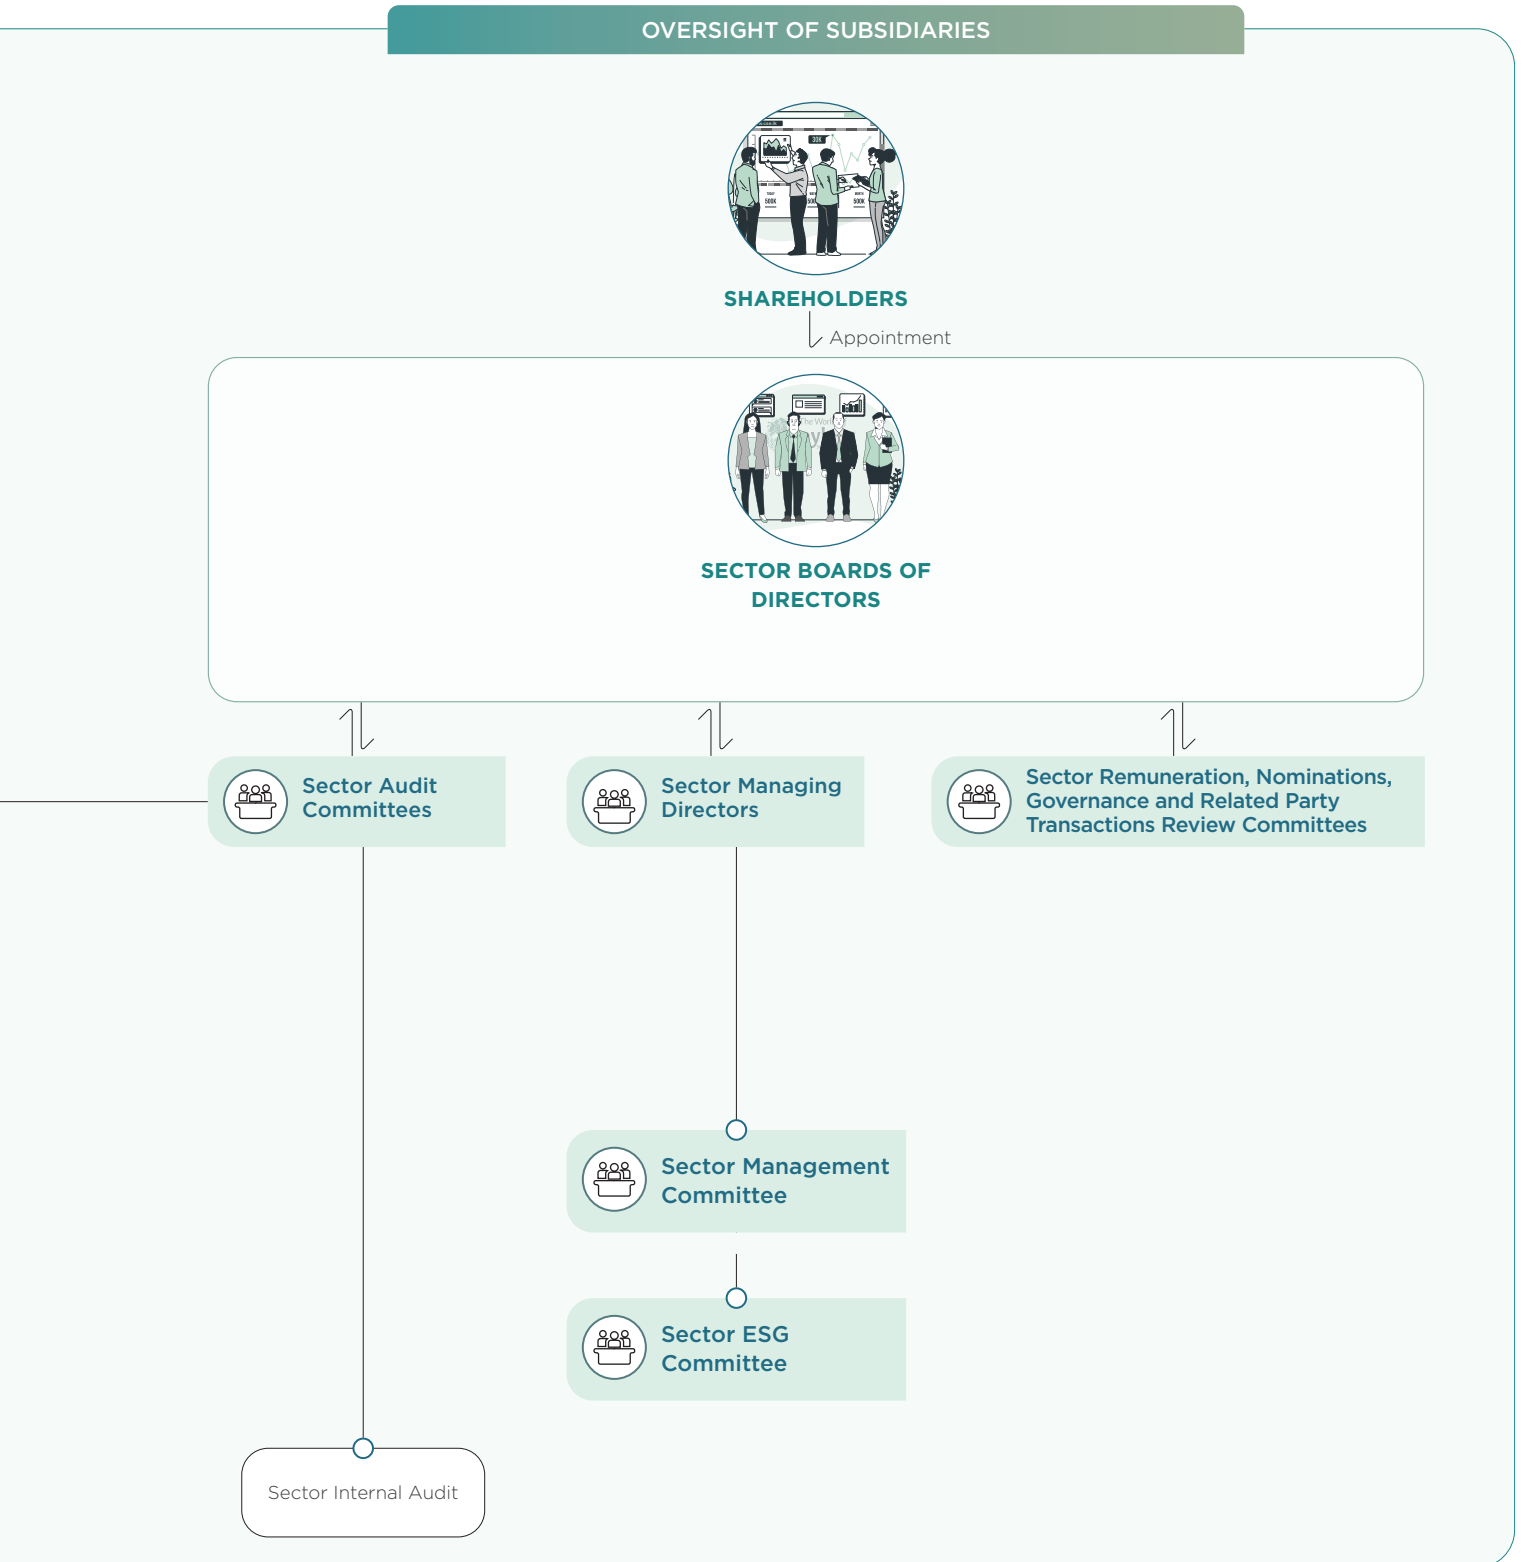

# CORPORATE GOVERNANCE

## STRUCTURES AND DELEGATION

The Group's governance structure has evolved over time to reflect the increasing diversity and depth of the Group's operations. As set out below, the Board of Hayleys PLC has line of sight to the Group's industrially and geographically diverse businesses. Arrangements

for delegation within the Board's structure assists in the effective discharge of duties while enabling balance of power and promoting independent judgement.

# CORPORATE GOVERNANCE

## BOARD SUB-COMMITTEES

The Group's governance structure and provisions for responsibility assignment strengthen independent judgement while providing opportunities to leverage director's expertise in specialised areas such as risk management, audit and sustainability. When determining committee composition, the Board considers relevant regulations, the skills and experience of its members and responsibilities of the Committee.

### ESG Steering Committee

- Oversight and monitor the execution of the Hayleys Lifecode
- Review and provide guidance on ESG related policies and programmes
- Review emerging trends and issues in the ESG areas

Composition  
3 Executive Directors  
3 GMC Members

#### Skill mix

- Corporate leadership
- Business sustainability
- Human resource management
- Finance

#### Relevance to value

#### Focus on strategic priorities

ESG integration/Inclusive business models

Setting strategic direction

Ensuring integrity of financial controls

Shaping organisational culture

Identification and management of risks and opportunities

Stakeholder management and reporting

lawyer with an illustrious practice of over 37 years in the Commercial High Courts and the Supreme Courts of Sri Lanka. Key responsibilities of the SID are listed below and further details are available on the SID report on page 316 of this Annual Report.

- Set corporate values facilitating an equitable balance between key stakeholder interests
- Uphold high standards of ethics, integrity and probity
- Support executive leadership whilst monitoring their conduct
- Meet with NEDs at least twice a year and Independent Directors at least once a year to facilitate discussion and communication of governance matters and communicate same to Chairman
- Be available to shareholders in case they have concerns which cannot, or should not, be addressed by the Chairman or Executive Directors
- Act on the results of any performance evaluation of the Chairman
- Maintain sufficient contact with major, significant and minority shareholders, assisting the Board to develop a balanced understanding of their issues

### BALANCE OF POWER

The Board ensures that delegation within its structures and mandates ensuring that balance of power is maintained while promoting independent judgement. The roles and responsibilities of the Board of Directors are clearly set out in the Board Charter and summarised below:

- Ensure formulation and implementation of business strategy
- Appointment of Chairman, Co-Chairman and Senior Independent Director
- Ensuring that Key Management Personnel have the required skills, experience and knowledge to implement strategy
- Succession planning
- Approval of budgets and major capital expenditure
- Ensuring effective systems to secure integrity of information, internal controls, business continuity and risk management
- Ensuring compliance with all laws, regulations and ethical requirements

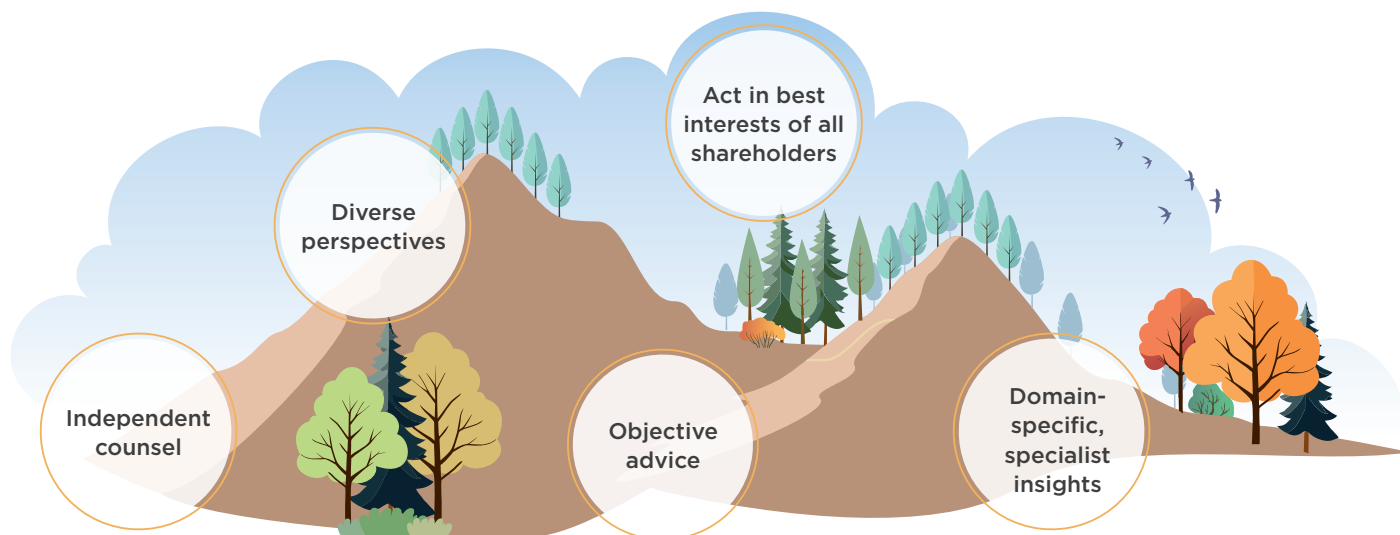

- Ensuring that key stakeholder interests are considered in corporate decisions
- Ensuring that businesses are developed in a sustainable manner and adoption of integrated reporting framework
- Ensuring adoption of appropriate accounting policies and fostering compliance with financial regulations
- Establishing a process for monitoring and evaluation of progress on implementation of strategy, budgets, plans and risks

The functions of Chairman and Chief Executive are vested in one person due to the diversity and scale of operations of the Group and the Board is of the view that this is the most appropriate arrangement for Hayleys PLC.

#### Senior Independent Director (SID)

The Board has also appointed Dr H Cabral, PC Non- Executive Director as Senior Independent Director to facilitate board balance and ensure effective engagement with Non-Executive Directors. The appointed SID is a President's Counsel and renowned

## CORPORATE GOVERNANCE

### THE GROUP MANAGEMENT COMMITTEE (GMC)

The Hayleys Group Management Committee is the apex management committee of the Group. It is chaired by the Chairman & Chief Executive and includes the Group's Executive Directors, Sector Heads, Group Chief Financial Officer and Head of Group Human Resources. The GMC contributes towards effective governance through weekly meetings deliberating on,

- Sector-level developments including trends in the operating environment, monthly performance updates and other matters
- Updates from Hayleys PLC center functions including HR, Treasury, Corporate Communications, Group Tax, Strategic Business Development, IT, Freight management, procurement, Group finance and Group ESG
- Any emerging developments which are pertinent to the Group's performance

### THE COMPANY SECRETARY

Company secretarial services are provided by Hayleys Group Services (Pvt) Ltd., who are competent

secretarial professionals registered as company secretaries with the Registrar of Companies. The role of the Company Secretary has been defined in line with the provisions set out in the Code and include the following:

- Facilitating the efficient conduct of Board meetings and ensuring that all proceedings of meetings are properly minuted
- Ensuring that all Board Committees are properly constituted and provided with clear terms of reference
- Ensuring that an Annual General Meeting is held in line with regulatory requirements and that all notices, forms and reports necessary for the meeting are disseminated with approval of the Board
- Maintaining the registers required by regulations and filing of all statutory returns and documents with the Registrar of Companies
- Advising Directors with respect to their duties and responsibilities in compliance with regulatory requirements
- Ensuring good relationships with shareholders

- Making necessary disclosures on related parties and related party transactions

### POLICY FRAMEWORK

The Group's comprehensive policy framework (listed below) facilitates the creation of an effective control environment and supports effective delivery of strategy. Policies are reviewed and revised annually to ensure relevance in evolving operating conditions. In aligning with the recent revisions to the CSE Listing Rules the Group introduced several new policies (listed alongside)

#### How we strengthened the policy framework during the year

- Introduced new Bribery and Anti-Corruption Policy (Weblink: Hayleys Bribery and Anti-corruption Policy (flihtml5.com))
- Introduced Shareholder and Investor Communications Policy (Weblink: Shareholder and Investor Communications Policy - Hayleys PLC)  
Policies required by the CSE listing rules are on the corporate website of Hayleys PLC. All policies will be in place by October 2024

## POLICY ARCHITECTURE

Environment		Social	Governance
<ul style="list-style-type: none"> <li>Material and waste management policy</li> <li>Energy and emissions management policy</li> <li>Water management policy</li> <li>Biodiversity conservation policy</li> <li>Chemical management policy</li> </ul>	HR-related policies	<ul style="list-style-type: none"> <li>Industrial Relations policy</li> <li>Disciplinary policy</li> <li>Grievance handling policy</li> <li>Recruitment policy</li> <li>Learning &amp; Development policy</li> <li>Talent Management and Succession Planning policy</li> <li>Performance Management Policy</li> <li>Human Rights Policy</li> <li>Whistleblower Policy</li> <li>Anti-Sexual Harassment policy</li> <li>Health and Safety Policy</li> </ul>	<ul style="list-style-type: none"> <li>Board Charter</li> <li>Board Committee Charters</li> <li>Stakeholder Engagement</li> <li>Information Disclosure Policies</li> <li>Bribery and Anti-Corruption Policy</li> <li>Shareholder and Investor Communications Policy</li> <li>IT policy</li> <li>Intellectual Capital Policy</li> <li>Information Security policy</li> <li>Business data back-up policy</li> <li>Internal Code of Business Conduct and Ethics</li> </ul>

## STRATEGIC LEADERSHIP

### Board composition

The Board consists of comprising 6 Executive Directors and 6 Non-Executive Directors. The size and skill composition of the Board is influenced by the demands of our diverse and complex business landscapes. An appropriate mix of skills, knowledge and experience ensures that the Board is collectively equipped to drive the Group's strategy and value creation (refer to pages 44 to 47 for detailed profiles of Directors)

### Board composition

50% of the Board comprises Independent Non-Executive Directors, thereby enriching discussions and bringing objective judgement to Board decisions

■ Executive Directors  
■ Independent Non-Executive Directors

### Skill composition

#### BOARD SKILL PROFILE

### Gender diversity

### Diversity of age

## 56.5 years

Average age

With 33% of Directors below the age of 60, the Board is diverse in its age representation, thereby combining both experience and fresh perspective

### Diversity of tenure

Years of service	Number of Directors
< 3	2
3-5	2
5-9	1
>9	7

Periodic introduction of new members bringing in new perspectives and skills, while continuity and valuable industry expertise is retained through long-standing Directors.

## CORPORATE GOVERNANCE

**Changes to Board:** During the period under review Mr. Timothy Speldewinde was appointed as an Independent Non-Executive Director (refer page 46 for profile). Meanwhile, Mr. Yohan Perera (refer page 47 for profile) was also appointed as an Independent Non-Executive Director on the 1st of April 2024. Following Mr. Perera's appointment, the Board now comprises 50% of Independent Non-Executive Directors.

**Fit & Proper Assessment :** The Group's fit and proper assessment for Directors is in line with the guidelines set out in the Listing Rules and include criteria on honesty, integrity and reputation, competence and capability and financial soundness. The Chairman and Directors satisfied the fit and proper assessment criteria stipulated in the Listing Rules of the CSE.

### APPOINTMENTS TO THE BOARD

Board appointments follow a formal and transparent manner, as determined by the Nominations and Governance Committee, which assesses the Group's strategic demands as well as diversity, skills and competencies of the Board. The Board considers the recommendations of the Nominations and Governance Committee and recommends suitable candidates for appointment or re-election by the shareholders at the Annual General Meeting under the advisement of the Nomination and Governance Committee.

### Board induction and training

Directors are kept updated on relevant developments through formal sessions, distributing of reading materials and deep dives into specific aspects. Directors are also encouraged to attend sessions conducted by the Sri Lanka Institute of Directors. Many

### How we strengthened the policy framework during the year

- 1/3rd of Directors in office retire at each AGM by rotation, with the directors who have served for the longest period since their appointment/re-appointment retiring first
- Retiring Directors are eligible for re-election
- The Board can appoint directors to fill any casual vacancies that may arise during the year and such directors can hold office until the next AGM and seek election by the shareholders

of the Directors also conform to the Continuing Professional Development requirements of the respective professional organisations. During the year, director training was provided on,

- Developments in regulations including the new Bribery and Anti-Corruption Act and new Listing Rules of the CSE

### Board appraisal

The Board evaluates its performance and that of its committees on an annual basis. Areas of assessment include appropriateness of the Board composition, mix of skills and ability to deliver strategic aspirations. The Chairman and Remuneration Committee are responsible for evaluating the performance of the Executive Directors and Committees through an annual self-evaluation of its own performance. The responses are submitted to the Chairman for discussion at a Board Meeting

The Group is in the process of strengthening its Board appraisal mechanisms in line with the guidelines recommended by the new Code.

### THE BOARD IN ACTION

The Board assumes apex responsibility for the Group's continued success and provides oversight on the value creation process aligned with emerging external developments and the Group's strategic aspirations. Ethical and responsible leadership is applied in directing the Group to achieve sustainable growth while preserving stakeholder interests. The Board engages with the business through the following structures and mechanisms

### Board meetings

Board meetings are scheduled early and duly informed to the Directors at the beginning of each calendar year. During the year, the Board convened 12 times while 1 special meeting was also held to discuss the corporate plan for 2024/25. Clear guidelines and processes are defined and communicated to ensure effectiveness of Board meetings.

### Board engagement with the business

- 5 Independent Directors serve on Board subcommittees, obtaining deeper insights on specific matters
- The 6 Executive Directors represent key sectors and Hayleys PLC center functions
- One Executive Director serves as the Chairman and Chief Executive
- Access to deeper insights at Sector level through common directors
- Regular monitoring of performance at monthly Board meetings
- Special meetings as and when required

## CORPORATE GOVERNANCE

### KEY AREAS OF FOCUS IN 2023/24

During the year, the following areas received heightened focus from the Board, reflecting both internal priorities and external developments in the operating landscape. Discussion areas are summarised in the following table and described in further detail in the Portfolio Review (page 114 to 245) and Capital Management Reports (page 248 to 287) of this Report.

Directors	Board	Audit Committee
<b>Monitoring strategy execution and delivery of performance</b>		
The Board monitored the execution of key strategic deliverables which included impact of external factors, entry into new markets, investments in new product capabilities, acquisitions and people-related initiatives among others. The Group's 6 Executive Directors, representing key business verticals play a vital role in this process, contributing their domain specific knowledge and deep industry insights.	Building resilience through portfolio optimisation  Nurturing an inspired team  Customer centricity	
<b>Navigating the volatile external environment</b>		
The Board considered the impact of global geopolitical tensions, monetary and fiscal policy, local political developments and other external drivers on strategy, business continuity and performance	Building resilience through portfolio optimisation	
<b>Digital transformation</b>		
The Board explored opportunities and risks stemming from emerging developments in digitalisation and technology, including AI, blockchain and robotics among others	Building resilience through portfolio optimisation  Customer centricity	
<b>Ethics and culture</b>		
The Board considered the direct and indirect impact of the Group's operations on the economy, society and the environment while setting the tone at the top on how ethical behaviour should be propagated	Inclusive business models  Integrating ESG	
<b>ESG integration</b>		
The Board sought to strategically integrated ESG considerations into strategy, processes, decision-making and organisational culture	Integrated ESG	

### STRATEGY AND PERFORMANCE MONITORING

The Board formulates and steers the Group's strategic direction, ensuring that specific areas of governance oversight are identified and addressed. The Board also approves policies and material processes which support the delivery of the Group's strategy while overseeing and monitoring management's implementation and execution of strategy.

Information shared with Board on a regular basis	Board deliberations in 2023/24

## DIGITAL TRANSFORMATION AND IT GOVERNANCE

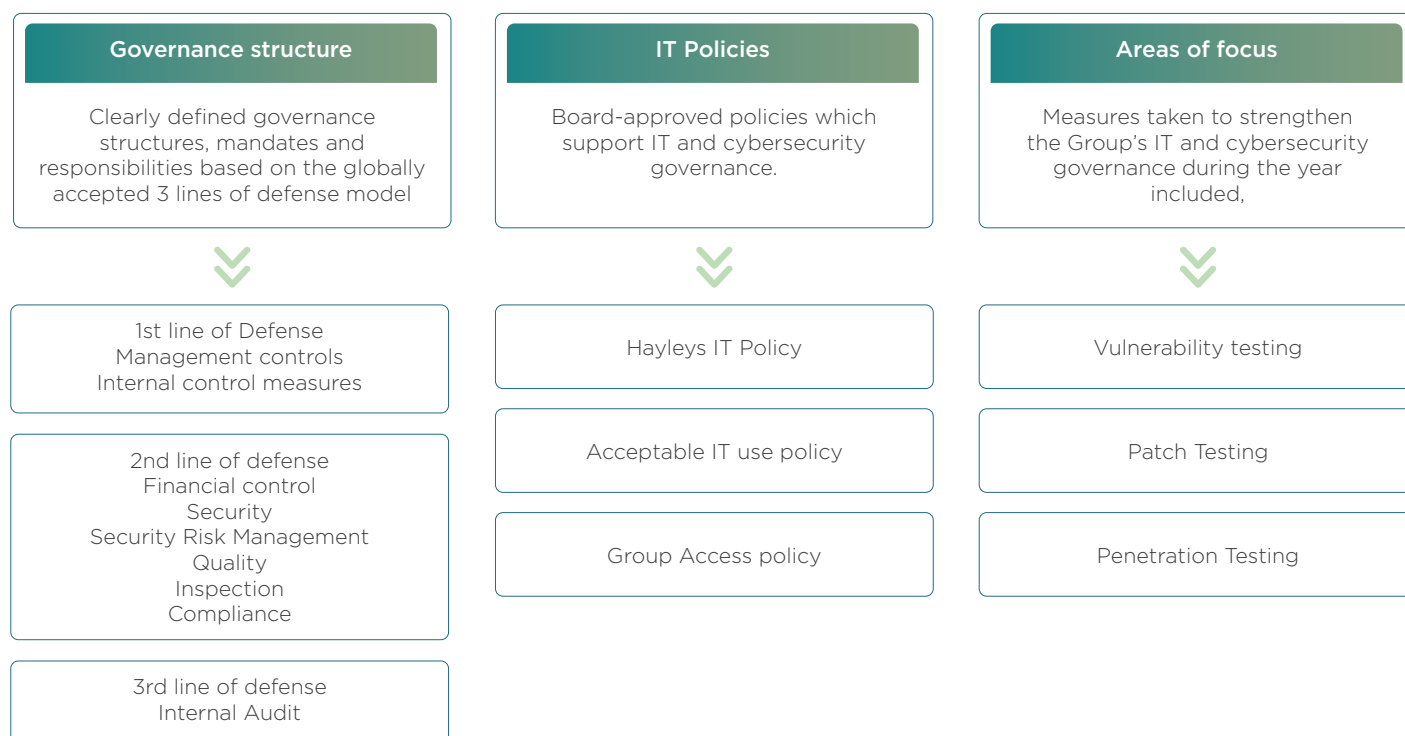

Technology-driven transformation is a key medium-to-long priority of the Group and key areas of focus included evaluating the potential opportunities and risks of disruption presented by technology and building effective, secure and agile infrastructure. The Board holds apex responsibility for governing technology and information and during the year, continued emphasis was placed on embedding ICT governance standards across the Group. The Head of Group IT Services, supported by specialised resources across the Group supports the Board in discharging its IT-related duties and providing oversight on the management of technology assets. During the year, the Group also recruited a Head of Digital Transformation who holds responsibility for formulating and driving the Group's digital roadmap.

### Digital transformation roadmap

The Group's approach to IT and cybersecurity management includes suitable governance structures, policies and processes as is given below:

### IT GOVERNANCE STRUCTURE

# CORPORATE GOVERNANCE

## ESG INTEGRATION

As an organisation with deep-rooted connections across communities, value chains and businesses that are closely linked to the natural environment, we are acutely aware of the interdependencies that exist between our commercial, social and environmental performance. The strategic integration of ESG remains a key priority for the Group, and its approach for doing so is summarised below and detailed further in 102 of this Annual Report.

-  Align purpose, governance and strategy
-  Set targets and measure performance planet
-  Embed ESG in practice
-  Transparency and engagement

**ESG Governance:** The Board holds overall responsibility of formulating the Group’s aspirations, strategies and policies relating to ESG and sustainable development. The Group ESG Steering Committee (comprising 3 Executive Directors and 3 GMC members) assists the Board in the discharge of its ESG-related duties. The mandate of the ESG Steering Committee includes,

- Provide oversight and monitor the execution of the Group’s ESG Framework-Hayleys Lifecode including progress against environmental, social and governance targets in the short, medium and long-term
- Identify ESG related risks, opportunities and impacts and recommend the implementation of appropriate measures to effectively address these dynamics.

- Review and provide guidance on ESG related policies and programmes required to drive the Group’s ESG Framework and strategy.
- Review and approve the Group’s stakeholder engagement strategy which allows management to identify, understand and respond to stakeholders’ legitimate concerns.
- Review emerging trends and issues in the ESG areas and assess potential impact on the Group.

**Group ESG Division:** The Group ESG Division is responsible for the day-to-day implementation of the Hayleys Lifecode across the Group and ensuring that the metrics required to assess progress are reliable. The Group ESG Division is supported by

**Actions taken to strengthen ESG oversight during the year included,**

- **Governance:** Establishment of Sector-level ESG Committees, with defined mandates aligned with the Group ESG Steering Committee
- **Strategy:** 4 key sectors launched their ESG Roadmaps during the year, clearly setting out targets, action plans and deliverables to be achieved by 2030 along with annual deliverables
- **Risk Management:** Integration of ESG risk management processes to existing business risk processes, with ultimate oversight by the Audit Committee
- **Data integrity:** Strengthened combined assurance model of ESG metrics and reporting
- **Reporting:** Voluntary, early adoption of the SLFRS S1 and S2 Sustainability Reporting Standards
- **Culture building:** Group-wide training and awareness programmes on emerging ESG risks and opportunities

Lifecode Champions in each sector who coordinates with the Centre and serve as a contact point for the Group ESG Division. Regular meetings are conducted by Group ESG to ensure that there is clear understanding about the objectives and progress made

## ETHICS AND CULTURE

Ensuring the effective implementation of the Group’s strategy and continued resilience requires a strong ethical culture. The Board is collectively responsible for setting the ethical tone at the top, with all Directors, KMPs and employees required to demonstrate integrity, transparency and the highest ethical standards.

**The Hayleys Way:** The Hayleys Way functions as the Ethical Road Map for all employees of the Group including its key management personnel, clearly setting out the expectations of all Group employees. This code of conduct is reinforced through the orientation training which all employees joining the Group undertake, typically within one month of joining. It sets out explicit statements on anti-corruption and acceptable gifts

**Key elements of the Group’s ethics framework**

- The Hayleys Way
- Corporate Values
- Whistleblower Policy
- Bribery and Anti-Corruption Policy
- Commitment to the UNGC’s 10 principles

## ETHICS AND CULTURE

### APPROACH TO BRIBERY AND ANTI-CORRUPTION

The Group launched a new Bribery and Anti-Corruption policy during the year, aligned to the new Anti-Corruption Act No.9 of 2023, revisions to the Corporate Governance Rules applicable to Listed entities and other regulations. The policy is applicable to all Directors, KMP and employees of the Group. Key highlights of the policy include,

- Zero tolerance to bribery and corruption
- Prohibition of political contributions, donations to political parties and election candidates
- Guidelines on gifts, hospitality and promotional expenses and charitable donations
- Prohibition of facilitation payments to government officials or other person t to expedite an action or process
- Due diligence of partners: inclusion of anti-bribery clauses in agreements/contracts with partners is required
- Retaliations or threats against whistleblowers and disciplinary action against reporting bribery is prohibited

**Whistleblower Policy:** The Group's Whistleblower Policy provides an effective mechanism for employees to raise concerns where the interest of the organisation is at risk. The Policy ensures confidentiality and anonymity and encourages the reporting of concerns such as fraud, improper conduct and breach of the Hayleys Way among others. Two-way communication is facilitated by providing the Whistleblower feedback on the actions taken if he/she so requests. Key elements of the policy are set out alongside:

**Preserving Human Rights:** As a signatory to the United Nations Global Compact, Hayleys has committed to Principle 1 and 2 of the UNGC Principles of Human Rights. The Group has also implemented a Human Rights Policy which aims to foster an organisational culture that embraces internationally recognised guidelines on human rights while eliminating the risk of human rights abuse. Key aspects of the Policy include the following:

- Fair treatment: Quality of opportunity and treatment for

the purposes of eliminating discrimination

- Non-harassment: Creating an environment free of all forms of workplace harassment
- Abolishing child, forced and compulsory labour in both our operations and along our value chain in working with subcontractors and suppliers
- Freedom of Association and Collective Bargaining

# CORPORATE GOVERNANCE

- Promoting health and safety by providing appropriate safety measures and precautions at all locations

## OTHER AREAS OF OVERSIGHT

### Risk Management

The Board governs risk in a manner that strengthens the Group’s resilience and supports delivery of the strategy. Risks controls and procedures are constantly enhanced to enable better risk identification, assessment, mitigation and monitoring. The Board also considers emerging risks when approving corporate plans and budgets, setting strategies and monitoring performance against budgets.

In line with the requirements of the new Code, the mandate of the Audit Committee was widened during the year to increase focus on risk-related responsibilities. The Group’s approach to risk management is described in further detail in the Risks & Opportunities chapter of this Annual Report on pages 104 to 112.

### Measures taken to strengthen risk management during the year

- Identification of Sustainability-Related-Risks and Opportunities (SRROs) with emphasis on Climate-Related-Risks and Opportunities (CRROs) which are reported to Sector ESG Committees and Audit Committees on a quarterly basis (Refer to page 100 for further information)
- Revision of risk assessments and risk templates to reflect emerging developments

## Discharge of risk-related responsibilities

Function	Mandate and Activities
<b>Board Audit Committee</b> (Please refer to pages 319 to 320 for the Composition, Scope and Functions of the Audit Committee)	<ul style="list-style-type: none"> <li>• Oversight responsibility on selecting and applying accounting policies and maintaining an appropriate relationship with the external auditors</li> <li>• Reviews internal control issues and risk management measures identified by MA &amp; SRD and evaluate the adequacy and effectiveness of the risk management and internal control systems including financial reporting</li> </ul> <p><b>Engagement with Sectors</b></p> <p>In addition to Audit Committees in listed subsidiaries, significant unlisted sectors have also established Audit Committees</p> <p>The annual Audit Committee Forum brings together all Audit Committee members of subsidiaries to discuss emerging concerns, trends and potential areas for improvement.</p>
<b>Internal Audit (Management Audit &amp; System Review Department)</b>	<ul style="list-style-type: none"> <li>• Vital role in assessing the effectiveness of controls and strengthening them and establishing new controls where necessary</li> <li>• Direct channel between the Head of MA&amp;SRD and the Chairman of the Audit Committee without the interference of any Directors or Executives.</li> <li>• Reports are made available to the Chairman &amp; Chief Executive and the Chairman of the Audit Committee</li> </ul>
<b>External Audit and Auditor Independence</b>	<ul style="list-style-type: none"> <li>• The Group’s external auditors (for financial reporting) are Messrs. Ernst and Young and the principal does not engage in any services which are in the restricted category as stipulated by the CSE for external auditors</li> <li>• The Audit Committee reviews the independence, the skills and experience and the work of the external auditors annually and recommends appointment accordingly to the Board</li> <li>• The Audit Committee conducts an in-camera meeting with the external auditors on completion of the audit to identify any areas of concern</li> <li>• The Audit Committee also monitors non-audit work done by the external auditors to ensure their independence</li> </ul>

### Board engagement with the business

- 5 Independent Directors serve on Board subcommittees, obtaining deeper insights on specific matters
- The 5 Executive Directors represent key sectors and Hayleys PLC center functions
- One Executive Director serves as the Chairman and Chief Executive
- Access to deeper insights at Sector level through common directors
- Regular monitoring of performance at monthly Board meetings
- Special meetings as and when required

## COMPLIANCE

The Group's policy framework facilitates compliance with regulatory requirements and voluntarily adopted standards of best practice and which are verified by MA & SRD. The Group also has a whistle-blowing policy in place which is clearly communicated to all employees and the Audit Committee and Board receive information in this regard. During the year under review there were no significant instances of non-compliance with laws and regulations and/or monetary value of fines for non-compliance.

## STAKEHOLDER RELATIONSHIPS

The Board consistently strives to ensure that communication with stakeholders is transparent, open and effective. In the execution of its governance responsibilities, the Board drives an inclusive approach that balances the often-conflicting interests of all stakeholders. Further details on the Group's stakeholder engagement is available on page 86 of this Report.

### Shareholder engagement

The Group ensures that the rights of all shareholders are preserved and has established procedures to ensure the fair and equitable treatment of all shareholders. As described on page 86, an array of measures is also in place to ensure that shareholder views are identified and fully considered. Platforms driving shareholder communication are as follows:

- **Annual General Meeting:** The AGM is the main forum for engaging with shareholders and the Group has a history of well attended shareholder meetings
- **Quarterly results updates** with accompanying reviews and timely updates of price sensitive information to the Colombo Stock Exchange
- **Hayleys website:** Includes comprehensive information

including Annual Reports, interim reports, investor presentations, ESG related information and department-level information

- **The Annual Report:** A track record of setting benchmarks for corporate reporting affirms the Group's commitment to disclosure and transparency. Assurance on financial statements, sustainability information and compliance with the Integrated Reporting Framework supports the reliability of the information contained in the annual report which provides comprehensive information on relevant matters to the shareholders. The Reports and other information are available on the Company's website and price sensitive information is also available on the Colombo Stock Exchange website.
- **Interaction through Corporate Secretarial Division:** Shareholders have the opportunity to directly address concerns, suggestions or any other queries to the Corporate Secretarial Division of Hayleys PLC.

### Preserving the rights of minority shareholders

Individual investors are encouraged to carry out adequate analysis or seek independent advice in investing or divesting decisions. They are also encouraged to participate in General Meetings of companies and exercise their voting rights. Information is disseminated to all shareholders. Any information that the Board considered as price sensitive is disseminated to the shareholders by way of announcements to the CSE and press releases by either the Chairman and Chief Executive or the Company Secretaries as appropriate.

There are meetings with shareholders (based on their requests) on matters which are relevant and of concern to the general membership. Voting of the shareholders is critical in carrying out a resolution at the AGM.

### Launch of Shareholder and Investor Communications Policy

Purpose of policy: Ensuring that all shareholders and investors have equal and timely access to accurate and publicly available information about the Company

Includes details on,

-  Communication platforms
-  Social media presence
-  Shareholder enquiries
-  Shareholder privacy
-  Financial and ESG Reporting

## REMUNERATION REVIEW

The Group's remuneration policies and procedures are relevant, fit-for-purpose and designed to ensure alignment with the Group's strategic aspirations. The performance criteria are set at a level which drives high performance, but precludes excessive risk-taking behaviour.

-  Driving the achievement of the Group's strategic aspirations
-  Attracting and retaining high-performing talent
-  Promote internal equity through fair and transparent remuneration schemes
-  Optimum allocation of resources in driving positive outcomes
-  Nurture an ethical culture and responsive and responsible corporate citizenry

## CORPORATE GOVERNANCE

### REMUNERATION GOVERNANCE

The Board Remuneration Committee provides oversight regarding remuneration-related matters within its mandate. The Committee thereby determines the remuneration of the Chairman/Chief Executive and the Executive Directors and sets guidelines for the remuneration of the management staff within the Group. The Report and summarised terms of reference the Remuneration Committee Report are set out on page 323. Additionally, some selected sector holding companies which are Groups in their own right, have also established their own remuneration committees to address the specific concerns within the industry in which it operates.

#### KEY DECISIONS AND ACTIVITIES OF THE REMUNERATION COMMITTEE

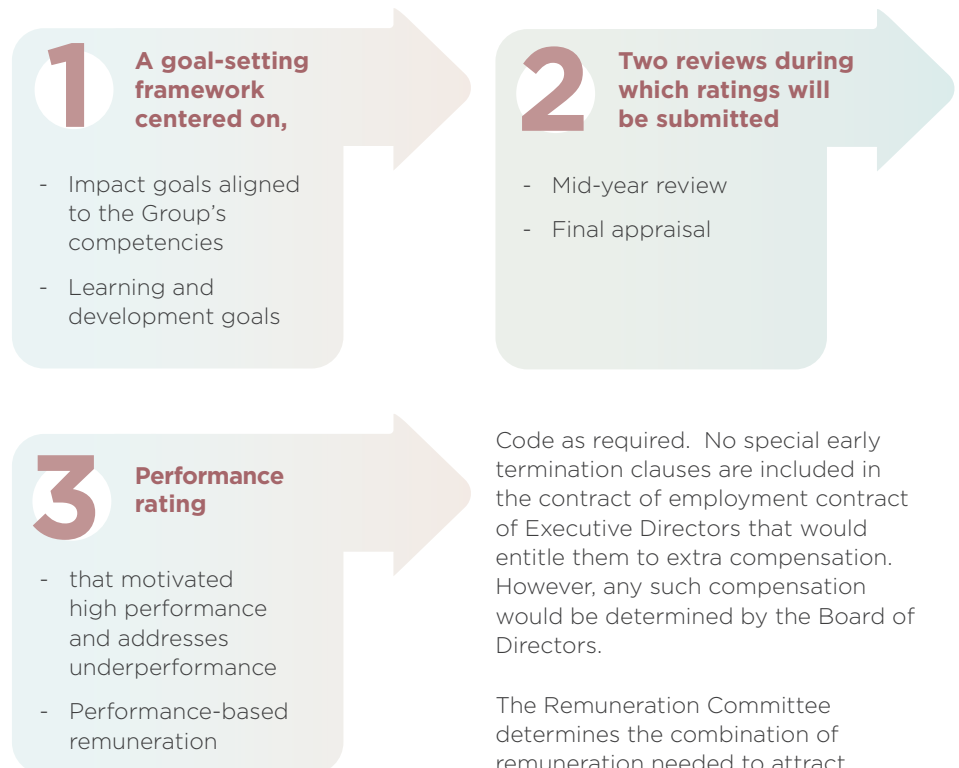

- Review the performance of the Chairman & Chief Executive, Executive Directors and Group Management Committee based on defined targets and determined the bonus payable and the annual increments.
- Reviewed Executives' compensation and implemented market corrections to Executives total compensation in line with the market median.
- Recommended the bonus payable and annual increments to be paid to Executive and Non-Executive staff based on the ratings of the Performance Management System.

The Board as a whole determines the remuneration of the NED's who receive a fee for being a Director of the Board and additional fee for being a member of a Committee. They do not receive any performance related incentive payments. Remuneration Committee

consults the Chairman about its proposal relating to the remuneration of other Executive Directors and have access to professional advice from within and outside Hayleys PLC, in discharging their responsibilities. No Director is involved in deciding his own remuneration.

### REMUNERATION PHILOSOPHY

Hayleys' remuneration processes are designed to ensure alignment with the Group's strategic aspirations. The performance criteria are set at a level which drives high performance, but precludes excessive risk-taking behaviour. The performance review process is graphically illustrated below:

Code as required. No special early termination clauses are included in the contract of employment contract of Executive Directors that would entitle them to extra compensation. However, any such compensation would be determined by the Board of Directors.

The Remuneration Committee determines the combination of remuneration needed to attract, retain and motivate Executive Directors of the quality required to achieve corporate goals. The Remuneration Committee ensures that the remuneration of executives of each level of management is competitive and in line with their performance. Surveys are conducted as and when necessary to ensure that the remuneration is competitive with those of comparative companies.

### LEVEL AND MAKE-UP OF REMUNERATION

A performance-based incentive has been determined by the Remuneration Committee to ensure that the total earnings of the executives are aligned with the achievement of objectives and budgets of the Group companies. Presently the Group does not have an Executive Share Option Schemes. The Remuneration Committee follows the provisions set out in Schedule D of the

Remuneration for Non-Executive Directors reflect the time commitment and responsibilities of their role, taking into consideration market practices. Non-Executive Directors are not included in share options as there is no scheme in existence.

The Report of the Remuneration Committee is set out on page 323 which includes a statement on Remuneration Policy. Please refer page 369 for the total Directors' Remuneration.

#### REMUNERATION IN 2023/24

Employee remuneration consists of salaries and bonus, defined benefit charges and other related expenses. Given the conditions that prevailed during the year, the Group engaged in a market adjustment of salaries, ensuring continued financial security to all employees. Further details of this are available on page 369 to Notes 10 and the Financial Statements.

Rs.bn	2024	2023
Directors' emoluments	4.25	3.57
<b>Personnel expenses</b>		
Defined contribution plan cost	3.88	3.05
Employee benefit plan cost	3.16	2.22
Other staff cost	46.07	41.04

#### REMUNERATION PRINCIPLES

-  Open and transparent
-  Fair and free from discrimination
-  Market competitive
-  Created performance orientation

#### Aligning strategy to remuneration

Remuneration structures are designed to assist us in measuring our performance against our strategic objectives using relevant performance indicators

#### ROADMAP TO ALIGN WITH NEW CORPORATE GOVERNANCE RULES

The Corporate Governance Rules applicable to listed entities under Rule 7.10 and Section 9 of the Listing Rules of the Colombo Stock Exchange were revised during the year, with effect from 1st October 2023. Key changes applicable to the Group and our planned roadmap for aligning with these requirements are presented in the table below. Please refer to page 13 for further details on the compliance to the new Corporate Governance Rules. Meanwhile, the Group has also opted for early adoption of the revised Code of Best Practice on Corporate Governance (2023) by CA Sri Lanka

### Compliance with CSE Corporate Governance Principles – Revised Section 9 of the Listing Rules

CSE Rule Reference	Corporate Governance Principles	Compliance Status	Hayleys' Extent of Adoption
9.2.1	Policies	Compliant	The Company has established and continues to maintain the policies on Board Committees, Corporate Governance, Nominations, Remuneration, Internal Code of Business Conduct and Ethics ('Hayleys Way'), Risk Management and Internal Control, Relations with Shareholders and Investors, Environment, Social Governance and Sustainability (Hayleys Lifecode'), Whistleblowing and Anti Bribery and Corruption.
9.3	Board Committees	Compliant	The Company continues to maintain the Nominations and Governance Committee, Remuneration Committee, Audit Committee and Related Party Transactions Review Committee. Except for the Audit Committee, the Company's other committees acted as the Committees for the subsidiaries of the Company.
9.3.2	Composition and disclosures	Compliant	All the Committees comply with the required rules. Please refer the respective Committee Reports.
9.3.3	Chairperson of Board Committees	Compliant	Chairperson of Board Committees is not the Chairperson of the Board
9.4.1	Meeting Procedures	Complaint	Company maintains records of all resolutions passed at General Meetings.
9.4.2	Communication and Relations with shareholders	Complaint	The Company has a Shareholder Communication and Relations policy and it is published on the corporate website.  The contact person is mentioned.  The policy includes a process whereby Directors are informed of major issues and concerns of shareholders.
9.5.	Policy on matters relating to the Board of Directors	Complaint	The Company maintains a Policy on Matters relating to the Board of Directors which addresses the requirements in rules 9.5.1 and 9.5.2
9.6. 2	Chairperson and CEO	Complaint	Since the Chairperson and CEO of the Company is the same person, a market announcement was made on 1st November 2024 stating the rationale for combining the two roles.
9.6.3	Senior Independent Director	Complaint	The Company has a Senior Independent Director since the Chairperson and the CEO are the same person.
9.6.3. (b)	Senior Independent Director	N/A	Not applicable since all Non-Executive Directors are independent
9.6.3. (c)	Senior Independent Director	Complaint	The SID holds a meeting once a year with the Non Executive Directors without the presence of the Chairperson to appraise the Chairperson's performance.
9.6.3. (e)	Senior Independent Director	Complaint	The SID has made a disclosure demonstrating the effectiveness of duties of the SID in the Statement by the Senior Independent Director. Refer Page 316
9.6.4	Rationale for appointing a SID	Compliant	The rationale is given in the Statement of the Senior Independent Director.

## CORPORATE GOVERNANCE

CSE Rule Reference	Corporate Governance Principles	Compliance Status	Hayleys' Extent of Adoption
9.7.1	Fitness of Directors and CEO	Complaint	The Company ensures that the Directors and CEO at all times fulfill the fit and proper assessment criteria set out in the Listing Rules
9.7.4	Fitness of Directors and CEO	Complaint	The Directors and the CEO have provided the declaration confirming that they satisfy the Fit and Proper Assessment Criteria during the financial year and as at the date of such confirmation.
9.7.5	Disclosures in the Annual Report	Compliant	Page 60 of the Annual Report provides the relevant disclosure.
9.8.1	Minimum number of Directors	Compliant	The Board consisted of 11 Directors up to 31st March 2024. On 1st April 2024, an additional Independent Director was appointed.
9.8.2	Independent Directors ('IDs')	Compliant	Six Directors are Independent as at 1st April 2024
9.8.3	Independent Directors	Compliant	All NEDs have submitted their confirmations on Independence as per the criteria set by Hayleys PLC, which is in line with the regulatory requirements.
9.8.5	Disclosure relating to Directors	Compliant	Each ID signed and submitted a declaration regarding his independence. The Board assessed the independence declared by the Director. The Board having considered that the Independent Directors who have served over 9 years do not exert control over the Company and are capable of acting in an impartial and independent manner, determined that they are nevertheless independent. The same is disclosed on page 322.
9.9	Alternate Directors	Not Applicable	The Board does not have any alternate directors
9.10.(1)	Disclosure relating to Directors		Company Policy on maximum number of Directorships which a Director can hold in listed companies is 20.
9.10.2	Disclosure relating to Directors	Compliant	Disclosed the appointments of new Directors to the Colombo Stock Exchange, together with a brief resume of Director, capacity of directorship and if they hold any relevant interest in shares of the Listed Entity. Appointments are reviewed by the Nominations and Governance Committee and recommended to the Board.  Please refer pages 44 to 47 for the brief resume of each Director.
9.10.3	Disclosure relating to Directors	Compliant	All changes to Board Committees were immediately informed to the Colombo Stock Exchange.
9.10.4	Disclosure relating to Directors	Compliant	Pages 286 to 294 of the Annual Report of the Board of Directors contains the relevant information
9.11.1-3	Nominations and Governance Committee	Compliant	Refer the Nominations and Governance Committee Report on pages 321 to 322.
9.11.4	Composition of the Nominations and Governance Committee	Compliant	The Nominations and Governance Committee comprised 3 Independent Non Executive Directors. On 17th May 2024 Mr. T.A.B. Speldewinde (Independent Director) was added to the Committee. There are no Executive Directors on the Committee. Please refer the Report on Pages 321 to 322.

## CORPORATE GOVERNANCE

Code Ref.	Compliance and Implementation	Compliance
A.1 An effective Board should direct, lead and control the Company	The Board meets on a monthly basis and attendance at meetings is given on page 61. Board packs are circulated one week prior to the Board meeting and typically include the following information:	☑
A.1.1 Regular meetings, structure and process of submitting information	<ul style="list-style-type: none"> <li>• Financial and operational information including progress on agreed Key Performance Indicators and information on the external operating environment;</li> <li>• Financial statements for the relevant quarter and year to date together with comparatives for the corresponding period of the previous financial year and budgets;</li> <li>• Impacts of risk factors impact of risk factors on financial and operating results and actions to mitigate such risks</li> <li>• Forecast performance for the financial year</li> <li>• Compliance with laws and regulations and any non-compliances</li> <li>• Internal control breaches or frauds during the period</li> <li>• Financial and operational decisions taken by the CEO within his delegated authority</li> <li>• Share trading of the company</li> <li>• Sustainability/ESG related risks and opportunities during the period</li> <li>• Cyber security risks, mitigative measures and a security breach report (if any)</li> <li>• Any other matters the Board should be aware of</li> </ul>	☑
A.1.2 Roles & Responsibilities of the Board	The Role and Responsibilities of the Board are inset on page 59 and encompass those set out in the Code .	☑
A.1.3 Act in Accordance with laws	The Board has set in place a framework of policies set out on pages 104 to 112, procedures and a risk management framework to ensure compliance with relevant laws, and international best practices with regards to the operations of the Group.	☑
A.1.4 Access to advise and services of Company Secretary	<p>All Directors have access to the advice and services of the Company Secretarial function provided by Hayleys Group Service (Private) Limited which is responsible for ensuring follow up of Board procedures, compliance with rules and regulations, directions and statutes, keeping and maintaining minutes and relevant mandatory records of the Group.</p> <p>Hayleys PLC has obtained insurance cover for the Board of Directors and key management personnel.</p>	☑
A.1.5 Independent judgement	Directors bring independent judgment to bearing on decisions taken by the Board on issues of strategy, performance, resources and business conduct. Composition of the Board ensures that there is a sufficient balance of power and contribution by all Directors. Many of the Board members are professionals who are required to conform to professional codes of conduct which require the exercise of independent judgement in discharge of their duties.	☑

Code Ref.	Compliance and Implementation	Compliance
A.1.6 Dedicate adequate time and effort to matters of the Board and the Company	<p>Dates of regular Board meetings and Board Sub-Committee meetings are scheduled at the beginning of the year and the relevant papers are circulated a week prior to the meeting giving sufficient time for review. There is provision to circulate papers closer to the meeting on an exceptional basis.</p> <p>It is estimated that Non-Executive Directors dedicate not less than 16 days per annum for the affairs of the Group and those Directors who are also on Audit Committee dedicate a further 4 days for the affairs of the Group.</p> <p>In addition, they are available for any adhoc meetings or discussions at any time.</p>	☑
A.1.7 Calls for resolutions	Any Director can call for a resolution to be presented to the Board if deemed necessary.	☑
A.1.8 Board induction and Training	<p>Directors recognise the need for continuous training and expansion of their knowledge and skills to effectively discharge their duties and are encouraged to attend sessions of the Sri Lanka Institute of Directors and other corporate forums on relevant matters. As independent professionals, many of the Directors also conform to Continuing Professional Development requirements of their respective professional organisations. Board members are also given insights in to regulatory changes that may impact the industry at Board meetings.</p>	☑
	<p>Audit Committee members receive updates on regulatory changes relating to matters entrusted to the Committee on a semi-annual basis to ensure that they are updated on regulatory requirements impacting reporting and risk management processes. They are also given insights in to organisation wide initiatives to strengthen internal controls, risk management and financial reporting processes at the same meetings.</p>	☑
	<p>In accepting an appointment as a Director, consideration is given to the responsibilities of the role, ability to commit time, any existing or potential conflicts of interest and required competencies.</p>	
A.2 Chairman & Chief Executive Officer	Functions of Chairman and Chief Executive are vested in one person as the Board is of the opinion that it is the most appropriate arrangement for Hayleys PLC considering the diversity and size of the Group. Dr H Cabral, PC, who is an Independent Non-Executive Director functions as the Senior Independent Director to facilitate Board balance.	☑
A.3. Chairman's role in preserving good corporate governance	See Role of Chairman in Corporate Governance Report.	☑
A.3.1 Conduct of Board Meetings	<p>The Chairman ensures the following:</p> <p>a. Development of an appropriate agenda for Board meetings with the Company Secretaries taking in to consideration recommendations of the Directors, Best Practices in Corporate Governance, regulatory and other compliance requirements, and business needs of the company including performance review, resource allocation and risk management</p>	☑

## CORPORATE GOVERNANCE

Code Ref.	Compliance and Implementation	Compliance
	<p>b. Sufficiency of information in Board packs and timely availability of the same</p> <p>c. Induction programmes for newly appointed Directors to acquaint them with their duties and responsibilities and Corporate Governance structure of the Group</p> <p>d. Effective participation of Executive and Non-Executive Directors,</p> <p>e. Directors are encouraged to seek additional information necessary to engage in discussion of agenda items and to request inclusion of matters of concern on the agenda</p> <p>f. Sufficient balance of power between Executive and Non-Executive Directors</p> <p>g. Views of directors are obtained and the minutes reflect the deliberations of the Board</p> <p>h. Board's control of the affairs of the company and its obligations to shareholders and stakeholders</p>	
A.4 Availability of financial acumen	Refer Principle A.4. in Corporate Governance Report.	☑
A.5 Board Balance	With the appointment of 2 new directors there are now 6 Independent, Non-Executive Directors on the Board, similar to the number of Executive Directors.	☑
A.5.1 Majority of Non-Executive Directors	All six Non-Executive Directors are independent of any material business relationships.	☑
A.5.2 If only 3 NEDs, they should be independent	<p>Independent Directors are independent of management and free of business dealings that may be perceived to materially interfere with the exercise of their unfettered and independent judgement.</p> <p>The Chairman holds a meeting at least once a year with only the NEDs without the presence of the Executive Directors. Directors' concerns regarding matters which are not resolved unanimously are recorded in the minutes.</p>	☑
A.5.3 Independence of Directors	Independent directors are free of any business or other relationship that could materially interfere with their unfettered or independent judgement	☑
A.5.4 Annual declaration by Directors	The Board determines the independence of Directors on an annual basis based on annual declarations submitted by the Directors and other information based on the requirements of the Code as set out in A.5.5.	☑
A.5.5 Annual determination of independence	The Company does not have any alternate Directors	☑
A.5.7 & A.5.8 Senior Independent Directors	<p>Dr. H. Cabral PC has been appointed as Senior Independent Director as disclosed in A.1. in the Corporate Governance Report. The role has being expanded to 2 meetings per annum with NEDs and 1 meeting with Executive Directors on governance matters and communicating matters discussed to the Chairman.</p> <p>The Report of the Senior Independent Director is available on page 316 of this Report.</p>	☑

Code Ref.	Compliance and Implementation	Compliance	
A.5.9 Annual In camera meeting with NED	The Chairman holds a meeting with only Non-Executive Directors at least once a year.	☑	
A.5.10 Recording of dissent in minutes	Directors' concerns on matters which have not been resolved unanimously are recorded in the Board minutes and Directors have the opportunity to review minutes	☑	
A.6. Supply of Information	<p>The Chairman ensures that all Directors are briefed on issues arising at Board Meetings by requiring management to provide comprehensive information including both quantitative and qualitative information for the monthly Board meetings 7 days prior to the Board/Sub-Committee meetings. The Directors have free and open access to Management at all levels to obtain further information or clarify any concerns they may have. They also have the right to seek independent professional advice at the Company's expense and copies of advice obtained in this manner are circulated to other Directors who request it. Any Director who does not attend a meeting is updated on proceedings prior to the next meeting through:</p> <ul style="list-style-type: none"> <li>• Directors who are unable to attend meetings physically have the opportunity to participate through digital platforms.</li> <li>• Formally documented minutes of discussions.</li> <li>• By clarifying matters from the Board Secretary.</li> <li>• Separate discussions at start of meeting regarding matters arising for the previous meeting.</li> <li>• Archived minutes and Board papers accessible electronically at the convenience of the Directors.</li> </ul> <p>Directors also have an open invitation to attend the meetings of the Management Committees and can interact with Senior Management after Board meetings. Directors are provided with monthly reports on performance, minutes of review meetings and such other reports and documents as necessary. Minutes of meetings are circulated with the Board packs for the next monthly meeting within the agreed time.</p>	☑	
A.7. Appointments to the Board: Nomination Committee	Refer Nomination, Appointment & Succession in Corporate Governance Report and Report of Nominations Committee on pages 321 to 322.	☑	
A.8 Directors to submit themselves for re-election	At least once in 3 years the Directors submit themselves for re-election by Shareholders	☑	
A.9 Appraisal of Board & Committee Performance	The Board undertakes an annual self-evaluation of its performance, that of its committees, Chairman, Non-Executive Directors and Executive Directors. Please refer to page 60 for further information.	☑

H.5 ESG related disclosures	The Group's Annual Report includes sustainability-related financial disclosures aligned to the IFRS Sustainability Reporting Disclosure Standards. Information on the business impacts of sustainability related risks and opportunities are available in the Group's Climate Risk Report on page 288	☑

## UNLOCKING VALUE

# Protecting our World

As we cascade value across every corner of our ecosystem, we are dedicated towards safeguarding our stakeholders under our canopy of protection, even amid times of adversity and change.

*Over 80% of all land animals, plants, fungi, and bacteria in the world reside in forests – cementing its status as one of the richest terrestrial ecosystems. They are home to an incredibly diverse community; with many of these species seeking the protection of these forests owing to their ability to nurture collective growth, and extend shelter and protection against extreme events.*

# VALUE CREATION MODEL

## Value Creation Model

The Group’s value creation model is a graphical illustration of how Hayleys relies on its resources and relationships (classified into six capitals by the <IR> Framework) to create and preserve value through its diverse business activities. The transformation of these capitals enables the delivery of the Group’s strategy, its ESG aspirations while contributing towards advancing the UN Sustainable Development Goals. Given the diversity of our businesses, in developing our value creation

model we have sought to disaggregate the Group into material operations and activities, based on the business models of each Sector. Businesses within the Group operate relatively independently of each other, reflecting the diverse nature of the industries in which we have a presence. Hayleys PLC- the holding company, offers services through several key centralised functions including Corporate Affairs, Legal, Human Resources, Corporate Communications, Central Treasury and ESG among others

## VALUE CREATING PROCESSES

### OPERATING CONTEXT

Key dynamics shaping the Group's operating landscape during the year included,

- Geopolitical tensions
- Macro-economic vulnerabilities
- Technology and automation
- Talent migration
- Supply chain disruptions
- Shifting customer dynamics
- Competition

### BUSINESS SECTORS

- Eco Solutions
- Hand Protection
- Purification
- Textiles
- Construction Materials
- Plantations
- Agriculture
- Consumer & Retail
- Leisure
- Industry Inputs, Power & Energy
- Transportation and Logistics
- Projects and Engineering
- Tea exports
- Others

### KEY RISKS

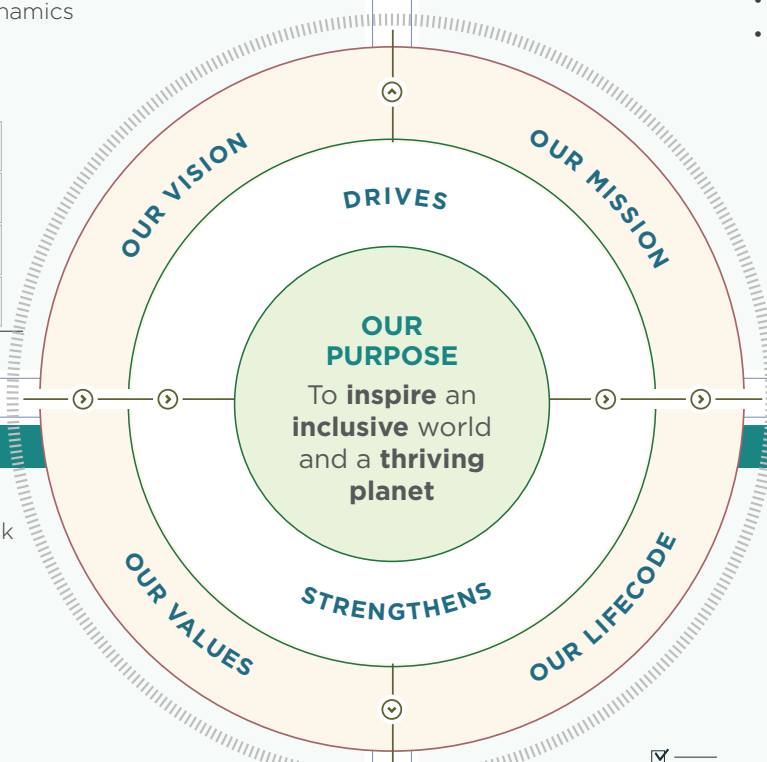

- Foreign currency and exchange rate risk
- Economic risk
- Geopolitical risk
- Local political risk
- Interest rate risk
- Employee retention
- Climate change
- Raw material price volatility and supply chain disruptions

### STRATEGIC PRIORITIES

The Group's overall strategic direction is underpinned by 5 strategic pillars

- Portfolio optimisation
- Customer centricity
- Nurturing inspired teams
- Inclusive business models
- ESG integration

# VALUE CREATION MODEL

## OUTPUTS AND OUTCOMES

### PRODUCTS

- Fibre-based products
- Protective hand-ware
- Tea, rubber and value-added tea
- Activated carbon
- Aluminium profiles
- Agricultural products
- Industrial raw materials
- Consumer durables
- Fabrics

### SERVICES

Hotels and resorts  
 Transportation and logistics services  
 MEP, Solar, BPO and shared services

### Waste and emissions

- Total GHG emissions: **213,078 tCO<sub>2</sub>e**
- Biogenic emissions: **282,951 tCO<sub>2</sub>e**
- Total waste: **20,850 MT**
- Effluents: **4.85 m<sup>3</sup> mn**

### CAPITAL OUTCOMES

#### Financial Capital

- > Net Asset Value per Share: **+2%**
- > Earnings Before Interest and Tax: **Rs. 42.72 bn (-30%)**
- > Profit After Tax: **Rs. 14.85 bn (-46%)**
- > Company dividends: **Rs. 4.01 bn**
- > Return on Capital Employed: **14.36%**

▶ Page 248

#### Manufactured Capital

- > Capital expenditure: **Rs. 19.83 bn (+15.75%)**
- > PPE/Turnover ratio: **30.62%**
- > Depreciation and amortisation: **Rs. 10.78 bn (+7.65%)**

▶ Page 253

#### Human Capital

- > Payments to employees: **Rs. 53.12 bn (+32%)**
- > Training investment increased: **Rs. 183.28 mn (2%)**
- > Turnover: **26%**
- > Improvement in diversity indicators

▶ Page 256

#### Intellectual Capital

- > Investment in R&D: **Rs. 548.08 mn (+70%)**
- > New products developed: **624**
- > Commenced digital transformation processes

▶ Page 266

#### Social & Relationship Capital

- > Improvement in customer satisfaction levels
- > Investment in CSR: **Rs. 408 mn (-6%)**
- > Supplier payments: **Rs. 325.36 bn (-17%)**

▶ Page 273

#### Natural Capital

- > Recycled water used: **14%**
- > Renewable energy generated: **196,166 Mwh**
- > Increase in total emissions: **2%**
- > Trees planted: **69,382**

# STAKEHOLDER RELATIONSHIPS

The diversity and depth of the Group’s businesses have enabled it to build intricate and interconnected networks across extensive stakeholder groups and understanding and responding to the needs of these stakeholders is essential for commercial success and maintain our social license to operate.

## GOVERNANCE OF STAKEHOLDER ENGAGEMENT

Stakeholder Engagement is a key element within the Governance (G) pillar of the Hayleys Lifecode, which articulates the Group’s value proposition to stakeholders and includes specific policies for employees, suppliers and communities that offer guidelines on the approach to stakeholder engagement. The Lifecode also sets out the engagement measures under each selected approach as set out below;

## ADDRESSING BARRIERS TO STAKEHOLDER ENGAGEMENT

The breadth and depth of the Group’s relationships makes its stakeholder universe widely diverse, which in turn necessitates differentiated approaches in conducting stakeholder engagement. This diversity includes language, cultural differences, general differences, gender imbalances and divisions within communities. The Group adopts the following measures to address these barriers;

- Trilingual communication wherever possible
- Tailor-made engagement initiatives for selected groups
- Use of independent parties to conduct engagement

Results of the Group’s stakeholder engagement during 2022/23 is set out below:

<b>SHAREHOLDERS:</b> Institutional shareholders and retail shareholders	<b>Strength of relationship: Strong</b>
<b>METHODS OF ENGAGEMENT (TWO-WAY COMMUNICATION)</b> <b>Providing feedback</b> <ul style="list-style-type: none"> <li>• Quarterly financial results released to the CSE</li> <li>• Press releases through the CSE (ongoing)</li> <li>• Ongoing engagement with investment analysts stockbrokers and media</li> <li>• Corporate website and social media</li> </ul> <b>Receiving feedback</b> <ul style="list-style-type: none"> <li>• Annual General Meeting</li> <li>• Communication through the Company Secretarial Division</li> <li>• Investor road shows</li> </ul>	<b>Integrating feedback to decision-making</b> Shareholders’ concerns (including those of minority shareholders) are brought to the attention of the Board of Directors and GMC members through the Corporate Affairs Unit, Company Secretary and Strategic Business Development Unit which serve as points of contact for all shareholders. # UNDERSTANDING OUR MATERIAL ISSUES

The Hayleys Group operates in persistently evolving and dynamic environments. An annual, comprehensive materiality assessment enables the Group to identify and continually assess issues that are most material to its business and stakeholders and prioritise matters that need to be addressed. The materiality analysis is conducted at Sector level and aggregated at Hayleys PLC.

## DOUBLE MATERIALITY

The Group adopts a 'double materiality lens' to determining its material topics, considering the impact on the organisation as well as on economic, social and environmental impacts. The materiality filters have been revised accordingly.

## IMPROVEMENTS TO THE MATERIALITY PROCESS

With the adoption of the IFRS Sustainability Reporting Standards, the Group's materiality assessment tool was further refined by

- Adding material topics of the relevant SASB standards
- Material topics have been grouped into four themes for better clarity

## CHANGES TO MATERIALITY

- Increased significance of technology and product innovation, operational efficiency and taxation
- Reduced significance of skill migration in comparison to 2022/23, although it still remains material
- Climate change adaptation added as a new material topic

## ESTABLISH PROCESS PARAMETERS

List of possible material issues is selected as process parameters and a reference point in conducting the materiality assessment by the Group ESG Division.

- 1 Discussions with Sector leadership teams
- 2 Evaluation of the Group's business model and strategic aspirations
- 3 Stakeholder feedback
- 4 Emerging risks and opportunities

## SECTOR-LEVEL PRIORITISATION OF MATERIAL TOPICS

The issues are prioritised at Sector level using the following filters to assess the relative importance of the topics to stakeholders and the importance to the organisation.

Organisational materiality	Impact materiality
Financial impact	Stakeholder impact
Innovation opportunity	Environmental impacts
Reputation	
Externalities	
Strategic link	
Risk	

## AGGREGATION AT HAYLEYS PLC LEVEL

Sector level materiality matrices are aggregated at Hayleys PLC weighted using a suitable metric based on the importance of the Sector to the Group.

**Economic factors:** Revenue contribution to the Group

**Social factors:** Headcount of the Sector

**Environmental factors:** Relative impact to the Group's carbon footprint and water consumption

## MATERIALITY RADAR

# PURPOSE-LED STRATEGY

The Group’s overarching strategic aspirations are aligned to its corporate purpose. While Sectors adopt unique strategies which reflect the risks, opportunities, and core competencies of each business the Board sets the overall strategic direction. The strategy underpins five pillars, formulated by the Strategic Business Development Unit (SBDU) at Hayleys PLC and cascaded to each Sector under the leadership of the Group Management Committee.

## OUR PURPOSE

## STRATEGIC DRIVERS

-  Portfolio optimisation
-  Customer centricity
-  Nurturing inspired teams
-  Inclusive business models
-  ESG integration

## GOVERNANCE AND REMUNERATION PRACTICES SUPPORTING STRATEGY

Multiple layers of performance review from sector-level Executive Committees to the Group Management Committee, Board Committees and the Board ensure a high level of monitoring on delivery of strategy. The GMC meets weekly and additional meetings may be called at short notice whenever the need arises. Monthly and quarterly performance is monitored against defined targets, with active debate encouraging the exploration of new ideas and diverse perspectives. The remuneration of GMC members and Sector heads are linked to relevant strategies and KPIs, which are cascaded across relevant functions thereby driving goal congruence across the organisation.

## Resource allocation framework

The Group's decisions on allocating resources in driving its strategic aspirations - which includes funding, expertise, people and natural resources is determined through the guidelines set out below:

Alignment to Purpose & Vision	Capabilities and competencies	Financial targets	Risks and vulnerabilities
We invest in opportunities that pave way to fulfil our aspirations of being a force for good in the broader economic, social and environmental context	Adequacy of current capabilities and competencies	The weighted average cost of capital adjusted to the risk premium attached to the relevant sector and business	Existing and emerging risks that are shaping the operating landscape

## PERFORMANCE AGAINST STRATEGY

# 1

### Building resilience through portfolio optimisation

Driving shared prosperity and value creation through building a resilient business portfolio which is centered on diversifying businesses, geographical footprint, customer segments and revenue streams. This has enabled the Group to remain relatively resilient to economic downturns, industry transformation and unforeseen challenges

Widening geographical reach	New manufacturing capabilities	New market and product segments
<ul style="list-style-type: none"> <li>Penetration of new markets by several Sectors including Eco Solutions, Hand Protection, Construction Materials and Tea exports</li> <li>Hayleys Advantis refined its international strategy, directing focus to three selected markets</li> </ul>	<ul style="list-style-type: none"> <li>Capacity expansion in Thailand factory by DPL</li> <li>Purification Sector strengthened manufacturing capabilities in energy storage solutions</li> <li>Agriculture Sector commenced manufacturing of PE pipes for irrigation</li> </ul>	<ul style="list-style-type: none"> <li>Agriculture Sector's entry into poultry (animal health) sector and new market segments in Bangladesh</li> <li>Hayleys Fentons leveraged growth opportunities in the residential solar segment</li> <li>Diversification of services at Hayleys Fentons</li> <li>Hayleys Advantis appointed as General Service Agent for Air India</li> </ul>

Capitals impacted and utilised	Measuring success	Performance metric	2024
		Revenue growth (%)	(10)
		EBIT growth (%)	(30)
		Customers acquired (mn)	1.24
		Economic value generated (Rs. bn)	149.84

## Plans and prospects

### Short-term

- Increased focus on productivity and cost efficiency
- New product applications across new market segments
- Strengthen value-added portfolio
- Develop existing and new export markets

### Medium-to-long term

- Roll out Group-wide digital transformation agenda
- Regional investments in selected markets
- Widen product and brand portfolio

## PURPOSE-LED STRATEGY

### 2

#### Customer Centricity

We aim to deliver innovative, cost-effective and sustainable solutions with excellent customer care across all our sectors to enhance the experience of every customer

 Innovation and value-addition	 Customer service and engagement	 Catering to customers' increasing sustainability consciousness
<ul style="list-style-type: none"> <li>Value-added product development in key sectors including Eco Solutions, Hand Protection, Purification, Construction Materials</li> <li>Increased investments towards strengthening R&amp;D infrastructure and skills</li> </ul>	<ul style="list-style-type: none"> <li>Strengthening after-sales service in key verticals including Consumer &amp; Retail, Industry Inputs, Power &amp; Energy and Hayleys Fentons</li> <li>Proactive engagement with customers through multiple platforms</li> </ul>	<ul style="list-style-type: none"> <li>Catering to customers' increasing focus on sustainability through,               <ul style="list-style-type: none"> <li>Obtaining international ESG ratings (DPL)</li> <li>3rd party verification of carbon footprint</li> <li>Sustainable innovation</li> </ul> </li> </ul>

<b>Capitals impacted and utilised</b> 	<b>Measuring success</b>	<b>Performance metric</b>	<b>2024</b>
		New products launched	624
		Products in pipeline	695
		Complaints resolved (%)	99

<b>Plans and prospects</b> <span style="float: right;">&gt;&gt;</span>	
<b>Short-term</b> <ul style="list-style-type: none"> <li>Strengthen customer acquisition and engagement through digital channels</li> <li>Ongoing focus on value-added product offerings</li> <li>Customer acquisition in new markets</li> </ul>	<b>Medium-to-long term</b> <ul style="list-style-type: none"> <li>Digital transformation to drive better customer service</li> <li>Technical product developments through collaborations</li> <li>Widen portfolio of sustainable solutions</li> </ul>

### 3

#### Nurturing Inspired Teams

The people pillar of the Group's strategy centers on building a dynamic, diverse and high-performing team which drives the Group's value creation aspirations

 Engagement	 Building leadership capabilities	 Employee well-being
<ul style="list-style-type: none"> <li>Resumption of year-round employee engagement activities that were halted during the pandemic and economic crisis</li> <li>Diversity and inclusion training</li> </ul>	<ul style="list-style-type: none"> <li>Multiple sectors engaged in leadership development programmes</li> <li>Succession planning and building talent pipelines</li> </ul>	<ul style="list-style-type: none"> <li>Launch of 'Momentum'- with the aim creating a family friendly workplace</li> <li>Range of mental and physical well-being interventions offered to employees</li> </ul>

<b>Capitals impacted and utilised</b> 	<b>Measuring success</b>	<b>Performance metric</b>	<b>2024</b>
		Employee retention rate (%)	74
		Average training hours	10.19
		Value added per employee (Rs.mn)	1.46
		Female representation (%)	35

<b>Plans and prospects</b> <span style="float: right;">&gt;&gt;</span>	
<b>Short-term</b> <ul style="list-style-type: none"> <li>Group-wide diversity and inclusion training to be rolled out</li> <li>Focus on talent retention through employee engagement and enhanced value proposition</li> <li>Focus on employee well-being</li> </ul>	<b>Medium-to-long term</b> <ul style="list-style-type: none"> <li>Development of leadership tiers and succession planning</li> <li>Digitalisation of HR processes</li> </ul>

## 4

**Inclusive Business Models**

Create secure, sustainable and efficient ecosystems which uplift livelihoods and empower communities

 Capacity development in ecosystems	 Building resilient supply chains	 Impactful and meaningful CSR engagements
<ul style="list-style-type: none"> <li>Strengthening capabilities across outgrower networks</li> <li>Fabricator training programmes by Alumex PLC</li> <li>Skill building through Singer Fashion Academy, Hayleys Leisure Training Academy and Hayleys Agriculture Training school</li> </ul>	<ul style="list-style-type: none"> <li>Long-term strategic supplier initiatives including DPL Firstlight and Haycarb Haritha Angara</li> <li>Geographical diversification of supply chains by key sectors including Purification, Hand Protection and Tea exports</li> </ul>	<ul style="list-style-type: none"> <li>Ongoing investments in long-term CSR projects by Sectors including,               <ul style="list-style-type: none"> <li>Home for every Plantation Worker</li> <li>Sisu Divi Pahana</li> <li>Puritas Sath Diyawara: Going beyond</li> </ul> </li> <li>Community projects targeting education and health and well-being</li> </ul>

<b>Capitals impacted and utilised</b>  	Measuring success	Performance metric	2024
		Spending of local suppliers	54%
		Supplier payments (Rs. bn)	325
		Suppliers developed	1,318
		CSR beneficiaries	707,580

**Plans and prospects** **Short-term**

- Diversification of supply chains
- Propagation of good environmental practices to address climate change

**Medium-to-long term**

- Strengthen environmental and social screening across supply chains

## 5

**ESG Integration**

Embedding ESG considerations across the Group's strategy, business model, processes and decision-making.

 Strengthening ESG Governance	 Formulation of ESG Roadmaps	 ESG Reporting
<ul style="list-style-type: none"> <li>Formation of Sector-level ESG Committees across all Sectors</li> <li>ESG risk management integrated with existing risk management processes</li> <li>Launch of bribery and anti-corruption policy</li> </ul>	<ul style="list-style-type: none"> <li>Sector-level ESG Roadmaps (aligned to the Hayleys Lifecode) formulated by 04 key sectors</li> <li>Social and environmental initiatives in line with Hayleys Lifecode</li> </ul>	<ul style="list-style-type: none"> <li>Voluntary adoption of SLFRS Sustainability Standards with transitional relief</li> <li>External verifications of Annual Reports in all key sectors</li> <li>Quarterly reporting of ESG metrics.</li> </ul>

<b>Capitals impacted and utilised</b>   	Measuring success	Performance metric	2024
		Reliance on renewable energy (%)	68
		Change in energy intensity (%)	+22
		Change in water intensity (%)	+12
		Change in emission intensity (%)	+14

**Plans and prospects** **Short-term**

- Group-wide ESG systems and reporting audits
- ESG Roadmaps to be launched by 3 sectors
- Accelerate climate ambitions through investments in renewable energy

**Medium-to-long term**

- Sustainable innovation to drive increased circularity of operations
- Improve computation of Scope 3 emissions
- ESG ratings across key sectors

# OUR OPERATING ENVIRONMENT

Our operating landscape is increasingly interconnected- driven by both traditional and emerging risks such as climate change, technological shifts, growing disparities and cyber threats. This increased volatility has led to a rapidly changing and evolving operating environment. Meanwhile, the Group’s diversity enables it to withstand external impacts to a large degree, as the interplay between performance drivers has opposing impacts on sectors.

## Sectors Impacted

	<p><b>APPRECIATION OF SRI LANKAN RUPEE</b> Adverse impacts on export-oriented sectors and positive impacts on import dependent sectors</p>	
	<p><b>DECLINE IN INTEREST RATES</b> Positive implications on borrowing costs</p>	
	<p><b>IMPLICATIONS OF CLIMATE CHANGE</b> Transition-related opportunities for Projects &amp; Engineering, Purification Sector Adverse implications on Sectors exposed to physical risks including Plantations and Agriculture</p>	

Red circle denotes negative impact on the Sector and green circle denotes the positive implications of the relevant external factor

## KEY DEVELOPMENTS

### GEOPOLITICAL DYNAMICS

**RELATED RISKS**  
Geopolitical Risk

#### IMPACTS

- Supply chain disruptions and implications on costs
- Demand uncertainty
- Implications on commodity and energy prices

**STRATEGIC PILLARS**  
Portfolio optimisation  
Customer centricity

**Escalating armed conflicts:** With active conflicts being at the highest levels in decades, interstate armed conflict has emerged as a new entrant to the World Economic Forum’s top global risks for 2024. Underlying geopolitical tensions and an eruption of hostilities led to an unstable global order leading to severe humanitarian crises and rising economic fragility. This has led to, soaring food and energy prices thereby undermining real incomes and triggering economic hardship for vulnerable groups. Implications on businesses have stemmed primarily from supply chain disruptions, shipping delays and increased volatility in commodity prices and demand supply dynamics.

#### RESPONSE

- Geographical diversification of supply chains and markets
- Focus on reducing lead times through increased agility and operational efficiencies
- Focus on relatively price inelastic value-added propositions

## MACRO-ECONOMIC CONDITIONS

### RELATED RISKS

Economic risk

### IMPACTS

- Adverse impacts of exchange rate appreciation on export revenue
- Reduction in borrowing costs
- Subdued domestic demand

### STRATEGIC PILLARS

Portfolio optimisation

**Global economic context:** The global economy is estimated to have grown by 3.1% in 2023, with several major economies demonstrating resilience to the cost-of-living crisis and geopolitical tensions. Government and private spending contributed towards the growth, driving consumption amidst the faster-than expected decline in inflation. While the USA as well as several major emerging markets and developing economies recorded commendable growth, economic activity in the European region was subdued, reflecting weak consumer sentiments and prolonged impacts of high energy prices.

**Sri Lankan economy:** Following the harshest economic crisis encountered in decades, the country entered a path of recovery in 2023 characterised by continued disinflation and improved fiscal and external conditions. The recovery was driven by coordinated policy measures by the Government, access to the International Monetary Fund's Extended Fund Facility (IMF-EFF) and political stability.

Although the economy recorded an overall contraction of 2.3% in 2023, the second half of the year posted a turnaround with agriculture, industry and services recording growth y-o-y. Growth was driven by improved harvests across key crops, surge in tourist arrivals gradual deceleration of inflation. Consumption, however, declined by 2.2% in 2023, with the still high prices and constrained fiscal space impacting private and public sector spending respectively.

**Monetary policy:** Inflation which peaked in September 2022 recorded rapid deceleration reaching lower single-digit levels by 2023 supported by lower fuel prices, improved supply dynamics and relatively subdued

demand. As inflation eased, the Central Bank adopted an expansionary monetary policy for the first time in two years reducing the policy rate and the statutory reserve ratio resulting in market interest rates falling below 15%.

**Exchange rate dynamics:** After significant depreciation in 2022, the Sri Lankan Rupee appreciated by 8% against the US Dollar in 2023, reflecting improved liquidity conditions stemming from tourism earnings, net inflows to the services sector and a rebound in workers' remittances.

Following approval of the International Monetary Fund's Extended Fund Facility programme of USD 3.0 bn, a total of USD 670 million was disbursed in two tranches in March and December 2023.

Key elements of the Government's Domestic Debt Optimisation programme was concluded in September 2023. The Government is also currently in negotiation with external creditors to obtain relief on external debt and in November 2023, an in-principle agreement was reached between the Official Creditors Committee (OCC) and the China Exim Bank. Negotiations are also ongoing with external commercial creditors.

## OUR OPERATING ENVIRONMENT

	Sri Lanka	
	2023	2022
GDP growth (%)	(2.3)	(7.3)
Per capita GDP (USD)	3,830	
Year-end exchange rate (Rs/USD)	323.92	363.11
AWPR (%)	12.13	27.24
Fiscal deficit (% of GDP)	(8.3)	(10.2)
External debt (% of GDP)	65	64.5
Growth projection for 2024%	+1.9	+2.7

### RESPONSE

- Geographical diversification of operations through regional expansion
- Proactive and timely management of pricing strategies to mitigate exposure to exchange rate volatility
- Measures to safeguard employees and ensure their financial security

### TECHNOLOGY

#### IMPACTS

- Opportunities in efficiency and productivity improvements
- Increased cybersecurity and reputational risks
- Embracing new ways of working

#### STRATEGY

Portfolio Optimisation  
Customer Centricity

**Technological developments:** Advances in technology and emergence of new capabilities such as data analytics, robotics, blockchain technology and artificial intelligence offer considerable opportunities for organisations to drive efficiencies while adopting new ways of working.

**Escalating cybersecurity vulnerabilities:** The ubiquity of technology has led to increased vulnerabilities to Cyber-attacks and loss of data, requiring organisations to invest in security systems and infrastructure.

**Misinformation and disinformation:** The proliferation of sophisticated technologies has accelerated the risk of information manipulation. Easily accessible AI interfaces have enabled the surge in falsified and misleading information, with increased scale, reach and efficacy. For governments, risks stem from widening political and societal divide, often leading to polarisation and undermining of elections. For organisations the ubiquity of social media and failures of platforms to ensure information integrity can lead to considerable reputational risks.

### RESPONSE

- Roll-out of digital roadmap to leverage advances in technology to drive efficiencies and enrich decision making
- Strengthen digital reputational management
- Leverage online presence to drive customer acquisition and business growth

## HUMAN CAPITAL DYNAMICS AND WAYS OF WORKING

### RELATED RISKS

High staff turnover and employee relations

### IMPACTS

- Challenges in employee attraction and retention
- + Opportunity to adapt new and agile working models

### STRATEGY

Nurturing Inspired Teams

**Talent migration and brain drain:** While migration-related employee turnover decelerated in comparison to the previous year, talent retention remains a key challenge for organisations with the country's recent economic woes prompting an exodus of young professionals from the country. This has added pressure on remaining individuals and teams, requiring them to manage the same workload with restricted resources.

**Changing aspirations of younger generations:** With Gen Z employees expected surpassing baby boomers by mid-decade, the values, aspirations and expectations of the workforce is undergoing significant change. These dynamics include expectations of continuous change, increased emphasis on work-life balance and different perspectives on loyalty to organisations.

**Importance of diversity, equity and inclusion (DEI):** Employees are increasingly demanding organisations to embrace diversity, equity and inclusion in creating more conducive work cultures. Diverse workplaces foster increased creativity and richer insights, contributing towards high-performing cultures.

### RESPONSE

- Strategic focus on leadership development and succession planning
- Resumption of employee engagement activities
- Introduce measures to create a family-friendly workplace Refer to page 262 for further information

## THE CLIMATE CRISIS

### RELATED RISKS

Physical and transitional risks of climate change

### IMPACTS

- Direct implications on yield and production quantity of Agriculture and Plantations Sector
- Disruptions along supply chains which rely on agricultural material

### STRATEGIC PILLARS

ESG integration

**Escalating implication of climate change:** Implications of climate change including erratic weather conditions, rising temperature and natural disasters are becoming increasingly frequent, impacting value chains, agricultural commodities, communities and organisational performance.

**Global shift to a low-carbon economy:** Transitional risks are featuring increasingly prominently in risk landscapes and include emerging sustainability related regulations, buyers' increasing eco-consciousness, energy policies and energy pricing among others.

**Biodiversity loss:** Unprecedented ecosystem and biodiversity loss, caused by human activity including land use, bio degradation and climate change. has a direct impact on businesses through affecting raw material availability and driving increases in commodity prices.

### RESPONSE

- Sector-level carbon reduction goals including commitment to SBTi by 3 companies
- Group-wide push towards renewable energy
- Numerous biodiversity initiatives conducted by sectors

# STRATEGIC ESG INTEGRATION

As an organisation with intricate and deeply-rooted linkages with nature and society, sustainability has always been part of Group's DNA. In recent years, however, Hayleys has sought to embrace ESG in a strategic manner, integrating environmental, social and governance considerations across all aspects of its strategy, processes and decision-making. On the one hand, we are acutely aware of the need to effectively manage increasingly pronounced ESG risks in building a more resilient business model; on the other hand, as a Group we understand that climate change is the defining challenge of this generation and regaining balance with nature will require rapid, deep and sustained mitigation and adaptation measures. The Group's sustainability context and the disruptive forces that are shaping it is graphically illustrated below:

## CLIMATE CHANGE

Escalating implications of climate change have led to increased vulnerabilities to physical risks (such as operational impacts of natural disasters and impacts on agricultural produce among others)

## WIDENING INEQUALITIES

Widening economic and social inequalities can constrain consumer spending and growth, disruption supply chains and affect businesses' social license to operate

## TRANSITION TO A LOW CARBON ECONOMY

Transition risks arising from society's response to climate change including technological changes, regulations and viability of existing products and services

## HUMAN RIGHTS

Increasing focus on preserving workplace rights including discrimination, privacy and security as well as safeguarding human rights across supply chains

## LOSS OF BIODIVERSITY

The accelerated destruction of ecosystems and species impacts supply chains and can drive higher volatility of raw material costs

## IMPACTS OF PRODUCTS AND SERVICES

Following the 'eco-awakening' of customers, social and environmental impacts of products are emerging as key considerations in the purchasing decision

## WATER STRESS

Sri Lanka is reaching critical levels of water stress, with the FAO estimating water stress to be 90.8%. Further stress could lead to considerable impacts on agricultural value chains and water-intensive sectors

## DIVERSITY AND EQUITY

The growing recognition that a diverse and inclusive workforce can strengthen decision-making, improve engagement and attract and retain talent

# ESG INTEGRATION: AMBITION TO ACTION

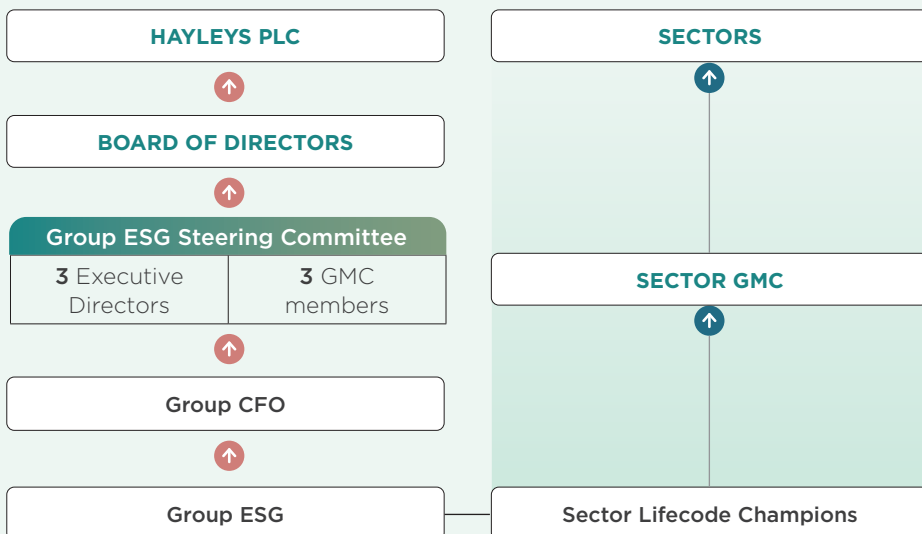

## ALIGNMENT OF PURPOSE, GOVERNANCE AND STRATEGY:

**Corporate Purpose:** The Corporate Purpose of 'Inspiring an Inclusive World and a Thriving Planet' embodies its aspirations to be a force for good in the broader economic, social and environmental context, thereby aligning directly with the Group's ESG agenda

**ESG Governance:** The Board is the highest decision-making authority in the Group and has overall responsibility for formulating the Group's sustainability-related policies and goals and implementing the Group's ESG Framework. The Board has established an ESG Steering Committee in discharging its sustainability and ESG related duties and during the year, ESG Committees were established at Sector-level, facilitating deeper analysis of industry-specific ESG developments.

**Strategy Formulation:** Following the launch of the Group's ESG Roadmap-the Hayleys Lifecode in 2022, several key sectors rolled out their sector-specific ESG strategies in line with the aspirations of the Lifecode. The Sector-specific roadmaps set out clear targets, actions and deliverables for environmental, social and governance aspects.

## SECTORS WHICH LAUNCHED ESG ROADMAPS IN 2023/24

- Hand Protection-DPL Pulse
- Purification- Activate
- Transportation-Helios
- Eco Solutions-Entwine

## DEVELOPMENTS IN 2023/24

Formation of Sector-level ESG Committees with the following mandate;

- Provide oversight and monitor the execution of ESG strategies
- Identify ESG related risks, opportunities and impacts and recommend response
- Review and provide guidance on ESG related policies and programmes
- Receive updates at least quarterly or as and when required, on ESG matters including progress against targets, key KPIs and strategy implementation.

## ESG INTEGRATION: AMBITION TO ACTION

### TARGETS AND MEASUREMENTS

**Monitoring metrics:** Performance against the Lifecode targets as well as other social and environmental metrics are tracked through the Hayleys CUBE- the Group's sustainability information portal. The web-based system enables over 400 users across the Group's operating locations to submit relevant social and environmental information quarterly, which is aggregated and reported to the ESG Steering Committees at both Sector level and Group level.

**Data integrity:** In addition to controls built into the CUBE system, which includes multiple levels of approval and error flagging, the integrity of the non-financial information is ensured through third-party assurance (as part of the Integrated Reporting assurance).

### ESG IN PRACTICE

ESG is embedded across organisational processes and decision-making, as described furthermore in the Portfolio Reviews and Capital Management Report on pages 114 to 245 respectively. Key mechanisms of embedding ESG include the following:

- Quarterly monitoring of performance against ESG targets
- Consideration of ESG aspects in key investment decisions
- ESG risks are assessed quarterly and submitted to the Audit Committee
- Awareness and culture building through employee induction and ongoing programmes

### TRANSPARENCY AND ENGAGEMENT

**ESG Reporting:** As detailed on page 9 of this Report, the Group's sustainability and ESG reporting complies with multiple international and local sustainability reporting frameworks. Hayleys PLC is frequently recognised for excellence in corporate reporting, both in domestic and regional reporting competitions. A combined assurance model (as detailed on page 9) is used to ensure the integrity of the quantitative and qualitative disclosures in the Report.

### Collaboration and knowledge sharing

**sharing:** As industry pioneers in sustainability across several of our verticals, the Group plays an active role in collaborating with like-minded organisations and communities to advance sustainability efforts. These collaborations have facilitated the leveraging of diverse expertise, knowledge sharing and innovation and enabled the scaling of impact.

### CROSS-SECTOR NETWORKS

Hayleys PLC, together with 9 companies within the Group are members of the United Nations Global Compact

### ACADEMIC-INDUSTRY PARTNERSHIPS

Partnerships with universities and other academic bodies in developing and implementing sustainable technologies, products and practices

### KNOWLEDGE SHARING

- International Plantations Sustainability Summit 2023
- Congress for Sustainable Materials 2024
- Supplier development forums across our verticals

### MULTI-STAKEHOLDER INITIATIVES

- Hayleys Plantations partnership with WNPS PLANT to enrich forest ecosystems and biodiversity
- KVPL partnership with IUCN and the Government to protect habitat connected to Kelani River Weoya catchment- Surakimu Ganga program
- Hayleys Advantis collaboration with Department of Wildlife Conservation, CEA and WNPS to accelerate the regeneration of mangroves

## DELIVERING RESULTS

FOCUS AREAS- ENVIRONMENT					
	Climate action	Biodiversity	Water	Materials and waste	
Target	30% reduction in Scope 1&2 GHG emissions by 2030	Increase biodiversity enhancing programme to cover 5 times the area occupied by the Group	50% sustainable water sourcing	75% total wastewater recycled and reclaimed	30% recycled/reclaimed material usage
	90% sustainable and renewable energy applications		30% reduction in water intensity		
	30% reduction in energy intensity				
Reference to further information	Natural Capital Portfolio Reviews	Natural Capital Portfolio Reviews	Natural Capital Portfolio Reviews	Natural Capital Portfolio Reviews	Natural Capital Portfolio Reviews
Performance	2% increase in GHG emissions (2% reduction in emissions excluding the new acquisitions during the year)	69,382 trees planted	49% Sustainable water sourcing	14% Total wastewater recycled and reclaimed	Improved reporting and monitoring of waste
	68% Sustainable and renewable energy applications		16% increase in water intensity		
	22% increase in energy intensity				
Relevant SDG	 				

FOCUS AREAS- SOCIAL					
	Engaged team	Health, safety and well-being	Supplier relationships	Customer relationships	Community relationships
Target	5% attrition rate across the Group	Zero significant workplace injuries/diseases!	40% of suppliers to be screened on social and environmental criteria	Customer satisfaction surveys and grievance mechanisms across 100% of operations	50% increase in CSR beneficiaries
	Each employee to receive an average of 40 hours training		All Sectors to establish at least one supplier development programme		
	100% employees to receive performance appraisals				
Reference to further information	Human Capital Portfolio Reviews	Human Capital	Social & Relationship Capital	Social & Relationship Capital Portfolio Reviews	Social & Relationship Capital Portfolio Reviews
Performance	14% Attrition rate	390 Injuries- first aid cases	3 Sectors engaged in strategic supplier development programmes	99% customer complaints resolved	707,580 CSR beneficiaries
	10.19 Average training hours per employee				
Relevant SDG					

# RISKS & OPPORTUNITIES

The Group's risk and opportunity landscape is shaped by the political, economic, social, technological and environmental context in which it operates. The increasingly dynamic and rapidly evolving environment underscores the importance of a proactive and agile approach towards risk management, which can drive long-term value creation through building a more resilient operating model.

The global order during the year was characterised by underlying geopolitical tension, active hostilities in several regions and escalation of climate change implications- both in terms of scale and intensity of impact. On the domestic front, economic fundamentals recorded a gradual improvement following the unprecedented economic crisis of last year; inflation and interest rates tapered off, the Sri Lankan Rupee strengthened and the country's reserve position improved reflecting difficult but necessary policy choices.

### WIDENING THE LENS OF RISK

The issue of the IFRS S1 and S2 Sustainability Disclosure Standards in June 2023 compels organisations to

widen its risk lens through requiring the disclosure of material information relating to the financial implications of sustainability-related risks and opportunities.

**A phased approach:** The Group is cognisant that truly embedding this new dimension of risk to our processes, controls and most importantly, the risk culture will require adequate time. Accordingly, this year, the Group has focused primarily on climate-related risks and opportunities with the relevant reporting structures and identification mechanisms being implemented across the Sectors.

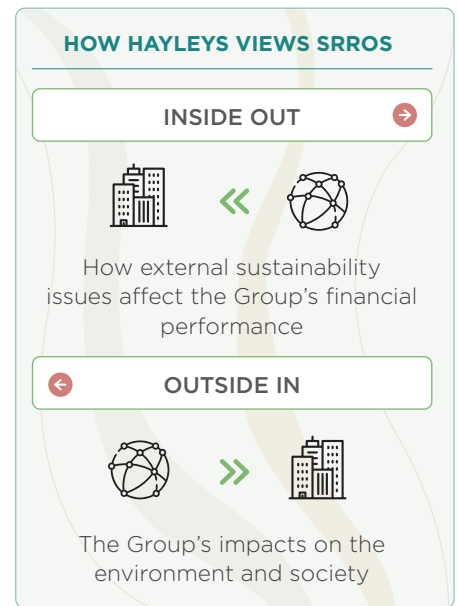

**Connectivity of risks:** Sustainability risks are typically pervasive in nature, demonstrating interactions across other types of risks. By adopting a unitary risk framework which integrates ESG risk assessments with existing business risk processes, the Group seeks to better understand these interactions, thereby providing leadership with the insights required to embed sustainability considerations into strategic decision-making.

**Time horizons:** The time horizons in which the Group classifies its short,

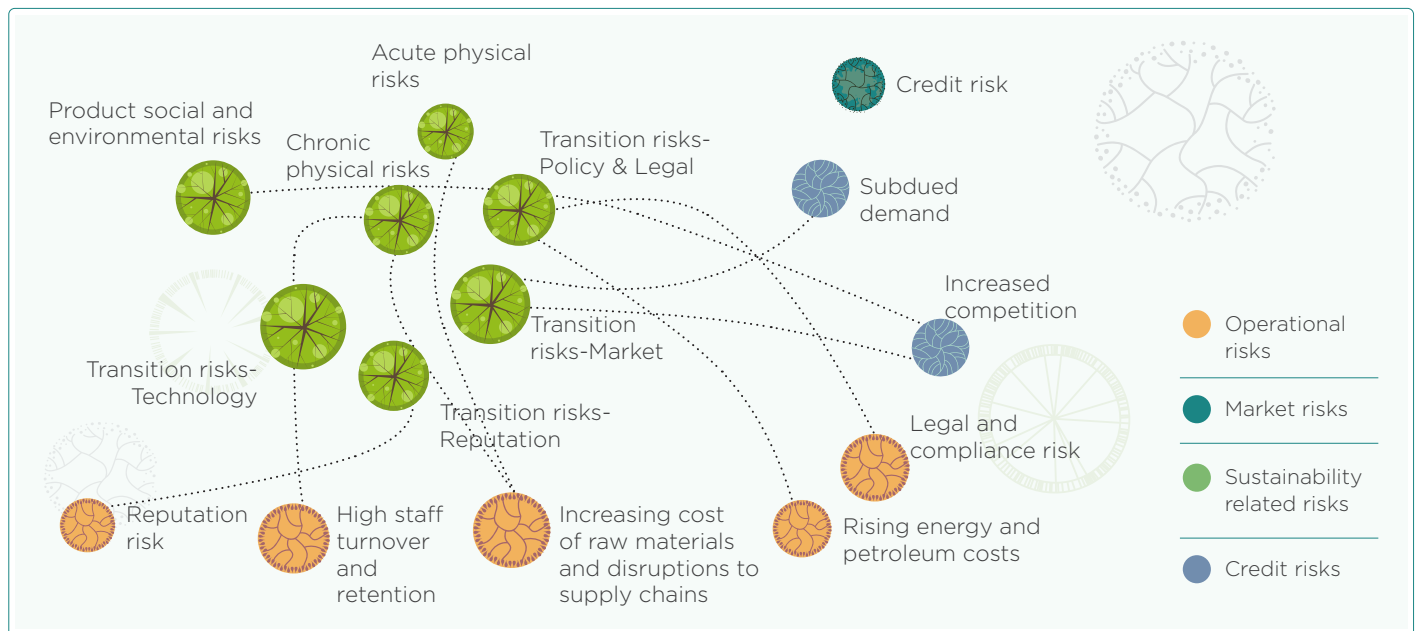

medium and long-term SRROs and CRROs are as follows; short term (less than 1 year), medium term (1-5 years) and long term (over 5 years)

### Interaction of risks

The following infographic demonstrates the link between these strategic, operational and other risks and the climate-related risks identified above. The size of the circle represents the magnitude of the risk.

### Connectivity between risks

## APPROACH TO RISK MANAGEMENT

The Group's Enterprise Risk Management framework supports strategic and operational resilience as we pursue our strategic aspirations and deliver stakeholder value through economic cycles. The Group follows a bottom-up approach to identify, prioritise and mitigate risks- which is subject to quarterly review to ensure completeness, relevance, robustness of mitigating actions as well as Board oversight.

### Risk Governance

The Board serves as the focal point for management of risk and is assisted by the Audit Committee in discharge of this duty. The diverse business sectors of the Group have high levels of autonomy in driving their businesses with Group governance structures playing a key role in harmonizing policies, sharing best practice, guiding strategic direction, managing risks and optimising resource allocation across the Group as depicted below. The Group also adopts the three-lines of defense model (as illustrated below) which ensures effective segregation and discharge of duties.

## RISKS & OPPORTUNITIES

The Group adopts the COSO Framework in assessing potential risks which are ranked and prioritised based on impact and likelihood of occurrence. The risk management process is as follows;

### SUSTAINABILITY AND CLIMATE-RELATED RISKS AND OPPORTUNITIES (CRRO)

- Roles and responsibilities: The Group ESG Steering Committee is responsible for the management of sustainability and climate-related risks and opportunities CRROs including formulating response strategies and assessing progress against the Group’s ESG roadmap (including the climate strategy).
- Sector-level ESG Steering Committees were established during the year under review, facilitating more focused and systematic management of industry-specific SRROs and CRROs
- Risk identification: Self-assessment of ESG risks and opportunities at Sector level through ESG risk templates
- Data inputs: An array of operational data and non-financial performance indicators (based on reporting frameworks) which are monitored on a monthly basis

#### Roadmap for progress in managing SRROs

	Where we are now	Where we want to be
<b>Maturity of SRRO and CRRO practices</b>	Basic systems for identifying SRROs and CRROs, based primarily management insights	Proactive identification, assessment, quantification and management of SRROs
<b>Integration</b>	Risk and compliance as the second line of defense	Risk and compliance of SRROs embedded in the business value and chain
<b>Strategic value enabler</b>	Fragmented approach in incorporating ESG into risk management	ESG as an enabler in driving strategic value

### INTEGRATED THINKING & EFFICIENT RESOURCE ALLOCATION

Several Hayleys PLC Centre functions monitor external developments and a variety of internal factors for early warning signs of threats and opportunities to align plans and ensure strategic relevance. The following functions come together at Group level to identify risks and opportunities and to mitigate them and manage them. The Group Management Committee plays a critical role as well, providing insights in to diverse areas of expertise, enabling early identification of potential risks, sometimes when it’s just a whisper. The diagram below sets out the effective risk management structure of Hayleys Group, reflecting the evolving nature of this increasingly important function.

## Department & Area of Focus

### CORPORATE AFFAIRS UNIT

- Manages Group financial performance and resilience
- Monitor external landscape to identify emerging threats including impending regulations, pressure points and evolving customer considerations

### GROUP HEAD OF RISK AND INSURANCE

- Formulation and negotiation of the Group's insurance programme
- Monitoring risk exposures across the Group

### MANAGEMENT SYSTEM AUDIT & REVIEW DEPARTMENT (MSA&RD)

Manage risks at a strategic level whereas MSA&RD approach it primarily from a risk mitigation and management perspective

Responsible for collating risk registers, constructively challenging them and presenting to Group Management Committee, Audit Committee and Board

### STRATEGIC BUSINESS DEVELOPMENT UNIT

- Monitoring the PESTEL factors to identify new opportunities as well as assess risks related to the opportunities
- Review risk from a portfolio perspective

### PESTEL ANALYSIS

**P**olitical

**E**conomic

**S**ocial

**T**echnological

**E**nvironmental

**L**egal

### GROUP TREASURY

- Management of Group liquidity including Foreign Exchange liquidity
- Managing Group funding including costs of funding

### GROUP SOURCING

- Manage risks across the supply chain and ensure availability of raw materials
- Ensure that finished goods are shipped out on time

### GROUP IT

- Responsible for safeguarding the digital infrastructure and information assets of the Group
- Surveillance to assess cyber threats
- Cybersecurity

## RISKS & OPPORTUNITIES

### TOP RISKS OF 2023/24

#### Market risks

Economic Risk					Foreign currency and rate risk						
Impact	3	Likelihood	3	Risk rating FY 2023	9	Impact	3	Likelihood	3	Risk FY 2023	9
<b>Strategic pillar</b>	Portfolio optimisation/Customer centricity				<b>Strategic pillar</b>	Portfolio optimisation/Customer centricity					
<b>Capitals impacted</b>	Financial				<b>Capitals impacted</b>	Financial					
<b>Material matters</b>	Government policy/macro-economic risk				<b>Material matters</b>	Macro-economic risks					
<b>Context and potential impact</b> Economic instability stemming from upcoming elections which could lead to impacts on fiscal policy and reform implementation					<b>Context and potential impact</b> Implications of exchange rate volatility on both transaction and translation risk. The recent appreciation in the Sri Lankan Rupee has impacted performance of export businesses through reduced global competitiveness						
<b>Mitigating actions</b> <ul style="list-style-type: none"> <li>Reduce dependency on domestic market through expanding export-orientation</li> <li>Maintain strong relationships with stakeholders, lobby groups and banks</li> </ul>					<b>Mitigating actions</b> <ul style="list-style-type: none"> <li>Forward foreign exchange contracts in hedging payables and receivables</li> <li>Use of currency swaps in managing the forex risk</li> <li>Close monitoring of forex movements to adopt hedging</li> </ul>						

Geopolitical risk					Liquidity and financial stability						
Impact	2	Likelihood	2	Risk rating FY 2023	4	Impact	2	Likelihood	3	Risk FY 2023	6
<b>Strategic pillar</b>	Portfolio optimisation/Customer centricity				<b>Strategic pillar</b>	Portfolio optimisation/Nurturing inspired teams					
<b>Capitals impacted</b>	Financial/S&R				<b>Capitals impacted</b>	Financial/S&R					
<b>Material matters</b>	Geopolitical dynamics				<b>Material matters</b>	Geopolitical dynamics					
<b>Context and potential impact</b> Implications of the global escalation in geopolitical tensions and armed conflict including potential trade sanctions, supply chain disruptions, rate volatility and demand fluctuations. During the year 54% of the Group's turnover was derived from exports					<b>Context and potential impact</b> With 46% of the Group's Revenue derived locally and manufacturing facilities across the island, local political instability can have a direct and significant impact on continuity of operations						
<b>Mitigating actions</b> <ul style="list-style-type: none"> <li>Pursuing increased diversification of export markets</li> <li>Focused growth in selected markets</li> <li>Value-added product propositions which are relatively price inelastic</li> </ul>					<b>Mitigating actions</b> <ul style="list-style-type: none"> <li>Revenue diversification through focus on export markets</li> <li>Geographical diversification of operations</li> </ul>						

Increased competition						Subdued demand

## RISKS & OPPORTUNITIES

### OPPORTUNITIES

An analysis of the PESTLE factors, Group risks and its resources have identified the following potential areas and opportunities for growth.

**Regional expansion** – The Group is actively pursuing regional opportunities across its key business lines, as it seeks to expand its geographical reach thereby building further resilience.

**Acquisitions** – The Group has a strong history of growth through acquisition and has a finely-honed team in place for the purpose with the expertise required. A strengthened cashflow position supports our aspirations for growth together with a strong talent pool of leaders and aspiring leaders who are eager for opportunities for

growth. The year under review saw the acquisition of Horana Plantations PLC, further strengthening the Group's position in Plantations.

**Diversification** – Strategic investments to further diversify the Group geographically and by investing into emerging sectors. Geographical diversification also enables movement to sources of raw material, markets, more favourable business climates and cost structures. It is also a potential opportunity to further strengthen the value proposition of the Group to customers.

**Investment in renewable energy** – The Group has a portfolio of investments in renewable energy and there are opportunities for investments in this sector in line with the country's long-term power generation plan. Additionally, the increasing cost of fuel and electricity will reduce payback periods of investments in alternative energy solutions at manufacturing locations, supporting investments in solar energy that will reduce dependency on the main grid and fuel.

**Expand Presence Along Value Chain** - The sectors have potential to widen their presence along the value chain through backward or forward integration, improving synergies, margins, stability of supply chains and market presence.

**Expand Capacity** – Investments in expanding capacity where there is a sustainable growth forecast is also an option, as it enables us to leverage our knowledge and expertise to drive volume growth.

**Digitalisation** – This is a key area of focus for the Group as we have had some success in this area as well. Digital applications have become mainstream, benefitting a number of stakeholders and enabling differentiation beyond the product. An inclusive approach to digitalisation

has seen a wide range of stakeholders benefitting from the applications, like tide that lifts all boats. We will be looking to invest in digital applications that builds bridges to understanding and addressing stakeholder concerns.

**Talent Pipeline & Succession** – A strong talent pipeline supports our growth aspirations, enabling us to invest with confidence as a number of potential leaders remain eager for growth opportunities.

**Sustainable Innovation**– We innovate products with a purpose and work closely with customers to identify their needs to make them customer centric. It is a key opportunity that has propelled our growth and we will continue to invest in research and development to drive innovation. A number of our products are necessary to address issues such as water and air pollution and environmental degradation. We will continue to stay at the cutting edge of sustainable innovation to drive growth in our businesses.

**Integrating ESG** - Although we have made progress, there is much to achieve in identifying and capitalising on ESG related opportunities, that will be mutually beneficial for the planet, the people and our bottom line. This is a fast-evolving area of focus as we believe it will unlock value for all stakeholders. We are committed to drive the change that is necessary to achieve our sustainability goals.

## PORTFOLIO REVIEW

# Expanding our World

Our widespread presence has positioned us to deliver multifaceted value across our sphere of influence. These myriad spaces rely on diverse strategies that fulfill one core purpose – to nurture and protect our stakeholders across every climate and territory in which we operate.

*Across the world, different forests are armed with their own unique strategies and structures that enable them to respond to their environment and its respective dynamics. Boreal forests are adapted to thrive in harsh conditions, while tropical rainforests are built to align with environmental fluctuations, and mangrove and kelp forests are built to maintain resilience against turbulence.*

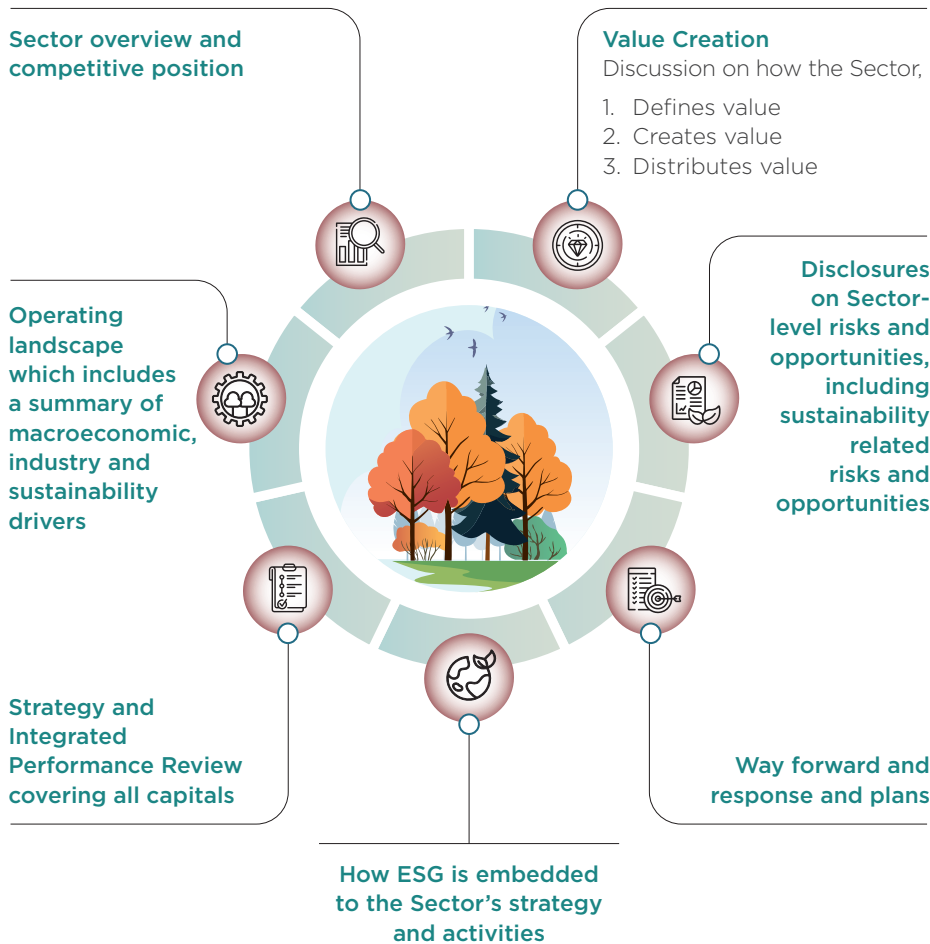

# PORTFOLIO REVIEW

The Group’s portfolio review set out in the following pages, provides a concise yet comprehensive, yet concise and balanced overview of the value creation of our Sectors for the period under review. In line with the principles of Integrated Reporting, we have included material information relating to the Sectors’ resource allocation, strategy, performance, external environment and stakeholder value creation among others.

## FEATURED CONTENT IN OUR PORTFOLIO REVIEWS

This year, the in line with the overall theme of our Annual Report the narrative in our portfolio reviews are structured to demonstrate the value creation story of our Sectors.

## GRAPHICAL REPRESENTATIONS

**Integrated Performance Chart** to demonstrate connectivity and trade-offs between the financial, social and environmental performance of each Sector

**Sankey Diagram:** Visual depiction of how Revenue and Other Income flows are absorbed through costs and other overheads, ultimately generating profit

## CHANGES/ IMPROVEMENTS TO THE PORTFOLIO REVIEWS

### Improvements to Sector classification

Given changes to the Group’s earnings profile and the increasing significance of several sectors, we have reclassified the previous 12 reporting segments into 14 as follows:

- Projects & Engineering (representing Hayleys Fentons and previously reported under the Others segment) presented as a separate cluster
- New reporting segment of Tea Exports (consisting of Mabroc Teas and Martin Bauer Hayleys)

Previous years have been restated to reflect this change

### SLFRS S1 and S2 disclosures

Sector-level disclosures on the potential sustainability related risks and opportunities that could impact the Sector. While focus is on climate related disclosures, other SRROs have also been considered

### Wider disclosures on the operating landscape

### Clarity through materiality

Sector-level disclosures have been carefully selected based on the Group’s materiality assessment. Accordingly, only material social and environmental indicators are reported in the Sector review, thereby improving clarity

## ECO SOLUTIONS

The Sector is a leading exporter of traditional and value-added coconut fibre products, generating significant local value addition through procurement of various types of coconut coir fibre from local supply chains and manufacturing a range of innovative and sustainable solutions catering to a global network of retailers, industries and households.

## ECO SOLUTIONS

**Procurement of coconut husks**  
 The Sector injects value across the coconut value chain through procurement of husks, while supporting knowledge transfer and capacity building

**Value addition across supply chain**  
 30% smallholder suppliers  
 Rs. 5.65 bn payments to suppliers

**Economic Value**  
 Rs. 828 mn tax contributions  
 USD. 37 mn forex generated to Sri Lanka

**Socio-economic value generation**

**Local community engagement**  
 1,201 beneficiaries and Rs. 3 mn CSR investment in supporting education, environmental awareness and uplifting livelihoods

**Rs. 3.25 bn**  
 Economic value creation

**2%**  
 Contribution to Group's value creation

**Manufacturing a range of coconut-fibre based products in line with national and international quality standards**

**Employee value**  
 Rs. 1.46 bn  
 employee payments  
 1,119 jobs created  
 1,666 indirect employees

**PRODUCT APPLICATIONS WHICH SHAPE A BETTER FUTURE**

-  **Growing media** solutions which facilitate plant growth in limited spaces by providing suitable substitutes for plant growth
-  **Erosion control** solutions which preserve soil quality and support agriculture
-  **Horticulture products** and bedding products which encourage cultivation and home gardening in households
-  A range of **brushware and floor covering** catering to the needs of industries and households

						
<b>Revenue</b> Rs. 13.85 bn (-9%)	<b>Profit Before Tax</b> Rs. 68.09 mn (-97%)	<b>Loss After Tax</b> Rs. 16.77 mn (-101%)	<b>Assets</b> Rs. 19.91 bn (+7%)	<b>Liabilities</b> Rs. 8.77 bn (+14%)	<b>Employees</b> 1,119 (+23%)	<b>Carbon footprint</b> 5,522 tCO <sub>2</sub> e (-22%)

## ECO SOLUTIONS

### SECTOR OVERVIEW

The Group's Eco Solutions Sector is a pioneering and leading manufacturer of value-added coconut fibre products, offering an array of tailor-made, innovative and environmentally sustainable solutions across several product categories. The Sector was the first business interest of the Hayleys Group, and has over the past 147 years sharpened its product capabilities, domain knowledge and competitive edge thereby catering to the rapidly evolving requirements of its global customer base.

### CONTRIBUTION TO GROUP

#### ECO FIBRE

Manufacture a range of value-added coir fibre products

**Contribution to Sector**  
Revenue: 67%  
PBT: 574%

**Performance 2023/24**  
Revenue: 40% growth  
PBT: 73% decline

#### BRUSHWARE

Pioneer in the brush market, catering to both the local and international markets

**Contribution to Sector**  
Revenue: 15%  
PBT: -454%

**Performance 2023/24**  
Revenue: 28% decline  
PBT: 452% decline

#### FLOOR COVERING & MATTRESSES

Manufacturer of coir, rubber, flocked door mats and PU mattresses

**Contribution to Sector**  
Revenue: 18%  
PBT: -221%

**Performance 2023/24**  
Revenue: 18% decline  
PBT: 420% decline

to oscillating freight rates. While Sri Lanka's macro-economic conditions stabilised compared to the preceding year, the volatility and appreciation of the Sri Lanka Rupee towards the latter part of the financial year adversely affected exporters. Meanwhile persistently escalating cost of production driven by adjustments to fuel prices and rising labour costs continued to pressure margins, given the highly price sensitive nature of the Sector's key product verticals. Supply chain dynamics also remained challenging during the year, with Sri Lanka's coconut industry plagued by escalating implications of climate change, relatively low yields and limited application of technology. The long-term outlook for eco-fibre products, however, remain optimistic, reflecting increased eco-consciousness of customers and more stringent environmental regulations in major export markets.

### OPERATING ENVIRONMENT

Global demand dynamics for eco-fibre products remained somewhat subdued during the year, with the retail sector witnessing a downturn in view of unfavourable geopolitical conditions and tightening global monetary conditions. Meanwhile, global geopolitical tensions continued to disrupt global trade flows leading

### COMPETITIVE POSITION

A portfolio of **leading brands** including Ravi, Rileys, Hayleys Fibre and Hayleys Mattresses

Over **1000 product varieties** across our key verticals of Eco Fibre (value-added coir fibre products), brushware and floor coverings.

**12 manufacturing facilities Overseas Locations** including 1 manufacturing location in India, and regional marketing offices in the UK, Netherlands and Japan

The Sector caters to a global base of over **300 customers across 80 markets** ranging from Fortune 500 companies to international supermarket chains and local customers.

**Summary of external drivers**

	Driver	Driver Significance of impact	Implications on Sector
Economic and geo-political context	Appreciation of Sri Lankan Rupee	H	- Reduced competitiveness in the global market and adverse implications on volume and market share
	Global geopolitical tensions	M	- Subdued demand and disruptions to trade flows
	Gradual decline in interest rates	H	+ Reduction in borrowing costs
Industry context	Escalation in cost of production	H	- Adverse impact on competitiveness and profitability margins
	Increasing demand for growing media products amidst limited availability of land and prevalence towards healthy diets	H	+ Potential for business growth
	Increasing stringency of global environmental regulations	H	+ Growth opportunities in new market segments and applications
Sustainability context	Migration of talent	M	- Challenges in business continuity
	Implications of climate change on coconut crop	H	- Disruptions to the supply chain - Volatility in raw material pricing - Adverse implications on water security
	Escalating customer requirements on sustainability considerations	H	+ Opportunity to strengthen competitive position by catering to emerging requirements + Cost efficiencies

H-High, M-Medium, L-Low. Brown circle represents adverse effect while yellow circle represents positive affect

**STRATEGY AND INTEGRATED PERFORMANCE REVIEW**

The Sector's performance was adversely affected by adverse macro-economic and market conditions during the year, resulting in Revenue and Profit Before Tax declining by 9% and 97% respectively. The Sector demonstrated resilience in the face of global challenges to record a 28% increase in volumes; however top line growth was affected by the appreciation of the Sri Lankan Rupee during the year. Profitability margins were impacted by challenges in passing on cost increases to customers given the price sensitive nature of several products in key verticals. In order to counter these externalities, the Sector placed strategic focus on cost management, process efficiencies and backward integration which softened adverse impacts to a certain extent.

In terms of products, growing media recorded commendable growth supported by favourable demand dynamics and penetration in new markets such as Mediterranean, Middle East and CIS regions. The Sector has strengthened

**SECTOR FINANCIAL PERFORMANCE**

## ECO SOLUTIONS

### INTEGRATED PERFORMANCE

its global market position in this category, now ranking within the top 3 exporters in Sri Lanka for value-added growing media. Brushware experienced a challenging year due to subdued demand conditions as well as unfavourable exchange rate dynamics and the Sector focused on sustaining customer relationships in this segment. In floor covering, emphasis was placed on improving product design and quality while increasing efficiencies to offer attractive pricing. Despite a decline in profitability in view of subdued domestic demand, the mattress business performed commendably amidst challenges.

Innovation remains a key priority for the Sector and during the year considerable progress was made in the growing media and value-added fibre products segments. In the former, the Sector launched a specialised range of grow bags for tomatoes, strawberries, cucumbers and chillies. During the year, the Sector also obtained a patent for its new water proof coir pots. New applications in coco fibre, including horticulture, rubberised coir car seats are also showing considerable upside potential and the Sector sought to drive increased penetration in these segments.

Strategic emphasis on proactive inventory planning enabled the Sector to mitigate the impact of supply chain disruptions during the year, although persistent declines in the country’s coconut yield and crop poses a significant medium-term risk to the Sector. During the year, the Sector sought to diversify its supply chains through commencing backward integration in the Jaffna region. The Sector has established a palmyrah fibre processing plant in Jaffna, supporting both supply chain security while contributing to socio-economic empowerment of women among these communities.

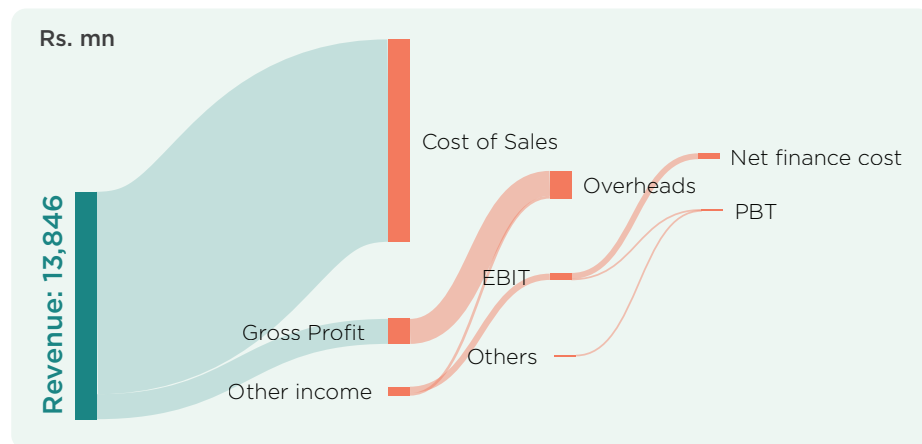

The Sector’s people strategy for the year was centered on increasing retention among shop floor teams and strengthening leadership tiers through leadership development programmes and effective succession planning. Rs. 1.19 mn was invested in training and development during the year, with employees receiving a total of 4,880 training hours.

### ESG IN ACTION

In aligning its ESG agenda with that of the Hayleys Group, the Sector

launched its 2030 ESG Roadmap, ‘Entwine’ during the year, marking a step change in its sustainability aspirations. Entwine offers a blueprint for shared responsibility and collective action in embedding environmental and social consciousness into the Sector’s strategy and processes, serving as a guiding framework for sustainable business. The Roadmap is directly aligned to the Sector’s corporate purpose of “inspiring innovative and eco-friendly living” and centers on the four pillars of nurturing the planet, optimising resources, improving lives and responsible leadership.

- Establishment of Sector ESG Steering Committee
- Strengthen ESG risk assessment and integration with existing risk processes
- Monthly and quarterly monitoring and reporting of performance against ESG targets
- Third-party verification of GHG emissions (2022/23)

HOW WE DEFINE VALUE

HOW WE CREATE VALUE

Strategic priorities	Market expansion	Supply chain management	Strategic integration of ESG
<b>Resource Allocation</b>	<b>Rs. 329 mn</b> Sales and marketing expenses	<b>Rs. 202 mn</b> Investment in backward integration	Launch of 'Entwine'- the Sector's ESG Roadmap
<b>Strategic KPI/ Pre-financials</b>	<b>CIS/ Middle East</b> New markets entered	<b>Rs. 5.94 bn</b> Payments to suppliers	<b>67%</b> Reliance on renewable energy
	<b>60</b> New customers acquired	<b>8</b> New suppliers added	<b>Rs. 3 mn</b> Community investment

HOW WE DELIVER AND PRESERVE VALUE

- Total economic value generated during the year declined by 46% in view of challenging operating conditions
- Payments to employees increased by 9% demonstrating continued commitment to employees.
- Value generated to Governments (in Sri Lanka and overseas) increased by 53%
- Value retained in the business amounted to Rs. 64 mn

VALUE DISTRIBUTION

### ESG HIGHLIGHTS

#### CLIMATE ACTION

The Sector relies primarily on renewable energy (biomass) which has enabled it to gradually reduce its carbon footprint over the years.

	2024	2023	Y-o-y	Target
Energy consumption (GJ)	132,477	97,445	+36	15% reduction in carbon footprint
Carbon footprint (tCO <sub>2</sub> e)	5,522	7,043	-22	
Reliance on renewable energy	73%	59%	+14%	

#### WATER SAVING

Improving monitoring of water and focus on efficiency improvements

**Target:** 15% reduction in water intensity

**Actual:** 11% Increase reduction in water intensity

#### SUSTAINABLE PRODUCTS

The Sector's product portfolio consists of innovative and sustainable solutions, which address several emerging environmental problems.

- Erosion control products
- Seedling pads
- Eco-friendly mats with biodegradable properties

#### EMPOWERING WOMEN ACROSS OUR SUPPLY CHAIN

The Sector has established a palmyrah processing plant in Jaffna providing employment to 12 impoverished women in the region.

**PROSPECTS AND PLANS**

While demand is likely to be subdued in the near-term reflecting softening global economic conditions, long-term demand dynamics remain favourable, particularly in categories such as growing media, erosion control and horticulture. Exchange rate volatility remains the key downside risk in the near term and lack of predictability on the trajectory of the Sri Lankan Rupee has rendered the short-to-medium term outlook challenging to predict. Meanwhile intensifying pressure from regional counterparts (such as India) could pose a risk in the near term, underscoring the critical importance of Sri Lankan manufacturers driving cost efficiencies and refining business models. The Sector’s risk and opportunity landscape is summarised below.

**INDUSTRY RISK AND OPPORTUNITY LANDSCAPE**

**- Exchange rate volatility**

The continued appreciation of the Sri Lankan Rupee in recent months presents a significant short-term risk to the Sector, with potential impacts on global competitiveness and profitability margins.

**Response**

Daily monitoring of exchange rate trends and forward booking of contracts and flexible pricing strategies with customers

**- Global geo political dynamics**

Escalating geopolitical tensions and unprecedented monetary tightening is likely to dampen demand over the short-term

**Response**

Drive penetration in non-traditional markets

**- Relatively high cost of production**

Upward revision of fuel prices and escalation in other manufacturing costs could impact the Sri Lanka’s competitiveness in the global market

**Response**

Product and market diversification

Increase contributions from value-added products

**+ Increasing demand for growing media**

Population growth, increased focus on healthy diets and limited availability of land and soil infertility fuelling demand for growing media products.

**Response**

Expansion of growing media product portfolio and penetration of markets

**+/- Sustainability as a competitive edge**

Environmental and social considerations are increasingly featuring in customers’ purchasing decisions, presenting both opportunities and risks.

**Response**

Leveraging sustainability as a competitive advantage to access new markets and customer segments

**Sustainability related risks and opportunities (SRRO)**

**Physical climate risk**

Implications of temperature rise and rainfall patterns on coconut production and availability of coconut husk

<b>&lt; 1 year</b>	Implications on moisture content and quality of raw materials
<b>1-5 years</b>	Shortages arising from the decline in nut production and price volatility of materials which in turn will impact profit margins
<b>&gt;5 years</b>	If mitigation measures are not adopted, climate change will lead to significant disruptions of the supply chain
<b>Response</b>	Backward integration and diversification of raw material sources

**Increasing stringency of environmental regulations**

Increasing stringency of environmental regulations and prevalence towards eco-friendly products, particularly in the European region

<b>&lt; 1 year</b>	Necessity to prepare for implications of upcoming EU regulations (particularly EU Green Deal)
<b>1-5 years &gt;5 years</b>	Pronounced demand for sustainable products and increased compliance requirements
<b>Response</b>	Increased focus on embedding sustainability considerations across the business

**Employee safety**

As a Sector which is considerably exposed to fire risk due to the combustible nature of the raw material, employee health and safety is a critical concern

<b>&lt; 1 year 1-5 years &gt;5 years</b>	Potential risks on employee safety could impact employee well-being, corporate reputation and ability to attract and retain employees.
<b>Response</b>	Implementation of health and safety systems and procedures through obtaining certifications  Upgrade of manufacturing infrastructure and technology

## ECO SOLUTIONS

Despite short-term pressures, the Sector will continue to focus on penetrating non-traditional markets, pursuing expansion in new applications and strengthening its position in the domestic market. Building supply chain security through backward integration will also remain a key priority over the short-to-medium term.

FUTURE PLANS	
Short-term	Medium-to-long term
<ul style="list-style-type: none"> <li>• Pursue growth in new product applications and market segments</li> <li>• Distributor acquisition in key markets</li> <li>• Ensure supply chain security through backward integration</li> <li>• Strategies to increase retention of shop floor employees</li> <li>• Optimise loan mix to mitigate currency and interest rate risk</li> </ul>	<ul style="list-style-type: none"> <li>• Optimise business model through gradual curtailment of loss leaders</li> <li>• Unlocking growth through the Sector's ESG strategy 'Entwine'</li> <li>• Embracing digital technology in driving better customer service</li> <li>• Enhance value-added portfolio through investments in R&amp;D</li> </ul>
<b>Short-term goals</b> ROCE>10% Gearing<50%	<b>Medium-to-long term goals</b> ROCE>12%

## HAND PROTECTION

With over 85% of its inputs sourced locally, the Group's Hand Protection Sector (represented by Dipped Products PLC) drives significant local value addition, designing, manufacturing, marketing and distributing an array of sustainable and innovative gloves catering to diverse applications and markets across the world.

# HAND PROTECTION

## SECTOR OVERVIEW

The Group's Hand Protection Sector is represented by Dipped Products PLC, a global leader in protective hand-wear, which serves close to 5% of global demand for natural and synthetic-latex based household and industrial gloves. Leveraging domain-specific knowledge and industry insights of over four decades, the Sector has sharpened its competitive edge through a relentless focus on quality, sustainability and innovation which has enabled DPL to fulfill rapidly evolving needs of its diverse clientele.

### CONTRIBUTION TO GROUP

### LOCAL OPERATIONS

5 manufacturing facilities producing a range of household, industrial and sports gloves

**Contribution to Sector**  
Revenue: 55%  
PBT: 97%

**Performance 2023/24**  
Revenue: 13% decline  
PBT: 46% decline

### THAILAND OPERATIONS

Manufacturing facility in Thailand producing disposable gloves

**Contribution to Sector**  
Revenue: 15%  
PBT: 15%

**Performance 2023/24**  
Revenue: 17% decline  
PBT: 49% reduction in loss

### EUROPEAN OPERATIONS

Distribution arm in Italy, supplying our products to the European market

**Contribution to Sector**  
Revenue: 30%  
PBT: -12%

**Performance 2023/24**  
Revenue: 17% decline  
PBT: 37% reduction in loss

### OPERATING ENVIRONMENT

During the first half of the year, global glove demand remained subdued, consistent with the dynamics of the previous year in which distributors curtailed purchases following inventory build-up. However, demand

strengthened towards the latter part of the year driven primarily by the industrial sector and is expected to maintain this momentum over the short-to-medium term. Sri Lankan exporters were adversely affected by the appreciation of the Sri Lankan Rupee, which impacted global competitiveness and revenue growth. During the year, the Sector was also impacted by the sharp increase in natural rubber prices, reflecting shortages in crop amidst pest attacks and unfavourable weather conditions. This, together with the increase in energy costs inserted pressure on overall cost of production. On the other hand, the relatively stable country's macro-economic conditions including the gradual tapering off of interest rates during the year remained largely favourable.

## COMPETITIVE POSITION

The Sector's products are sold in over **70 countries** across **6 continents**

**ESG integration** through the implementation of DPL Pulse- the Sector's ESG roadmap centered on Planet, Product, People and Partners

A comprehensive portfolio of products with over **720 product variants** in supported, unsupported, disposable, electrician, sports gloves and sleeves

**Quality and best-in-class innovation** supported by state-of-the-art research capabilities, accredited laboratory facilities and an array of system and product certifications

**15%**  
Increase in natural  
rubber prices

**10%**  
Reduction in Sri  
Lanka's rubber crop

**8%**  
Appreciation of the  
Sri Lankan Rupee

### Summary of external drivers

	Driver	Driver Significance of impact	Implications on Sector
Economic and geo-political context	Appreciation of Sri Lankan Rupee	H	- Reduced competitiveness in the global market and adverse implications on volume and market share
	Gradual decline in interest rates	M	+ Reduction in borrowing costs and finance income
	Fiscal policy: Higher corporate income tax rate of 30% applicable to the full financial year	H	- Increase in effective tax rate
	Increase in energy costs	H	- Adverse impact on cost of production and profitability margins
Industry context	Growth in industrial activity and resultant demand for gloves	M	+ Growth in demand for industrial gloves
	Increased stringency of health and safety regulations	H	+ Will drive demand for safety and hygiene solutions including gloves
	Growing awareness on the importance of personal protective equipment in work environments	H	+ Increased demand for industrial gloves and specialised gloves
Sustainability context	Implications of climate change on supply chain & raw material availability	H	- Disruptions to the supply chain - Volatility in raw material pricing
	Customers' increasing focus on sustainability considerations	H	+ Opportunity to strengthen competitive position by catering to emerging requirements + Cost efficiencies

H-High, M-Medium, L-Low. Brown circle represents adverse effect while yellow circle represents positive affect

### STRATEGY AND INTEGRATED PERFORMANCE REVIEW

The Sector's performance reflected the external pressures that prevailed during the year, with Revenue declining by 16% to Rs. 43 bn, in view of the appreciation of the Sri Lankan Rupee and a 2% decline in volumes. Profitability margins were pressured by the increase in raw material costs and other overheads, although this was mitigated by ongoing focus on lean management and cost efficiencies. The Sector's overall Profit Before Tax declined by 24% to Rs. 4.01 bn for the previous year, reflecting the slowdown in top line as well as normalisation of exchange gains in comparison to the previous year. Meanwhile, the performance of the European segment was below expectations during the year, due to the prevalent adverse market conditions and decline in pricing.

### SECTOR FINANCIAL PERFORMANCE

# HAND PROTECTION

## INTEGRATED PERFORMANCE

The Sector pursued penetration in niche markets during the year, entering the Middle Eastern and African markets which show significant upside potential. India is also earmarked as a significant target market and short-to-medium term plans are in place to drive customer acquisition. Although adversely affected during the year in review, the Sector’s expansions in the European region including France and Poland are positioned for strong growth and expected to emerge as significant contributors to the bottom line over the medium-to-long term.

Increasing contributions from value-added products has been a core strategy and the Sector leveraged its best-in-class research and development capabilities to drive product innovation. A total of 35 new products were launched during the year, including a disposable gripper glove, a high-cut resistant glove, specialised glove for the electric vehicle industry and Super Chem Technology gloves that protect against a range of chemicals. The Sector also upgraded its research laboratory in the Kottawa facility, featuring state-of-the-art technology and aligning with the requirements international accreditations thereby positioning it as a Center of excellence in innovation. In line with our strategic focus on ESG, the Sector also sought to embed principles of sustainability in its

innovation and product development processes, as listed in subsequent sections of this Chapter.

The Sector invested Rs. 2.66 bn in physical infrastructure during the year, which included investments in solar, sports glove manufacturing facility and construction of a consolidated central warehouse, which has accrued substantial efficiencies and cost improvements. The new sports glove facility which was commissioned last year completed its full first year of operations, achieving commendable capacity utilisation levels as the new range gained momentum followed by partnerships with several globally leading sporting brands.

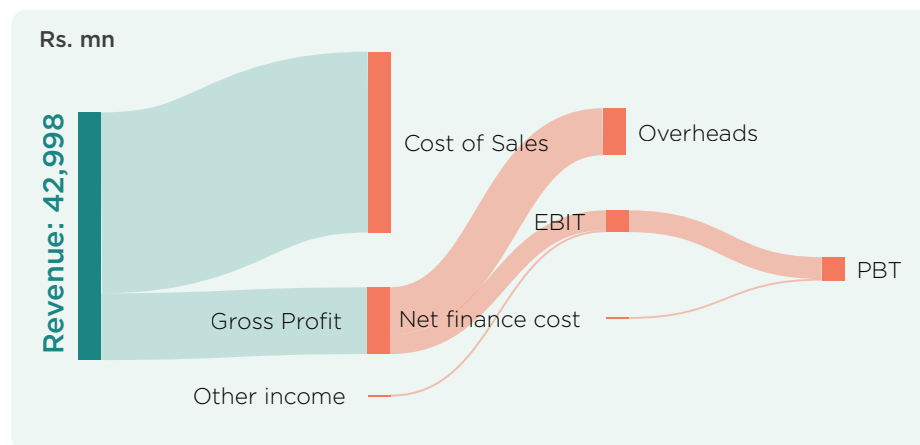

With employee retention remaining a key challenge for most Sri Lankan employers, the Sector placed strategic focus on upskilling employees, developing leadership capabilities and succession planning. Total training hours of 71,543 were delivered through investments of Rs. 7.42 mn, focusing on sales excellence, digital skills and technical skills among others. Supply chain dynamics remained challenging during the year, given the shortfall in natural rubber supply and resultant volatility in pricing. The Sector continued to leverage supplier relationships nurtured through DPL

Firstlight to address supply chain issues while also accessing the supply chain in Thailand.

## ESG IN ACTION

The Sector sought to strategically institutionalise ESG across all aspects of its business through the launch of its holistic ESG Roadmap, ‘DPL Pulse’ aligned with the aspirations of the Hayleys Lifecode. Centered on the four pillars of Planet, People, Product and Processes, DPL Pulse details the Sector’s environmental, social and governance targets, together with planned actions and strategies. While ESG initiatives are detailed in a subsequent section of this Chapter, measures taken to strengthen ESG governance in the Sector included the following:

- Strengthen ESG risk assessment and integration with existing risk processes
- Monthly and quarterly monitoring and reporting of performance against ESG targets with the participation of relevant personnel from manufacturing facilities
- Third-party verification of GHG emissions (2022/23 and 2023/24)

HOW WE DEFINE VALUE

HOW WE CREATE VALUE

HOW WE DELIVER AND PRESERVE VALUE

- Total economic value generated during the year reduced by 9%
  - Value generated to Governments (in Sri Lanka and overseas) amounted to Rs. 1.41 bn an increase of 7%
  - Payments to employees increased by 6% during the year
  - Payments to lenders of capital decreased by 36%, reflecting the gradual decline in interest rates
  - Value retained in the business for future investment amounted to Rs. 2.5 bn
- 

VALUE DISTRIBUTION

## ESG HIGHLIGHTS

### CLIMATE ACTION

The Sector relies primarily on renewable energy sources, which include biomass for boilers and solar power. The Sector has invested over Rs. 1.22 bn in rooftop solar PV systems, which have been installed across all Sri Lankan manufacturing facilities and in the Thailand factory.

	2024	2023	Y-o-y	Target
Energy consumption (TJ)	2,055	1,971	4	-
Carbon footprint (tCO2e)	25,735	26,893	-4	20% reduction in Scope 1 & 2
Renewable energy reliance	93%	92%		95%

### SUSTAINABILITY IN PRODUCT DESIGN

Key sustainable innovations during the year include,

Product carbon footprint assessment of **7 gloves** under ISO 14067:2018 **Product Life Cycle Accounting and Reporting Standard**, to quantify emissions during all stages of the product cycle following the Life Cycle Analysis.

Supported gloves made of plant-based renewable material such as lenzing, banana and pineapple fibre

Rubber and plastic based reusable glove that can be used an alternative to conventional disposable glove

### EMBRACING DIVERSITY, EQUITY AND INCLUSION

Launch of Embrace, a series of DEI awareness sessions conducted for all leadership and executive and above categories

### SUPPLIER DEVELOPMENT THROUGH DPL FIRSTLIGHT

- Distribution of **65,000 KG** of fertilizer
- Distribution of **30,000** rubber saplings

### Community engagement initiatives

Investments of Rs. 16 mn in community engagement initiatives focusing primarily on health and education

- Pahesera Arunalu-Educational support
- Sisu Divi Pahana: 85,000 nutritious meals
- Stationary and school book donations

**PROSPECTS AND PLANS**

The anticipated recovery of demand from the European market is expected to strengthen volume growth in 2024/25, as the Sector leverages its expansion efforts of recent years to drive increased penetration. Supported gloves are expected to record more pronounced growth, a trend DPL is well positioned to capitalise on given investments in enhancing product offerings and manufacturing capabilities. The Sector’s short, medium and long-term risks and opportunities are summarised below:

**INDUSTRY RISK AND OPPORTUNITY LANDSCAPE**

**⊖ Exchange rate volatility**

The Sri Lankan Rupee is expected to appreciate further over the short-term before decelerating and stabilising towards the latter part of the year. As an exporter, the appreciation of the Rupee will affect global competitiveness as well as revenue and profitability margins given the price sensitive nature of the industry

**Response**

Proactive monitoring of exchange rate trends

**⊖ Global geopolitical dynamics**

Escalating geopolitical tensions and resultant disruptions to shipping routes has led to longer lead times as well as higher operational costs

**Response**

Increased geographical diversification of markets

**⊖ High energy costs**

Sri Lanka’s energy costs increased significantly during the year and is currently ranked among the highest in the region.

**Response**

Increased reliance on renewable energy sources

**⊕ Increasing awareness on health and safety and more stringent regulations**

Growing awareness on workers’ safety and increasing occupational hazards in mining, construction, oil and gas and manufacturing will drive demand for industrial glove applications

**Response**

Expansion of product portfolio catering to specialised industrial needs  
Penetration of new markets

**⊕/⊖ Sustainability as a competitive edge**

Environmental and social considerations are increasingly featuring in customers’ purchasing decisions, presenting both opportunities and risks.

**Response**

Leveraging sustainability as a competitive advantage to access new markets and customer segments

**Sustainability related risks and opportunities (SRRO)**

**Impacts of weather on supply chain**

Implications of adverse weather patterns including variability in rainfall patterns and temperature on the rubber supply chain

<b>&lt; 1 year</b>	Shortages in natural rubber and sharp escalation in prices
<b>1-5 years</b>	More pronounced shortages and price volatility of natural rubber, as demand increases
<b>&gt;5 years</b>	If mitigation measures are not adopted, climate change will lead to significant disruptions of the supply chain
<b>Response</b>	Strengthen relationships with suppliers through DPL Firstlight and diversification of raw material sources

**Transition risk: Shift to low-carbon economy**

Increased stringency of regulations and escalating customer requirements on sustainability considerations

<b>&lt; 1 year</b>	Customers requests for product-level carbon footprints and ESG ratings
<b>1-5 years</b>	Evolving regulations from the EU including the EU Deforestation Regulation and European Green Deal will have significant impact
<b>&gt;5 years</b>	Survival of sustainability-focused organisations while others will be challenged to garner market acceptability
<b>Response</b>	Embedding ESG in a strategic manner

**Water availability**

Sri Lanka has been ranked a water-stressed country and escalating implications of climate change are likely to drive further challenges.

<b>&lt; 1 year</b>	Limited impact albeit increased variability of weather patterns
<b>1-5 years</b>	The Sector is relatively water intensive with potential impacts on production continuity and operational cost
<b>&gt;5 years</b>	Increase in water costs with frequent disruptions to availability
<b>Response</b>	Continued monitoring of water usage and increase reliance on sustainable sources including investments in water recycling

## HAND PROTECTION

FUTURE PLANS	
Short-term	Medium-to-long term
<ul style="list-style-type: none"> <li>Strengthen presence in Europe, Australia, Africa and East Asia</li> <li>Enhance value added portfolio catering to specialised needs including chemical resistant and electrical insulation gloves</li> <li>Pursue new opportunities by prioritising ESG related investments</li> <li>Cost optimisation through digitalisation and centralising back office functions</li> </ul>	<ul style="list-style-type: none"> <li>Reengineer and automate manufacturing systems</li> <li>Diversify raw material and packaging supply chain in both Sri Lanka and Thailand</li> <li>Position DPL as a sustainable manufacturer through strategic approach to ESG</li> </ul>

# PURIFICATION

## SECTOR OVERVIEW

The Purification Sector is represented by Haycarb Group, a global leader in the coconut-shell based activated carbon market commanding a share of approximately 16%. Through its subsidiary Puritas (Private) Limited, the Sector is also a leading provider of water and waste water purification solutions in Sri Lanka, Maldives and the region. During the year under review, the Purification Sector ranked as the top contributor to the Group's bottom line, accounting for 15% and 19% of EBIT and PBT respectively.

## CONTRIBUTION TO GROUP

### SRI LANKAN OPERATIONS

Manufacture of coconut-shell based activated carbon

**Contribution to Sector**  
Revenue: 41%  
PBT: 48%

**Performance 2023/24**  
Revenue: 26% decline  
PBT: 41% decline

### OVERSEAS MANUFACTURING

Manufacturing facilities in Indonesia and Thailand

**Contribution to Sector**  
Revenue: 30%  
PBT: 42%

**Performance 2023/24**  
Revenue: 18% decline  
PBT: 3% decline

### OVERSEAS MARKETING

Marketing arm engaged in distribution

**Contribution to Sector**  
Revenue: 29%  
PBT: 10%

**Performance 2023/24**  
Revenue: 42% decline  
PBT: 43% decline

in supply coupled with dampened demand led to intensifying price competition across the industry. On the other hand, increased volatility of global currencies fuelled demand for precious materials, which in turn drives demand for mining-related activated carbon applications. While Sri Lanka's macro-economic environment stabilised compared to the previous year, the appreciation of the Sri Lankan Rupee towards the latter part of the financial year adversely impacted export-oriented businesses and remains a significant risk factor in the near term. Over the medium to long-term however, implications of climate change are expected to have increasingly pronounced impacts on the coconut supply chain, as evidenced by chronic shortages in most producing countries.

## OPERATING ENVIRONMENT

The global activated carbon market witnessed some consolidation during the year, with demand softening due to inventory adjustments following stock-build up over the previous years. The normalisation of global supply chains and resultant increase

## COMPETITIVE POSITION

The Sector caters to >590 customers in over 50 countries with marketing offices in Sri Lanka, USA, Europe and Australia

**Seven manufacturing facilities** comprising 2 in Sri Lanka, Indonesia and 3 in Thailand. The Sector's newest facility will be commissioned in Philippines shortly

A complete range of over **1500 product variants** including standard, washed impregnated granular activated carbon, powder activated carbon and extruded pellet activated carbon

Advanced **research and product development capabilities** which have enabled the Sector to cater to evolving customer demands across different applications

7%

Decrease in Sri Lanka's coconut production in 2023

3%

Increase in cost of production

8%

Appreciation of the Sri Lankan Rupee

### Summary of external drivers

	Driver	Driver Significance of impact	Implications on Sector
Economic and geo-political context	Appreciation of Sri Lankan Rupee	H	- Reduced competitiveness in the global market and adverse implications on volume and market share
	Gradual decline in interest rates	M	+ Reduction in borrowing costs
	Fiscal policy: Higher corporate income tax rate of 30% applicable to the full financial year	H	- Increase in effective tax rate to 30% from 21%
	Decline in freight rates	M	+ Reduction in transportation costs
Industry context	Increased demand from mining industry	H	+ Potential for business growth
	Growing demand for water and air purification		
	Decline in raw material prices	H	+ Positive impact on profitability margins
Sustainability context	New energy arena with the global transition to a low-carbon economy	H	+ Opportunities to access new market segments through energy solutions
	Implications of climate change on coconut crop	H	- Disruptions to the supply chain - Volatility in raw material pricing - Implications on quality and yield
	Escalating customer requirements on sustainability considerations	H	+ Opportunity to strengthen competitive position by catering to emerging requirements + Cost efficiencies

H-High, M-Medium, L-Low. Brown circle represents adverse effect while yellow circle represents positive affect

### STRATEGY AND INTEGRATED PERFORMANCE REVIEW

The Sector delivered a commendable performance in a challenging year, sustaining customer relationships and preserving profitability margins amidst external pressures. The 29% decline in Revenue during the year primarily reflects the appreciation of the Sri Lankan Rupee and a reduction of prices offered to customers, while the Sector successfully leveraged its strong customer relationships to remain resilient against intensifying competition and subdued demand. Revenue was also upheld by deeper penetration in key markets such as USA, China and the Middle East, and increasing contributions from the value-added portfolio. Meanwhile, proactive negotiations with raw material suppliers enabled the Sector to optimise input costs, thereby preserving profitability margins. Meanwhile, the Environmental Engineering arm recorded strong

### SECTOR FINANCIAL PERFORMANCE

# PURIFICATION

## INTEGRATED PERFORMANCE

turnaround during the year supported by the gradual recovery of the construction sector and infrastructure projects. Overall, the Sector recorded a Profit Before Tax of Rs. 56 mn (compared to loss of Rs. 240 mn the previous year) gradually emerging as a key contributor to profit during the period.

The Sector’s product strategy was consistent with the approach adopted in the last few years, in which considerable business development efforts were directed towards widening the value-added product portfolio. Strategic emphasis placed on energy storage carbon including hard carbon for sodium ion batteries, which presents significant upside potential given rapid growth in the new energy arena. Manufacturing and R&D capabilities were also strengthened in these areas, with investments of over Rs. 125 mn directed towards constructing a state-of-the-art electrochemical laboratory for energy storage solutions. Digital transformation also remains a strategic focus, with the Sector exploring avenues of leveraging AI capabilities to drive increased automation and efficiencies.

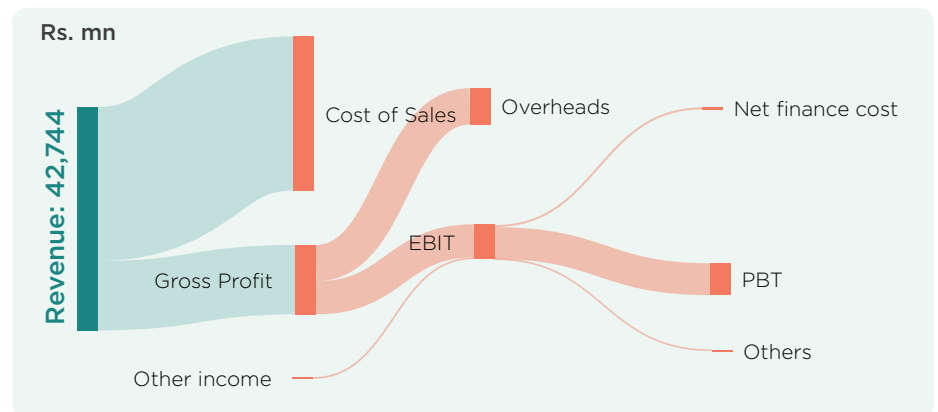

Improving security and resilience of the coconut supply chain is critical to the long-term success of the Sector. Reflecting its efforts to strengthen local coconut production, the Sector committed to plant 100,000 coconut trees in Northern province of Sri Lanka, aligned to a national initiative to establish a second coconut triangle. In line with the Sector’s efforts to further diversify its raw material sources, the Sector’s 7th and latest manufacturing facility is to be commissioned in the Philippines in the first half of 2025. Meanwhile, the ‘Haritha Angara’ initiative, which uses a proprietary closed pit charcoaling technology was further expanded, with the addition of 25 new pits.

The Sector’s people strategy for the year centered on succession planning, building capabilities in critical areas such as digitalisation and ESG as well as creating better working environments through renovations and upgrades to workspaces. Despite the widespread talent migration in the country, the Sector maintained relatively healthy retention levels of 88%, reflecting its superior employee value proposition which is aligned to the three pillars of the Sector’s corporate purpose- envision, enrich and empower.

## ESG IN ACTION

The Sector marked a major milestone in its ESG journey during the year, with the launch of ‘Activate’ the Sector’s holistic ESG roadmap for 2030. Through Activate (which is broadly aligned to the Hayleys Lifecode), the Sector committed to ambitious social, environmental and governance targets centering on five action-driven pillars of Restore, Inspire, Excite, Uplift and Innovate articulating the Sector’s commitment to the environment, employees, customers, communities and product proposition. In addition, the following measures have been taken to institutionalise ESG:

- Establishment of Sector ESG Steering Committee and ESG Working Group
- Strengthen ESG risk assessment and integration with existing risk processes
- Monthly and quarterly monitoring and reporting of performance against ESG targets
- ESG audits conducted by the Sector ESG Division
- Third-party verification of GHG emissions (2022/23)

HOW WE DEFINE VALUE

HOW WE CREATE VALUE

HOW WE DELIVER AND PRESERVE VALUE

- Total economic value generated during the year decreased by 10%
- Value generated to Governments (in Sri Lanka and overseas) increased by 33%
- Payments to lenders of capital decreased by 41%, reflecting over the gradual decline in interest rates
- Value retained in the business amounted to 20% compared to 25% the previous year

## ESG HIGHLIGHTS

### CLIMATE ACTION

The Sector's renewable energy drive consists of increased investments in solar as well as waste-heat-recovery. Plans are in place to install solar panels across manufacturing locations in Sri Lanka and Thailand.

	2024	2023	Y-o-y	Target
Energy consumption (MJ mn)	240,589	264,182	-9%	Scope 1 and 2 emission reduction target of 25
Carbon footprint (tCO2e)	26,696	28,396	-6%	
Solar capacity	2.4%	N/A		50%

### GREENING THE SUPPLY CHAIN

**Recogen:** Patented environmentally friendly charcoaling process

**Haritha Angara:** Environmentally friendly charcoaling initiative with 431 pits operating to date

**Vertical Kiln Charcoaling:** Conversion of traditional open pit charcoaling into a closed pit charcoaling fulfilling approximately 20% of raw material requirement in Thailand

### SKILL DEVELOPMENT

**Key areas of training:** Digital, R&D, ESG, business leadership

**Training hours:** 23,353

**Investment in training:** Rs. 8.27 mn

### COMMUNITY INITIATIVES

Numerous needs-based community initiatives initiated with the commemoration of the Sector's 50th anniversary

Sisu Divi Pahana: Mid day meal programme for school children

- >150,000 meals
- 14 schools
- 800 children

## PROSPECTS AND PLANS

While short-term demand will be driven by strong growth in the mining industry, medium-to-long term demand outlook also remains favourable, supported by the global transition to a low-carbon economy which is driving demand for energy storage solutions as well as increasingly stringent water and pollution control regulations. Prices are expected to remain stable in the short-to-medium term, while opportunities in value-added products and new market segments would enable manufacturers to gain premium pricing. The Sector's risk and opportunity landscape is summarised below.

## INDUSTRY RISK AND OPPORTUNITY LANDSCAPE

### ⊖ Exchange rate volatility

The Sri Lankan Rupee is expected to appreciate further over the short-term before decelerating and stabilising towards the latter part of the year. In the near term, this is expected to impact revenue, profitability and global competitiveness.

#### Response

Proactive monitoring of exchange rate trends

### ⊖ Talent migration

The exodus of talent from the country in recent years has posed considerable challenges in attracting and retaining the tight talent.

#### Response

Investments in talent development and succession planning

### ⊖ Competition for raw materials

The gradual reduction in coconut crops, coupled with the persistent increase in demand has led to price pressure and disruptions to supply chains.

#### Response

Geographical diversification of raw material sources and backward integration

### + Digitalisation and digital transformation

Significant opportunities in driving operational efficiencies, risk mitigation and elevating the customer experience through technology-driven solutions.

#### Response

Exploring avenues to digitalise manufacturing process data, to drive real time reporting and better decision-making.

### +/- Sustainability as a competitive edge

Environmental and social considerations are increasingly featuring in customers' purchasing decisions, presenting both opportunities and risks.

#### Response

Leveraging sustainability as a competitive advantage to access new markets and customer segments

### Sustainability related risks and opportunities (SRRO)

#### Physical climate risk

Implications of adverse weather patterns on the coconut charcoal supply chain

< 1 year	Limited impact of weather on coconut charcoal -will not have a shortages in charcoal
1-5 years	More pronounced shortages in coconut charcoal leading to price escalations and volatility
>5 years	If mitigation measures are not adopted, climate change will lead to significant disruptions of the supply chain
Response	Diversification of raw material sources and support expansion of coconut triangle in Sri Lanka

### Shift to low-carbon economy

Increased stringency regulations relating to environmental implications and escalating customer demands on sustainability considerations

< 1 year	Necessitates focus on providing customers relevant sustainability information
1-5 years	Compliance to sustainability requirements Opportunity for growth in new energy arena
>5 years	Strong growth in energy storage solutions
Response	Embedding ESG in a strategic manner and increasing investments towards energy storage solutions

### Water availability

Sri Lanka has been ranked a water-stressed country and escalating implications of climate change are likely to drive further challenges

< 1 year	Limited impact albeit increased variability of weather patterns
1-5 years	If climate implications are not abated, shortages in water supply could impact production continuity
>5 years	Increase in water costs and disruptions to availability
Response	Continued monitoring of water usage and increase reliance on sustainable sources

## PURIFICATION

Despite potential external challenges, the Sector's investments in product development, people capabilities and digitalisation has positioned it in good stead to capture emerging opportunities. The Sector's priorities in the short, medium and long-term together with our targets are presented below:

FUTURE PLANS	
Short-term	Medium-to-long term
<ul style="list-style-type: none"> <li>Increase market share of value-added carbon portfolio</li> <li>Increased penetration in markets with high potential</li> <li>Expand regional manufacturing presence</li> <li>Digital transformation to facilitate data-driven decision making and increased efficiencies</li> <li>Backward integration</li> </ul>	<ul style="list-style-type: none"> <li>Re-engineer and automate manufacturing systems to improve efficiency</li> <li>Pursuit of ESG aspirations</li> <li>Expanding regional presence of water purification business</li> <li>Explore opportunities on entering the activated Carbon solution market</li> </ul>
<b>Short-term goals</b> ROE>10% Borrowings<50% of capital employed	<b>Medium-to-long term goals</b> ROE>12%      Gearing<55% Dividend to net profit of 40%

### SASB DISCLOSURES

Chemicals- Sustainability Disclosure Topics & Accounting Metrics

TOPIC	ACCOUNTING METRIC	UNIT OF MEASURE	CODE	DISCLOSURE/Pg. reference
<b>Management of Chemicals in Product</b>	(1) Gross global Scope 1 emissions. (2) Percentage covered under emissions-limiting regulations.	Kg CO2-eq Mn %	RT-CH-110a.1	10,903,000 Kg CO2-eq Not applicable

# TEXTILES

## SECTOR OVERVIEW

The Group's Textile Sector, represented by Hayleys Fabric PLC and South Asia Textiles Limited is the pioneering and largest textile manufacturer in the country. The Sector manufactures and supplies world-class fabric to leading global fashion brands and has built a strong global reputation for sustainability, quality and innovation. In addition to the conventional cotton range, the Sector specialises in the manufacture of synthetic, knitting fabric suitable for lingerie and casual/lounge wear, with over 50% of its manufacturing capacity comprising synthetic fabric. The Sector was also the first Sri Lankan fabric mill to launch its own brand, 'INNO'- enabling it to position itself as a niche supplier of fashion-forward, sustainable, value-added fabric.

### CONTRIBUTION TO GROUP

**HAYLEYS FABRICS PLC**

Fabric manufacturer

**Contribution to Sector**  
Revenue: 61%  
PBT: 81%

**Performance 2023/24**  
Revenue: -18% growth  
PBT: 7% growth

**SOUTH ASIA TEXTILES**

Fabric manufacturer, acquired by Hayleys Fabric in April 2021

**Contribution to Sector**  
Revenue: 39%  
PBT: 19%

**Performance 2023/24**  
Revenue: -20% growth  
PBT: 28% growth

### OPERATING ENVIRONMENT

The global fashion and apparel industry experienced deepening and varied challenges during the year, against the backdrop of economic

uncertainty, geopolitical tensions and shifting consumer priorities. Many global brands deferred orders given persistent inflation, divergent economic growth and weak consumer confidence. Geopolitical tensions in Europe and the Middle East and resultant disruptions to key maritime routes have led to vessel diversions. Subsequent shipping delays coupled with the global brands' shorter-term forecasts and orders pushed fabric manufacturers to further reduce lead times to minimise disruptions to supply chains. In Sri Lanka, while macro-economic conditions stabilised on comparison to previous year, manufacturers and exporters were adversely affected by escalating energy costs, the appreciation of the Sri Lankan Rupee towards the latter part of the year and the higher tax regime. As a result, Sri Lanka's total garment exports (in dollar terms) contracted by 18% during the year, although the industry maintained its track record of quality and timely delivery in international markets. However, the demand outlook remains favourable over the short-to-medium term, as evidenced by the recovery of volumes from April 2024 onwards.

## COMPETITIVE POSITION

The Sector caters to **high-end global fashion brands** such as Nike, Calvin Klein, Tommy Hilfiger and Victoria's Secret among others

Globally recognised for its strong **sustainability focus**, with numerous innovations centered on circularity and resource efficiency

Manufacturing capabilities include Knitting, Dyeing, Printing, Brushing, Sueding and Finishing, with the ability to **manufacture an array of** varieties of tailor-made natural, synthetic and weft-knit fabrics.

The Sector's reputation for quality and sustainability is backed by an **array of international certifications** in environmental management, energy health and safety and responsible business

**34%**  
Increase in petrol costs

**8%**  
Appreciation of  
Sri Lanka Rupee

**2 - 4%**  
Growth outlook for  
fashion industry

### Summary of external drivers

	Driver	Driver Significance of impact	Implications on Sector
Economic and geo-political context	Global geopolitical dynamics and resultant uncertainty	H	- Implications on volumes with global brands deferring orders - Shipping delays and escalation in freight rates
	Appreciation of Sri Lankan Rupee	H	- Reduced competitiveness in the global market and adverse implications on volume and market share
	Reduction in interest rates	H	+ Reduction in borrowing costs
	Increase in energy costs	M	- Adverse impact on cost of production and profitability margins
Industry context	Increased demand uncertainty	M	- Necessitates revisiting pricing, product and manufacturing strategies
	Rapidly evolving consumer demand patterns	H	- Necessitates increased agility and flexibility of manufacturing processes
	Digitalisation and AI in enhancing creatives and processes	H	+ Significant opportunities to drive innovation and agility
Sustainability context	Sustainable fashion as a competitive edge	H	+ Opportunity to strengthen competitive position by catering to emerging requirements + Cost efficiencies
	Implications of climate change	M	- Accelerated climate ambitions across the value chain and need to tackle emissions and build resilience
	Shifting customer preferences towards prolonging use and smaller wardrobes	M	- Potential implications of demand and business growth

H-High, M-Medium, L-Low. Brown circle represents adverse effect while yellow circle represents positive affect

### STRATEGY AND INTEGRATED PERFORMANCE REVIEW

Strategic foresight in building agility enabled the Sector to demonstrate remarkable resilience in a challenging year, delivering improvements in both top and bottom lines. Subdued demand together with the appreciation of the Sri Lankan Rupee resulted in the Revenue declining by 18% to Rs.49.17 bn. The Sector leveraged its agile manufacturing processes to ensure timely delivery to customers. Relentless focus on refining processes and improving production planning and scheduling enabled the Sector to considerably reduce its lead time, which in turn mitigated the adverse impacts of shipping delays for both apparel manufacturing customers and the global brands. Proactive negotiations with yarn suppliers and cost efficiencies delivered through a focus on sustainability, enabled the Sector to widen its profit margins during the year. Resultantly, the Sector's Profit Before Tax and Profit After Tax increased by 23% and 6 - fold to Rs. 3.72 mn and Rs. 2.49 mn respectively during the year.

### SECTOR FINANCIAL PERFORMANCE

## TEXTILES

### INTEGRATED PERFORMANCE

The Sector’s continued success in recent years has been underpinned by its brand-focused strategy, which allowed it to outperform local and regional competitors. In addition to enabling resilient demand conditions, these long-standing relationships with Tier 1 suppliers have facilitated collaborations on product developments and ongoing transfer of knowledge which in turn allowed us to strengthen relationships with these global brands.

Meanwhile, the Sector’s product strategy in recent years has centered on pivoting from basic, conventional cotton-based fabrics to premium, value-added products both in natural and synthetic fabrics. The Sector has made significant strides in building its range of synthetic fabric, led by its own brand INNO which continued to deliver commendable growth during the year under review. Continued investments are also made in strengthening manufacturing and digital capabilities. Capital expenditure for the year amounted to Rs. 1.25 bn comprising investments in new dye machines and versatile technology.

While employee retention remains an industry-wide challenge, the Sector’s efforts to consistently enhance its employee value proposition continues

to bear fruit. Continued investments were made in upskilling employees, driving employee engagement and ensuring a safe and healthy working environment. In a unique female empowerment initiative, the Sector operates a knitting plant that is powered almost entirely by females, thereby increasing employability and driving socio-economic empowerment among these impoverished communities.

Hayleys Fabric is globally recognised as a pioneer and leader in sustainability in the industry, having gained international recognition for its environmentally conscious, responsible and ethical business practices. The Sector’s remarkable achievements in sustainability (some of which are listed in the table below) have been supported by its relationships with global fashion brands, which has paved way for ongoing collaborations on sustainability products and the transition to a low-carbon operation through ambitious targets. During the year, in addition to winning several awards for innovation at the ISPO (Germany) Textrends Awards Fall/ Winter 2025/26, the Sector also won the prestigious Best SDG Impact Award for Commitment to

Sustainability at the ESG World Summit and Awards 2023.

### ESG IN ACTION

While sustainability has always been deeply ingrained in Hayleys Fabric, during the year, several measures were taken to strengthen ESG governance, strategy and risk management-aligned with the overall ESG vision of the Hayleys Group. Accordingly, the following interventions were made during the year:

- Establishment of Sector ESG Steering Committee
- Strengthen ESG risk assessment and integration with existing risk processes
- Obtained verification of emission targets under the Science-based-targets-initiative
- Monthly and quarterly monitoring and reporting of performance against ESG targets with the participation of relevant personnel from manufacturing facilities
- Third-party verification of GHG emissions (2023/24)

HOW WE DEFINE VALUE

HOW WE CREATE VALUE

Strategic priorities	Value-added product focus	Brand centered strategy	ESG as a strategic differentiator
<b>Resource Allocation</b>	<p><b>Rs. 51 mn</b> Investment in R&amp;D Collaborations with global brands</p>	<p>Global fashion brands Proactive engagement through sales and marketing teams</p>	<p><b>16,995</b> Training hours focused on sustainability</p>
<b>Strategic KPI/ Pre-financials</b>	<p><b>445</b> New products/variants developed</p> <p><b>289</b> Products in the pipeline</p>	<p><b>16,413 MT</b> Volume</p>	<p><b>19%</b> Reduction in carbon footprint</p> <p><b>4%</b> Reduction in water footprint</p> <p><b>43</b> Sustainable innovations launched</p>

HOW WE DELIVER AND PRESERVE VALUE

- Total economic value generated during the year expanded by 33%
- Payments to employees increased by 7% during the year
- Value generated to Governments amounted to Rs. 1.95 bn (accounting for 16% of value)
- Payments to lenders of capital increased by 16%
- Value retained in the business for future investment amounted to 24% compared to 18% the previous year

## ESG HIGHLIGHTS

### CLIMATE ACTION

- One of the four companies in Sri Lanka to obtain verification of its emission targets under the Science-Based-Targets-Initiative
- Only fabric manufacturer in Sri Lanka to obtain ISO 50,001 certification
- Largest private sector rooftop solar system (4.5 MW) in Sri Lanka
- Sri Lanka's first floating solar system

	2024	2023	% y-o-y	Target
Energy consumption (TJ)	1,477	1,500	(2)	Aligned to SBTi
Carbon footprint (tCO <sub>2</sub> e)	43,953	53,998	(19)	
Renewable energy generation(Gjs)	1,075,286	1,024,075	5	

### CHEMICAL MANAGEMENT

Committed to the Zero Discharge of Hazardous Chemicals global initiative

**100%**

Chemicals and dyes certified as ZDHC Level 1

**92%**

Chemicals and dyes certified as ZDHC Level 3

### EMBEDDING CIRCULARITY

- Procurement of recycled yarn obtained through recycling PET bottles
- Recycled polyester yarn procured from reputed suppliers

Partnership with the University of Moratuwa through funding a research initiative to upcycle waste (polythene, waste fabric and sludge) to manufacture a fibre sheet

### PRESERVING BIODIVERSITY

- 9 acre thriving biodiversity park established
- Elevated walkways for visitors and school children to build awareness
- 146 species of fauna and 149 species of flora
- 25 acres of fruit and vegetable cultivation using sustainable agriculture practices

### SUSTAINABLE INNOVATION

#### Warna by Mahogany:

Organic natural dye made from extracting dye in-house from furniture industry waste

#### Eco Stretch:

Eco-friendly fabric for sportswear

**PROSPECTS AND PLANS**

The industry is expected to be characterised by uncertainty and volatility over the short-term given divergent economic growth and concerns on geopolitical tensions. Manufacturers will be required to strike a balance between managing uncertainties and seizing opportunities through building agile and adaptable operating models, which can swiftly adapt to dynamic changes in demand and other external factors. The Sector’s short, medium and long-term risks and opportunities are summarised below:

**INDUSTRY RISK AND OPPORTUNITY LANDSCAPE**

**+/- Rapid pace of change and shorter lead times**

With customer demands evolving at an unprecedented rate, fashion retailers are focusing on getting new styles to customers at record pace, necessitating shorter lead times across the industry

**Response**

The Sector will be required to invest in automation and process efficiencies to achieve continued improvements in lead time

**- Exchange rate volatility**

The Sri Lankan Rupee is expected to appreciate further over the short-term before decelerating and stabilising towards the latter part of the year. As an exporter, the appreciation of the Rupee will affect global competitiveness as well as revenue and profitability margins

**Response**

Proactive monitoring of exchange rate trends

Grow volumes in value-added, relatively price inelastic segments

**+ Growing role of digital**

Generative AI is likely to feature prominently in the industry value chains as it is used to enhance human creatives and drive increased efficiencies

**Response**

Pursuing opportunities in digital transformation including data driven decision making, production planning and scheduling among others.

**+/- Shifts in consumption patterns**

Key consumer trends in fashion include hybrid clothes (such as the athleisure segment), smaller capsule wardrobes, reselling platforms and increased focus on social and environmental considerations.

**Response**

Flexing strategies and adapting operating model through leveraging insights gained from our network of global retail brands.

**Sustainability related risks and opportunities (SRRO)**

**Transition risk- shifting customer demands**

Social and environmental considerations of businesses are gaining higher importance in purchasing decisions coconut husk

<b>&lt; 1 year</b>	Sustainability is a competitive edge in accessing new markets and commanding premium pricing
<b>1-5 years</b>	As retailers seek to cut emissions along their supply chain, manufacturers will be compelled to adopt measures to tackle emissions
<b>&gt;5 years</b>	Businesses who do are unable to comply with these evolving requirements will be challenged to survive
<b>Response</b>	Strategic integration of ESG across the business

**Increasingly stringent regulations**

Increased stringency of regulations particularly from the EU are reshaping the operations of manufacturers

<b>&lt; 1 year</b>	Evolving regulations on carbon taxes, chemical management, emission reduction and sustainability reporting
<b>1-5 years</b>	
<b>&gt;5 years</b>	Sustainability practices across the industry will be standardised and non-complying organisations will cease to exist
<b>Response</b>	Embedding ESG in a strategic manner, with due consideration to all emerging regulations

**Impact of water availability on cotton**

Cotton is susceptible to variability in rainfall and temperature patterns

<b>&lt; 1 year</b>	Limited impact albeit increased variability of weather patterns
<b>1-5 years</b>	Volatility of supply and pricing given the wide-ranging impacts of the climate emergency
<b>&gt;5 years</b>	Frequent disruptions to raw material procurement and implications of continuity of production
<b>Response</b>	Research and development efforts focused on sustainable innovation Diversification of raw material sources

## CONSTRUCTION MATERIALS

### SECTOR OVERVIEW

The Sector is represented by Alumex PLC, Sri Lanka's pioneering and largest manufacturer of aluminium extrusions. With a market share of over 46%, the Sector has built a strong reputation for product design, quality and innovation. The Sector's world-class design and manufacturing capabilities has also enabled it to enter overseas markets and Alumex is currently the largest Sri Lankan exporter of aluminium extrusions.

**5%**  
Decline in global Aluminium prices

**21%**  
Contraction in construction industry

### OPERATING ENVIRONMENT

The Sector's performance is correlated to the country's construction industry, which experienced yet another year of multiple challenges. Construction industry activity contracted by over 21% in 2023 reflecting protracted impacts of the country's economic crisis of 2022 which saw sharp depreciation of the Sri Lankan Rupee, subdued consumer sentiments inflationary pressures and tightening monetary policy.

### CONTRIBUTION TO GROUP

Meanwhile, construction sector value chains remained cash strapped for most part of the year, although improving by December 2023 following a liquidity injection by the government. The cost of construction materials remained elevated for most part of the year, although easing from the unprecedented highs of 2022 as import restrictions were eased. Accordingly, aluminium prices in Sri Lanka declined by 8% during the reviewed period, while global prices eased off around 5% to end the year at around USD2,200/MT. The outlook, however, remains promising for 2024/25, as evidenced by the gradual pick up of demand and volumes in the last quarter of the financial year.

### COMPETITIVE POSITION

A host of **local and international certifications** including QMEA, QUALANOD, QUALICOAT and several ISO Standards

Manufacturing rights for 8 globally renowned **proprietary systems for Aluminium windows**

**Strong presence in South Asia** and pursuing growth in high-value added markets in Europe and North America, Australia and New Zealand

As the **largest manufacturer in Sri Lanka** the Sector has an annual capacity of 22,0000 MTs. Infrastructure includes

- Extrusion, melting, powder coating and anodising plants
- 9 distribution centres
- 13 Lumin Concept centres

### Summary of external drivers

	Driver	Driver Significance of impact	Implications on Sector
Economic and geo-political context	Contraction of the Sri Lankan economy	H	- Weak consumer sentiments - Curtailment of discretionary expenses amidst reduced purchasing power
	Inflationary pressures	M	- Relatively high (albeit easing) cost of construction materials
	Reduction in interest rates	M	+ Reduction in borrowing costs
	Volatile and uncertain global construction landscape	M	- Subdued demand from export markets
Industry context	Government efforts to revive sector through liquidity injections	H	+ Tepid recovery of demand towards the latter part of the financial year
	Strong growth in Sri Lanka's solar market	H	+ Increased demand for aluminium components required for solar installations
	Long-term trend of increased sophistication of customers	M	+ Customers are increasingly placing more value on design, durability and aesthetics
Sustainability context	Increasing ESG consciousness along the construction value chain	M	- Push towards decarbonising value chains
	Increasing stringency of environmental regulations	M	- Regulations such as the Carbon Border Adjustment (CBAM) mechanism will reduce global competitiveness unless efforts are made to cut emissions

H-High, M-Medium, L-Low. Brown circle represents adverse effect while yellow circle represents positive affect

### STRATEGY AND INTEGRATED PERFORMANCE REVIEW

The Sector's performance inevitably reflected the dynamics of the country's construction sector. However, strategic focus on exports together with relentless pursuit of operational efficiencies and a gradual recovery in demand during the last quarter of the year enabled the Sector to post turnaround during the year. Despite the conditions that prevailed, the Sector achieved a commendable volume growth of 17%, reflecting continued growth in exports as well as complementary demand stemming from the growth in the solar segment. Capacity utilisation levels improved

marginally from 27% the year before to 30%. Despite volume growth Revenue declined by 2% to Rs. 9.94 bn increased by 8% to Rs. 10.98 bn, as the Sector passed on the benefit of cost reduction to customers in an increasingly price conscious and price competitive market. Resultantly, the Sector's operating profit margins also narrowed to 10% from 12% the previous year. Ongoing focus on cost efficiencies continued to accrue benefits, with the Sector generating cost savings of approximately Rs. 271.2 mn through over 12 cost reduction projects across the organisation. Overall, the Sector generated a Profit Before Tax of Rs. 231.72 mn compared

### SECTOR FINANCIAL PERFORMANCE

## CONSTRUCTION MATERIALS

to Rs. 153.54 mn the previous year, while Profit After tax amounted to Rs. 186.07 mn (2022/23: Rs. -10.21 mn)

Growing exports continued to be a strategic focus for the Sector as it pursued new customer acquisition and deeper relationships with existing customers in key markets in the USA and European Region. Accordingly, the Sector achieved a 21% growth in export volumes during the year, contributing approximately 35% to total Revenue. The Sector intends to double contributions from exports over the short-to-medium term, leveraging its design and manufacturing capabilities to drive increased penetration of value-added products.

Over the years, Alumex has built a strong reputation for innovation introducing several 'firsts' to the Sri Lankan industry. The year under review, saw the addition of several value-added products catering to export markets, including fences, balconies and artificial walls among others. The Sector also expanded offerings under the Dwellings range (the do-it-yourself range for the domestic market) while also launching several products catering to the industrial segment. Commendable growth was also seen in the aluminium kitchen cabinets market, given its durability and sustainability compared to timber solutions.

The Sector's people strategy for the year centered on improving succession planning and building leadership capabilities, particularly given the exodus of middle management employees due to migration. Employee turnover amounted to 18% during the year, while attraction remained a challenge given the country's

talent migration as well as industry dynamics. Employee engagement also remained a priority, with considerable investments directed towards recreation and well-being.

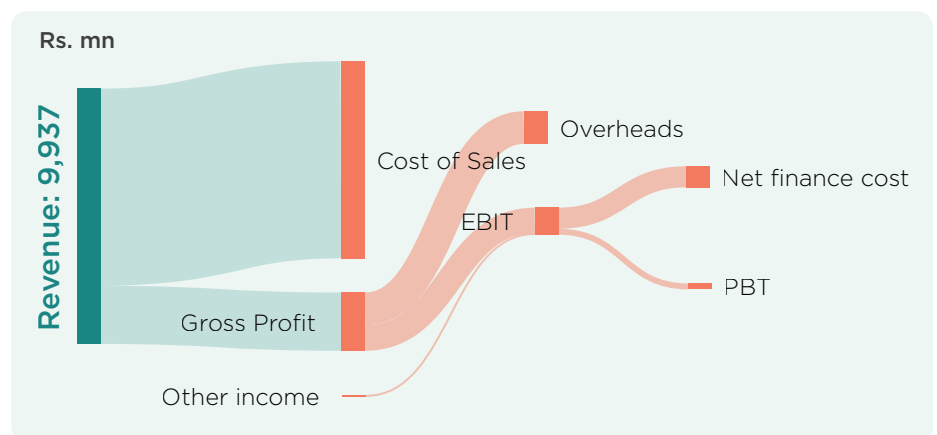

Alumex is a catalyst for skill development across the aluminium value chain, delivering training sessions to diverse industry stakeholders including fabricators, dealers, engineers and students of the Vocational Training Authority and NAITA among others (refer to table below for further information). Alumex also entered a MOU with the Department of Technical Education and Training during the year to develop a state-of-the-art technical aluminium fabrication training center, with the objective of uplifting the industry. During the year, the Sector also sought to develop a new channel of fabricators for the Dwellings range, thereby facilitating economic opportunity and empowerment of nearly 150 fabricators across the island.

### ESG IN ACTION

The Sector's ESG aspirations are aligned to the Hayleys Lifecode as well

as the industry-specific requirements of the Aluminium Stewardship Initiative (ASI)- a global collaboration which aims to foster responsible production, sourcing and stewardship of aluminium. The Sector's ESG agenda centers on curtailing emissions through energy efficiencies, reducing reliance on virgin aluminium and developing the aluminium ecosystem in Sri Lanka. Key developments in integrating ESG are listed below:

- Establishment of Sector ESG Steering Committee
- Commence formulation of the Sector's ESG Roadmap, which will be launched in 2024/25
- Strengthen ESG risk assessment and integration with existing risk processes
- Monthly and quarterly monitoring and reporting of performance against ESG targets with the participation of relevant personnel from manufacturing facilities
- Third-party verification of GHG emissions (2022/23)

### ESG HIGHLIGHTS

#### CLIMATE ACTION AND ENERGY EFFICIENCY

While the use of recycled aluminium is expected to drive a reduction in the Sector's Scope 3 emissions, the reduction in direct emissions during the year has been supported by,

- Modifications to rectifiers to enable higher energy efficiency
- Replacing existing compressors with new screw type models which enable considerable energy savings
- Exploring alternative fuel sources to diesel

	2024	2023	Y-o-y
Energy consumption (GJ)	81,117	82,654	-2%
Carbon footprint (tCO2e)	9,519	8,880	+7%

#### Fabricator training through Alumex Training School

Established in 1998, the Training School provides both in-house and offsite fabricator training courses free of charge to diverse industry stakeholders with the aim of,

- Developing skills of apprentices, fabricators and consultants
- Raise awareness on modern methods in fabrication
- Introduction to appropriate equipment, accessories and safety

#### Driving circularity

**61%**

Reliance on recycled aluminium

**Target: 80%**

The Sector increased the use of used beverage cans through 50 collection points in the Western Province

**181 MT**

Use of beverage cans

#### Employee value creation

The Sector continues to invest in long-term CSR and community development projects including the following:

- Give the Gift of Sight campaign 2023 with Helpage Sri Lanka: 260 cataract surgeries
- Book and stationary donations to impoverished schools
- Reforestation Project at Rathambale Kanishta Vidyalaya in partnership with the Department of Wildlife Conservation

**PROSPECTS AND PLANS**

Despite the short-term volatilities Sri Lanka’s construction sector is poised for recovery in 2024/25, supported by the stabilising macro-economic fundamentals, improved tourism earnings and conducive interest rates. With the recovery of private sector investments in the construction industry, we are optimistic that the residential and industrial segments will record gradual growth over the next few months. Key risks and opportunities that are likely to shape the industry landscape over the short, medium and long-term are given below:

**INDUSTRY RISK AND OPPORTUNITY LANDSCAPE**

**+ Stabilising macro-economic conditions**

The gradual recovery of the economy and tapering inflation is expected to support the recovery of residential projects

**Response**

Leverage on brand, customer relationships and customer touchpoints to offer attractive pricing and innovative solutions catering to emerging demands

**+ Commencement of large-scale projects**

Most suspended large-scale projects are expected to recommence in the near term, following more conducive macro-economic conditions

**Response**

Leverage on brand, customer relationships and customer touchpoints to offer attractive pricing and innovative solutions catering to emerging demands

**+ Demand for alternatives to wood fixtures**

With customers increasing preference for sustainable, lightweight, corrosion free and durable solutions, the demand for alternatives to wood fixtures is expected to record continued growth

**Response**

Widen product range beyond conventional applications to new segments such as kitchen cabinets and wardrobes

**+ Customer demand for convenience**

Busy lifestyles and shortage of construction sector labour is fuelling demand for DIY solutions

**Response**

Expansion of product offerings under the Dwelling brand

**Sustainability related risks and opportunities (SRRO)**

**Industry decarbonisation**

The Aluminium Sector is a significant emitter of greenhouse gas emissions and the regulations pertaining to tackling emissions along the value chain is evolving rapidly

<b>&lt; 1 year</b>	Transitional phase of CBAM with exporters to EU expected to commence reporting
<b>1-5 years</b>	Taxes correlated to the carbon emissions of exports to EU could reduce competitiveness if emissions are unabated
<b>&gt;5 years</b>	Businesses who are unable to comply with these evolving requirements will be challenged to survive
<b>Response</b>	Widening the scope of the carbon footprint computation to include Scope 3 emissions and formulating a roadmap for curtailing emissions

**Sustainability as a competitive edge**

Strategic integration of sustainability presents significant opportunities for market access, particularly in the EU region

<b>&lt; 1 year</b>	Limited opportunities in the short-term, although demand patterns are showing signs of shifting
<b>1-5 years</b>	More pronounced demand for sustainable products in line with more stringent environmental regulations from the EU
<b>&gt;5 years</b>	Organisations with weak sustainability practices are likely to face severe competition and be challenged to survive
<b>Response</b>	Formulation of the Sector’s ESG Roadmap to identify avenues for strategic integration

**Sri Lanka’s shift to renewable energy**

According to Sri Lanka’s Net Zero plan, the country is gearing to scale up renewable energy to be 70% of total energy consumption by 2030

<b>&lt; 1 year</b>	Gradual increase in fossil-fuel based energy prices and resultant shift to solar power
<b>1-5 years</b>	Anticipated price revisions to fossil fuel costs to drive increased investments in renewable energy.
<b>&gt;5 years</b>	Energy intensive industries are likely to shift entirely to renewable energy, generating both economic and environmental benefits
<b>Response</b>	Driving energy efficiency initiatives as a strategic focus on pursuing investments in solar and other renewable energy sources

## CONSTRUCTION MATERIALS

The Sector remains optimistic on the medium-to-long term growth potential of the country's construction sector and given current capacity utilisation levels of around 30%, Alumex is well positioned to capitalise on the release of pent-up demand. The Sector will seek to further strengthen its leadership position in the local market, while driving aggressive penetration in exports.

FUTURE PLANS	
Short-term	Medium-to-long term
<ul style="list-style-type: none"> <li>Develop existing and new export markets with focus on US, Europe and Oceania</li> <li>Strengthen value added propositions in export markets</li> <li>Grow solar market in both residential and industrial segments</li> <li>Increase contributions from premium products such as satin finish and die cast</li> </ul>	<ul style="list-style-type: none"> <li>Develop customers across 5 continents and set up sales offices in key markets</li> <li>Increase dealership network to drive regional penetration</li> <li>Widen brand portfolio to include premium brands</li> <li>Development of fabricators to manage proprietary systems</li> </ul>
<b>Short-term goals</b> ROE>15%	<b>Medium-to-long term goals</b> ROCE>30% Gearing< 40%

# PLANTATIONS

## SECTOR OVERVIEW

As one of the country's largest plantation groups, the three RPCs under Hayleys, collectively cultivate over 13,800 hectares of tea and rubber across 55 estates. The Hayleys Plantation companies have played a key role in driving Sri Lanka's tea sector forward, redefining industry standards in sustainability, innovation and quality. The long-term viability of Sri Lanka's tea sector is being threatened by rising costs, intensifying implications of climate change and increased volatility of prices. At this critical juncture, the Hayleys Plantation companies are at the forefront of propelling the industry's transformation to a modern, dynamic and sophisticated industry, in which stakeholder value is equitably distributed across the entire value chain.

## CONTRIBUTION TO GROUP

### KELANI VALLEY PLANTATIONS PLC

Produces of tea, and rubber in 25 estates

**Contribution to Sector**  
Revenue: 40%  
PBT: 37%

**Performance 2023/24**  
Revenue: 12% decline  
PBT: 53% decline

### TALAWAKELLE TEA ESTATES PLC

Produces tea in 16 estates

**Contribution to Sector**  
Revenue: 42%  
PBT: 57%

**Performance 2023/24**  
Revenue: 5% decline  
PBT: 36% decline

### HORANA PLANTATIONS PLC

Produces, tea, rubber, oil palm and coffee in 14 estates

**Contribution to Sector**  
Revenue: 18%  
PBT: 6%

Following its acquisition on the 31st of March 2023, Horana Plantations has been consolidated to this year's performance. From FY 2023/24, Mabroc Teas and Martin Bauer Hayleys (which were previously categorised in the Plantations Sector) have been classified as a separate sector under Tea Exports. Kindly refer to page 235 for the Tea Exports Sector Review.

## OPERATING ENVIRONMENT

Sri Lanka's tea production increased marginally to 256.04 mn Kgs in 2023 as the industry struggled to recover

from detrimental policy decisions and worsening implications of climate change. Meanwhile, tea prices (in rupee terms) declined by 7% in 2023, in view of the appreciation of the Sri Lankan Rupee – a trend which persisted in the first quarter of 2024. The surge in chemical fertilizer prices, coupled with significant variability in rainfall and persistent labour shortages continue to affect the long-term sustainability of the country's tea industry. While prices commanded at the Colombo Tea Auction remained elevated in comparison to counterparts, Sri Lanka's international competitiveness is being threatened by high cost of production, relatively low yields and inadequate plucking. Changing aspirations of the younger generations continue to drive increased labour migration from the estate sector, resulting in significant labour shortages.

## COMPETITIVE POSITION

Sri Lanka's largest plantation sector group, collectively accounting for **4.6% and 4.1% of the country's tea and rubber cultivation**

**Consistently ranking as the top 3 prices takers in the Colombo Tea Auction**, the three companies have continued to command a premium over national sales average (NSA)

Among the most awarded companies in Sri Lanka with the Sector winning a total of **119 awards** during the year

Benchmark of quality as the most **certified plantation companies** in Sri Lanka, which includes 38 certifications and 14 management systems across all three RPCs

Meanwhile, Sri Lanka's rubber industry witnessed yet another year of considerable challenges with total production falling by 10% in view of excessive rain and pest attacks. These challenges were further compounded by the appreciation of the Sri Lankan Rupee which led to a 6% decline in rupee prices.

**+2%**

Growth in Sri Lanka's tea production

**-18%**

Decline in tea prices (in rupee terms)

**-10%**

Decline in Sri Lanka's rubber production

### Summary of external drivers

	Driver	Driver Significance of impact	Implications on Sector
Economic and geo-political context	Appreciation of the Sri Lankan Rupee	H	- Lower prices commanded by exporters in Rupee terms
	Increase in energy costs	M	- Adverse implications on cost of production
	Global geo political tensions	H	- Decline in export volumes to both Russia and Ukraine, which are among Sri Lanka's largest tea markets
Industry context	Persistent labour shortages due to migration from estates	H	- Inadequate plucking and resultant loss in crop
	High cost of labour	H	- Impact on profitability margins - Adverse implications on global competitiveness over the long-term
	Relatively low labour productivity	M	+ Increased cost of compliance - Adverse impacts on cost of production
	Global surge in fertilizer prices	M	- Implications on profitability margins
Sustainability context	Increasing focus on health and well-being	M	+ Global recognition of tea as a beverage with significant health benefits
	Escalating implications of climate change including variability rainfall patterns and temperature	M	- Implications on quality, yield and quantity of tea

H-High, M-Medium, L-Low. Brown circle represents adverse effect while yellow circle represents positive affect

### STRATEGY AND INTEGRATED PERFORMANCE REVIEW

The Sector adopted a strategic reset during the year, with the aim of driving transforming its plantation management approach to dynamic and holistic value-added systems management. Accordingly, strategic focus was placed on creating social business enterprises through more equitable remuneration models, regenerative agriculture and data-driven decision making. While these interventions entail long-term outcomes, the Sector's results for the year attest to the significance of these actions; the Sector generated a Revenue growth of 13% to Rs. 18.13 bn during the year reflecting the consolidation of Horana Plantations PLC. Production volumes grew by 3% compared to the industry growth of 2%. Sector profitability was inevitably impacted by the fall in prices and the appreciation of the Sri Lankan Rupee, which resulted in Profit Before Tax and Profit After Tax declining by a respective 34% and 40% during the year.

### SECTOR FINANCIAL PERFORMANCE

# PLANTATIONS

## INTEGRATED PERFORMANCE

The critical challenge of labour shortages in the industry is driven by the perception of low dignity associated with working in estates. In addressing this issue, the Hayleys Plantations have sought to dismantle the archaic daily-wage based system through introducing an innovative revenue share model, aimed at creating social business enterprises within the estates. Offering increased flexibility in working hours and directly linked to productivity, the new model enables workers to multiply their earnings through an entrepreneurial model. Meanwhile the Sector continues to invest in strengthening engagement between estate workers and the management teams, building camaraderie and driving goal congruence across the business. The Sector invested a total of Rs. 30.41 mn in training and development initiatives during the year, translating to total training hours of over 123,000. It is noteworthy that all three companies with the Sector have obtained the 'Great Place to Work' certification, attesting to the strength of its employee value propositions.

Regenerative agriculture is a key pillar of the Sector's strategy and is aimed at revitalising relationships between ecosystems, soil, human and crops. Key developments during the year included expanding the coverage of manual weeding to generate compost, resulting in the Sector increasing its

organic fertilizer, thereby improving soil health through the use of biochar and organic soil enrichment, biodiversity assessments (refer table below) and preservation of natural ecosystems. The Sector is also actively pursuing crop diversification, with increased investments being deployed towards expanding coconut and coffee production during the year.

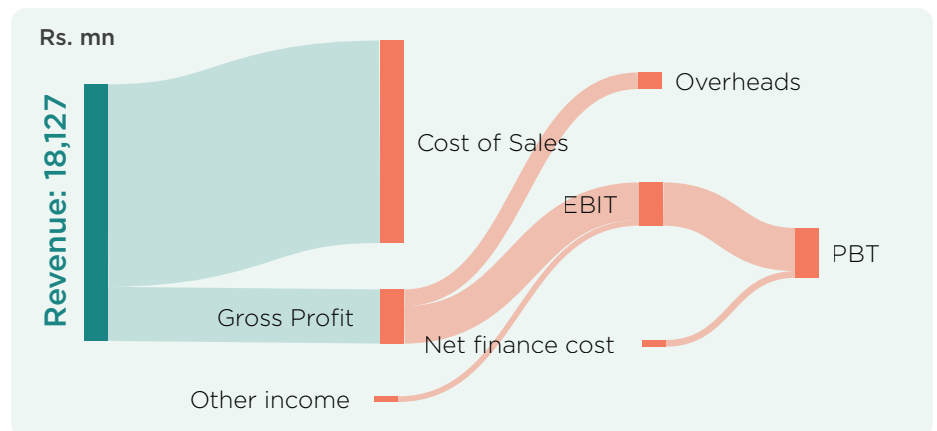

The Sector also continues to drive socio-economic empowerment in one of the country's most vulnerable communities through ongoing investments in its unique and holistic initiative 'Home for Every Plantation Worker' programme. Investment in this programme amounted to Rs. 313 mn during the year with a total beneficiary base of more than 411,000.

As an industry pioneer and leader in plantation sector sustainability, the Sector continued to be recognised both locally and internationally for excellence in social and environmental commitment. In a landmark achievement, TTE was recognised with the prestigious 'Best Corporate Citizen Sustainability Award 2023', sweeping the awards with the highest-ever number of wins by one company and marking the first-time in history in which a plantation company won the flagship award. TTE was also recognised as Sri Lanka's sole representative in the UN Global Company-Accenture SDG Stocktake Report in 2023.

## ESG IN ACTION

As an industry that is deeply interconnected to both the natural environment and surrounding communities, sustainability has always been part of the Sector's DNA supporting its social license to operate and commercial viability. The Sector's commitment to embedding ESG into its' operations and strategy has been recognised through numerous accolades, certifications and recognition. During the year, the Sector focused on strengthening its sustainability governance and risk management practices and key developments during the year are listed below:

- Establishment of Sector ESG Steering Committee with representation from all 3 RPCs
- Strengthen ESG risk assessment and integration with existing risk processes
- Monthly and quarterly monitoring and reporting of performance against ESG targets with the participation of relevant personnel from manufacturing facilities
- Third-party verification of GHG emissions (2023/24)

HOW WE DEFINE VALUE

HOW WE CREATE VALUE

## ESG HIGHLIGHTS

### CLIMATE ACTION

- Increased reliance on biomass, hydro and solar power
- TTE and HPL have committed to the SBTi, with the former being the first plantation company in the world to obtain verification of its targets
- Sector's emission reduction agenda centers on the use of renewable energy and reducing dependence on chemical fertilizer

	2024	2023	Y-o-y	Target
Carbon footprint (tCO2e)	26,122	18,710	40	Based
Reliance on renewable energy (%)	84	75	9	on SBTi

### WOMEN IN LEADERSHIP

TTE launched a historical initiative to empower women to achieve career progression in the plantations sector.

**24 females**

promoted as field supervisors

**28 females**

harvesters recognised as team leaders

### WORLD'S FIRST INTERNATIONAL PLANTATIONS SUSTAINABILITY SUMMIT

#### Towards Sustainable Plantations - Reimagined | Redesigned | Resilient

The Summit marked a collaborative effort between over 700 representatives from local and international academia, plantation operators, policy makers and others on the integration of biosphere, geosphere, social and economic elements in achieving long-term sustainability and equitable value sharing in the Plantations Sector

### ADDRESSING PERIOD POVERTY

In a unique initiative aimed at addressing period poverty and driving economic empowerment, HPL set up women-led facility to manufacture reusable sanitary pads. The initiative has provided employment to 6 females from the community, including those with disabilities who are engaged in packaging.

**PROSPECTS AND PLANS**

The short-to-medium term outlook of the country's tea industry remains somewhat volatile at this juncture, reflecting global headwinds including geopolitical tensions and logistical disruptions as well domestic challenges including labour shortages, declining yields and escalating cost of production. Despite these challenges, the strategic foresight of Hayleys Plantations and interventions made to modernise and transform our estate operations is expected to augur well for the Group, enabling all three RPCs to maintain their standing as the most profitable, sustainable and high-quality producers of tea in Sri Lanka. The short, medium and long-term outlook and plans in place to respond to the emerging risks and opportunities are presented below:

**INDUSTRY RISK AND OPPORTUNITY LANDSCAPE**

**⊖ Labour shortages in the plantation industry**

Labour shortages in the plantation industry, driven by the changing aspirations of the younger demographic continue to pose a key challenge for the industry, resulting in high-turnover, low labour productivity and inadequate plucking.

**Response**

Transforming remuneration models to build an empowered, entrepreneurial workforce.

**⊖ Escalating cost of production**

Sri Lanka's cost of production continues to be higher than competing producers due to low labour productivity and declining yields, which over the medium to long-term is likely to affect the country's competitiveness in the international market

**Response**

Regenerative agricultural models focused on preserving soil quality and improving yields as well as interventions to improve labour productivity

**⊖ Geopolitical tensions**

Escalating geopolitical tensions in Sri Lanka's major tea markets have led to considerable volatility and is likely to impact demand and pricing over the short-term, which would be further compounded by potential logistical disruptions

**Response**

Ongoing monitoring of external developments and increased focus on value-addition

**⊕ Transformation of the global beverage industry**

Consumers are increasingly tilting towards products that contribute to their health and well-being, giving rise to the convergence of sustainability and wellness in beverages

**Response**

Strategic focus on ensuring superior quality of produce through certifications and adopting global best practices

**Sustainability related risks and opportunities (SRRO)**

**Evolving requirements of buyers**

Global customers are increasingly demanding responsible social and environmental practices along the entire value chain, necessitating higher supply chain visibility and traceability

<b>&lt; 1 year</b>	Limited impact in the short-term
<b>1-5 years</b>	European customers are expected to strengthen due diligence along the value chain, given emerging regulations and disclosure requirements
<b>&gt;5 years</b>	Anticipated stringency and global implementation of regulations driving ethical sourcing and traceability across value chains
<b>Response</b>	Assurance to customers through independent third-party verifications and compliance to a range of certifications on quality, sustainability and ethical business

**Increasingly erratic weather patterns**

Escalating implications of climate change have led to significant volatility in rainfall and precipitation levels as well as considerable fluctuations in temperature levels

<b>&lt; 1 year</b>	Volatility in production levels and variations in quality
<b>1-5 years</b>	More pronounced impacts of volatile weather patterns, which will impact leaf quality, yields and prices
<b>&gt;5 years</b>	If climate adaptation measures are not adopted, Sri Lanka's tea industry could suffer significant challenges
<b>Response</b>	Pursuing climate-smart and regenerative agriculture practices

**Declining land productivity**

Limited investments in replanting and infilling have led to long-term decline in productivity of Sri Lanka's tea lands, resulting in relatively lower yields

<b>&lt; 1 year</b>	Limited impact in short-term
<b>1-5 years</b>	Further declines in yields and resultant escalation in cost of production is likely to affect Sri Lanka's international competitiveness in the global market
<b>&gt;5 years</b>	Commercial viability of Sri Lanka's tea industry could be threatened
<b>Response</b>	Strategic focus on the use of organic fertilizer to preserve soil health and regenerative agricultural practices to improve yields

## PLANTATIONS

FUTURE PLANS	
Short-term	Medium-to-long term
<ul style="list-style-type: none"> <li>Drive improvements in yield through increasing plucking rounds and harvesting modules</li> <li>Improving labour productivity through transforming remuneration models</li> <li>Increase efficiency and efficacy of input materials</li> <li>Increased crop diversification</li> <li>Use of technology and mechanisation to drive increased efficiency</li> </ul>	<ul style="list-style-type: none"> <li>Pursue diversification of new crops including cinnamon, coconut and coffee</li> <li>Increase reliance on renewable energy through investments in solar</li> <li>Develop specialty teas catering to evolving customer requirements</li> <li>Increased customer acquisition in rubber</li> </ul>
<b>Short-term goals</b> ROE>10% Gearing<10% (TTEL/KVPL) Gearing<35% Horana	<b>Medium-to-long term goals</b> ROE>20% Gearing<10% (TTEL/KVPL) Gearing<35% Horana

# AGRICULTURE

## SECTOR OVERVIEW

The Sector is at the forefront of Sri Lanka's Agriculture industry, offering a comprehensive array of agriculture-related solutions to the local and export markets. Hayleys Agriculture's competitive edge is underpinned by its partnerships with globally renowned principals, extensive relationships across Sri Lanka's agricultural value chains, domain-specific knowledge and best-in-class research and development capabilities. The Sector has contributed towards catalysing the development of the country's Agriculture Sector through providing essential input materials, driving mechanisation and introducing climate-smart agriculture solutions supporting the longevity of the industry.

## CONTRIBUTION TO GROUP

### LOCAL OPERATIONS

Provides a range of agriculture input solutions, including agriculture machinery, crop protection solutions, seeds and planting materials, animal health products, and fertilizer.

**Contribution to Sector**  
Revenue: 70%  
PBT: 63%

**Performance 2023/24**  
Revenue: 11% growth  
PBT: 45% decline

### EXPORTS

Exporter of processed fruits and vegetables, coconut kernel-based products, tissue culture plants and F1 hybrid flower seeds

**Contribution to Sector**  
Revenue: 12%  
PBT: 3%

**Performance 2023/24**  
Revenue: 5% decline  
PBT: 86% decline

### OVERSEAS OPERATIONS

International operations in Bangladesh

**Contribution to Sector**  
Revenue: 17%  
PBT: 34%

**Performance 2023/24**  
Revenue: 11% decline  
PBT: 45% growth

stabilisation of the country's macro-economic fundamentals and gradual return to normalcy following the fuel shortages and economic disruptions of the previous year. Accordingly, the country's paddy production increased by 20%, compared to the near 34% drop in the paddy crop in 2022. Despite these improvements, consumer spending remained subdued resulting in customers' increasing price consciousness, deferment of purchases and shift towards cheaper alternatives. This was further compounded by the relatively high interest rates in the first half of the year coupled with the increase in tax rates. Meanwhile, having a made strong recovery post pandemic, Bangladesh has been impacted by rising inflation, financial

## OPERATING ENVIRONMENT

Sri Lanka's Agriculture Sector posted modest recovery in 2023, expanding by 3% compared to the contraction of 4% recorded in 2022. This uptick represents the

## COMPETITIVE POSITION

**Agriculture Extensive Services powered by over 150 skilled agriculturalists** who collaborate with stakeholders across the agri-value chain in propagating knowledge and best practice.

Long-standing relationships with **66 globally renowned principals** including Kubota, Bayer, BASF, Elanco and Hipra among others.

**Market leader** in several verticals which include

- Largest Sri Lankan exporter of processed fruits and vegetables
- Largest producer and exporter of tissue culture plants
- Only Sri Lankan exporter of F1 hybrid flower seeds
- Leader in Agri input solutions and equipment

sector vulnerabilities and a balance-of-payment deficit which has led to a sharp decline in foreign exchange reserves. External pressure is expected to persist in Bangladesh for the most part of 2024, while GDP growth is expected to moderate but remain relatively good at 5.6% in 2024.

**+3%**  
Growth in Sri Lanka's  
Agriculture Sector

**+20%**  
Increase in  
paddy crop

**0.1%**  
Growth in  
agriculture exports

### Summary of external drivers

	Driver	Driver Significance of impact	Implications on Sector
Economic and geo-political context	Appreciation of the Sri Lankan Rupee	M	+ Favourable pricing on imported agricultural inputs - Negative impacts on agricultural exports
	Interest rates	M	- High interest during the first half of the year adverse impacted demand
	Decline in consumer spending	M	- Subdued consumer demand and increasing price consciousness of customers
	Taxation	H	- Adverse implications on consumer buying power - Significant increase in prices following the imposition of VAT from January 2024
Industry context	Mechanisation of agriculture	H	+ Promising long-term demand dynamics for agricultural equipment and machinery
	Inconsistent policy	M	- Limited predictability leading to challenges in planning
	Land degradation	M	- Adverse impacts on quality, quantity and yields of crop thereby negatively affecting farmer income
Sustainability context	Implications of climate change	M	- Impacts of erratic weather patterns on quantity and quality of crop
	Water stress in several areas of the country	M	- Implications on quality, yield and quantity of tea
	Water stress in several areas of the country	M	- Impacts of erratic weather patterns on quantity and quality of crop

H-High, M-Medium, L-Low. Brown circle represents adverse effect while yellow circle represents positive affect

### STRATEGY AND INTEGRATED PERFORMANCE REVIEW

The Sector delivered a resilient performance amidst a multitude of challenges that prevailed during the year, underpinned by the diversity of its businesses as well as the strength of its brands and relationships. Performance was upheld by Crop Protection and Overseas Operations, which led to a Revenue growth of 6% to Rs. 34.89 bn during the year. Profitability normalised from the record highs of last year, to record a Profit Before Tax of Rs. 3.02 bn during the year (2022/23: Rs.5.0 bn)

Crop Protection recorded strong growth during the year, emerging as the highest contributor to Sector profitability. Performance was upheld by the launch of a new herbicide which swiftly gained traction to achieve market leadership status. With this addition, the cluster has strengthened its product proposition offering a comprehensive array of crop protection materials. Meanwhile, profits from Agro Fertilizer normalised during the year, reflecting intensifying competitive pressures and the imposition of VAT which led to subdued demand.

### SECTOR FINANCIAL PERFORMANCE

## AGRICULTURE

### INTEGRATED PERFORMANCE

The Agri Equipment cluster also experienced a challenging year due to customers' increased concerns on affordability which led to deferment of purchases. Despite these challenges, the Sector maintained its position as the market leader in the four-wheel tractor segment supported by the strength of its global brands. Meanwhile Animal Health performed commendably during the year; with the pet segment recording subdued demand amidst increasing affordability concerns, the cluster expanded its reach to new market segments such as poultry. In a key achievement the cluster also introduced two new vaccines Gumbohatch and Evalon in partnership with its principal HIPRA; these vaccines gained quick traction in the market supported by its high efficacy and ease of use.

In Exports, the horticulture segment performed well maintaining its position as the largest producer and exporter of tissue culture plants and the only Sri Lanka exporter of F1 hybrid flower seeds. Food exports were affected by adverse weather conditions, which necessitated reseeded of gherkins, while profitability was also impacted by the appreciation of the Sri Lankan Rupee and subdued demand from key markets. Despite these challenges, the cluster continued to inject value to its network of out-growers ensuring their financial viability and continued economic empowerment. The outlook for food exports, however, is promising with the cluster seeing a gradual pick-

up in demand towards the last quarter of the financial year. Meanwhile, strategic focus was placed on upgrading and revamping the coconut milk facility which was purchased in 2022/23, which enabled the Sector to obtain the required certifications and launch a range of coconut-based products including beverages, oils, spreads, and confectionery under the CocoLife by Hayleys brand.

The Sector's Overseas Operations (represented by Haychem Bangladesh) emerged as a key contributor to profits during the year, as it leveraged the strength of its brands and product channels to drive increased penetration. During the year, the Sector sought to capitalise on its existing competitive edge in Bangladesh to strengthen its product offering in new segments- accordingly, the Sector commenced Animal Health services in Bangladesh and intends to commence the manufacture of bio-fertilizer for which a land was acquired during the year.

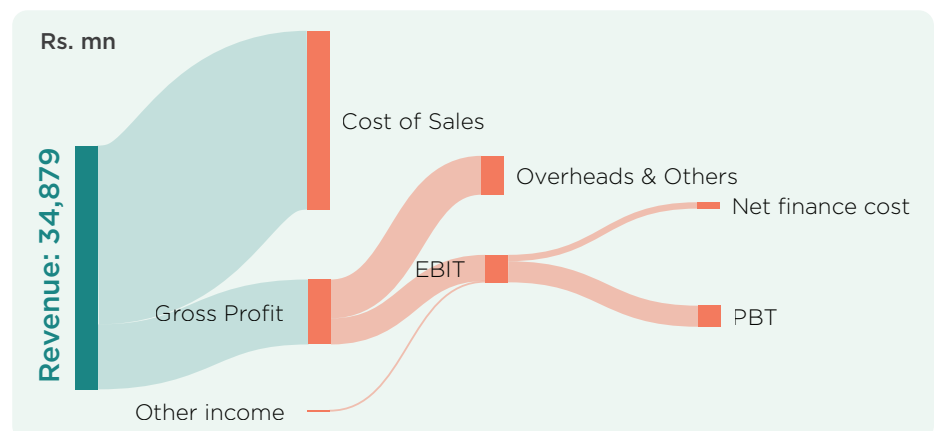

Best-in-class research and development capabilities is the hallmark of Hayleys Agriculture and during the year it continued to strengthen its product portfolio through innovations. The Sector established a facility for pre-mixes of antibiotics and vitamins during the year, with the aim of tapping export markets including Bangladesh in which it already has an established presence. The Sector also marked

a key milestone as it established a polyethylene pipe manufacturing facility during the year, offering advanced irrigation solutions to Sri Lanka's Agriculture industry. Hayleys Agriculture continues to play a pivotal role in driving industry mechanisation and during the year launched a first-of-its kind paddy dryer, which seeks to empower farmers through reducing drying time, money and labour while minimising losses.

### ESG IN ACTION

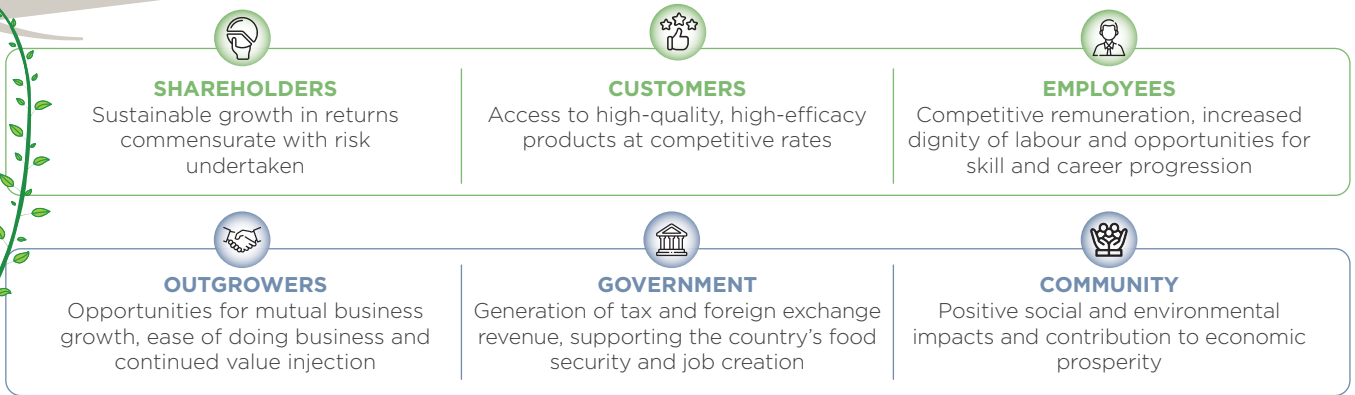

The Sector's ESG agenda is aligned to that of the Hayleys Lifecode with key areas of focus including sustainable water sourcing, increasing energy efficiency and driving economic empowerment through outgrower programmes. During the year, measures were taken to strengthen the Sector's ESG governance and reporting mechanisms. Key interventions include,

- Establishment of Sector ESG Steering Committee
- Strengthen ESG risk assessment and integration with existing risk processes
- Monthly and quarterly monitoring and reporting of performance against ESG targets with the participation of relevant personnel from manufacturing facilities
- Third-party verification of GHG emissions (2022/23)

HOW WE DEFINE VALUE

HOW WE CREATE VALUE

HOW WE DELIVER AND PRESERVE VALUE

- Total economic value generated during the year decreased by +22% reflecting the appreciation of the Sri Lankan Rupee and normalisation of tea prices
  - Payments to employees decreased by 12% during the year
  - Value generated to Governments amounted to Rs. 4.03 bn and 40% of the total value created
  - Payments to lenders of capital decreased by 59%
  - Value retained in the business for future investment
  - Amounted to Rs 2.30 bn compared to Rs. 3,450 mn the previous year
-

- Propagation of agricultural skills and knowledge
- Over 150 trained agriculturalists

## CLIMATE-SMART AGRICULTURE SOLUTIONS

Climate-smart irrigation and protected agriculture technologies

Organic and bio fertilizers to improve soil health

Farmer training to propagate sustainable agriculture practices

### Leadership development

The Sector placed strategic focus on developing the next generation of leaders through ongoing opportunities for training.

	2024	2023	y-o-y
Training hours (hours)	2,552	3,278	-22%

**PROSPECTS AND PLANS**

Despite short-term volatilities stemming from macro-economic fundamentals and climate impacts, the outlook for the country's Agriculture Sector remains promising given its vital importance in ensuring food security and supporting livelihoods of nearly 30% of the country's population. Consistent and conducive government policy remains a key requisite in driving sustainable growth of the industry and we look forward to engaging and collaborating with industry stakeholders to achieving the true potential of Sri Lanka's Agriculture Sector. The Sector's short, medium and long-term risks and opportunities are summarised below:

**INDUSTRY RISK AND OPPORTUNITY LANDSCAPE**

**- Affordability concerns**

The increases in income tax as well as imposition of VAT has led to escalating concerns on affordability, which in turn has driven demand for cheaper alternatives. This has also increased the risk of sub-standard and counterfeit products entering the market, inserting further pressure on suppliers of legitimate goods.

**Response**

Increased diversification of product and service portfolio, overseas expansion

**+ Mechanisation of agriculture**

Labour shortages in the industry continues to be a key challenge reflecting the changing aspirations of the youth and increased migration from the Sector. Against this backdrop, mechanisation of agriculture will be essential in ensuring continued growth and supporting the country's food security.

**Response**

Leverage partnerships with global suppliers to provide innovative solutions for mechanisation.

**- Exchange rate dynamics**

While the appreciation of the Sri Lankan Rupee remains favourable for imports, this trajectory will impact the competitiveness and profitability of our exports

**Response**

Geographical diversification of operations and strengthening market share across key verticals.

**- Policy inconsistency**

Rational and consistent policy is essential for the long-term sustainability and survival of the country's Agriculture Sector as well as ensuring the commercial sustainability of Agriculture Sector operators.

**Response**

Proactive engagement with regulators and industry counterparts in creating a conducive environment which ensures the long-term sustainability of the industry.

**Sustainability related risks and opportunities (SRRO)**

**Implications of weather on agriculture**

Escalating implications of climate change have led to significant volatility in rainfall and precipitation levels as well as considerable fluctuations in temperature levels affecting agricultural productivity and crop volumes

<b>&lt; 1 year</b>	Volatility in production levels and variations in quality
<b>1-5 years</b>	More pronounced impacts of volatile weather patterns, which will impact cultivation of key crops
<b>&gt;5 years</b>	Survival of the Agriculture Sector will be threatened if climate adaptation measures are not adopted
<b>Response</b>	Pursuing climate-smart agriculture practices

**Declining land productivity**

The productivity in major growing ecosystems in Sri Lanka (dry and intermediate zones) has been stagnant or declining over the last 10 years

<b>&lt; 1 year</b>	Limited impact in short-term
<b>1-5 years</b>	Further declines in yields and resultant escalation will affect industry profitability, thereby affecting demand for our products.
<b>&gt;5 years</b>	If measures are not adopted to improve land productivity, farmer incomes will suffer, resulting in further migration of labour from the Sector.
<b>Response</b>	Raising farmer awareness on sustainable agriculture practices through our network of extension services.

## AGRICULTURE

As a leading player at the forefront of Sri Lanka's Agriculture Sector, we are deeply committed to supporting the long-term growth and survival of the industry by collaborating with our ecosystem of partners in propagating modern and sustainable agriculture practices. We will continue to leverage the collective knowledge of our team, our access to global brands and our extensive networks to support the country's food security aspirations. The short, medium and long-term plans in place are summarised below:

FUTURE PLANS	
Short-term	Medium-to-long term
<ul style="list-style-type: none"> <li>Cost management and process efficiencies.</li> <li>Market entry and new customer acquisition in coconut product range.</li> <li>Expand product proposition under food exports.</li> <li>Strengthen distribution networks in fertilizer cluster.</li> <li>Widen product offering in Bangladesh.</li> <li>Strengthen presence in poultry sector in Animal Health Division.</li> </ul>	<ul style="list-style-type: none"> <li>Strengthen digital marketing activities in agri-equipment cluster.</li> <li>Elevate market share in animal health division through new products.</li> <li>New product development in agri exports cluster.</li> <li>Development of bio-organic crop protection solutions.</li> </ul>
<b>Short-term goals</b> ROCE > 20% ROE > 20%	<b>Medium-to-long term goals</b> ROCE > 20% ROE > 20%

### SECTOR OVERVIEW

Singer (Sri Lanka) PLC is the undisputed leader in the country's consumer durables industry. With a customer penetration rate of over 50%, Singer's competitive edge is underpinned by its multi-brand, multi-product portfolio, unmatched island-wide retail network and strength of its brand as a household name in Sri Lanka. In addition to representing an array of local and global brands, Singer also manufactures a range of SINGER and SISIL refrigerators, washing machines, sewing machines, furniture and water pumps among others. The Consumer & Retail Sector also includes the Hayleys Consumer Division, which operates as a distributor for Proctor & Gamble products in Sri Lanka as well as Singer Finance (Lanka) PLC, a mid-sized licensed finance company offering an array of lending, deposit and transactional solutions to individuals and SMEs.

### CONTRIBUTION TO GROUP

#### SINGER MARKETING

Represents 407 outlets across the country and an island-wide dealer distributor network

**Contribution to Sector**  
Revenue: 78%  
PBT: -35%

**Performance 2023/24**  
Revenue: 21% growth  
PBT: 51% growth

#### SINGER FACTORIES

Comprises 4 manufacturing facilities engaged in the production of refrigerators, washing machines, sewing machines, water pumps and furniture.

**Contribution to Sector**  
Revenue: 7%  
PBT: -10%

**Performance 2023/24**  
Revenue: 18% decline  
PBT: 169% decline

#### SINGER (FINANCE) LANKA PLC

Licensed finance company engaging in leasing and loans.

**Contribution to Sector**  
Revenue: 8%  
PBT: 104%

**Performance 2023/24**  
Revenue: 2% growth  
PBT: 4% decline

#### HAYLEYS CONSUMER

Exclusive distributor for Proctor & Gamble products in Sri Lanka and Maldives

**Contribution to Sector**  
Revenue: 6%  
PBT: 40%

**Performance 2023/24**  
Revenue: 3% decline  
PBT: 50% decline

During the year under review, two unlisted subsidiaries and listed subsidiaries of Singer, Singer Industries (Ceylon) PLC and Regnis (Lanka) PLC were amalgamated with Singer (Sri Lanka) PLC and delisted from the Colombo Stock Exchange.

### COMPETITIVE POSITION

Singer operates an extensive island-wide network of **407 outlets** across 25 districts and 16 service centres. Meanwhile, Singer Finance operates a network of 52 branches

One of **Sri Lanka's strongest brands**, having won the People's Brand of the Year for 18 consecutive years (including 2024) at the SLIM-Kantar People's Awards

Singer represents over **50 international consumer durable brands** including Samsung, Dell, Huawei, Honor, Philips and Panasonic, offering a portfolio of over **600 electronic items** and **1250 home appliances**

Hayleys Consumer is the **distributor of Proctor & Gamble products** in Sri Lanka including personal care brands such as Head & Shoulders, Gillette, Whisper and Olay as well as Group products such as Mabroc Teas and Hayleys Agriculture Products

## OPERATING ENVIRONMENT

The year under review was characterised by two very distinct halves; the first was defined by a multitude of challenges including high inflation and interest rates, continued import restrictions and weak consumer sentiments which led dampened demand. As macro-economic conditions gradually stabilised, the second half of the year showed signs of recovery underpinned by a relatively stable exchange rate, tapering interest and inflation levels and resumption of economic activity. While consumer purchasing power remained constrained by elevated costs and a higher tax regime, aspirations for convenience and sophistication fuelled the gradual release of pent-up demand. Import restrictions on consumer durables was lifted in October 2023, following which demand conditions recorded considerable improvement. The impending imposition of VAT on all consumer durable products with effect from January 2024, boosted demand in the month of December as customers sought to advance purchasing to avoid extra costs. While demand has since normalised, the outlook for the industry is promising as gradual improvement of macro-economic fundamentals is expected to support demand growth over the short-to-medium term. On the other hand, the rapid growth of the grey market continues to pose a significant threat to legal importers; the increased price disparity between legal and illegal imports following the imposition of VAT on the former has fuelled the rapid growth of the informal sector, not only threatening the survival of legal importers but depriving the Government of tax revenue.

### +9%

Decline in expenditure on furniture, household equipment and maintenance

### +11%

Increase in per capita GDP

### +8%

Appreciation of the Sri Lankan Rupee

## Summary of external drivers

	Driver	Driver Significance of impact	Implications on Sector
Economic and geo-political context	Lower disposable income	H	- Curtailment of discretionary expenses amidst reduced purchasing power
	Increase in VAT rate from 15% to 18% and removal of exemptions on selected products	M	- Upward price revision - Fuelled the growth of the grey market
	Easing interest rates	H	- Conducive for hire purchase schemes which will drive consumption
	Appreciation of the Sri Lankan Rupee	M	+ Leads to lower import costs and increased attractiveness of pricing to local customers
Industry context	Growth of the tourism sector	M	+ Increased investments directed towards new tourism establishments will drive demand for consumer durables + Increased liquidity along the tourism value chains is conducive for volume growth
	Rapid growth in grey market for selected products	H	- Inequitable playing field for legal importers who are compelled to sell products at a higher price due to the applicability of duties and taxes
	Increasing customer sophistication	H	+ Shifting lifestyles are fuelling demand for increased convenience, quality and durability
Sustainability context	Increased focus on energy efficient solutions	H	+ Following the sharp escalation in energy costs, consumers are increasingly pursuing energy-efficient solutions + The shift to a low carbon economy has presented many opportunities in energy efficient products and renewable energy solutions
	Growth in sustainable finance solutions	H	+ Opportunity for Singer Finance to grow its sustainable/green lending portfolio

### INTEGRATED PERFORMANCE

### STRATEGY AND INTEGRATED PERFORMANCE REVIEW

Singer's ability to preempt challenges and flex its strategy in addressing these evolving dynamics enabled the Sector to mitigate the adverse impacts of an extremely challenging year. Singer shifted focus from a classical to a renewal operating model where strategy was regularly refreshed and refined to ensure viability in a relatively harsh operating landscape. Proactive efforts to clear high-cost inventory together with the gradual pick-up in demand towards the latter part of the year enabled the Sector to generate a Revenue growth of 28% to Rs. 81.60 bn. However, margins narrowed reflecting promotions and market activations that were offered to optimise inventories resulting in the Sector's Operating Profit margin declining from 11.7% to 4.3%. Against this backdrop, the Sector aggressively pursued cost efficiencies and optimised finance costs. Meanwhile, performance of the Hayleys Consumer division was also affected by the weak consumer sentiments and buying power, resulting in a decline in profitability. Overall the Sector generated a Profit Before Tax and Profit After Tax of Rs. 611.29 mn and Rs. 175.11 mn respectively during the year.

Despite the challenges that prevailed, Singer continued to evolve its product and brand portfolio to cater to emerging customer needs. Singer was appointed the sole distributor of Honor- one of the world's fastest

growing smart phone brands. Positioned as a brand that offers premium features at competitive pricing, Singer launched 10 models of Honor in Sri Lanka catering to the diverse needs of customers across varying price points. Singer also launched the 'Singer premium furniture' brand, aligned with its long-term aspirations of penetrating a more premium customer segment through an elevated product offering. Singer maintained its market leadership position across key product categories including refrigerators, washing machines, televisions and sewing while gaining market share in digital devices. At the SLIM-KANTAR People's Awards 2024, Singer was recognised as the People's Brand of the Year for the 18th consecutive year, attesting to its status as a household brand in the country.

Branch consolidation continued during the year with a view to ensuring long-term sustainability of all locations resulting in the total branch count being optimised to 407 outlets. Meanwhile, demand for after sales services increased significantly during the year reflecting customers' preference to repair and reuse current products given the weaker buying power. Resultantly, Singer enhanced its service capabilities, establishing a premium Contact Centre in Colombo and leveraging its network of 16 regional service centers and over 300 service franchise agents. Singer also continued to offer an enhanced value proposition to its loyalty customer base of over 2.2 million through Singer

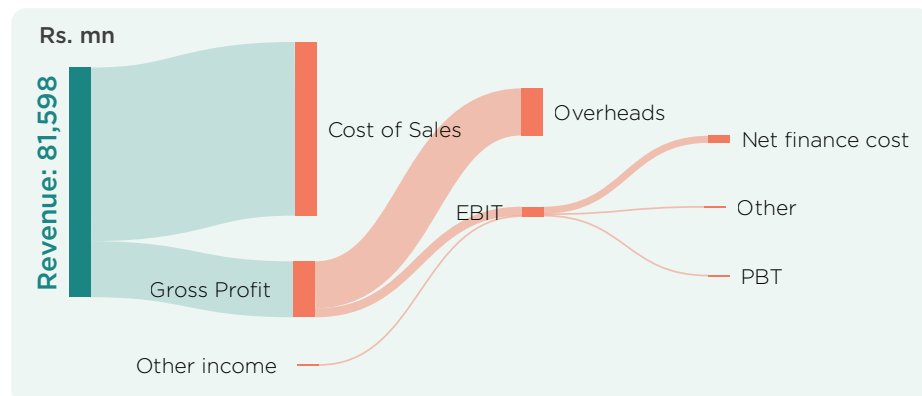

RED- offering exclusive benefits and customised offerings.

Singer Finance (Lanka) PLC delivered a creditable performance in a challenging year. Although profits declined due to the increase in expenditure reflecting expansion of the operations, the Company's Profit Before Tax of Rs. 652.40 mn upheld the Singer Group's profit during the year. During the year, 2 branches were added bringing the total network to 52. The Company also maintained healthy portfolio quality, liquidity and capitalisation levels in comparison to industry peers.

### ESG IN ACTION

Singer's ESG aspirations center on greening the customer journey through providing access to energy efficient product solutions while reducing its own energy consumption and supporting circularity through an island-wide e-waste management programme. Strategic efforts that made to integrate ESG into the Sector's strategy and operations in line with the Hayleys Roadmap included the following:

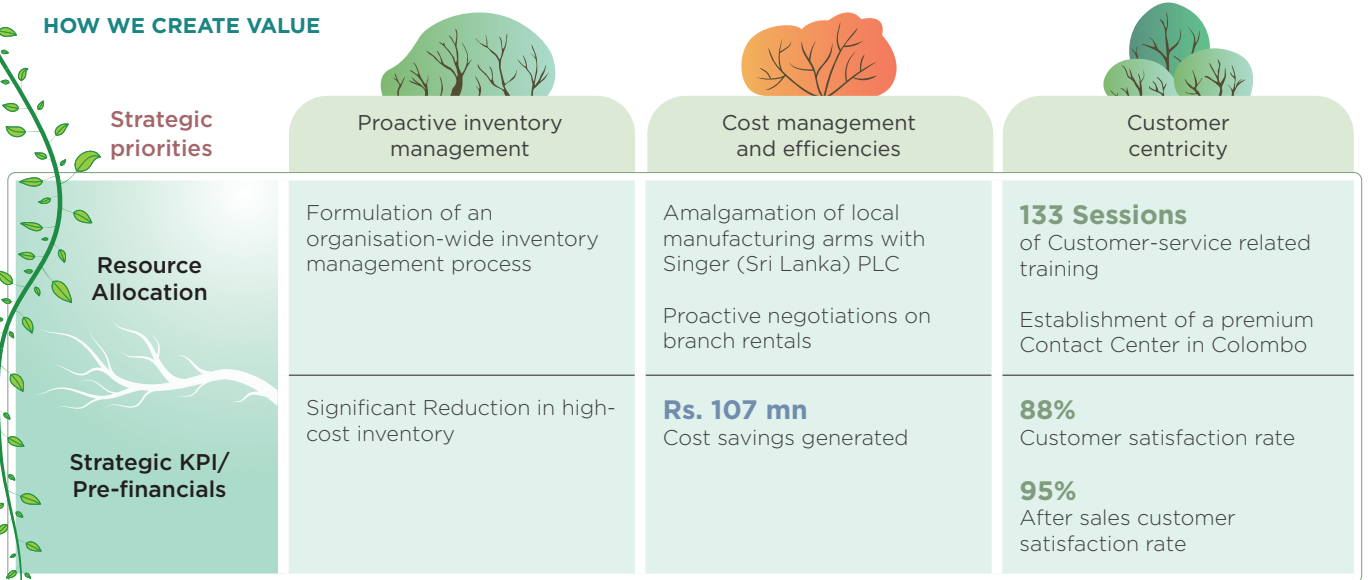

- Establishment of Sector ESG Steering and Working Committee
- Strengthen ESG risk assessment and integration with existing risk processes
- Third-party verification of GHG emissions (2022/23)
- Winner of the sector award in the Retail Sector at Best Corporate Citizen Sustainability Awards 2023-Singer (Sri Lanka) PLC.

HOW WE DEFINE VALUE

HOW WE CREATE VALUE

HOW WE DELIVER AND PRESERVE VALUE

- Total economic value generated during the year increased by 19% in spite of the challenging external dynamics
- Payments to employees increased by 9% during the year
- Value generated to Governments amounted to Rs. 15.36 bn an increase of 79% compared to the previous year
- Payments to lenders of capital decreased by 35%
- Value retained in the business for future investment amounted to 3% compared to 6% the previous year

### Singer Youth Catalyst

**PROSPECTS AND PLANS**

The industry outlook for the short-to-medium term remains promising, given gradually recovering macro-economic fundamentals, conducive interest and exchange rates, tapering inflation and an overall improvement in customer sentiments. A recovering tourism sector and gradual release of pent-up demand is also expected to provide further impetus for growth, affording retailers significant opportunities in driving increased penetration. The long-term growth potential of Sri Lanka's consumer durables sector is positive, driven by the relatively low penetration levels in certain product categories, growing aspirations for a better quality, customer sophistication, faster replacement cycles, and urbanisation. Trends which are expected to shape the Sector's risk profile over the short, medium and long-term are presented below:

**INDUSTRY RISK AND OPPORTUNITY LANDSCAPE**

**+ Stabilising macro-economic conditions**

The gradual recovery of macro-economic fundamentals, easing interest rates and inflation is expected to drive demand for consumer durables in the short-to-medium term as evidenced by the recovery of volumes in the past few months

**Response**

Leverage on the extensive product portfolio, brand and branch reach to drive increased penetration and gain market share across key product categories

**+ Demographic changes and increasing customer sophistication**

Notwithstanding the implications on poverty of the recent economic crisis, over the long-term Sri Lanka's middle class is expected to expand, driving demand for more sophisticated products and convenient lifestyles

**Response**

Expand product offering to cater to the specific needs of different customer segments, including the premium segment

**- Expansion of the grey market**

Presents a significant threat for legal importers in the short-term, given the significant price disparity between legal, taxed products and products imported illegally evading tax

**Response**

Build customer awareness and lobbying to the government

**+ Omni channel preference**

Customers from younger demographics are showing increased preference towards e-commerce channels

**Response**

In addition to driving penetration via the Singer website, the Sector also hopes to partner with established third-party e-commerce platforms to increase its online presence

**Sustainability related risks and opportunities (SRRO)**

**Increasing customer awareness on sustainability**

The eco-awakening of customers, particularly among younger demographics is driving demand for sustainable products

<b>&lt; 1 year</b>	Increased focus on energy efficient products
<b>1-5 years</b>	Heightened awareness among customers on sustainability considerations including energy efficiency, resource use and end-of-use disposal
<b>&gt;5 years</b>	Standardised use of sustainably designed and manufactured products
<b>Response</b>	Providing access to the world's leading sustainable products through our partnerships with global brands

**Impacts of climate change on farmer income**

As a company with a strong rural presence, agriculture-based communities are an important customer segment for Singer

<b>&lt; 1 year</b>	Sales are typically correlated with farmer's harvest and income which is directly linked to weather patterns
<b>1-5 years</b>	Increasingly erratic weather patterns are likely to lead to significant variations in farmer income, thereby impacting demand
<b>&gt;5 years</b>	If climate adaptation and mitigation measures are not adopted, farmer incomes will dwindle
<b>Response</b>	Diversification of markets and customer segments

**Sri Lanka's renewable energy aspirations**

According to Sri Lanka's Net Zero plan, the country is gearing to scale up renewable energy to be 70% of total energy consumption by 2030.

<b>&lt; 1 year</b>	Gradual increase in fossil-fuel based energy prices and resultant shift to solar power
<b>1-5 years</b>	Price adjustments to fossil fuel-based sources will drive increased preference of energy efficient solutions.
<b>&gt;5 years</b>	
<b>Response</b>	Design and manufacture of energy efficient products through our local manufacturing arms

# LEISURE

## SECTOR OVERVIEW

The Group's Leisure Sector is a leading player in the country's hospitality sector, with a network of hotels, resorts, wellness retreats and collection of managed boutique properties in Sri Lanka and Maldives. The sector's property portfolio comprises 5-owned and operated properties including the five-star city hotel, The Kingsbury, and 6 managed properties in Sri Lanka through the Amaya Resorts chain.

## OPERATING ENVIRONMENT

Following consecutive years of extraordinary challenges, Sri Lanka's tourism sector posted strong recovery in 2023. Tourist arrivals into the country increased by 106% to reach 1.47 mn during the year driven by stabilising macro-economic fundamentals and the release of pent-up demand from key markets. Sri Lanka witnessed a growth in demand from countries such as India, Russia, Germany and the United Kingdom. Despite the improvement, arrivals and rates remained lower than pre-pandemic levels, which coupled with the sharp escalations in labour migration continued to impinge on sector profitability. Meanwhile, competition is expected to intensify among city hotels with the 5-star room inventory projected to increase by over 60% given the strong pipeline of projects. Against this backdrop, the shortage of skilled labour in the industry remains an acute challenge with intense competition for skilled labour among new and existing operators resulting in high turnover levels and escalating staff costs.

## COMPETITIVE POSITION

Our offering centers on creating experienced aligned to our **purpose of curating happiness**

The Sector's **multi-channel strategy includes destination management** companies (DMC), online travel agents, direct bookings and online reservations among others

**Best-in-class F&B offerings** through highly-rated restaurants at the Kingsbury

Amongst the most popular and top-rated banquet operators in Colombo

**Highly rated portfolio of properties**

**Trip Advisor ratings**

- Amaya Hills: 4.0/5
- Amaya Lake: 4.5/5
- Amaya Beach: 4.5/5
- The Kingsbury: 4.5/5
- Amaya Kuda Rah: 4.5/5

## Summary of external drivers

	Driver	Driver Significance of impact	Implications on Sector
Economic and geo-political context	Appreciation of the Sri Lankan Rupee	M	- Increased cost for foreign tourists resulting in decreased international competitiveness + Higher rupee revenue on foreign currency earnings
	Increased taxation	M	- Adverse implications on buying power of domestic consumers - Significant increase in prices following the imposition of VAT from January 2024
Industry context	Impacts on consumer spending	H	- Reduced disposable income of domestic guests following prolonged implications of economic crisis
	Intensifying competition in city hotels	H	- Acute challenges in labour attraction and retention - Sharp increase in labour costs
	Implementation of minimum room rate for star-class establishments	M	+ Limits ability of operators to drive down prices to attract guests + Drive positive yields for rooms
Sustainability context	Preference for authentic experiences Growing informal sector	M	+ Opportunity to sharpen competitive edge through unique offerings
	Implications of climate change	M	- Impacts of natural disasters on physical infrastructure and attractiveness of locations
	Increasingly eco-conscious customers	M	- Necessitates rewiring of business models to cater to increasing environmental and social consciousness of the younger demographic

H-High, M-Medium, L-Low. Brown circle represents adverse effect while yellow circle represents positive affect

**CONTRIBUTION TO GROUP**

**STRATEGY AND INTEGRATED PERFORMANCE REVIEW**

The Sector's reflected the recovery of the country's tourism industry, with an average increase in occupancy levels enabling the Sector to achieve a 35% growth in Revenue to Rs. 9.02 bn. Meanwhile, Operating Losses and Loss Before Tax also declined by 53% and 22% respectively, driven by the improvement in the core performance of The Kingsbury and the Sri Lankan Amaya Properties. The Kingsbury delivered its first year of profitability since 2019 upheld by increasing footfall as it leveraged its strong F&B proposition and positioning as the preferred venue for restaurants. The Sri Lankan Amaya Properties also delivered a commendable

improvement in performance while Losses reducing during the year. The Sector's overall profitability during the year was hampered by the weak performance of Amaya Kuda Rah which was partially closed for repairs during the year.

In recent years, the Sector has placed strategic emphasis on sharpening its competitive edge through mastering product delivery which has enabled our properties to consistently achieve relatively high customer ratings. During the year, the Sector also opened its 1st outdoor, high street café, 'The Nosh' adjacent to a premium commercial zone, the initial response for which has been extremely encouraging.

The acute shortage of skilled labour remains a critical challenge for the Sector, given the exodus of staff from the industry in recent years and intensifying competition for labour following the entry of new international operators, particularly in Colombo. In addressing this challenge, the Sector has focused on multi-skilling its employees thereby contributing towards a leaner operating model. The Sector also continues to benefit from the strength of the Hayleys employer brand and the unique value proposition offered.

**ESG IN ACTION**

The Sector's sustainability aspirations are guided by the Hayleys Lifecode and during the year measures were taken to strengthen the Sector's ESG monitoring and reporting mechanisms. The Sector also improved its GHG emissions computation, as part of the Group's initiative to obtain third party verification on its GHG inventory. The Sector will seek to formulate its ESG targets in line with the parent's aspirations over the short-to-medium term.

**INTEGRATED PERFORMANCE**

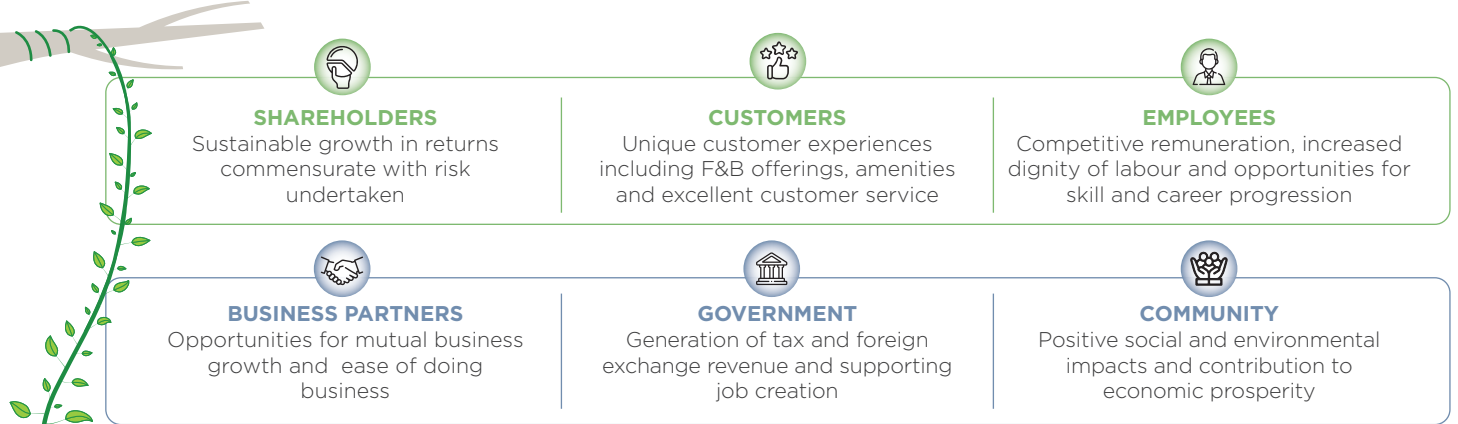

**SECTOR FINANCIAL PERFORMANCE**

The properties engaged in the following environmental initiatives during the year: commemorating Earth Day 2024.

- Coral restoration in Maldives
- Bio-degradable packaging for bath amenities
- Sea erosion prevention in Amaya Beach

## SKILL DEVELOPMENT THROUGH HAYLEYS LEISURE TRAINING ACADEMY

The Training Academy offers an opportunity for aspiring youth from disadvantaged communities to obtain access to hospitality skill development, supporting employability and driving socio-economic empowerment. Graduates have the opportunity for employment within Hayleys' extensive network of hotels and resorts, contributing to the growth of Sri Lanka's tourism industry.

# LEISURE

## PROSPECTS AND PLANS

Sri Lanka is positioned for a surge in tourist arrivals in 2024, with the Sri Lanka Tourism Development Authority (SLTDA) targeting an ambitious 2.3 million arrivals during the year. This is expected to be driven by aggressive marketing efforts to promote Sri Lanka as a destination as well as further relaxation of VISA requirements for selected markets. The short, medium and long-term outlook and plans in place to respond to the emerging risks and opportunities are presented below:

## INDUSTRY RISK AND OPPORTUNITY LANDSCAPE

### - Escalating competition

With the city star-class room inventory expected to increase by over 60% over the next few years, competition for business as well as skilled labour is expected to intensify- particularly given the acute labour shortage in the market.

#### Response

Expansion of employee recruitment under the Hayleys Leisure Training Academy and strengthened employee value proposition

### - Exchange rate volatility

The direction of the exchange rate movement remains difficult to predict at this juncture, although some depreciation is expected during the latter part of the calendar year. Increased volatility of the exchange rate leads to challenges in setting pricing as well as volatility in profitability margins

#### Response

Proactive monitoring of USD exchange rate and close coordination with Group Treasury function

### - Domestic and international geopolitical dynamics

The upcoming elections in Sri Lanka although unlikely to have significant impact on arrivals, could lead to political uncertainty resulting in tourists deferring travel plans

#### Response

Ongoing engagement with channel partners in ensuring travel confirmations for the upcoming Winter season Leverage on diversified offerings across the island

### + Changing customer expectations

Changing demographics, advances in technology and social media influences are driving changes in traveller expectations which include an increased preference for solo travel, authentic and personalisation of experiences and recognition technology among others

#### Response

Creating new customer experiences across all aspects of operations

### Sustainability related risks and opportunities (SRRO)

#### Physical risks and natural disasters

The escalating implications of climate change are leading changes in travel patterns and attractiveness of destinations. These dynamics include significant biodiversity loss, disruptions along travel routes and changes in travel seasons among others

<b>&lt; 1 year</b>	Implications of extreme heat and natural disasters
<b>1-5 years &gt;5 years</b>	More pronounced impacts of volatile weather patterns and biodiversity loss which could impact attractiveness of locations and Sri Lanka as a tourism destination
<b>Response</b>	Long-term transformation of offering based on sustainable tourism concepts

#### Rise of the eco-conscious customers

Travellers are increasingly demanding responsible environmental and social practices from tourism sector operators, necessitating shifts in operating models and processes to ensure long-term attractiveness of offering

<b>&lt; 1 year</b>	Environmental consciousness among factors considered when selecting destination and operator
<b>1-5 years</b>	Responsible business is expected to feature increasingly prominently in travellers' decision-making, particularly among the younger demographics
<b>&gt;5 years</b>	Tourism sector operators who do not embrace responsible business will see significantly reputational impacts and an erosion of competitive edge
<b>Response</b>	Gradual transformation of business and processes to embrace environmentally conscious practices

## SASB DISCLOSURES

Table: Hotels and Lodging Industry

TOPIC	ACCOUNTING METRIC	UNIT OF MEASURE	CODE	DISCLOSURE/Pg. reference
Energy Management	1) Total energy consumed,	Gigajoules (GJ), Percentage (%)	SV-HL-130a.1	117,900 38%
	2) Percentage grid electricity			
	3) Percentage renewable			
Water Management	1) Total water withdrawn	Thousand cubic meters (m <sup>3</sup> ), Percentage (%)	SV-HL-140a.1	174.74 mn Sri Lanka has been ranked as a highly water stressed nation
	2) Total water consumed; percentage of each in regions with High or Extremely High Baseline Water Stress			
Ecological Impacts	Number of lodging facilities located in or near areas of protected conversation status or endangered species habitat	Number	SV-HL-160a.1	Two of the Sector's properties in Sri Lanka are located in areas close to rich biodiversity
	Description of environmental management policies and practices to preserve ecosystem services.	N/A	SV-HL-160a.2	The Sector aligns with the environmental policies and procedures of the Hayleys Lifecode (refer to page 102)
Labour Practices	1) Voluntary	Percentage (%)	SV-HL-310a.1	36%
	2) Involuntary turnover rate for lodging facility employees			
	Total amount of monetary losses as a result of legal proceedings associated with labour law violations (1)	Presentation currency	SV-HL-310a.2	Nil
	Description of policies and programmes to prevent work harassment	N/A	SV-HL-310a.4	The Group's Anti-Sexual Harassment Policy and Whistleblower Policies provide an effective tool for employees to put forward their grievances

## LEISURE

As the Sector positions itself to capture opportunities emerging from the country's revival in tourism the short, medium and long-term plans in place are summarised below:

FUTURE PLANS	
Short-term	Medium-to-long term
<ul style="list-style-type: none"> <li>• Strengthen social media presence to drive increased conversion rates</li> <li>• Dynamic pricing strategy to increase competitiveness</li> <li>• Diversification of target customer segments</li> <li>• Improve employee value proposition to enhance retention levels</li> <li>• Ongoing focus on cost optimisation</li> </ul>	<ul style="list-style-type: none"> <li>• Enhance corporate proposition of The Kingsbury</li> <li>• Soft refurbishments of rooms and other amenities</li> <li>• Strengthening service culture to retain restaurant patrons</li> </ul>
<p><b>Short-term goals</b> ROCE &gt; 8%</p>	<p><b>Medium-to-long term goals</b> ROCE &gt; 15% Gearing &lt; 55%</p>

## INDUSTRY INPUTS, POWER & ENERGY

Hayleys Aventura drives growth of Sri Lanka's industrial sector through providing access to a range of world-class industrial raw materials and engineering solutions. The Sector also drives the advancement of Sri Lanka's government healthcare sector through providing access to advanced health care technology and solutions. Through the Power & Energy cluster, Aventura contributes to the country's low- carbon transition through an installed capacity of 50MW of hydro, solar and wind power.

## INDUSTRY INPUTS, POWER & ENERGY

**Rs.4.56 bn**  
Payments to suppliers

**Procurement**  
Importing a portfolio of industrial raw materials, healthcare equipment and engineering solutions from globally reputed suppliers

**Economic Value**  
Rs. 1.87 bn tax contributions  
USD 4.78 bn export revenue generated

### Socio-economic value generation

**Facilitating business growth**  
4500+ customers supported

**Contributing to Sri Lanka's low carbon transition**  
142 GWh generation of renewable energy

## INDUSTRY INPUTS, POWER & ENERGY

### SECTOR OVERVIEW

The Sector is represented by Hayleys Aventura, one of Sri Lanka's leading suppliers of industrial raw materials to domestic and export-oriented industries as well as medical and analytical equipment and engineering solutions. In Power & Energy, the Sector is a leading producer of renewable energy, with a collective installed capacity of 50MW in mini hydro, wind and solar power plants, contributing to the total renewable energy installed capacity in the renewable energy sector of Sri Lanka.

#### INDUSTRIAL RAW MATERIALS

Supplier of a range of input materials to manufacturing industries

##### Contribution to Sector

Revenue: 46%  
PBT: 16%

##### Performance 2023/24

Revenue: 23% growth  
PBT: 2% growth

**-9%**

Contraction in Industrial Sector

**-21%**

Contraction in Construction Sector

**21%**

Reliance on non-conventional renewable energy

## OPERATING ENVIRONMENT

The operating landscape remained challenging during the review period, reflecting subdued demand from industries catering to the domestic market amidst a decline in consumer spending. While demand from export industries remained relatively stable, overall demand decelerated in view of the prevalent challenges in the domestic economy. Demand for Engineering Solutions was also lackluster during the year, reflecting contractions in the country's Industrial, Manufacturing and Construction sectors. The appreciation of the exchange rate had mixed effects on the Sector, which has exposure to both dollar receivables and payables. While liquidity constraints faced by the government sector continued to impede collections, conditions improved in comparison to the previous year supported by the influx of foreign funding for specific healthcare projects. Meanwhile, in line with the global energy transition and Sri Lanka's 2050 net zero aspirations, the Government is driving the widespread adoption of renewable energy sources, with a target of achieving 70% reliance on renewable energy by 2030, from the current levels of 50%.

### Summary of external drivers

	Driver	Driver Significance of impact	Implications on Sector
Economic and geo-political context	Decline in consumer spending	H	- Subdued demand from industries such as Food and Beverage and Cosmetics
	Contraction in the industrial and construction sector	M	- Weak demand for Engineering Solutions given limited commencement of new projects
	Appreciation of the exchange rate	H	+ Leads to lower import costs and increased attractiveness of pricing to local customers
Industry context	Government impetus towards transitioning to a low carbon economy	M	+ Increased opportunities for renewable energy projects
	Talent migration	H	- Challenges in talent attraction and retention
Sustainability context	Increasing preference for sustainable solutions across industries	H	+ Opportunity to introduce sustainable innovations in partnership with our global partners
	Focus on energy efficiency across industries	H	+ Growth opportunities in catering to green and efficient energy solutions

H-High, M-Medium, L-Low. Brown circle represents adverse effect while yellow circle represents positive affect

## STRATEGY AND INTEGRATED PERFORMANCE REVIEW

The Sector's performance during the year inevitably reflected the challenges stemming from the external environment. Revenue increased by 12% to Rs. 9.73 bn, driven by the Industry Inputs cluster, which delivered top line growth of 23% (and contributed 46% to the Sector) supported by good growth in regional markets. The Power & Energy cluster saw Profit Before Tax increasing by 6% respectively. Overall, however profitability was affected by the challenges in the Industry Inputs cluster resulting in the Sector's Profit Before Tax and Profit After Tax declining by a respective 10% and 13%.

### SECTOR FINANCIAL PERFORMANCE

## INDUSTRY INPUTS, POWER & ENERGY

### INTEGRATED PERFORMANCE

### Industrial Raw Materials

The sub-sector delivered a subdued performance, reflecting the decline in consumer spending which affected demand from key industries such as F&B, cosmetics and polymers. Meanwhile demand from export-oriented industries such as polymers, gloves and tiles were somewhat subdued during the year, reflecting global dynamics. The Sector continued to focus on widening its sustainability-linked product portfolio given increasing consciousness of environmental factors; for instance, having launched the biodegradable plastic additive, Eco One in the previous year the Sector focused on increasing penetration through acquisition of new customers.

### Lifesciences

In this sub-sector, Aventura commands market leadership in the general x-ray segment and also has a presence in high-end segments such as radiology, oncology and cardiology. While domestic demand remained relatively unchanged, the sub-sector pursued strong growth in regional markets, pursuing new customer acquisition in the Maldives. Plans are currently in place to widen agency agreements to cover Maldives and Bangladesh in addition to Sri Lanka, thereby presenting significant regional opportunities. While domestic demand continued to be impeded by

liquidity constraints in the government healthcare sector, selected projects gained traction following the receipt of foreign funds for specific areas. The cluster demonstrated strong performance supported by regional expansion with 60% growth in profits.

### Engineering Solutions

As Sri Lanka’s demand dynamics remained unfavourable, reflecting the contraction in Sri Lanka’s Industrial and Construction sectors the sub-sector commenced a rental fleet and engaged primarily in repair and maintenance activities. It also directed increased focus towards strengthening its position in regional markets. Accordingly, the sub-sector recorded a 2% growth in profits, driven by proactive marketing strategies and increased penetration in both Maldives and Bangladesh. Continued focus was also placed on expanding the portfolio of products and services offered and during the year, Aventura partnered with globally reputed Stamford Alternators, entering into a regional service partnership for alternators, parts and expert services. The cluster also successfully obtained the Agency for Avery Weigh-Tronix during the year.

### Power & Energy

The cluster’s Profit Before Tax increased by 10% during the year, reflecting stronger rainfall in generating regions. With the expected downward

revisions of tariffs rates on the 2nd tier of power plants, performance is expected to be subdued in 2024/25. Aventura sees tremendous potential for renewable energy in the medium-to-long term, given the government’s thrust towards reducing dependence on fossil fuels and achieving net zero aspirations by 2050. The Sector also pursued aggressive regional growth in Bangladesh, which is expected to come to fruition in the medium term.

While employee retention remained a challenge, the Sector focused on strengthening capabilities through access to training and development and increasing employee satisfaction through numerous engagement interventions.

### ESG in Action

The Sector’s ESG aspirations center on offering access to global innovations which drive positive social and environmental benefits to local industries. With increasing focus on sustainability considerations, these efforts are expected to accrue significant positive impacts and mitigate adverse environmental impacts of local industries. In line with the ESG integration agenda of Hayleys, the Sector also established an ESG Steering Committee to identify and respond to emerging ESG risks and opportunities. The Sector also obtained third-party assurance on its carbon footprint during the year.

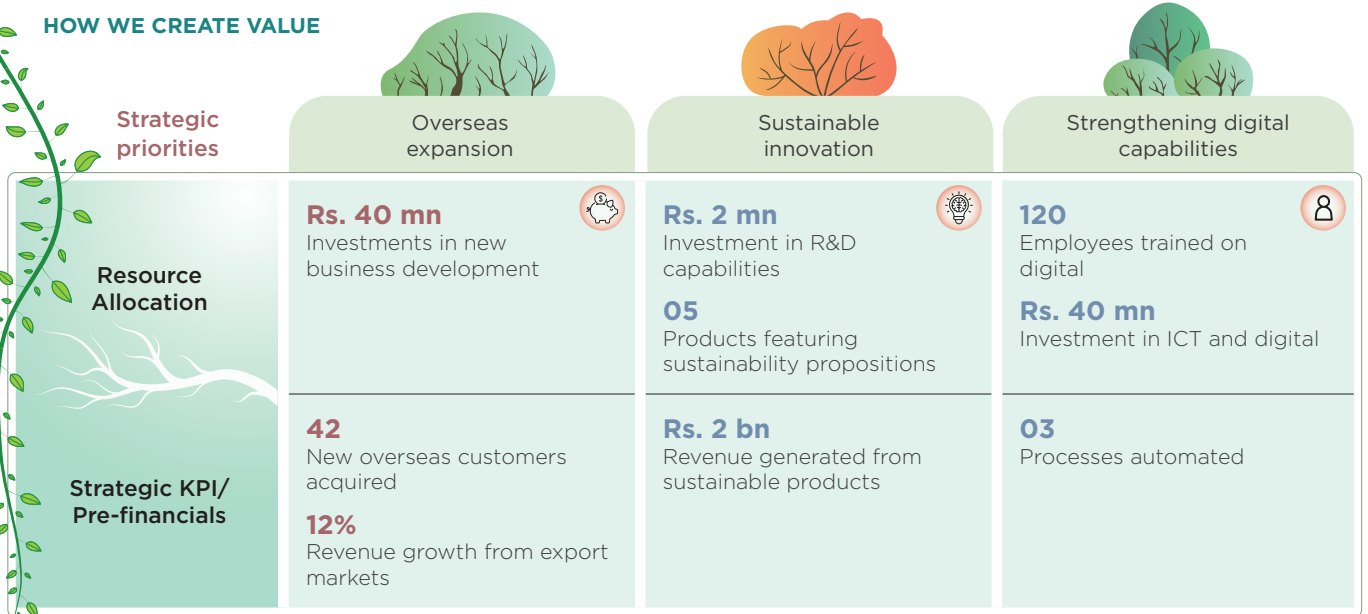

HOW WE DEFINE VALUE

HOW WE CREATE VALUE

HOW WE DELIVER AND PRESERVE VALUE

- Total economic value generated during the year declined by 5% in view of subdued demand
- Payments to employees increased by 7% during the year
- Value generated to Governments amounted to Rs. 1.87 bn an increase of 39% compared to the previous year
- Payments to lenders of capital decreased by 28%
- Value retained in the business for future investment amounted to Rs. 1.23 bn compared to Rs. 1.26 bn the previous year

### ESG HIGHLIGHTS

#### CLIMATE ACTION

- As one of Sri Lanka's largest renewable energy operators, the Sector generated 142 GWh of solar, wind and hydro energy during the year, offsetting 105,136 of the Group's carbon footprint
- Rooftop solar installation in the Sector's Industrial Raw Materials manufacturing facility (Haycolour)

	2024	2023	Y-o-y
Renewable energy generation (GWh)	142	143	-
Carbon footprint offset (tCO2e)	105,136	105,943	(1)
Sector energy consumption (Gj)	6,487	1,161	459
Carbon footprint (tCO2e)	803	480	68

### INDUSTRIAL SOLUTIONS THAT SHAPE A BETTER FUTURE

<b>EcoOne</b>		<ul style="list-style-type: none"> <li>Accelerate rate of degradation to 18-24 months</li> <li>Support recyclability</li> <li>Certified by third-party local and global testing include Bureau Veritas</li> </ul>
<b>Recovered carbon black</b>		<ul style="list-style-type: none"> <li>Contributes towards a circular economy by reusing carbon black from the tyre industry</li> </ul>
<b>Illumina Next Generation Sequencing</b>		<ul style="list-style-type: none"> <li>Enabled targeted precision treatment of medical conditions</li> </ul>

### EMPLOYEE VALUE CREATION

During the year focus was placed on building leadership skills and ensuring succession planning

	2024	2023
No. of employees	312	296
Training investment (Rs.mn)	14	8
Payments to employees (Rs.bn)	686	641

### INDUSTRY COLLABORATION

#### Inaugural Congress for Sustainable Materials- 'The Future of Plastics and Packaging'

The Sector provided leadership to a much-needed industry dialogue on the issue of non-biodegradable waste in Sri Lanka, inadequate waste management systems and potential solutions to ensure responsible use and disposal of plastic

**PROSPECTS AND PLANS**

Despite short-term volatilities stemming from the country’s still recovering industrial activity, the medium-to-long term prospects for the Industry Inputs cluster remains promising. As macro-economic conditions record gradual stability, industrial activity is expected to strengthen along with improved customer sentiments. Meanwhile, in the Power & Energy cluster, the Government’s aspirations of reaching 70% renewable energy generation by 2030 presents significant opportunities for growth. The short, medium and long-term opportunities and risks shaping industry dynamics are listed below:

**INDUSTRY RISK AND OPPORTUNITY LANDSCAPE**

**+ Gradual recovery of the Industrial Sector**

The gradual recovery of industrial activity in line with more favourable macro-economic fundamentals is expected to augur well for the Sector in the medium-term, driving increased demand from both domestic and export-oriented businesses

**Response**

Aggressive market activations and customer engagement across industries

**+ Technology**

Technology and AI is pushing boundaries in engineering and healthcare (among others) offering significant opportunities for innovation. Technology is also redefining the modern workplace through automation, productivity and collaboration among others

**Response**

Ongoing engagement with global partners in accessing the latest developments in engineering and healthcare technology

**+ Opportunities for regional expansion**

Significant opportunities in leveraging partnerships with global principals to drive increased regional penetration, particularly in Maldives and Bangladesh

**Response**

Acquisition of new customers and deeper engagement with existing customers

**- Government’s liquidity constraints**

With over 80% of the Lifesciences sub-sector relying on government contracts, liquidity constraints can lead to longer debtor days and higher finance cost

**Response**

Ongoing debtor engagement and diversification of customer base

**Sustainability related risks and opportunities (SRRO)**

**Sri Lanka’s net zero ambitions and push to renewable energy**

In line with Sri Lanka’s Net Zero Roadmap the country is gearing up renewable energy projects as it aims to tackle emissions and transition to a low-carbon economy

<b>&lt; 1 year</b>	Increased interest in renewable energy given escalation in fossil fuel-based energy costs
<b>1-5 years</b>	Significant growth potential with the Government aiming for 70% renewable energy by 2030
<b>&gt;5 years</b>	With the government committing to zero new coal fired plant, RE will be positioned as the key solution to bringing s to bridge the country’s energy requirements
<b>Response</b>	Aggressive pursuit of new projects

**Increasing demand for sustainable materials**

As the world shifts to a low-carbon economy and environmental regulations become increasingly stringent, demand for sustainable materials are expected to increase

<b>&lt; 1 year</b>	Interest from export-oriented businesses which are subject to regulations from EU
<b>1-5 years</b>	Anticipated increase in demand from both export-oriented businesses and domestic businesses
<b>&gt;5 years</b>	Use of sustainable materials become widespread, providing significant upside potential for suppliers of industrial materials
<b>Response</b>	Exploring opportunities to partner with our global principals on innovative sustainable materials

## INDUSTRY INPUTS, POWER & ENERGY

Against the backdrop, the Sector will place strategic emphasis on both product and market development, directing focus on expanding the regional presence and supporting export-oriented industries.

FUTURE PLANS	
Short-term	Medium-to-long term
<ul style="list-style-type: none"> <li>• Capacity expansion in Industrial Raw Materials</li> <li>• Expand bio-degradable product portfolio to regional markets</li> <li>• Product diversification</li> <li>• Penetration into high-end applications in the Lifesciences sub-sector</li> <li>• Market development through expansion to new regions in Lifesciences</li> <li>• Investments in new renewable energy projects.</li> </ul>	<ul style="list-style-type: none"> <li>• Develop new brands catering to diverse industry applications</li> <li>• Product development focused on surgical and critical care segments in Lifesciences</li> <li>• Offer generation solutions in regional markets including Maldives, Seychelles and Bangladesh</li> </ul>

# TRANSPORTATION & LOGISTICS

## SECTOR OVERVIEW

Hayleys Advantis Group is the undisputed leader in Sri Lanka's transportation and logistics industry, offering end-to-end logistics solutions covering land, air and sea transport as well as the full spectrum of solutions in integrated logistics, projects and engineering, marine and energy, freight management and travel & aviation. Advantis' competitive edge is underpinned by its array of unmatched solutions, world-class service standards and customer centricity, which were recently recognised when the Group was awarded the 'Best Transportation and Logistics Company in Sri Lanka and South Asia' by the Global Brands Magazine, UK.

Unisyst Engineering PLC, in which the majority share is held by Advantis Projects and Engineering has announced plans to delist from the CSE

## CONTRIBUTION TO GROUP

## COMPETITIVE POSITION

- Largest operator of floating assets in Sri Lanka with a fleet of 23 assets
- Largest Agency house in Sri Lanka and the Maldives
- Warehouse footprint of over 3 mn square ft across 6 markets
- Multi-purpose project logistics capabilities
- B2B distribution footprint of 7.2 million KM annually

Strengthening market presence in transportation and logistics in South Asia and South East Asia

Partnerships with numerous global principals including the world's leading shipping and freight forwarding companies

**0.3%**  
Global trade volumes

**3.6%**  
Sri Lanka cargo volumes

**89%**  
Increase in global freight rates

**OPERATING ENVIRONMENT**

Global merchandise trade volumes slightly improved by 0.3% in 2023 with strong regional disparities amidst global geopolitical tensions, divergent economic growth and disruptions to main shipping routes. For instance, import demand fell sharply in Europe, remained flat in Asia and grew in fuel-exporting economies. Disruptions to shipping routes during the latter part of 2023, have had wide ranging implications on global trade with diversion of traffic resulting in longer voyage times, higher fuel costs and somewhat reversing the downward trend in freight rates. On average, however, global freight rates which reached unprecedented highs in the aftermath of COVID-19 have continued to trend downwards. Sri Lanka’s port and airport activities recorded modest improvement, rebounding from the implications of the economic crisis during the latter part of the year. Accordingly, total containers handled increased by 1.3% while air cargo handled decreased by 7% supported by the gradual recovery of macro-economic conditions, lifting of import restrictions and stabilisation of interest and exchange rates.

**SECTOR FINANCIAL PERFORMANCE**

**Summary of external drivers**

	Driver	Driver Significance of impact	Implications on Sector
Economic and geo-political context	Global geo political tensions	H	- Potential disruptions to shipping routes and implications on voyage length and fuel costs and freight rates
	Volatility in freight rates	M	+ Gradual improvement of freight rates towards the latter part of the year
	Global inflation	M	- Downward impact on the consumption of trade-intensive goods
Industry context	Exchange rate volatility	M	- Impact on global competitiveness and profitability margins
	Increased uncertainty in trade policy	H	- Limited predictability of trade activity
	Technology driven transformation	H	+ Potential improvements in efficiency, cost management and improve the uptime of vessels
Sustainability context	Increased regulations on sustainable shipping	M	+ Increased cost of compliance
	Decarbonisation	M	+ Opportunity to sharpen competitive edge through differentiation + Potential opportunities for cost reductions

H-High, M-Medium, L-Low. Brown circle represents adverse effect while yellow circle represents positive affect

## TRANSPORTATION & LOGISTICS

### INTEGRATED PERFORMANCE

### STRATEGY AND INTEGRATED PERFORMANCE REVIEW

The Sector's performance reflected its efforts to consolidate operations in a year characterised by numerous external challenges. Against this backdrop, the Sector adopted a long-term view to value creation, focusing on retaining relationships, strategising for the future and building a strong platform to drive future growth. The Sector's Revenue declined by 32% to Rs. 91,353 mn, reflecting lower freight rates, appreciation of the Sri Lankan Rupee, as well as the discontinuation of the domestic fuel license through which the Sector had supplied bunker fuel temporarily to the domestic market the previous year. Meanwhile, the Sector's Profit Before Tax also normalised to Rs. 3,671 mn from the record highs of the previous year.

The Freight Management cluster recorded a decline in Profits of 59% mainly due to the normalisation of freight rates during the year and a decline in trade volumes given the softening of global demand. The performance of the Integrated Logistics cluster also weakened significantly, reflecting lower occupancy levels at the warehousing facilities. As consumer purchasing power weakened amidst high inflation, demand for third-party logistics from the FMCG sector also declined, while increasing price consciousness of customers also led to a contraction in profitability margins. Despite short-term volatilities, the long-term prospects of the cluster remain promising given the increasing preference towards third-party logistics services.

Performance of the Marine & Energy cluster normalised from the record highs of the previous year, following the discontinuation of the distribution of fuel to the domestic market. The Cluster focused on the acquisition of new customers and retention of existing relationships through offering an enhanced value proposition at attractive pricing, which although temporarily affecting profitability is expected to drive long-term growth. The Projects & Engineering cluster continued to be dampened by the persistent downturn in the country's construction sector and infrastructure projects.

The Sector refined its international expansion strategy during the year to direct focus towards selected markets which present the most significant opportunities for growth. Accordingly, the Sector will drive deeper penetration in the four markets of Bangladesh, India, Indonesia, and Thailand, leveraging on its established relationships to offer a wider portfolio of services. The Sector's organisational structure was also repurposed with the strengthening of regional leadership capabilities, aligned with the geographical focus.

The Travel & Aviation cluster marked a significant achievement by winning a competitive bid for the General Sales Agency to represent Air India, the flag carrier airline of India. This partnership presents significant opportunities for medium-to-long term growth, given the potential to position India as the transit hub for long haul travel and establish Air India as the airline of choice for Sri Lankan travellers to the Europe and Americas.

The Sector continued to focus on strengthening its value position to employees with considerable enhancing investments directed towards enhancing leadership skills across all levels. A culture of learning is nurtured through Advantis Campus- the Sector's dedicated in-house corporate campus which enables employees to share knowledge across diverse disciplines. The Sector also continues to nurture a future-ready, holistic and dynamic organisational culture through Advantis DNA centering on the four pillars of Purpose, Spirit, Philosophy and Values.

### ESG IN ACTION

The Sector marked a step change in its ESG aspirations during the year, with the launch of its ESG strategy, HELIOS. Centered on the seven pillars of energy, emissions, biodiversity, employee engagement, community engagement, safety and governance, HELIOS is aligned to the long-term aspirations of the Hayleys Lifecode while reflecting industry-specific risks and opportunities.

- Establishment of Sector ESG Steering Committee
- Strengthen ESG risk assessment and integration with existing risk processes
- Monthly and quarterly monitoring and reporting of performance against ESG targets with the participation of relevant personnel from manufacturing facilities

HOW WE DEFINE VALUE

 <p><b>SHAREHOLDERS</b> Sustainable growth in returns commensurate with risk undertaken</p>	 <p><b>CUSTOMERS</b> Access to reliable and high-quality engineering solutions and excellent customer service</p>	 <p><b>EMPLOYEES</b> Competitive remuneration, opportunities for skill and career progression</p>
 <p><b>PRINCIPALS</b> Opportunities for mutual growth and ease of conducting business</p>	 <p><b>GOVERNMENT</b> Generation of tax revenue, supporting the country's emission reduction aspirations and job creation</p>	 <p><b>COMMUNITY</b> Positive social and environmental impacts and contribution to economic prosperity</p>

HOW WE CREATE VALUE

Strategic priorities	Focused regional expansion	Organisational restructure	People development
<b>Resource Allocation</b>	<b>Rs. 204 mn</b> Sales and marketing expenses in selected geographies	Matrix structure reflecting both geographical and product focus	<b>Rs. 71 mn</b> Investment in training <b>3,162</b> Employees trained
<b>Strategic KPI/ Pre-financials</b>	Customer acquisition <b>-29%</b> Revenue growth from overseas markets		<b>204</b> Promotions <b>76%</b> Employee retention

HOW WE DELIVER AND PRESERVE VALUE

- Total economic value generated during the year declined by 1% in view of the challenging external conditions
- Payments to employees increased by 11% during the year
- Value generated to Governments amounted to Rs. 6,954 Mn and 27% of the total value created
- Payments to lenders of capital decreased by 32%
- Value retained in the business for future investment amounted to 6% compared to 29% the previous year

Remuneration per Employee (Rs.mn)	4	2.2	82	2

### ESG HIGHLIGHTS

#### Climate action

- The Sector improved its emission reporting, widening the coverage of its scope 3 emissions following an external assurance on its GHG inventory.
- Pursuing options to decarbonise vessels with the use of alternative fuels such as bio diesel

	2024	2023	Y-o-y	Target
Carbon footprint (tCO2e)	45,863	35,323	30	50% reduction

#### BUILDING FUTURE LEADERS

Advantis partnered with the CINEC campus to deliver a series of transformative workshops catering to undergraduate students. Sessions delivered included fundamentals of problem solving, effective time management and entering the job market

#### ADVANTIS BLUE CARBON

The Project seeks to increase the national blue carbon sinking capacity by supporting the conservation and replenishment of coastal ecosystems. The initiative is focused on accelerating the natural regeneration of mangroves at Anawilundawa and included the following:

- Facilitating the studying and collection of data by supporting a team of scientists
- Setting up a pre-engineered laboratory facility adjacent to data collection points
- Gathering topographical data and developing hydrological models providing valuable scientific insights

#### EMPLOYEE VALUE CREATION

Several companies within the Sector have obtained the Great Place to Work Certification. The Sector's people strategy for the year centered on, skill development, culture-building, health and well-being and diversity, equity and inclusion (DEI) among others

	2024	2023
No. of employees	2,899	2,399
Training investment (Rs.mn)	71	76
Average training hours/employee	6	11

## PROSPECTS AND PLANS

The World Trade Organisation anticipates that merchandise trade volumes will increase by 2.6% in 2024 and 3.3% in 2025 as inflationary pressures ease and real household incomes improve. This forecast however, is associated with a high degree of uncertainty given the recent escalation in regional conflicts and geopolitical tensions. Despite short-term volatilities, Sri Lanka's port activity is poised for long-term growth, supported by the gradual recovery of the economy together with policy thrust towards strengthening exports and port infrastructure. The outlook for the Sector is shaped by the following risks and opportunities.

## INDUSTRY RISK AND OPPORTUNITY LANDSCAPE

### ⊖ Escalating geopolitical tensions

Conflict in the Middle East has disrupted main shipping routes and diverted sea shipments between Asia and Europe. Attacks on commercial ships in the Red Sea have resulted in several carriers avoiding transiting via the Red Sea altogether, causing the average number of weekly passages to plunge. This could also lead to some fragmentation in trade flows, with trade activity reorienting along geopolitical lines.

#### Response

Diversification of revenue sources and geographical footprint

### + Regional dynamics

Sri Lanka's locational advantage and strategic positioning along the main maritime pathways present considerable potential for transforming the country into a central point linking the Middle East and the Far East hubs. Meanwhile, Sri Lanka can benefit from the anticipated economic growth of India, as currently the majority of Sri Lanka's transshipments are from India

#### Response

Expansion of the portfolio of services offered and customer acquisition

### + Digital transformation

Digital capabilities are transforming the global shipping industry with technologies such as Internet of Things (IOT), Artificial intelligence and big data acting as critical enablers in optimising operations, enhancing efficiency and increasing the uptime of vessels.

#### Response

The 5-year digital road map introduced for the Sector, will continue to be rolled out during the next financial year

### + Gradual recovery of the Manufacturing Sector

Sri Lanka's Industrial Sector is poised for growth with the gradual stabilisation of the exchange rate and relatively favourable interest rate dynamics fuelling the release of pent-up demand. The apparel sector is also showing promising signs of recovery over the medium to long-term supported by the country's increased competitiveness amidst the adjustment of minimum wages in competing economies.

#### Response

Pursuing increased customer penetration and acquisition

### Sustainability related risks and opportunities (SRRO)

#### Decarbonisation aspirations of the International Maritime Organisation (IMO)

The IMO has committed to reducing the emissions from international shipping by at least 50% by 2050 (compared to 2008), which can only be achieved through developing new zero-carbon technologies or sustainable products

< 1 year	Limited impact over the short-term
1-5 years	Potential increase in the low-carbon shipping propositions by global operators
>5 years	Increased popularity of commercially viable zero carbon ships
Response	Currently exploring avenues of low-carbon technologies with the aim of decarbonising vessels

#### Shift to low-carbon economy

As the world transitions to a low-carbon economy, environmental regulations pertaining to vessel emissions, marine pollution and sea farers' rights are likely to increase in stringency

< 1 year	Regulations pertaining to the use of low-carbon fuel such as low-Sulphur fuel
1-5 years	Potential applicability of EU regulations on the use of renewable marine fuels and connection to onshore power supplies
>5 years	In addition to low-carbon ships, regulations pertaining to recycling ships and dismantling vessels could be introduced in the long-term
Response	Ongoing monitoring of emerging regulations and commitment to drive deep reductions in the carbon footprint by 2045

## TRANSPORTATION & LOGISTICS

The Sector's regional strategy, extensive customer and principal relationships, strong brand name as well as ongoing focus on expanding its service portfolio has aptly positioned Advantis to effectively leverage the industry's upside potential. Key areas of focus in the short, medium and long-term are given below

FUTURE PLANS	
Short-term	Medium-to-long term
<ul style="list-style-type: none"> <li>• Market penetration in existing markets</li> <li>• Strengthen position of Advantis Singapore</li> <li>• Implement digital roadmap</li> <li>• Initiatives to increase top-of-mind brand awareness</li> <li>• Execution of DEI initiatives across the Group</li> <li>• Exploring opportunities decarbonisation</li> </ul>	<ul style="list-style-type: none"> <li>• Regional investments in identified markets</li> <li>• Enhance technological capabilities and drive productivity improvements</li> <li>• Customised marketing plans for each selected country</li> <li>• Enhance the proposition offered under Advantis Campus</li> </ul>
<b>Short-term goals</b> ROCE > 15%  ROE > 20%	<b>Medium-to-long term goals</b> ROCE > 15%  ROE > 25%

## PROJECTS & ENGINEERING

Hayleys Fentons is Sri Lanka's leading provider of integrated engineering solutions, facilitating the growth of local industries and businesses through an array of Solar, ICT, Security, MEP and Facility Management (among other) solutions. As the country's leading rooftop solar PV installer, Hayleys Fentons is also at the forefront of fuelling the country's transition to a low-carbon economy.

## PROJECTS & ENGINEERING

**Supplier value addition**  
Value generation across suppliers through procurement of key input materials

**Economic Value**  
Rs. 3.3 bn tax contributions

**Socio-economic value generation**

**Facilitating business growth**  
14,773 Projects to commercial customers supported through diverse business verticals

**Driving Sri Lanka's carbon reduction ambitions**

# PROJECTS & ENGINEERING

## SECTOR OVERVIEW

Hayleys Fentons is Sri Lanka's leading engineering services company, offering an unparalleled array of end-to-end, integrated solutions to the industrial, commercial and residential segments. Over an illustrious history spanning over a century, Hayleys Fentons has emerged as one of Sri Lanka's most trusted engineering brands founded on a strong reputation for quality, service excellence and innovation. Through its partnerships with globally reputed principals, Hayleys Fentons offers the Sri Lankan consumer access to an array of world-class products and solutions with the latest technology, driving the growth of diverse industries and uplifting living standards and quality of life across the island. The Sector emerged as a key contributor to the Hayleys Group's profits during the year, accounting for 14% of PBT and ranking the 2nd largest contributor to Profit Before Tax during the year.

## CONTRIBUTION TO GROUP

### RENEWABLE ENERGY

Sri Lanka's largest solar EPC services provider

**Contribution to Sector**  
Revenue: 66%  
PBT: 82%

**Performance 2023/24**  
Revenue: 141% growth  
PBT: 233% growth

### EQUIPMENT HIRING

Provides industrial equipment on rent-basis to a larger spectrum of customers.

**Contribution to Sector**  
Revenue: 0.03%  
PBT: (0.3)%

**Performance 2023/24**  
Revenue: 0% growth  
PBT: 0% growth

### EQUIPMENT TRADING

Supplier of cutting-edge construction equipment including, electrical, instrumentation, material handling, combustion, and HVAC products

**Contribution to Sector**  
Revenue: 8%  
PBT: 7%

**Performance 2023/24**  
Revenue: 97% growth  
PBT: 198% growth

### SYSTEM INTEGRATED SOLUTIONS

Offers system integrated solutions including information security, enterprise networking, energy storage solutions and IT managed services among others

**Contribution to Sector**  
Revenue: 11%  
PBT: 4%

**Performance 2023/24**  
Revenue: 2% decline  
PBT: 28% decline

### ENGINEERING SERVICES

Largest integrated engineering services provider including facilities management and architectural design visualisation solutions.

**Contribution to Sector**  
Revenue: 15%  
PBT: 8%

**Performance 2023/24**  
Revenue: 32% growth  
PBT: 204% growth

## OPERATING ENVIRONMENT

The Sector's performance is typically correlated to the country's Construction Sector, which despite cascading effects from the economic turbulence of recent years showed signs of recovery towards the latter part of the financial year. While the construction industry contracted by

## COMPETITIVE POSITION

**Sri Lanka's leading solar EPC** (engineering, procurement and construction) company, having installed over 200 MWp of rooftop solar power systems since 2011

Facilitates the **growth of Sri Lanka's construction and infrastructure sector** through offering a variety of diverse services to landmark projects

Leading **mechanical, engineering and plumbing** (MEP) contractor in Sri Lanka, powered by a team of highly skilled professionals

Compliance to a range of domestic and international **environmental, quality and health and safety** certifications.

**First ISO-certified Facility Management Service** provider in the country

21% in 2023, it is noteworthy that in the last quarter of 2023 and first quarter of 2024 the sector marked a positive growth. Growth was supported by improving business sentiments together with favourable interest and exchange rate dynamics and liquidity injections by the government as settlement of dues to contractors. Meanwhile, Sri Lanka's solar sector recorded remarkable growth during the year driven by price adjustments in electricity costs. Accordingly, solar (rooftop) generation increased substantially in 2023, accounting for 9% of the total non-conventional renewable energy generation (NCRE). Meanwhile the global prices of solar panels continued its downward trajectory during the year falling by nearly 50% in view of increased production capacity and inventory piling by suppliers.

**21%**  
Contraction in  
construction industry

**70%**  
Sri Lanka's renewable  
energy target for 2030

**9%**  
Solar contribution to  
the NCRE mix

### Summary of external drivers

	Driver	Driver Significance of impact	Implications on Sector
Economic and geo-political context	Appreciation of the exchange rate	M	+ Favourable to the Sector given its reliance on imported inputs
	Contraction of the construction industry for most part of the year	M	- Subdued demand for MEP, facility maintenance and other related solutions
	Government liquidity injection to construction sector towards the latter part of 2023	M	+ Gradual recovery of construction sector and promising outlook for 2024/25
Industry context	Increase in electricity and energy prices	H	+ Increased demand for solar from both residential and industrial customers
	Decline in global solar panel prices	M	+ Improved affordability
	Intensifying competition in solar	M	- Entrance of new players and intensifying price competition
Sustainability context	Sri Lanka's national climate ambitions of increasing reliance on renewable energy to 70% by 2030	H	+ Anticipated increase in demand for solar
	Increasing popularity of sustainable financing avenues and concessionary funding schemes for green investments	M	+ Potential increase in demand for solar given access to concessionary funding schemes

H-High, M-Medium, L-Low. Brown circle represents adverse effect while yellow circle represents positive affect

### STRATEGY AND INTEGRATED PERFORMANCE REVIEW

The Sector recorded delivered impressive growth and profitability during the year, emerging as the 2nd largest contributor to Group Profit Before Tax with a share of 14%. Revenue increased by 46% to Rs. 19.80 bn driven primarily by strong growth in the Renewable Energy cluster and supported by broad-based growth across all clusters. Profitability margins also improved during the year reflecting scale efficiencies in line with volume growth. The Sector's finance costs also declined significantly during the year, reflecting relentless focus on optimising working capital requirements as well as the downward trajectory of interest rates. Overall, the Sector generated a Profit Before Tax of Rs. 4.33 bn during the year a near tripling increase of Rs. 1.11 bn compared to the previous year.

### SECTOR FINANCIAL PERFORMANCE

## PROJECTS & ENGINEERING

### INTEGRATED PERFORMANCE

#### Renewable Energy

The cluster reaffirmed its position as the market leader in the rooftop solar PV segment, completing 200MW of installation and commanding an estimated market share of 25%. Revenue and Profit Before Tax recorded an increase of 141% and 233% during the year and was the largest contributor to the Sector. The cluster’s strategic foresight and timely interventions in penetrating the residential segment through a wider geographical footprint of 6 branches, deployment of stronger sales force and ongoing market activations enabled the cluster to capitalise on the surge in demand for solar during the year. The cluster also continued to strengthen its product proposition through the launch of solar hot water systems and irrigation and industrial pumps. In a landmark project marking a major milestone in Sri Lanka’s renewable energy journey, the Cluster also constructed a 2MWh battery backup system powered by solar PV which can offer up to three days of uninterrupted power to the respective client. In ensuring the accessibility of solar to a wider market and driving the country’s renewable energy aspirations, the Sector also partnered with several banks to introduce easy payment schemes and concessionary rates for solar installations.

#### Engineering Services

The cluster posted a strong turnaround during the year, generating a positive bottom line during year. Performance was upheld by improvements in core

performance with the recommencement of projects as well as a reduction in finance costs during the year. The cluster also optimised its organisational structure to empower leadership teams and enable better resource allocation, which in turn drove increased customer acquisition. The cluster also sought supply chain efficiencies through disintermediation and proactive negotiations with principals.

#### System Integrated Solutions

While the cluster secured several new projects during the year, performance was impacted by the deferment of several existing projects to the next financial year. Emphasis was placed on refining the cluster’s product offering through expanding the solutions offered under the security surveillance and audio-visual services range. The cluster also relaunched its ICT services arm as Fentons Information Technology under the brand promise of ‘Dependable tech-Capable hands’ offering access to world-class security and network infrastructure solutions.

The cluster delivered record-high profitability during the year. Performance was supported by customer acquisition in new market segments and diversification of the service portfolio to include equipment maintenance and minor works. In a significant achievement, the cluster also entered Maldives during the year, securing a contract with a multi-national financial institution. The Architectural Drawings and 3D Visualisations cluster also represents

a new business line, which offers 3D modelling of architectural drawings, enabling viewers to obtain the first-of-its-kind immersive experience through virtual reality.

#### Other segments

The Equipment Trading cluster also delivered its best-ever performance through consolidating its market position in the solar panel trading and expanding its product portfolio. In a new venture, Fentons commenced Equipment Renting during the year, seizing the market opportunity presented by organisations increasingly favouring renting equipment over purchasing. This cluster is powered by a team of highly capable designers and architects.

#### ESG in Action

The Sector commenced its alignment with the Hayleys Group’s ESG Roadmap during the year and is currently in the process of formulating its own ESG strategy with targets, action plans and deliverables up to 2030. Key interventions and developments in the Sector’s ESG integration during the year included the following:

- Establishment of Sector ESG Steering Committee
- Obtaining membership of the United Nations Global Compact and committing to the 10 principles
- Strengthen ESG risk assessment and integration with existing risk processes
- Third-party verification of GHG emissions (2022/23)

HOW WE DEFINE VALUE

 <p><b>SHAREHOLDERS</b> Sustainable growth in returns commensurate with risk undertaken</p>	 <p><b>CUSTOMERS</b> Access to reliable and high-quality engineering solutions and excellent customer service</p>	 <p><b>EMPLOYEES</b> Competitive remuneration, opportunities for skill and career progression</p>
 <p><b>PRINCIPALS</b> Opportunities for mutual growth and ease of conducting business</p>	 <p><b>GOVERNMENT</b> Generation of tax revenue, supporting the country's emission reduction aspirations and job creation</p>	 <p><b>COMMUNITY</b> Positive social and environmental impacts and contribution to economic prosperity</p>

HOW WE CREATE VALUE

<p><b>Strategic priorities</b></p> <p><b>Resource Allocation</b></p> <p><b>Strategic KPI/ Pre-financials</b></p>	<p><b>Consolidate leadership position in solar</b></p> <p><b>200</b> Strength of solar business development team</p> <p><b>6</b> Branches in key cities</p> <hr/> <p><b>87%</b> Growth of renewable energy sector</p> <p><b>25%</b> Market share</p>	<p><b>Expansion of product and service portfolio</b></p> <p><b>06</b> No. of new services provided</p> <hr/> <p><b>7,563</b> New customers acquired during the year</p>	<p><b>Focus on quality assurance</b></p> <p>Ongoing Investments in certifications and process improvement</p> <hr/> <p><b>02</b> New certifications obtained during the year</p> <p><b>05</b> Total certifications</p>
--	--	---	--

HOW WE DELIVER AND PRESERVE VALUE

- Total economic value generated during the year increased by 110%
- Payments to employees increased by 25% reflecting the Sector's increased headcount
- Value generated to Governments amounted to Rs. 3,327 mn and accounted for 35% of the total value created
- Payments to lenders of capital decreased by 45%.
- Value retained in the business for future investment amounted to Rs.9,586 mn compared Rs. 4,561 mn to the previous year

### ESG HIGHLIGHTS

#### Greening the customer journey

Through its integrated solar EPC solutions, Fentons has successfully reduced the country's fossil fuel dependence, both for residential and commercial customers.

#### RESIDENTIAL CUSTOMERS

##### 5,902 residences powered

- Customised services tailored for specific requirements
- Ensured affordability and accessibility through solar loans with favourable terms
- Support value chain through engaging providing panels to SME installers

#### COMMERCIAL PROJECTS COMPLETED

##### 135 commercial projects completed

- Solar power installation in 800 communication towers in partnership with Dialog Axiata adding 5.6 Mw of capacity
- Hayleys Fabric- largest single roof solar PV system of 4600 kWp
- Coca Cola Biyagama factory-2,000 kWp
- Brandix 3 factories combined capacity of nearly 4,000 kWp

#### Empowering indirect employees across the value chain

Hayleys Solar empowers and supports over 150 micro-entrepreneurs who are partnered as installers in the operation of solar solutions.

	2024	2023	Y-o-y
Energy consumption (GJ)	8,299	16,466	-50
Carbon footprint (tCO2e)	1,432	1,487	-4%

#### Roots of resilience

Launched a biodiversity conservation programme at the Bolgoda Lake in partnership with the Department of Coast Conservation and Coastal Resource Management (CCCRMD), with the aim of reforesting 1,000 of mangroves

#### Employee value proposition

Hayleys Solar empowers and supports over 150 micro-entrepreneurs who are partnered as installers in the operation of solar solutions.

	2024
No. of employees	311
Training investment (Rs.mn)	7
Total training hours	15,783
Payments to employees (Rs.bn)	1.31

## PROSPECTS AND PLANS

The Sector's performance is expected to be driven by Renewable Energy over the short-to-medium term, for which the outlook remains extremely promising. The country's gradual shift towards a low-carbon economy, coupled with conducive interest and exchange rates and persistently declining cost of solar modules is expected to support this growth. The dynamics shaping the Sector's operating landscape over the short, medium and long-term are listed below:

## INDUSTRY RISK AND OPPORTUNITY LANDSCAPE

### Sri Lanka's renewable energy drive

As a signatory to the Paris Agreement, Sri Lanka has committed to achieve carbon neutrality by 2050. This commitment entails a 70% reliance on renewable energy for power generation by 2030 and gradual phasing out of fossil fuel subsidies. On the flip side however, this transition requires the country to bridge a significant funding gap of approximately USD 11 bn.

#### Response

The Sector intends to leverage on the policy thrust towards renewable energy through further strengthening its market position

### + Anticipated recovery of construction and infrastructure sector

Sri Lanka's construction sector and resultantly infrastructure projects are poised for growth with the gradual stabilisation of the exchange rate and relatively favourable interest rate dynamics. The strong recovery of the tourism sector is also expected to drive demand for new constructions.

#### Response

Strengthen market activations across key verticals to drive new customer acquisition

### + Technology driven business transformations

Emerging technologies such as virtual reality, AI, robotics and digital twins are reshaping engineering, presenting significant opportunities for businesses to drive technology enabled transformation

#### Response

Leveraging technology to expand the Sector's product proposition (i.e 3D visualisation through NexGen)

### - Talent migration

The recent exodus of talent from the country, particularly in the IT and technology fields has posed a considerable challenge in attracting and retaining the right talent

#### Response

Strategic focus on developing capabilities of team and building the next generation of leaders

### Sustainability related risks and opportunities (SRRO)

#### Supply chain visibility

The boom in production of solar panels in China have raised concerns on the use of forced labour, violations of human rights and the use of coal-fired electricity in certain regions. This has underscored the critical importance of supply chain visibility for solar contractors and suppliers purchasing panels from China.

< 1 year	Limited impact over the short-term
1-5 years	Potential restrictions on imports from selected suppliers linked to labour allegations, particularly in the EU and USA regions
>5 years	Regulations on supply chain assessments
Response	Sourcing from globally reputed suppliers with strong social and environmental practices

### + Decarbonisation goals of businesses

Organisations, particularly those in export-oriented industries are pursuing ambitious decarbonisation goals which will require significant investments in renewable energy

< 1 year	Demand from MNC and export -oriented businesses
1-5 years	Increased demand from both domestic and export-oriented businesses
>5 years	Low emission operating models will become the norm
Response	Currently exploring avenues of low-carbon technologies with the aim of decarbonising vessels

### Product end of life management

The global production boom of solar panels is estimated to create a wave of solar trash over the long-term in which recycling infrastructure remains considerably inadequate

< 1 year	Limited impact over the short-term
1-5 years	Solar panel recycling regulations are likely to come into place, aligned with the e-waste regulations in the EU
>5 years	Necessitates increased capacity in solar panel recycling and comprehensive end-of-life infrastructure for uninstallation, transportation and storage
Response	Exploring avenues for responsible disposal and recycling of waste- which is likely to impact the Sector over the long-term

## PROJECTS & ENGINEERING

FUTURE PLANS	
Short-term	Medium-to-long term
<ul style="list-style-type: none"> <li>Consolidate market leadership position in renewable energy</li> <li>Efficiency and cost management drive</li> <li>Optimise working capital management</li> <li>Market activations of new business lines to drive increased penetration</li> <li>International expansion</li> </ul>	<ul style="list-style-type: none"> <li>Strengthen market position in renewable energy and widen presence in adjacencies.</li> <li>Island-wide penetration of services and improving affordability</li> <li>Participation in the broader spectrum energy following to the reforms of the energy sector</li> </ul>
<b>Short-term goals</b> ROCE>25% ROE<30%	<b>Medium-to-long term goals</b> ROCE>30% Gearing>45%

## TEA EXPORTS

As one of Sri Lanka's largest value-added tea exporters, the Sector drives significant local value addition, taking Ceylon Tea to the world through extensive distribution networks and long-standing customer relationships. The Sector plays a vital role in expanding the global reach and popularity of Ceylon Tea which is critical for ensuring the longevity of the country's tea industry

## TEA EXPORTS

**Supplier value addition**  
Rs. 8.74 bn payments to purchase Ceylon Tea suppliers

**Economic Value**  
Rs. 227 mn tax contributions  
Rs. 37 mn USD export revenue generated

**Socio-economic value generation**

**Elevating the reach and popularity of Ceylon Tea**

## TEA EXPORTS

### SECTOR OVERVIEW

The Group's Tea Exports Sector is represented by two entities; Mabroc Teas (Pvt) Ltd, one of Sri Lanka's leading value-added and bulk tea exporters and Martin Bauer Hayleys (Pvt) Ltd, an innovative manufacturer and exporter of Ceylon tea extract powders and tea aroma in the liquid and powder form. Both companies serve as export arms of the Group's plantation companies and create significant local value addition through sourcing bulk of their tea requirements from Hayleys Plantations. Martin Bauer Hayleys (Pvt) Ltd is a joint venture between Hayleys and global leader in botanicals, German-based Martin Bauer Group (MBG).

### CONTRIBUTION TO GROUP

**MABROC (PVT) LTD**

Exporter of value -added tea

**Performance 2023/24**

Revenue: (0.3%) decline  
PBT: (34%) decline

**MARTIN BAUER HAYLEYS (PVT) LTD**

Manufacturer and exporter of tea extracts

**Contribution to Sector**

Share of profit of associates: Rs 167.20 mn

### OPERATING ENVIRONMENT

The Sector experienced a challenging year during the year, mirroring the complexities faced by the country's plantation sector. Rising cost of tea amidst relatively low production volumes, the recent surge in fertilizer costs as well as high labour costs adversely impacted profitability margins. The country's tea crops continue to be affected by the shortage of labour and low yields which have resulted in sub-optimal production volumes. Meanwhile, exchange rate dynamics also remained unfavourable to exporters during the year given the sharp appreciation of the Sri Lankan Rupee for most part of the year. On the other hand, global demand for both value-added tea and tea extracts remain healthy, reflecting consumers' increasing tilt towards products that contribute to their health and well-being.

### STRATEGY AND INTEGRATED PERFORMANCE REVIEW

The Sector performed commendably in a challenging year, with Mabroc and Martin Bauer Hayleys delivering strong volume growth through new customer acquisitions and deeper penetration of existing customers. The latter also benefitted from increased local demand for 3 in 1 instant milk tea given the sharp increase in milk powder prices. Performance was however affected by unfavourable exchange rate dynamics which saw Revenue (representing Mabroc) declining by 3% to Rs. 12.20 bn. Profit contribution from Martin Bauer Hayleys (which is accounted for an equity accounted investee) also declined to 159.06% mn during the year due to the appreciation of the Sri Lankan Rupee. Overall the Sector's Profit Before Tax amounted to Rs. 823.65 mn, a decline of 41% compared to the previous year which was also buoyed by significant exchange gains.

### COMPETITIVE POSITION

Mabroc's OEM and branded products as well as Martin Bauer's products are sold to **leading retailers and supermarket chains in over 71 countries**. Mabroc's products are also sold in over 20,000 retail outlets in the domestic market

The Sector is committed to maintaining the highest standards of quality and product responsibility as attested by **numerous Food Safety and Quality certifications**.

In value-added tea, the Sector has capabilities to **customise and skillfully blend teas** to supply e a range of packets and tea bags of black, green, herbal and flavoured tea. Martin Bauer Hayleys is the only Sri Lankan manufacturer with capabilities to manufacture tea

Mabroc Teas is **one of Sri Lanka's largest tea exporters** and the 3rd largest exporter of bulk tea. It is also the largest exporter of tea from Sri Lanka to China and Taiwan. Martin Bauer Hayleys (Pvt) Ltd is the leading exporter of Ceylon Tea aroma to the global market and one of Sri Lanka's largest exporters of instant tea

## Summary of external drivers

	Driver	Driver Significance of impact	Implications on Sector
Economic and geo-political context	Appreciation of the Sri Lankan Rupee	H	- Adverse implications on international competitiveness and profitability margins
	Global geo political tensions	M	- Volatility in demand conditions and disruptions to shipping routes
Industry context	High cost of tea production in Sri Lanka	H	- Implications on international competitiveness and attractiveness of Ceylon Tea
	Intensifying global competition	M	- Intensifying price competition and implications on market share and profitability margins
	Relatively low labour productivity in estate sector	H	- Long term implications on crop volumes and ability to serve demand conditions
Sustainability context	Global recognition of tea as a beverage with significant health benefits	M	+ Growth opportunities in new market segments
	Escalating implications of climate change	M	- Impacts of erratic weather patterns on quantity and quality of crop

H-High, M-Medium, L-Low. Brown circle represents adverse effect while yellow circle represents positive affect

Geographical diversification remains a key priority for Mabroc and during the year the Company strengthened its position in Poland through an investment in one of the leading FMCG distribution companies expanding its product range and volumes to drive increased penetration across the country's leading supermarket chains. In diversifying its supply chains, Mabroc also entered Kenya during the year establishing a fully-fledged tea export company in Mombasa - Kenya. This is expected to strengthen the Company's competitive edge in the medium to long-term as it leverages on multi-origin tea blends and existing relationships in Europe to access new market segments. Meanwhile, Mabroc also strengthened its position in the domestic market, through successfully marketing the Talawakelle Supiri Kahata brand in the general and modern trade in Sri Lanka.

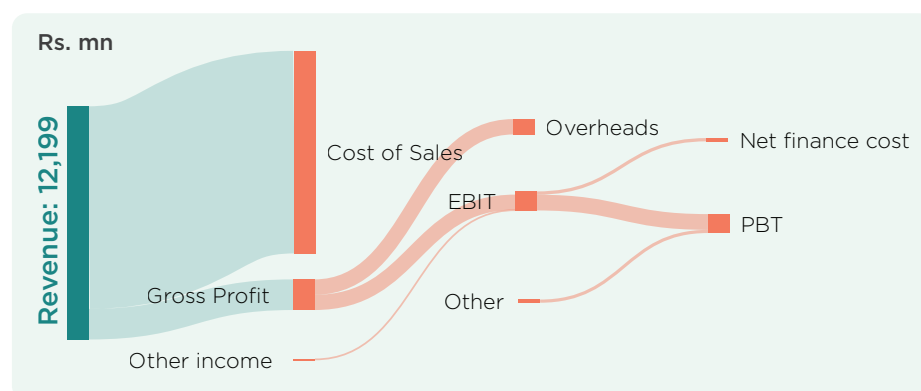

The Sector also continued to leverage its best-in-class research and development capabilities to widen its product offerings. During the year Mabroc sought to develop a range of herbal teas and is exploring opportunities of further expanding its fruit teas. Meanwhile Martin Bauer leveraged on the domain knowledge and global insights of the

Martin Bauer Group to further widen its portfolio of aroma and concentrations. Both companies also strengthened its product development and manufacturing capabilities during the year through investments in infrastructure and talent.

As part of the Hayleys Group, the Sector benefits from traceability up to field level through the procurement of tea from Hayleys Plantations which are pioneers and global leaders in industry sustainability. This partnership has enabled the Sector to strengthen its competitive edge through accessing single garden products which are

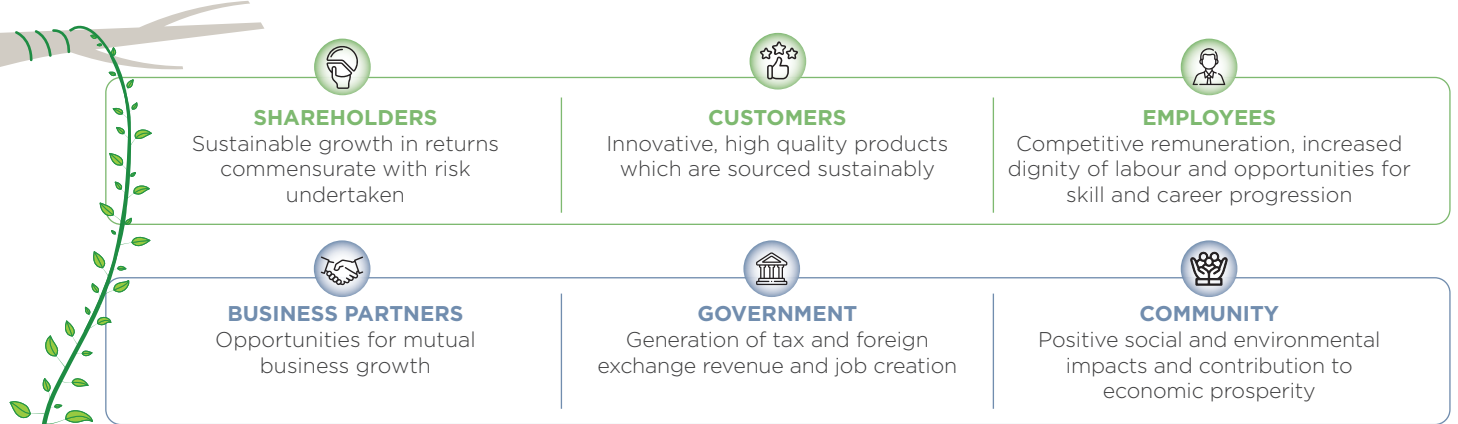

cultivated under stringent certification requirements, underpinned by strong social and environmental practices.

## ESG HIGHLIGHTS

### Climate Action

In line with the carbon neutrality aspirations of the Martin Bauer Group, the Company commissioned a 1.5 MW solar plant during the year which is expected to fulfill around 30% of the energy requirement of the manufacturing facility. This was funded through a concessionary loan facility granted by Martin Bauer Group which is driving carbon reductions across over 30 locations in its global network.

- Mabroc also established a 245kW solar panel with inverter capacity of 245 kW

	2024	2023	% Y-o-y	Target
Mabroc- Carbon footprint (tCO2e)	384	442	-13	20% reduction
MBH-Carbon footprint (tCO2e)	3,907	N/A	N/A	N/A

### PEOPLE DEVELOPMENT

Given increased challenges in employee attraction and retention, the Sector sought to build capabilities and nurture its talent pipelines through increased investments in training and development.

	2024	2023	% y-o-y
Training hours (hours)	1,451	1,341	8.2
Investment in training (Rs.mn)	2.31	0.9	156

### COMMUNITY ENGAGEMENT

Multi-faceted CSR projects under the Mabroc Tea Without Tears project including tree planting campaigns, book donations and donations towards healthcare

### WASTE MANAGEMENT

Mabroc teas has also initiated a pilot project in vegetable cultivation, utilising tea and food waste generation from its operations as organic fertilizer.

# TEA EXPORTS

## PROSPECTS AND PLANS

While global demand dynamics for value-added tea and extracts remains favourable, the Sector’s short-to-medium term outlook is somewhat clouded by the complexities in the country’s plantation sector. The tea sector is at a critical juncture at which transforming remuneration models, investing in replanting and pursuing sustainable agricultural practices is critical for long-term survival. The Sector’s short, medium and long-term risks and opportunities are summarised below:

## INDUSTRY RISK AND OPPORTUNITY LANDSCAPE

### Escalating local cost of production

Sri Lanka’s cost of production continues to be higher than competing producers due to low labour productivity and declining yields, which over the medium to long-term is likely to affect the country’s competitiveness in the international market

#### Response

Geographical diversification of raw material sourcing through international expansion

### Increasing international competition

The competitiveness of Ceylon Tea in the international market is being threatened by the country’s rising cost of production and dwindling volumes amid intensifying competitive pressures from other producing nations such as Kenya

#### Response

Product innovation to develop value-added premium offerings

### Exchange rate dynamics

The Sri Lankan Rupee is expected to appreciate further before stabilising towards the end of Calendar year 2024. This will adversely impact the international competitiveness and profitability margins of Sri Lankan tea exporters

#### Response

International expansion to limit exposure to a single currency

### Rise of the health-conscious consumer

Consumers are increasingly tilting towards products that contribute to their well-being, given increasing focus

on healthy lifestyles. As a healthy beverage, tea is aptly positioned to benefit from these evolving customer requirements

#### Response

Strengthen promotions and market activations

### Sustainability related risks and opportunities (SRRO)

#### Declining land productivity in tea sector

Limited investments in replanting and infilling have led to long-term decline in productivity of Sri Lanka’s tea lands, resulting in relatively lower yields

< 1 year	Limited impact in short-term
1-5 years	Further declines in yields and resultant escalation in cost of production is likely to affect Sri Lanka’s international competitiveness in the global market
>5 years	Commercial viability of Sri Lanka’s tea industry could be threatened significantly impacting growth and profitability of exporters
Response	Regional expansion and geographical diversification of supply chain

### Physical climate-related risks of increasingly erratic weather patterns

Escalating implications of climate change have led to significant volatility in rainfall and precipitation levels as well as considerable fluctuations in temperature levels

< 1 year	Volatility in production levels and variations in quality
1-5 years	More pronounced impacts of volatile weather patterns, which will impact leaf quality, yields and prices
>5 years	If climate adaptation measures are not adopted, Sri Lanka’s tea industry could suffer significant challenges
Response	Geographical diversification of supply chains

### Evolving requirements of buyers

Global customers are increasingly demanding responsible social and environmental practices along the entire value chain

< 1 year	Limited impact in the short-term
1-5 years	European customers are expected to strengthen due diligence along the value chain, given emerging regulations.
>5 years	global implementation of regulations driving ethical sourcing and traceability across value chains
Response	Ensure full supply chain transparency and traceability through partnership with Hayleys Plantation companies

## ESG IN ACTION

The Sector is currently in the process of strengthening its ESG integration with Mabroc aligning to the aspirations of the Hayleys Lifecode while Martin Bauer Hayleys is guided by the sustainability aspirations of the Martin Bauer Group. The former is a Member of the United Nations Global Compact, partnering with KVPL to produce the world's 1st UNGC signatory tea brand and commit to the 10 principles. Meanwhile Martin Bauer Hayleys is aligned to the Martin Bauer Group's aspirations to achieve carbon neutrality by 2030, focusing on reducing its reliance on fossil fuel-based energy sources to achieve emission reductions. During the year Martin Bauer Hayleys also commenced tracking and reporting all material social and environmental performance indicators to the Hayleys CUBE- the Group's sustainability information portal.

In navigating these challenges, the Sector will focus on innovation to sharpen its competitive edge while accessing new markets and securing its supply chains through geographical diversification. Key priorities in the short, medium and long-term are as follows:

FUTURE PLANS	
Short-term	Medium-to-long term
<ul style="list-style-type: none"> <li>• Increase market share in existing markets</li> <li>• Enhance production capacity through investments in manufacturing infrastructure</li> <li>• Development of Sector Sustainability/ESG roadmap</li> <li>• Upskilling human capital with focus on technical, R&amp;D and leadership capabilities</li> </ul>	<ul style="list-style-type: none"> <li>• Drive increased penetration in key markets such as China, Japan and Taiwan</li> <li>• Penetrate new markets and regions</li> <li>• Operating efficiencies through automation</li> <li>• Ongoing innovation and product development to cater to emerging customer requirements</li> <li>• Strengthen position in local market through expanding presence in retail outlets</li> </ul>
<p><b>Short-term goals</b> Gross profit margin&gt;12% ROE&gt;20%</p>	<p><b>Medium-to-long term goals</b> ROCE&gt; 20% ROE&gt;20%</p>

## OTHERS

The Others Sector comprises Hayleys Business International Solutions and Group Services of Hayleys PLC. HBSI engages in BPO operations and Shared Services specialising in providing a range of back-end services including accounting, payroll, digital marketing, data management and IT solutions among others. Hayleys Fentons, which was previously classified under the Others Sector is now presented separately as the 'Projects and Engineering' Sector given its increased contribution to the Group and wider socio-economic impacts. Sector financial and non-financial indicators have been adjusted to reflect this reclassification.

**HBSI**

Provider of BPO services and shared services within the Group

PBT: 68%

**Performance 2023/24**

Revenue: 2% growth

PBT: 23% decline

**SECTOR PERFORMANCE OVERVIEW**

The Others Sector's Revenue declined by 38% to Rs. 1.44 bn during the year, reflecting a reduction in dividends upstreaming to Hayleys PLC in line with the decreased profitability in certain key sectors. The decline in Profit Before Interest and Tax was, however contained at 8% while Net Finance Cost decreased marginally to Rs.4.39 bn due to the lower interest rate scenario that prevailed during the year. Total tax expenses increased by 49% due to upward revision in tax rates resulting in the Sector's Profit After Tax declining by 25% to Rs.1.94 bn during the year under review.

Rs.mn	2024	2023	% y-o-y	2022

**HAYLEYS PLC**

With the reclassification of Hayleys Fentons, Hayleys PLC emerged as the most significant contributor to the Others Sector. Overall performance of Hayleys PLC eased in comparison to the previous year, reflecting a decline in dividends received as well as a considerable increase in tax payments. Dividend received during the year amounted to Rs.5.35 bn a decline of 8% compared to the previous year reflecting lower profitability in several key verticals, while administrative expenses increased by 7% led by higher staff costs. Resultantly the Company's Earnings Before Interest and Tax reduced by 8% to Rs.6.23 bn during the year. A near

42% increase in tax expenses, stemming from the upward revision in the tax rate as well as the claiming of brought forward tax losses in 2022/23, resulted in the Company's Profit After Tax declining by 30% to Rs.1.33 bn.

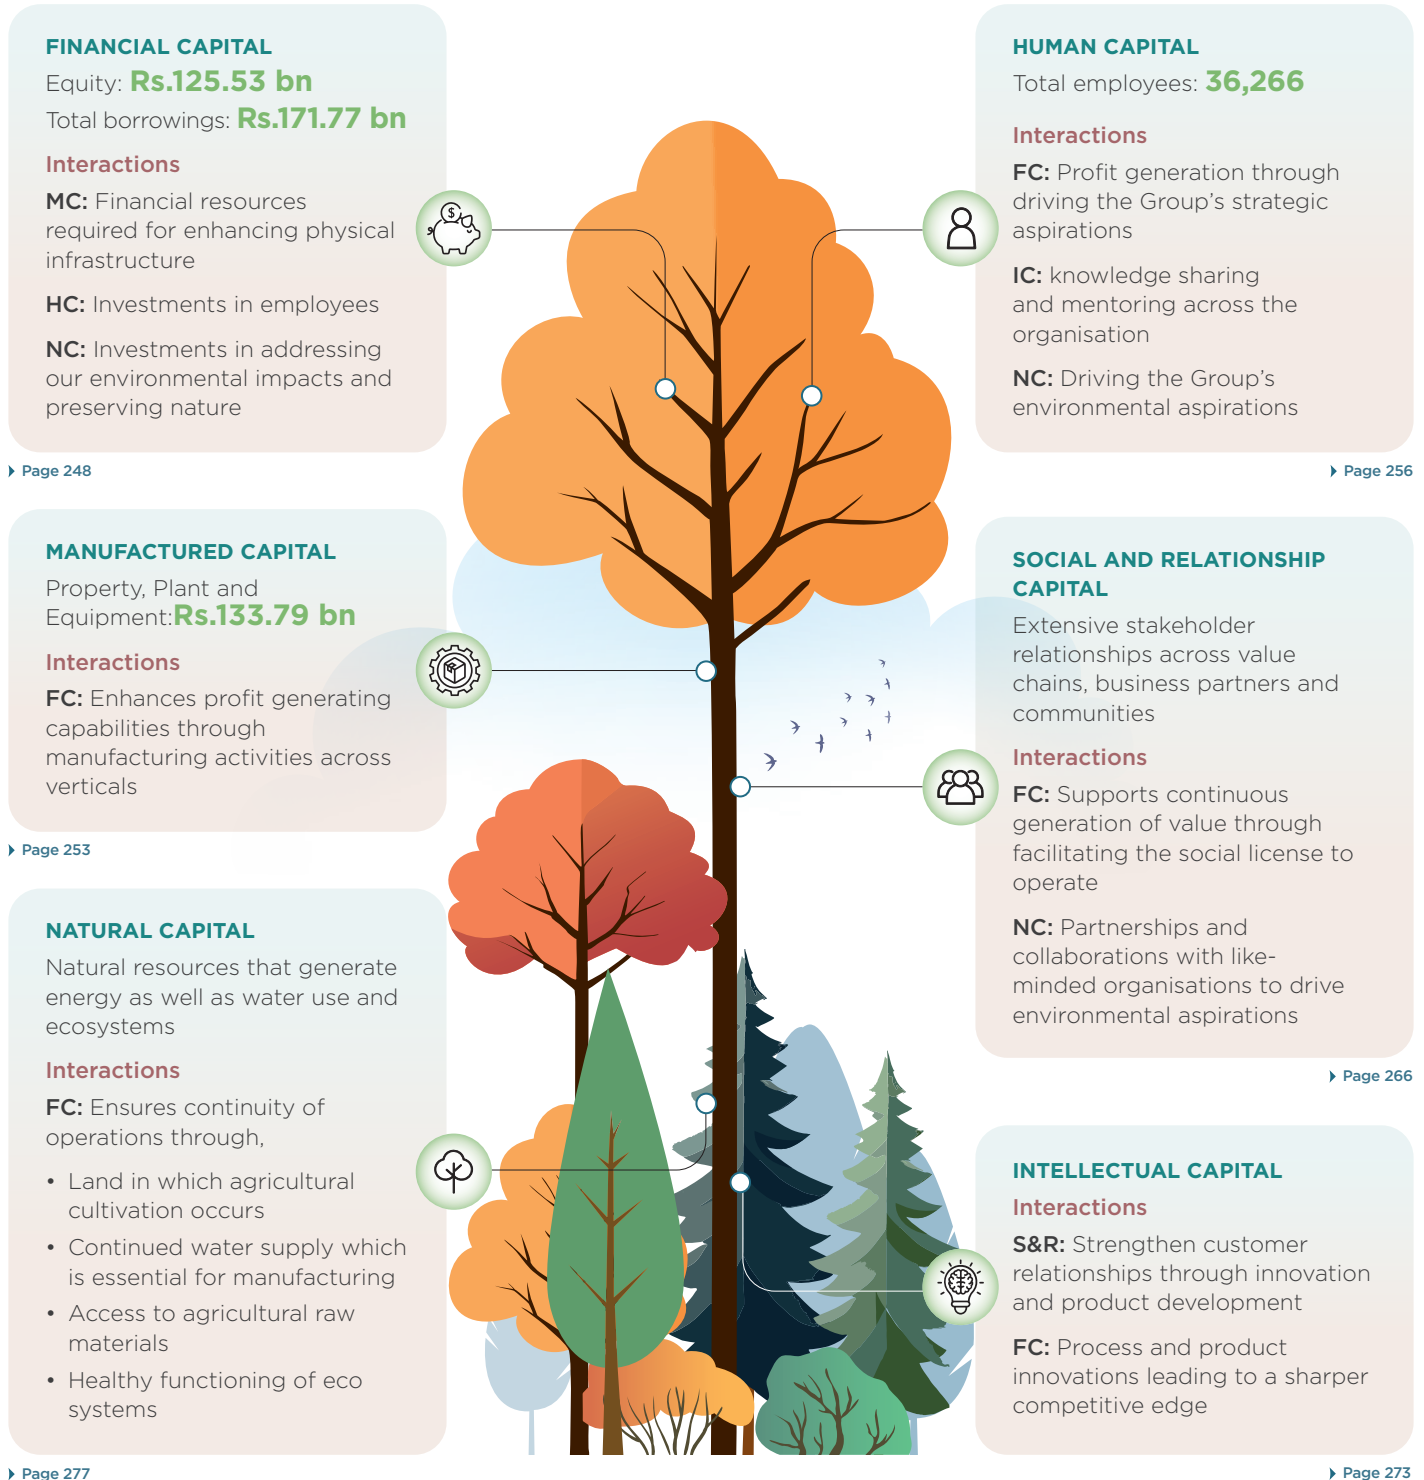

**HAYLEYS BUSINESS SOLUTIONS INTERNATIONAL LTD**

HBSI recorded strong top line growth of 13% during the year supported by broad-based expansion across all business verticals. Profitability, however, was adversely affected by the appreciation of the Sri Lankan Rupee, resulting in Profit-Before-Tax declining by 4% to Rs. 301.18 mn during the year. The BPO operations delivered strong growth

during the year, upheld by increased penetration in the Australian market and a wider service proposition with the addition of pharmacy accounting to the retinue of services offered. The Company also strengthened its position in web services and digital media solutions with a surge in demand from new and existing customers. The Company's unique operating model, which offers flexible and hybrid work arrangements continues to empower new mothers returning to work and this coupled with increased focus on training opportunities across both technical and soft skills has aided in the retention of employees amidst an industry-wide exodus of skilled migration.

# CAPITAL MANAGEMENT

The Group's six capital resources (as defined in the IR Framework) interact and are transformed through the Group's strategy and processes to drive value creation, preservation and/or erosion. The interplay between these capitals typically necessitate trade-offs, which require decision-makers to give due consideration of quantity and time frame of impacts when allocating resources. The subsequent changes of this Report demonstrate how the Group relied on these resources and relationships during the year to generate outputs and long-term outcomes for stakeholders.

## CAPITAL MANAGEMENT REVIEW

# Sustaining our World

**We remain committed towards generating and channeling growth and prosperity across our world of value – relying on the right mechanisms and processes to augment our resources and deliver positive outcomes from end to end.**

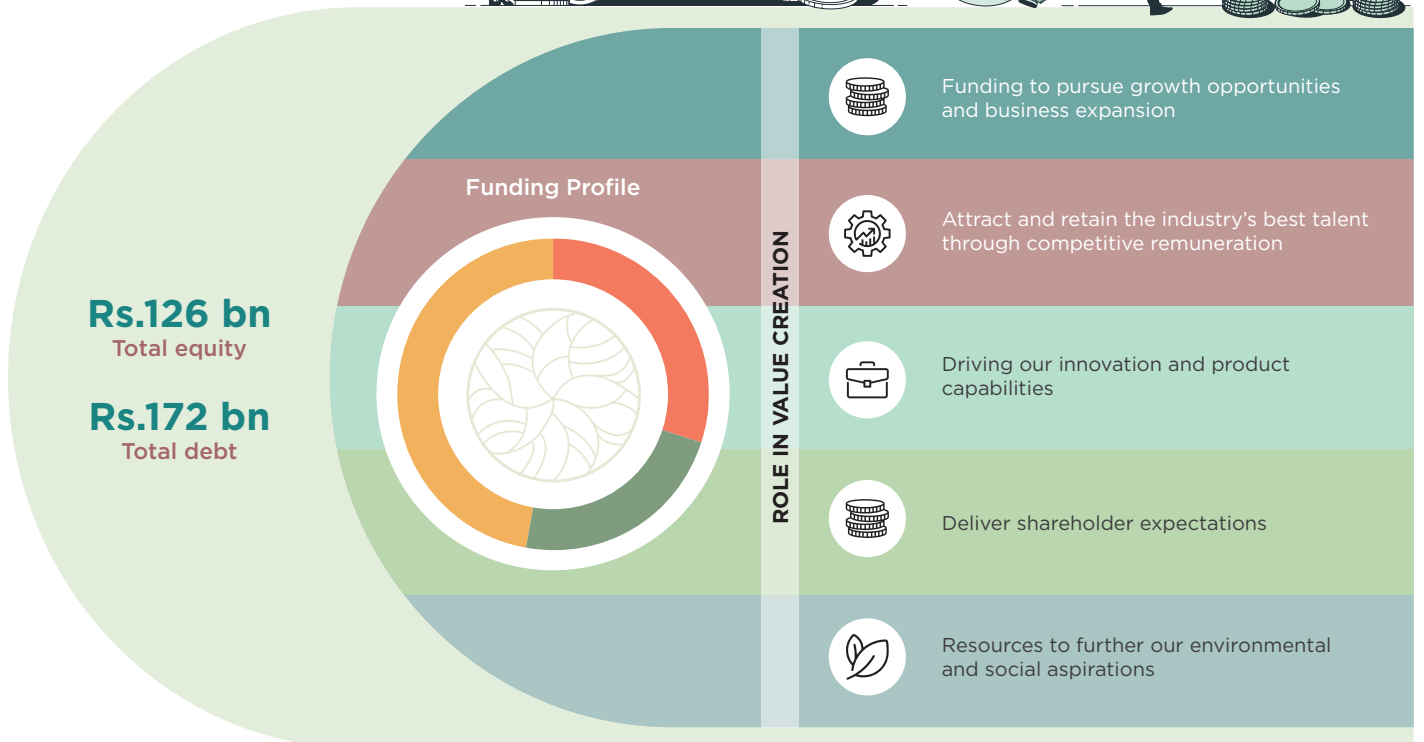

*Forests are an essential source of clean water and oxygen, delivering the very lifeblood that sustains ourselves and our surroundings. They serve as a natural pump – driving a cyclical process that creates the necessary conditions for sustainable growth, while using its capabilities to mitigate harmful impacts and create a purer, cleaner atmosphere in which we can thrive.*

# FINANCIAL CAPITAL

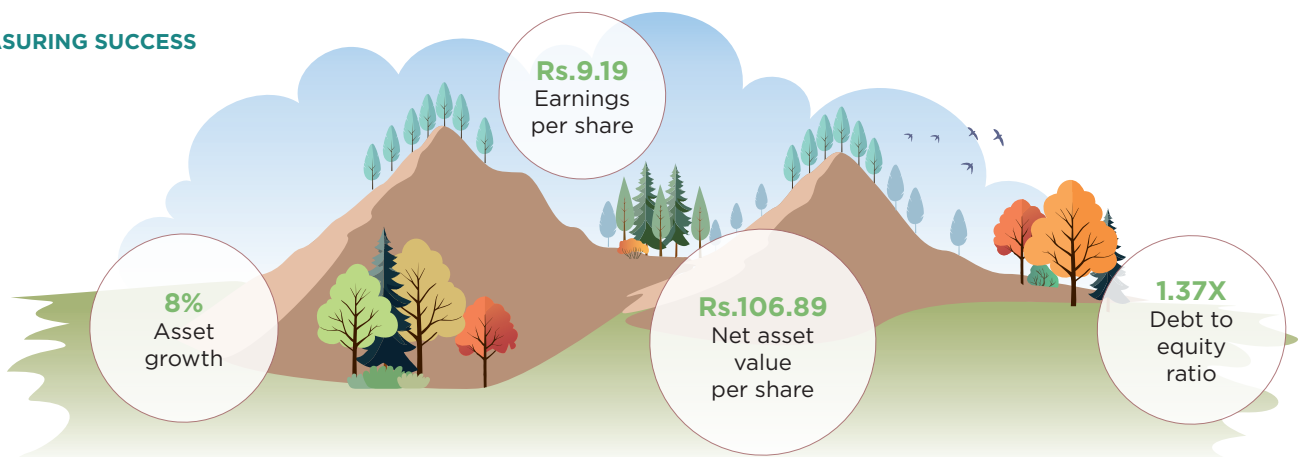

The Group's Financial Capital comprises the pool of funds available to the Group, which enables new investments and allows the sustenance of day-to-day operations. It includes equity funding, debt and retained earnings.

## CONTRIBUTION TO VALUE CREATION

● Equity ● Non current liabilities ● Current liabilities

## MEASURING SUCCESS

## REVENUE

The Group leveraged the diversity of its businesses, geographies and markets to remain resilient in a year of volatility and unpredictability. Despite subdued global demand in key markets and the appreciation of the Sri Lankan Rupee during the year, the Group generated a Consolidated Revenue of Rs. 436.83 bn, curtailing the y-o-y decline to 10%. While the Group's export sectors recorded revenue contractions, this was somewhat countered by the strong top line growth of Projects & Engineering (+46%) and Consumer & Retail Sector (+28%). Resultantly, the Group's Revenue composition tilted increasingly towards the domestic market, accounting for 46% of Consolidated Revenue during the year, compared to 38% the year before. The Transportation & Logistics Sector maintained its position as the largest contributor to Consolidated Revenue with a share of 21% during the year, followed by Consumer & Retail (19%), Textiles (11%), Hand Protection (10%) and Purification (10%). Further information on the factors which shaped the performance of each Sector is detailed in the Portfolio Reviews from page 114 to 245.

## REVENUE TRENDS

## GROSS PROFIT

The Group's Gross Profit declined by 8% to Rs.109.43 bn during the year, reflecting the reduction in the top line. The Group's relentless focus on increasing contributions from value-added products across its verticals, together with ongoing focus on cost efficiencies and a deceleration of commodity prices enabled the Group to widen its gross profit margins to 25% from 24% the previous year. This is a creditable achievement given the escalation in operating costs and appreciation of the Sri Lankan Rupee

which affected the profitability of the export-oriented sectors.

## OPERATING COST MANAGEMENT

Ongoing focus on operating efficiencies and lean management enabled the Group to contain the increase in operating costs to 12% during the year. Administrative Expenses (comprising primarily of staff costs) accounted for 78% of the Group's Operating Costs and increased by 14% during the year reflecting increased value creation to employees. Distribution expenses also increased by 12% reflecting promotions and market activations across key verticals. The Group's focus on optimising resource usage through integrating ESG as well as the anticipated rollout of the Group's digital transformation roadmap is expected to further enhance efficiencies over the mid to long-term.

## OPERATING PROFITABILITY

The Group's Operating Profit/Earnings before Interest and Tax (EBIT) declined by 30% to Rs.42.72 bn during the year, reflecting the decrease in Revenue and the escalation in Operating Costs, which adversely impacted profitability margins. Subdued global demand and a stronger Rupee affected the profitability of key export sectors such as Transportation & Logistics (-57%), Purification (-21%) and Hand Protection (-7%). That said, these sectors continued to dominate the Group's earnings profile, with Transportation & Logistics, Purification and Textiles emerging as the most significant contributors to Consolidated EBIT. Projects & Engineering emerged as a significant contributor to core profitability, with EBIT increasing by 90% upheld by the impressive performance of its Renewable Energy cluster. Meanwhile, the Group's Consolidated EBIT margin narrowed from 12.5% to 9.8% during the year under review.

### EARNINGS BEFORE INTEREST AND TAX

### NET FINANCE COST

The Group's Net Finance Cost declined by 8% to Rs.17.24 bn during the year, with Finance Income decreasing at a faster pace than the Finance Cost. Despite an 8% increase in Total Borrowings, Finance Cost fell by 31% to Rs. 27.15 bn as interest rates fell sharply during the year. Finance Cost also included foreign exchange losses of Rs.5.14 bn stemming primarily from the appreciation of the Sri Lankan Rupee in the latter part of the financial year. Meanwhile, Finance Income declined to Rs.9.91 bn from Rs.20.72 bn the previous year as significant foreign

exchange gains of 2022/23 normalised during the year.

### PROFIT BEFORE TAX

The Group generated a Consolidated Profit Before Tax of Rs. 25.34 bn during the year, declining by 41% compared to the record-high profitability of the previous year. The normalisation of profits represent the impacts of external headwinds on our export-oriented sectors and the still recovering conditions in local businesses. The Purification Sector emerged as the Group's largest profit

### PROFIT BEFORE TAX

generator with a share of 19%, followed by Projects & Engineering (share of 14%), Hand Protection (share of 13%), Textiles (12%) and Plantations (11%). The Group's performance during a volatile and challenging year is testament to the diversity and resilience of its earnings profile as well as the strength of its market positions.

### TAX

The Group's Tax Expense for the year amounted to Rs.10.49 bn, a reduction from the previous year owing to the moderation in profitability. That said, the Group's effective tax rate increased from 36% to 42% during the year, with the majority of companies being liable for tax under the higher 30% rate and withholding tax on dividend income and the impact of deferred tax.

### PROFIT AFTER TAX

The Group generated a Profit After Tax of Rs.14.85 bn, a decrease of 46% compared to the previous year. At Company level, Hayleys PLC recorded a Profit After Tax of Rs. 1.33 bn, compared to Rs.1.90 bn the previous year. Although declining in comparison to the previous year, dividend upstreaming remained healthy at Rs.5.35 bn during the year.

### OTHER COMPREHENSIVE INCOME

The Group's Other Comprehensive Income for the year clocked in at a negative Rs.3.89 bn, driven primarily by net exchange differences on translation of foreign operations. As a result, the Group's Total Comprehensive Income amounted to Rs. 10.96 bn, a decline of 63% compared to the previous year.

### TOTAL ASSETS

Despite the short-term vulnerabilities the Group remains optimistic about the growth potential of its businesses and markets and continued to invest in further diversifying its businesses and strengthening earnings generation capacity. Investments in several key sectors including Purification, Hand Protection, Transportation & Logistics

and Agriculture resulted in the Group's Property, Plant and Equipment increasing by 6% to Rs.133.79 bn, which resulted in Total Assets expanding by 8% to Rs.446.34 bn. Total Current Assets also increased by 10% to Rs. 261.62 bn, driven primarily by an increase in Trade and Other Receivables (+19%), in the Consumer & Retail and Projects & Engineering Sectors. The asset composition remained relatively unchanged during the year, with Current Assets accounting for 59% of Total Assets.

Key contributors to asset growth were Projects & Engineering (+157%), Consumer & Retail (+22%) and Construction Materials (+23%). Sector-level Asset growth and contribution to Assets is given below;

Sector	Asset growth (y-o-y) %	Contribution (%)
Eco Solutions	7	4
Hand Protection	(2)	7
Purification	(1)	8
Textiles	(11)	7
Construction Materials	23	3
Plantations	5	5
Agriculture	(1)	5
Consumer & Retail	+22	19
Leisure	0	4
Industry inputs, Power & Energy	+3	3
Transportation & Logistics	+6	15
Projects & Engineering	+157	5
Tea Exports	+3	1
Others	1	15

### CAPITAL FUNDING

The Group's Financial Position is strong, as reflected by a relatively healthy funding profile and manageable debt coverage levels. Total Equity increased by 2% to Rs.125.53 bn during the year, funding 28% of the Group's Total Assets. Borrowings increased by 8% to Rs.171.88 bn, reflecting increased capital expenditure in the Transportation & Logistics

### DEBT PROFILE

Sector and higher working capital requirements in the Consumer & Retail Sector. Borrowings funded 39% of the Group's assets during the year, with Consumer & Retail, Others and

### BORROWINGS BY SECTOR

### CASH FLOW AND LIQUIDITY

The Group's cashflow position mirrored the trends in its operating performance during the year and Net Cash Inflow from Operating Activities declined to Rs.30.43 bn from Rs.56.79 bn the year before. Meanwhile, Net Cash Outflow from Investing Activities amounted to Rs. 11.46 bn during the year, reflecting additions to Property, Plant and Equipment. Net Cash Outflow from Financing Activities amounted to Rs. 32.50 bn during the year, mainly due to debt and interest repayment as well as dividends paid to equity holders.

### INVESTOR RELATIONS

Hayleys PLC is committed to maintaining transparent, constructive and ongoing dialogue with its shareholders, facilitated through multiple engagement platforms including the Annual General Meeting, the publication of the Annual Report, quarterly reporting to the CSE as well as periodic press releases and announcements. Through our engagement we seek to provide meaningful and relevant information to facilitate informed decision making.

Transportation & Logistics collectively accounting for 62% of the Group's debt. Given the decelerating interest rate scenario, the Group's borrowings profile tilted more to the short-term, with Short-Term Borrowings accounting for an increased 67% of Total Borrowings, compared to 63% the previous year. Overall, the Group's Debt/Equity ratio increased to 1.40X from 1.30X the previous year.

## FINANCIAL CAPITAL

### Principles of our Investor Relations

Information we share with our shareholders through this Annual Report

- The operating environment during the year (pg.98)
- Implications of the macro-economic environment (pg.98)
- Financial performance and Portfolio Review (pg.114)
- Corporate Governance and risk management practices (pg.248)
- Our Environmental, Social and Governance (ESG) framework (pg.100)

### SHAREHOLDER RETURNS

Despite the moderation in performance, the Group continued to deliver on its shareholder returns as measured by Earnings per share declined from Rs.21.80 to Rs.9.19 during the year, reflecting the moderating profitability. Meanwhile, Net Asset Value per share increased from Rs. 105.24 to Rs.106.88 depicting the growing value of the Group's non-monetised capital including innovation capabilities, deep rooted relationships with suppliers and communities, strong brand equity as well as our ability to attract the country's top talent.

Despite the moderation in profitability the Group paid a dividend of Rs.5.35 during the year, ensuring continued value creation to its shareholders.

### PERFORMANCE OF THE COLOMBO STOCK EXCHANGE

The Colombo Stock Exchange recorded a mixed performance during the year, reflecting macro-economic and policy developments throughout the year. The All Share Price Index (ASPI) and S&P SL20 Index demonstrated positive momentum during the year, particularly following considerable progress in the domestic debt optimisation programme and the exclusion of the banking sector from the same. Accordingly, both ASPI and S&P SL20 indices grew by 24.9% and 15.7% respectively during the year 2023 while market capitalisation increased by 9.7% to close the year at Rs. 4,233.3 bn. Foreign participation in the domestic equity market through foreign purchases declined in comparison to the previous year.

### PERFORMANCE OF THE HAYLEYS SHARE

The Hayleys share performed relatively well during the year, appreciating gradually during the year to close the year at Rs.82.10, an increase of 13% from the beginning of the year. The share price traded between a low of Rs.65.60 and a high of Rs.97.90 during the year. The average volume traded amounted to 425,208 during the year while the daily average turnover clocked in at Rs.35.20 mn.

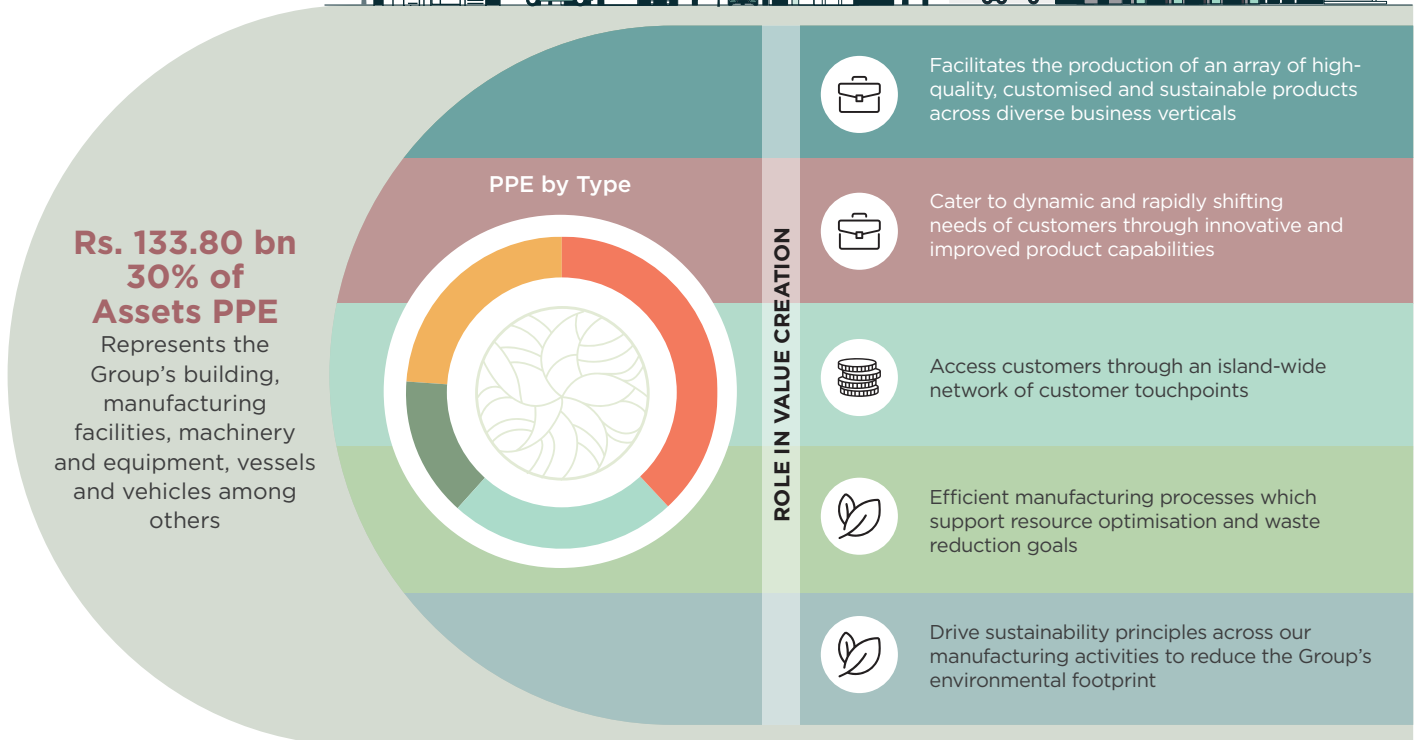

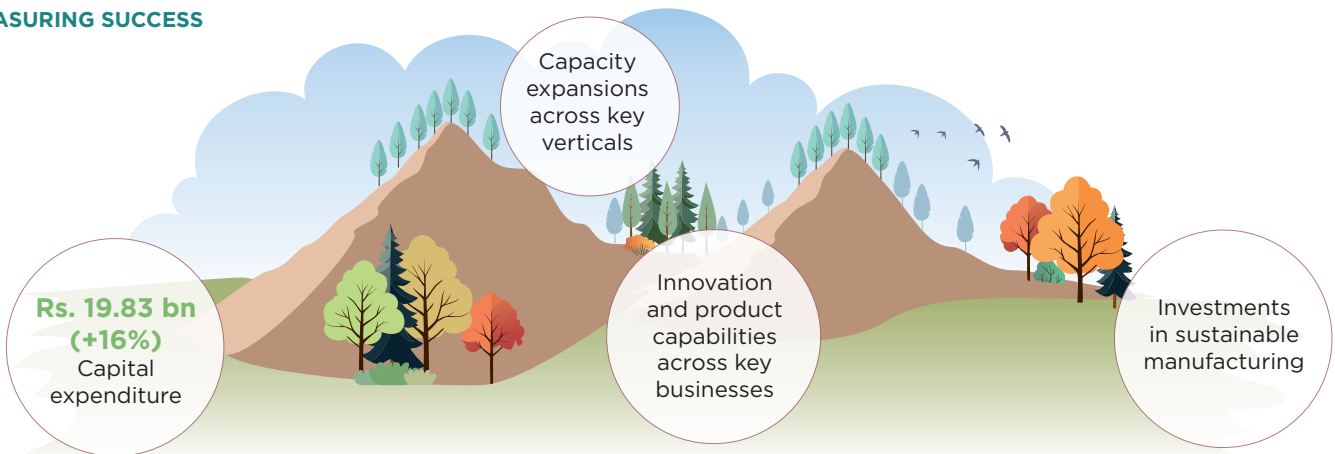

# MANUFACTURED CAPITAL

With nearly 36% of the Group’s Revenue derived from manufacturing operations, Manufactured Capital is a vital input in Hayleys’ value creation process, enabling it to sharpen its competitive edge across key verticals through offering an array-of world-class products catering to rapidly evolving customer requirements

## CONTRIBUTION TO VALUE CREATION

## MEASURING SUCCESS

## MANUFACTURED CAPITAL

### MANUFACTURED CAPITAL INPUTS

The Group's extensive manufacturing footprint spans 92 facilities in Sri Lanka, Thailand, Indonesia, India and Bangladesh. Meanwhile, the Singer Group's 416-strong branch network is a critical element of its physical infrastructure, providing direct customer reach across the island. Please refer the note 13 of the Financial Statements for the accounting policy pertaining to the measurement and recognition of these assets. The Group's manufacturing footprint is summarised below:

 <p><b>ECO SOLUTIONS</b> Manufacturing of fibre-based products</p> <p>8 manufacturing facilities in Sri Lanka 1 manufacturing facility in India</p> <p><b>Rs. 3.09 bn</b></p>	 <p><b>HAND PROTECTION</b> Manufacturing a range of household, industrial and medical gloves</p> <p>5 manufacturing facilities in Sri Lanka 1 manufacturing facility in Thailand</p> <p><b>Rs. 8.75 bn</b></p>	 <p><b>PURIFICATION</b> Manufacturing coconut-shell based activated carbon</p> <p>2 facilities in Sri Lanka 2 facilities in Indonesia 2 facilities in Thailand</p> <p><b>Rs. 6.69 bn</b></p>
 <p><b>TEXTILES</b> Fabric knitting, dyeing, printing and brushing - cotton and polyester</p> <p>3 manufacturing facilities in Sri Lanka</p> <p><b>Rs. 12.53 bn</b></p>	 <p><b>CONSTRUCTION MATERIALS</b> Manufacture of Aluminium extrusions</p> <p>2 manufacturing facilities in Sri Lanka</p> <p><b>Rs. 3.39 bn</b></p>	 <p><b>PLANTATIONS</b> Manufacture of tea, rubber and tea extracts</p> <p>55 estates</p> <p><b>Rs. 2.04 bn</b></p>
 <p><b>AGRICULTURE</b> Manufacturing a range of agricultural produce</p> <p>14 manufacturing facilities and plants in Sri Lanka</p> <p><b>Rs. 2.39 bn</b></p>	 <p><b>LEISURE</b> Hotels and resorts</p> <p>4 resort properties in Sri Lanka and Maldives 5-star city hotel</p> <p><b>Rs. 13.01 bn</b></p>	 <p><b>INDUSTRY INPUTS, POWER &amp; ENERGY</b> Industrial Inputs, Power &amp; Energy</p> <p>6 mini hydro plants 1 solar plant 3 wind-power plants</p> <p><b>Rs. 3.69 bn</b></p>

 <p><b>TEA EXPORTS</b> 2 manufacturing facilities in Sri Lanka</p> <p><b>Rs. 702.53 mn</b></p>	 <p><b>OTHERS</b> Head office building</p> <p><b>Rs. 276.20 mn</b></p>	

## APPROACH TO MANAGING MANUFACTURED CAPITAL

During the year, the Group's approach to managing its Manufactured Capital centered on the following:

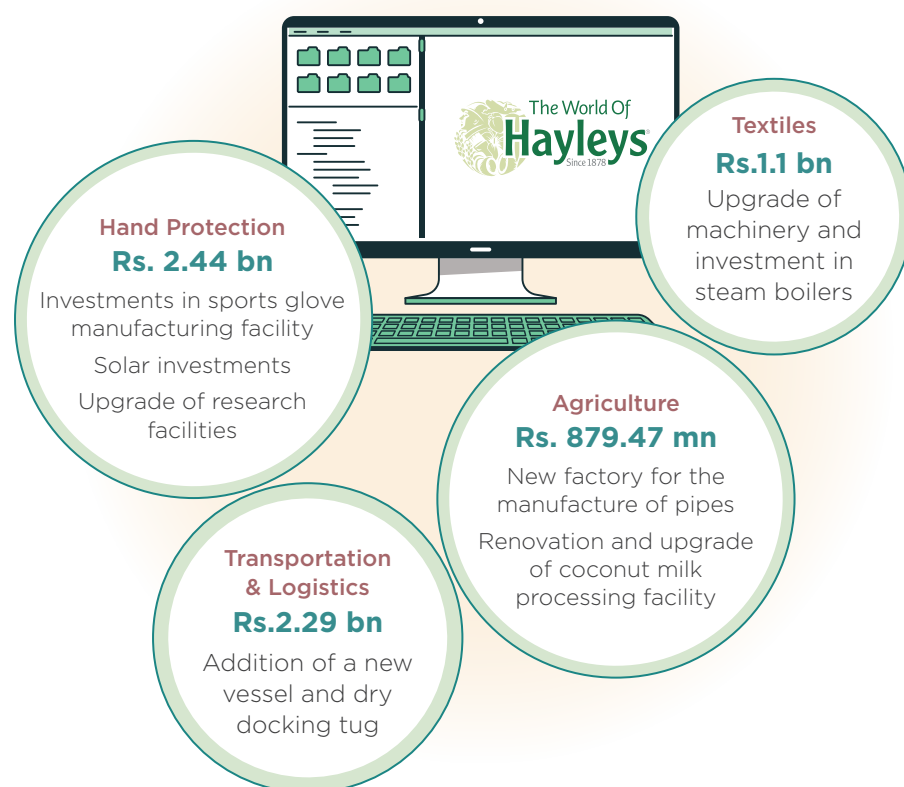

Sector	Volume growth (%)	Turnover/PPE ratio
Eco Solutions	26	1.9
Purification	(12)	3.9
Textiles	(1)	3.7
Construction Materials	23	2.1

### Driving manufacturing efficiency

Our key manufacturing sectors have consistently sought to drive manufacturing and operational efficiencies through initiatives such as productivity maintenance, Lean and Six Sigma among others. These initiatives have enabled the Group to curtail costs while enhancing efficiency and reducing waste.

### Sustainable manufacturing

In line with the Group's environmental aspirations, several sectors have focused on introducing sustainable manufacturing methods which aim to reduce energy and water intensity while reducing costs and wastage. Details of these developments are available on pages 274 to 275 of this Annual Report.

## Investing in the future

In line with its strategic focus on strengthening production capacities and product capabilities the Group continued to enhance its manufacturing footprint in businesses earmarked for strategic growth. Total additions to PPE for the year amounted to Rs. 17.34 bn reflecting improvements in technology, factory upgrades, new facilities and capacity enhancements.

### CAPEX BY SECTOR

### WAY FORWARD

- Geographical diversification of manufacturing capabilities
- Strengthening capabilities for manufacturing value-added products
- Increased focus on sustainable manufacturing methods

### ADEQUACY OF MANUFACTURED CAPITAL FOR FUTURE PLANS

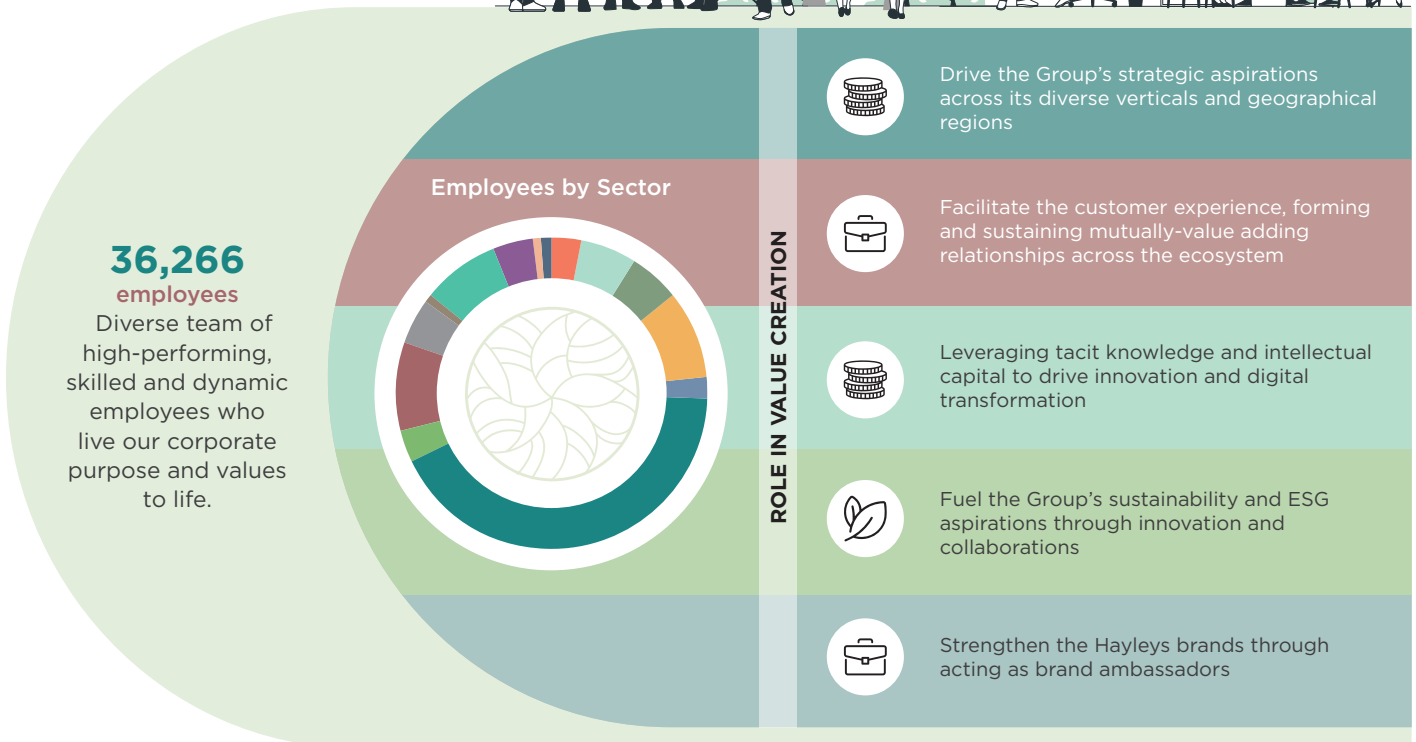

Having expanded capacity over the past few years, key manufacturing sectors of Hand Protection, Textiles and Construction Materials are aptly positioned to drive growth through increased capacity utilisation.

# HUMAN CAPITAL

We understand that it is the people behind our businesses that create value, and drive innovation, differentiating us from the competition and ensuring that we remain resilient and sustainable in the long-term. In turn, we strive to create a work environment which values the unique differences of our people while enabling them to reach their full potential.

## CONTRIBUTION TO VALUE CREATION

## MEASURING SUCCESS

## MANAGING TALENT

Hayleys is one of Sri Lanka's most sought-after private sector employers, and the Group's people-focused aspirations center on creating a conducive, supportive and inclusive environment where all employees feel heard, safe, connected and valued. Many Sectors within the Group operate their own Human Resource departments that are supported by specialist services offered by the Group's centralised HR function. The Group HR function plays a critical role driving the overall people strategy and ensuring adherence to group HR policies. The Group's HR policies and procedures comply with relevant legal and regulatory frameworks as well as several voluntary global benchmarks and standards, including the UN Global Compact Principles 1 to 6 and ILO Declaration.

### HR policy framework

HR policy framework	
The Hayleys Way	Performance Management Policy
Disciplinary Policy	Anti-Sexual Harassment Policy
Grievance Handling Policy	Whistleblower Policy
Recruitment Policy	Human Rights Policy
Learning & Development Policy	Health and Safety Policy
Talent Management and Succession Planning Policy	Industrial Relations Policy
Personal Data Protection Policy	Bribery and Anti-Corruption Policy

### Hayleys Lifecode Goals 2030

#### HEALTH AND SAFETY

Safest workplace with zero workplace injuries/occupational diseases

#### LEADERSHIP & SUPERVISORY DEVELOPMENT

10,000 man hours of leadership and supervisory development

#### ENGAGED TEAM

5% attrition rate across the Group  
2% new hire attrition rate cross entire Group

#### PERFORMANCE-DRIVEN CULTURE

100% employees to receive performance appraisals

## TEAM PROFILE

The Hayleys team is represented by our 36,266-strong workforce, who operate in 18 countries across the world. The increase in the Group's team compared to the previous year is largely driven by the addition of 3,455 employees from Horana Plantations PLC, which was acquired during the year. The country's sharp economic downturn in 2022 fuelled the exodus of skilled professionals from the country, resulting in organisations facing acute challenges in attracting and retaining the right talent. Resultantly, the Group's retention rate declined to 75%, compared to 80% the previous year.

	2024	2023	2022
Total employees	36,266	31,483	32,840
Permanent	29,058	26,085	26,569

## EMERGING TRENDS IN HUMAN CAPITAL MANAGEMENT

Global trends that are shaping workplaces and employee aspirations are compelling organisations to navigate new levels of uncertainty, underscoring the need to maintain agile and adaptable people strategies. These dynamics include the following:

## PEOPLE STRATEGY IN 2023/24

The Group's people strategy for the year was developed taking into consideration the changing aspirations of employees and the emerging dynamics shaping the world of work. Centering on an equitable approach, the strategy for the year was founded on creating long-term value for employees through equipping them with stronger skills enabling greater employability, opportunities for advancement and increased sense of belonging. Key pillars of the people strategy are illustrated below:

Developing capabilities	Employee well-being	Inclusive culture	Digital transformation
Building the Group's next generation of leaders through the Management and Leadership Development Programmes	Fostering physical, mental and emotional well-being of employees and helping them to thrive	Enhancing the dialogue around diversity and inclusion and find collaborative means in addressing prevalent issues	Improve efficiency of HR processes through digitalisation and automation
<b>Human capital allocations and developments in 2023/24</b>			
Tailor-made programmes carried out across Sectors of the Group  <b>134</b> Total employees trained under Management Leadership Development Programmes  <b>45,057</b> Leadership development training hours	Year-round calendar of well-being activities and interventions carried out focusing on health awareness, nutrition and women's well-being among others  <b>480</b> Total participants	Formulation of Group-wide DEI training programme which will be rolled out across the Group through a train the trainer model ensuring continuity and sustenance.  Launch of family-friendly leave, mental wellness and childcare benefits.	Ease of user access through HR administration kiosks  Improved efficiencies through the automated HR Help Desk  Investments in digitalisation and automation including the HRIS  Increased accuracy and eliminating human error through digitalization and automation of processes

# HUMAN CAPITAL

## Developing capabilities

Employee capabilities are developed through a blended approach of a multitude of structured programmes, workshops, coaching, digital learning and on-the-job training. With leadership traits significantly influencing organisational culture and determining employee mindsets, the Group prioritised the development of leadership capabilities. This was actioned through customised Management and Leadership Development Programmes as well as the Hayleys Management Trainee programme, 'FYOUTURE CEO'.

**Our Management and Leadership Development Programmes** are holistic, multi-faceted development interventions which are customised and offered to sectors covering all tiers of leadership. The programmes aim to build the Group's next generation of leaders, equipping them with the capabilities to lead in different operating environments and build succession pipelines. They included project-based assessments, in which participants were required to propose actionable projects which accrued financial benefit to their respective sectors.

**COACHING SESSIONS**

- Built in coaching sessions for maximum optimisation of development
- Direct coaching (consultant to participants)
- Indirect coaching (Participants to internal teams)

**MANAGING PEOPLE AND EMOTIONAL INTELLIGENCE**

- Management of practical applications in difficult conversations, Emotional
- Intelligence when handling teams and changing landscapes

**LEADERSHIP FINANCE**

Understanding the financial impact of all decisions, singularly and collectively

**ENTREPRENEURIAL THINKING**

Owning the business, developing markets and solutions from an entrepreneurial perspective.

**LEADERSHIP AND PRODUCTIVITY**

Accountability, results orientation, time management and productivity on a personal and departmental level

The Hayleys Group’s Management Trainee Programme, branded as ‘FYOUTURE CEO’, is amongst the country’s most sought-after programmes of its kind, drawing significant interest from aspiring young professionals from diverse backgrounds. During the year, the Group received over 4200 applications, which were initially screened through an automated platform. Thereafter, shortlisted applicants were assessed through a series of comprehensive, multi-pronged tests comprising cognitive tests, assessment centres and psychometric tools.

**OTHER TRAINING INTERVENTIONS**

Total training hours	2024	2023	2022

- C-suite level mentors assigned to each MT
- Core project within allocated Sector
- Cross-sector exposures with mini-projects
- Competency Development through multiple learning interventions
- Direct engagements with Senior Leadership

**Diversity, Equity and Inclusion**

Strategic focus was placed on enhancing the dialogue around diversity, equity and inclusion, enabling the Group to identify pressure points and find collaborative means to address these challenges. During the year, we also engaged with the UNGC’s questionnaire on Women’s Empowerment Principles to identify gaps through a quantification of our gender equality commitment

# HUMAN CAPITAL

## GENDER INCLUSIVITY AND EMPOWERING WOMEN

We are committed to improving gender diversity across all levels of the organisation and building diverse leadership teams. Our commitment to gender inclusivity is embedded through our HR policies and processes from recruitment and training opportunities to remuneration and promotions.

### Well-being

We understand the importance of rethinking workplace well-being through a lens of emotional and mental health, in addition to the conventional focus on physical health. Positive outcomes such as motivation and engagement are correlated with feeling supported and included at workplaces which promote work-life balance and freedom from overwhelming workloads. In addition to regular medical camps, free Zumba and yoga sessions, gym and pool memberships several awareness sessions were held across the Group primarily covering the following areas:

- Substance abuse and addiction prevention
- Relaxation techniques for daily life
- Dietary awareness for a healthy life
- Breast cancer awareness
- HIV awareness
- Women's wellbeing for a sustainable tomorrow

### EMPLOYEE ENGAGEMENT

Formal and informal communication platforms, an open-door policy and regular employee satisfaction surveys ensure that employees feel heard and understood. Meanwhile, a year-round activity calendar which includes sports events, cultural events and family engagements aids in improving morale, building camaraderie and team spirit and nurturing a more conducive work environment. Key engagement activities during the year are listed below:

<p><b>Internal communications</b> Quarterly CONNECT magazine and employee broadcast conducted through Office 365 platform</p>	<p><b>Cultural, sports and other events</b> <b>The Group conducted a year-round activity calendar which included the following events;</b> Art Competition for employees and children Hayleys Cricket 6's Tournament Hayleys swimming meet and other sporting events Family Fun Day Children's party Quiz competitions Karaoke competitions Multi-religious and other cultural ceremonies</p>
<p><b>Satisfaction surveys</b> Most Sectors conduct internal and/or third-party facilitated employee satisfaction surveys</p>	
<p><b>Social media engagement</b> A variety of activities such as competitions and knowledge sharing to enhance engagement of internal teams through social media platforms.</p>	
<p><b>Mercantile sporting events</b></p>	

### PERFORMANCE MANAGEMENT

The Group's performance management framework is designed to encourage superior performance through regular, fair and constructive performance-related feedback that drive personal growth, competency development and business contribution. The performance management process from goal setting to mid and year-end reviews for all employees in executive and above categories are conducted through the HRIS. Appraisals for all non-executive employees are conducted offline. Approximately 99% of our permanent employees undergo annual performance appraisals.

#### PERFORMANCE MANAGEMENT PROCESS

- 1 Individual employees set annual objectives aligned to the relevant business/department strategy, which are reviewed and approved by the relevant manager
- 2 Mid-year performance review where progress against expectations and deliverables are discussed
- 3 Year-end performance review where final performance rating is confirmed subsequent to a Company wide calibration process

### SAFEGUARDING OUR EMPLOYEES

We work consistently towards creating an environment which is safe for our employees, contractors and customers. The Group's Health and Safety policy sets the foundation for this commitment and is strengthened across all Sectors through compliance to safety certifications, incident reporting and stringent procedures. During the year, Sectors improved the scope of reporting for health and safety indicators, which has led to a considerable increase in the cases reported and occupational injuries.

## HUMAN CAPITAL

	2024	2023	2022
Reported first-aid cases	390	147	236
Occupational injuries- resulting in lost days	164	66	73
Lost man days due to accidents/injuries	902	1,076	1,834

### H&S MANAGEMENT SYSTEM

- H&S champions in multiple Sectors
- Compliance with all relevant regulations under the Factories Ordinance, BOI requirements and Labour Laws of Sri Lanka.
- Several sectors including Hand Protection, Construction Textile, Transportation & Logistics and Projects & Engineering also comply with the ISO 45000: 2018 OHS Management system certification

### H&S SERVICES

- Availability of OHS persons and visual communication
- Emergency vehicles at sites, medical centres, dedicated nurses/medical representatives at facilities etc.
- Fully qualified in-house nurse and employees are provided access to a doctor

### H&S MANAGEMENT SYSTEM

- Each Sector (particularly in the Manufacturing Sectors) operates dedicated OHS management departments, which are powered by qualified safety professionals.
- Hazard identification is also enabled by risk assessments relating to ISO 45000: 2018. Meanwhile digital OHS management systems are available in the Hand Protection Sector, which allows real-time, online reporting of accident/incidents.

### CULTURE

- Ongoing safety trainings to all employees based on the specific OHS risks faced by the Sectors
- Selected Sectors such as Transportation & Logistics have also embedded OHS related KPIs into employee performance evaluations to ensure the nurturing of a safety conscious culture.

### HUMAN RIGHTS

In addition to the adherence of relevant regulations, Hayleys has also committed to the UNGC's Principles on Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work.

- The **Group's Human Rights Policy and Code of Conduct**- the Hayleys Way recognises the right of all employees to have a respectful workplace free of any form of harassment

- **Working hours and wages**- Hayleys complies with relevant minimum wage legislations and our competitive compensation reflects adjustments to living expenses and benchmarks against peer companies. We also comply with all applicable laws relating to overtime payments, hours and breaks.
- **Freedom of association and collective bargaining**- We recognise employees' right to association and collective bargaining and approximately

Sector	% of employees covered
Plantations	7%
Purification	35%
Hand Protection	38%
Agriculture	13%
Eco Solutions	20%
Consumer & Retail	32%
Textiles	28%

14% of the Group's employees are covered by Collective Agreements. We have not identified any operations in which the right to freedom of association and collective bargaining may be at risk. Minimum notice periods vary depending on the sector and circumstances, but relevant collective agreements ensure that a reasonable notice period is given for operational changes. During the year, Group and Sector HR teams maintained cordial relationships with all trade unions and there were no disruptions to operations due to industrial action.

- **Child labour** - Hayleys opposes child labour, does not employ any person under the age of 18, and works with business partners to ensure that zero instances of child labour are recorded in the supply chain as defined by national laws
- **Addressing workplace concerns**- Employees and third parties are encouraged to raise questions or concerns relating to misconduct, human rights, labour practices and other issues

**Rs. 53.12 bn**  
**(+14%)**

Payments to employees

**Rs. 1.5 mn**

Remuneration/employee Revenue

#### Rewards and Compensation

The Group's reward schemes include an array of market-competitive benefits that enable us to attract, motivate and retain employees. The Remuneration policy ensures a consistent approach across Group companies, while factoring in industry-specific dynamics and regulations.

Our benefits include components that are applicable across the Group as well as non-core benefits which are applicable to selected Sectors or employee groups. Group-wide benefits include medical and life insurance, fuel allowances, subscriptions and study assistance (for selected categories), Group discounts for Hayleys products, funeral funds and retirement benefits. In addition, Sector-specific benefits given include enhanced gratuity payments, long-service awards and staff transportation facilities.

#### Components of our remuneration

- Guaranteed pay
- Benefits (detailed alongside)
- Performance-based incentives

#### WAY FORWARD

- Enhancing process efficiencies through adoption of digital transformative strategies
- Development of leadership tiers and capabilities
- Continuous focus on employee well-being and welfare
- Driving holistic, organisation-wide, diversity, equity & inclusion initiatives

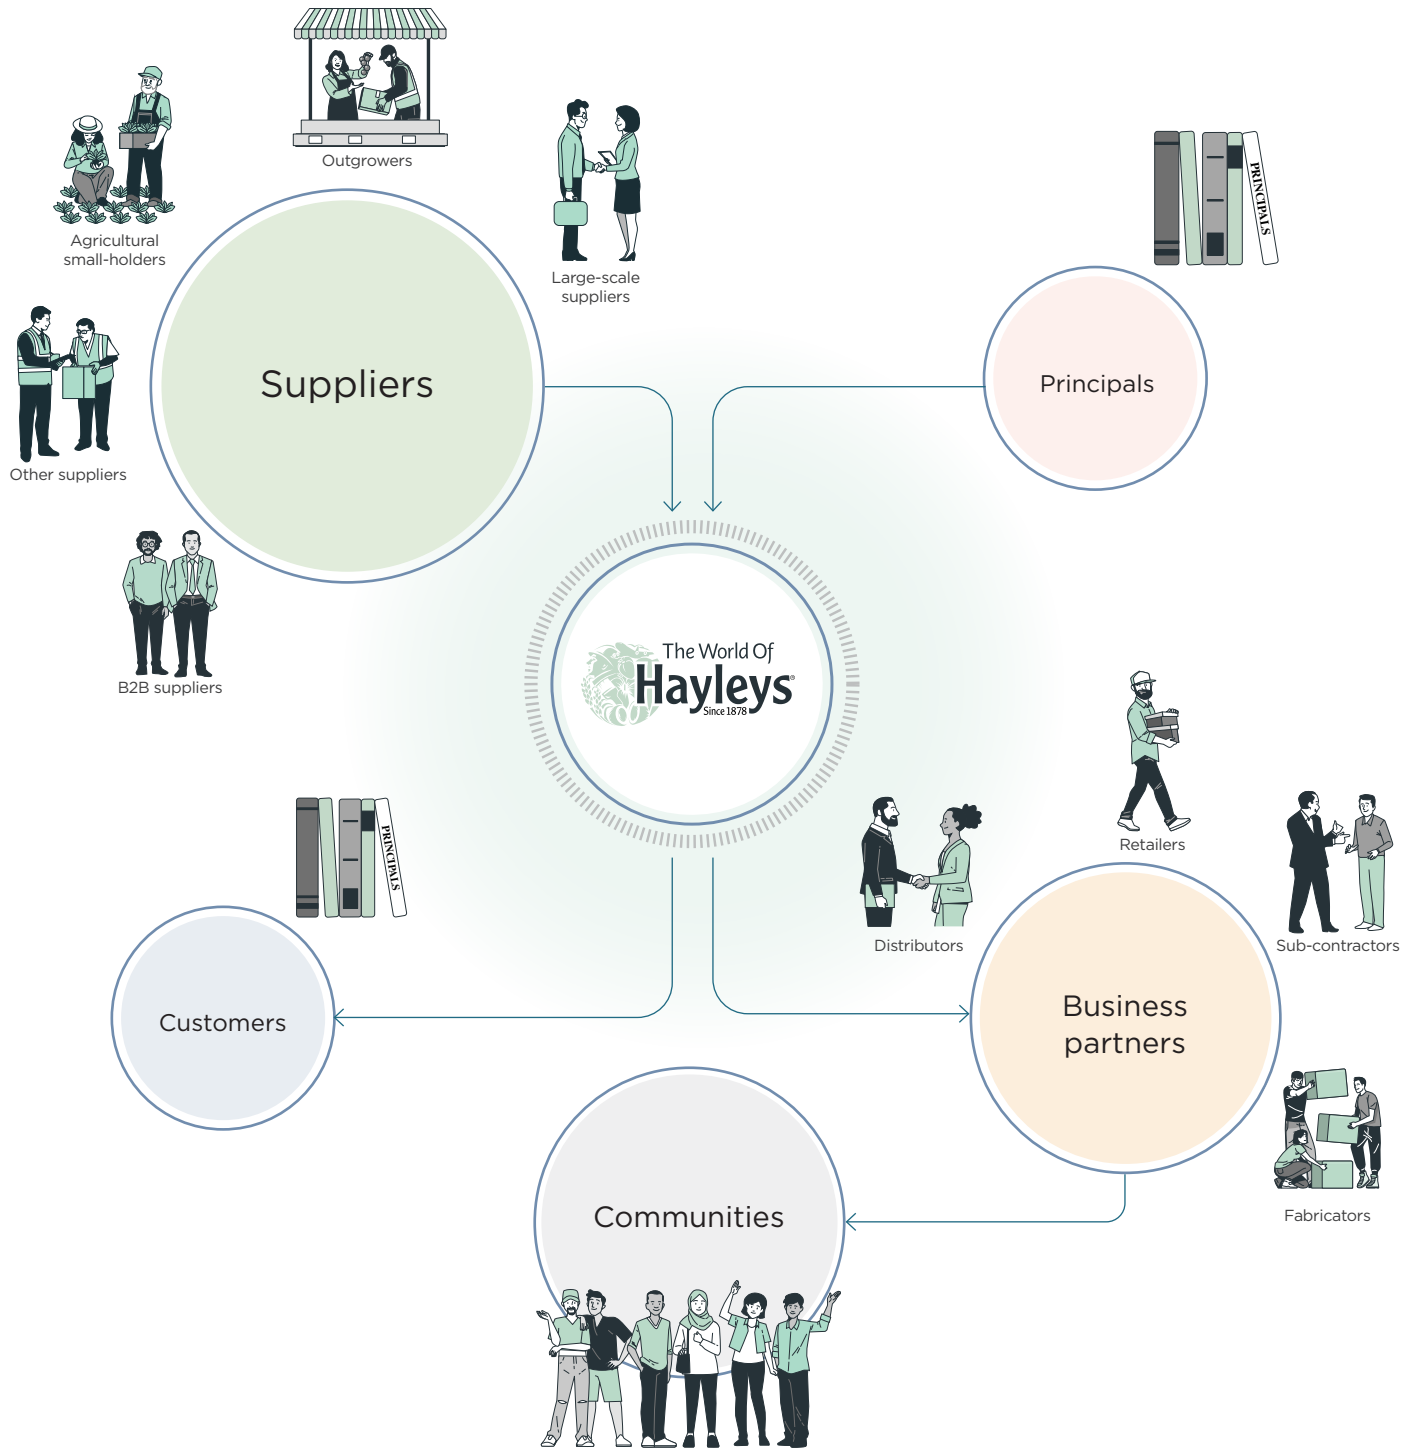

#### Adequacy of Human Capital for future plans

Attracting and retaining the right talent will continue to be a challenge in the short-to-medium term given the current shortage of skills in the country. The Group will seek to further strengthen its employer brand as a preferred employer while developing a multi-skilled talent pool to address this challenge.

# SOCIAL & RELATIONSHIP CAPITAL

As a Group with an unparalleled social footprint across the country, and inclusivity at the center of its Corporate Purpose, Social & Relationship Capital is a vital element of the Hayleys' value creation process. Our ethos has always centered on driving shared value across our relationships and networks, which in addition to building resilient business models and driving socio-economic empowerment has afforded us a strong social license to operate.

**CUSTOMERS**

Our commitment is to leverage our unique strengths to cater to the dynamic needs of our customers, creating value through innovation, technology, quality and customer service. We combine our deep customer insights with our domain knowledge which is deepened by ongoing engagement and collaboration with customers. The breadth and depth of the Group's operations has enabled it to build a global network of diverse customers.

**Understanding customer needs**

The channels we use to engage with our diverse customers are detailed on page 88 of this Report. These platforms and channels are used to identify and respond to the concerns and suggestions of our customers, thereby ensuring their needs are identified and responded to.

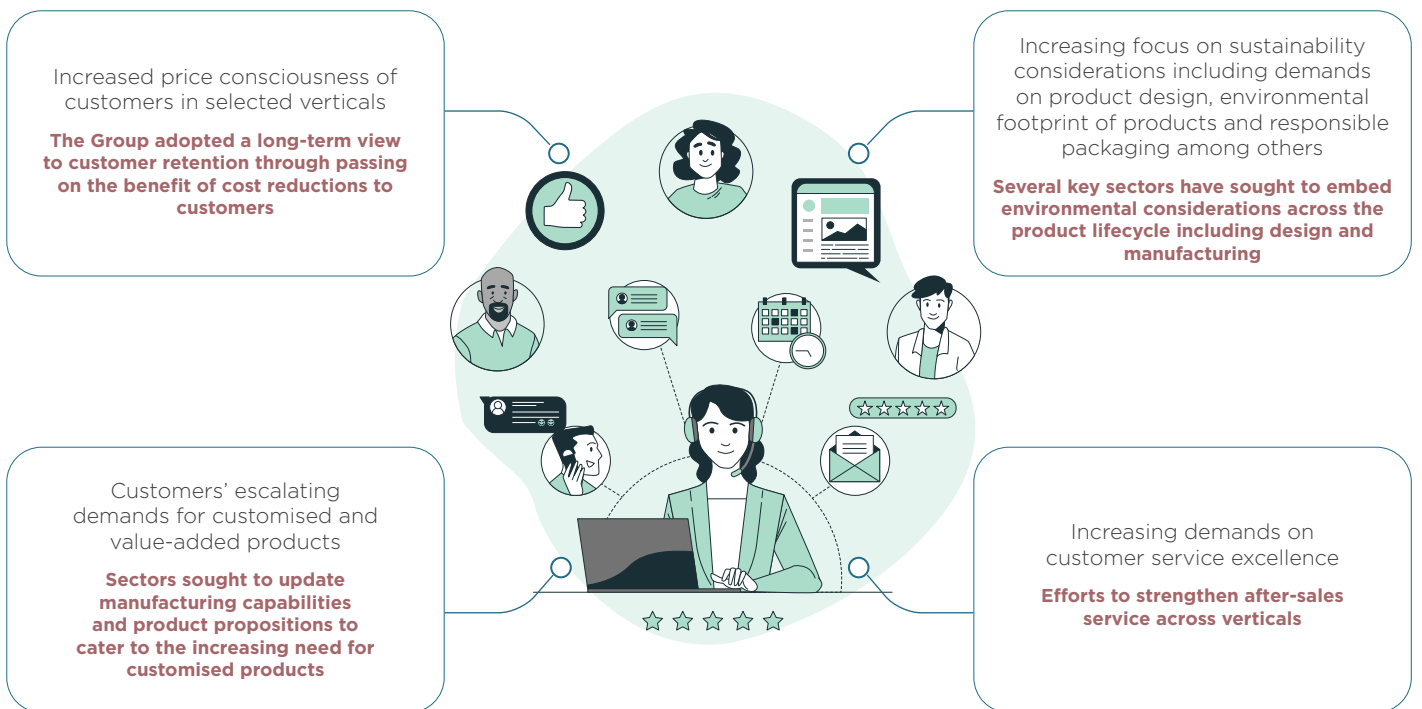

**CUSTOMER PROFILE**

**1.24 mn**  
Customers served

**B2B and Retail**  
customers across 5 continents

**KEY CONCERNS RAISED BY CUSTOMERS AND OUR RESPONSE**

**7,000** Customer surveys conducted

**99%** Customer complaints resolved

## SOCIAL & RELATIONSHIP CAPITAL

### Product Stewardship

The Group’s commitment to product stewardship is embedded across different aspects of its customer journey through compliance to certifications, internal policies as well as responsible marketing practices.

 <p><b>Procurement/ Buying stage</b></p>	<p>Stringent procurement practices and strong relationships with suppliers limit the risk of potential issues at the purchasing stage</p>
 <p><b>Manufacturing stage</b></p>	<p>Compliance to an array of certifications and clearly defined policies, procedures and guidelines for manufacturing operations</p>
<p><b>Marketing stage</b></p>	<p>A Responsible Marketing Guidelines ensures the integrity and accuracy of all marketing communications. The Hayleys Group Corporate Communications Department reviews all key press releases and publications</p>
<p><b>Product use</b></p>	<p>Compliance with a range of certifications which provide assurance to external stakeholders regarding the quality and safety of our products. These include the following certifications obtained by various sectors</p> <ul style="list-style-type: none"> <li>• ISO 9001: 2015 Quality Management Systems</li> <li>• ISO 22000: 2018 Food Safety Management Systems</li> <li>• British Retail Consortium Certification Safety and Quality certification for consumer products</li> </ul>

### Building sustainability into products

Aligned with our ESG aspirations, we are integrating sustainability into our research and product development processes thereby striving to minimise negative environmental implications during product usage as well as end-of-life disposal. Refer to page 274 for further information on the Group’s sustainable innovation efforts.

### SUPPLIERS & BUSINESS PARTNERS

The Group’s deep-rooted relationships with diverse and extensive supply chains across the country is a defining aspect of its value creation process, strengthening its socio-economic footprint. Suppliers are diverse in geographical profile and scale of operations, ranging from individuals and small-scale suppliers to large B2B players.

### Supplier value creation during 2023/24

The Group’s supplier value proposition centers on continued value injection through procurement, development and capacity building and creating market linkages to global value chains. During the year, total payments to suppliers declined by 17% to Rs. 325.36 bn.

**Over 70,000**  
Supplier profile

**54%**  
Local suppliers

### Building inclusive value chains

Inclusivity has always been a defining characteristic of the Hayleys ethos and the Group has always prioritised business models that support grassroot communities, thereby injecting economic value and driving empowerment. Through its diverse businesses, the Group connects rural communities to global supply chains, facilitating market linkages, building capacity and providing access to finance and resources. During the year, the Group supported nearly 20,000 smallholder agricultural suppliers and business partners.

Sector	Suppliers/Value chain partner	Number
<b>Eco Solutions</b>	Fibre suppliers	419
<b>Hand Protection</b>	Latex suppliers (local)	6,000
	Latex suppliers (Thailand)	1,059
<b>Purification</b>	Charcoal and coconut shell suppliers	285
<b>Agriculture</b>	Outgrowers-fruits and vegetables	11,962
	Smallholder-farmers	225
<b>Construction Materials</b>	Fabricators	30
<b>Consumer &amp; Retail</b>	Indirect employment in branches	2800
<b>Projects &amp; Engineering</b>	Sub-contractors	978

### WOMEN-LED SUPPLY CHAINS

In diversifying its supply chain and driving socio-economic empowerment among vulnerable women, the Eco Solutions Sector established a Palmyrah processing plant in Jaffna providing employment to 12 impoverished women.

### Supplier development

In building resilient supply chains and supporting the long-term sustainability of our valued partners, several key sectors in the Group conduct ongoing supplier development programmes. These initiatives entail providing access to input materials, raising awareness on good social and environmental practices and ongoing capacity development. Key supplier development initiatives that are conducted on an ongoing basis are listed below:

#### DPL Firstlight- Hand Protection Sector

Strategic supplier development programme which ensures a fair price for rubber latex by guaranteeing rubber smallholders a price which is indexed to RSS1 (the highest grade of consumed rubber) for their field latex. DPL also contributes US 0.5 dollars for every pair of gloves sold, which is utilised to fund a wide range of education, health and infrastructure projects to improve the overall quality of life of smallholders and their families.

**+6000** Farmers in total

**Rs.3.0 bn** Payments to Firstlight farmers

**131,00 kg** of fertilizer distributed

**600** Farmers participated in training programmes

**Rs.3.79 mn** Investments in community engagement

#### Haritha Angara- Purification Sector

A holistic supplier development initiative, through which charcoal makers are encouraged to engage in environmentally friendly charcoaling with Haycarb PLC providing technical support and guidance on ecologically friendly charcoaling processes and buy back agreements.

**+6,000** Farmers island-wide

**23** Green charcoaling pits added bringing the total to **431**

**12** Suppliers assisted to mechanise production facilities during the year, with **over**

**350** supported so far

## SOCIAL & RELATIONSHIP CAPITAL

### Skill development along value chains

Several Sectors in the Group are catalysts for skill development in their respective industries and value chains, sharing best practices, raising awareness on latest technology and supporting the future-readiness and resilience of these value chains. Key ongoing interventions include the following:

#### Singer Fashion Academy

The Singer Academy supports livelihood development through empowering youth who wish to pursue a career in sewing, by providing opportunities for skill development through 6 fashion academies. The School aims to provide future fashion entrepreneurs an understanding of the scope and opportunities available in the field of fashion design at an affordable cost

**Total students trained: over 5,400**

#### Fabricator Training By Alumex

Alumex has contributed towards the development of a skilled and competent construction industry through building capacity in aluminium extrusions, providing practical insights into the application and usage of Aluminium profiles, components, new products and new technologies through multi-faceted training programmes. The training is targeted towards a wide range of fabricators and technicians including students of VTA affiliated Technical Colleges, CECB, Buildings Department, Provincial Councils, ICTAD, Contractors, Sri Lanka Army, Navy, Air Force and other Technical Colleges (Government/ Non-Government) island wide.

**20,000 fabricators trained to date**

#### Agriculture Training Schools

The Hayleys Agriculture Training school conducts training programs for a range of stakeholders including teachers, industry practitioners and commercial operators. While supporting our financial objectives this initiative also aims to enhance the agricultural skill base in Sri Lanka, given the shortage of skilled labour in the industry.

### Membership in Industry Associations

- Ceylon Chamber of Commerce
- Ceylon Association of Ships' Agents
- Lanka Business Coalition for HIV-AIDS
- United Nations Global Compact
- National Agribusiness Council
- Sri Lanka Association of Inbound Tour operators
- National Chamber of Exporters
- Sri Lanka Institute of Nanotechnology
- Planters Association
- Sri Lanka Freight Forwarding Association
- SLASSCOM
- American Chamber of Commerce

### COMMUNITY ENGAGEMENT

**CSR Governance:** All CSR initiatives are aligned to the Group Community Engagement policy but formulated and driven at Sector level; certain significant projects are also driven by the Centre. The Group ESG Steering Committee has oversight responsibility on the Group's CSR activities. Details pertaining to CSR activities, beneficiaries and impacts are reported by the Sectors to the Group ESG division on a quarterly basis.

**Measuring our impact:** Sectors monitor the impact of its community engagement activities on an ongoing basis, defining project-specific criteria to monitor progress and assess success. From a Group perspective, total beneficiaries, CSR investments and volunteer hours are monitored on a consistent basis.

### INDUSTRY PARTNERSHIPS

As a dominant player and active stakeholder in several of its business sectors, the Group contributes proactively to industry forums and associations, engaging with stakeholders and the government to provide input in creating an enabling industry and regulatory environment. The Group holds memberships in the following industry associations

**HIGHLIGHTS OF THE GROUP'S COMMUNITY RELATIONSHIPS POLICY**

- Sectors should actively engage in strategic community development initiatives, broadly focusing on the key areas of education, health and well-being, livelihood development, religion and culture
- Encourage and reward employee volunteerism, thereby recognising employee involvement.
- The progress of all projects should be monitored periodically, through impact assessments, audits, feedback from beneficiaries and independent third parties (where necessary) to ensure that program objectives are met.

**KEY CSR INTERVENTIONS IN 2023/24**

The Group's community engagement activities during the year were designed to address critical community needs while leveraging the Group's strengths in specific areas and aligning with the aspirations of the Hayleys Lifecode. Key CSR initiatives conducted during the year are summarised below:

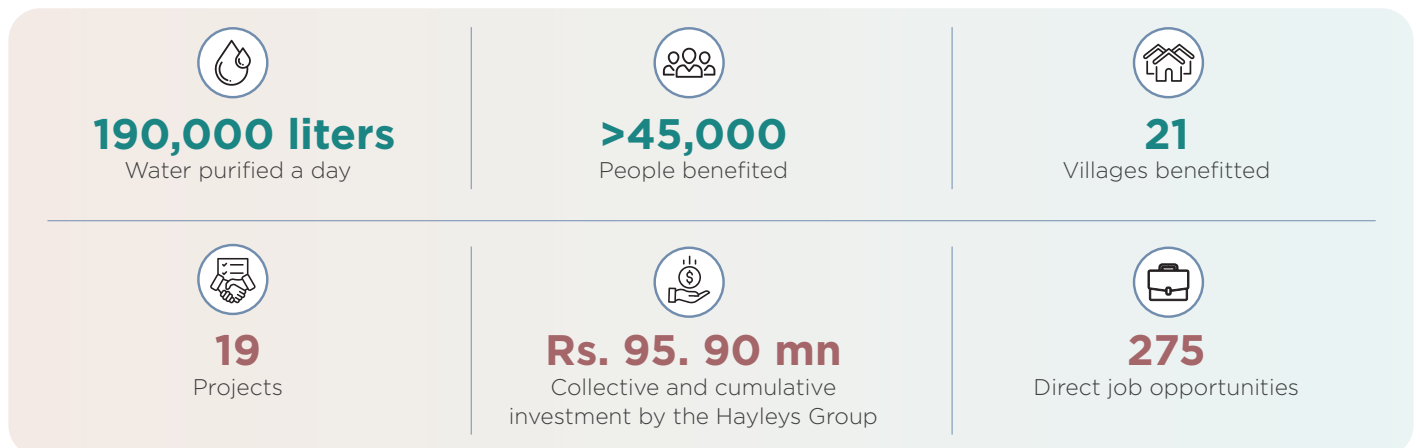

**Sisu Divi Pahana**

Initiated by the Purification Sector as part of its 50th anniversary commemoration, 'Sisu Divi Pahana' provides nutritious mid-day meals to students across 13 schools in Madampe, Wewalduwa, Kaluthara, Mahiyanganaya, Padaviya and Batticaloa. The programme was launched amidst the surge in food inflation last year and has contributed towards preventing acute malnutrition in students and increasing retention levels in schools. During the year, the Hand Protection Sector also joined the initiative, thereby widening impact and coverage.

**Puritas Sath Diyawara**

Puritas Sath Diyawara leverages the Group's expertise in water purification to provide purified water to families in areas affected by Chronic Kidney Disease (CKD). Conceptualised and launched by Puritas (Pvt.) Ltd., the initiative has expanded in partnership with other sectors within the Group. A Puritas Sath Diyawara project consists of commissioning a Reverse Osmosis (RO) water treatment plant and distribution system (through docking stations) to enable residents to obtain high quality potable water.

## SOCIAL & RELATIONSHIP CAPITAL

### Sathdiyawara Going Beyond

Launched as an extension of Puritas Sath Diyawara, 'Going Beyond' strives to address the broader socio-economic needs of the people living in CKD affected villages. In recent years, this initiative has focused on supporting the educational needs of these impoverished communities through providing infrastructure & facilities and book donations among others.

### Home for Every Plantation Worker

A long-term, multi-dimensional community engagement initiative carried out by the Plantation Sector, 'A Home for Every Plantation Worker' is a unique and holistic program targeted at uplifting the living standards of employees and estate community amounting to nearly 150,000 individuals. The relevance of this programme was greater during the year, given the numerous socio-economic challenges that prevailed.

The progress made in each of the focus areas are summarised below:

<p><b>Living environment</b></p>	<p><b>30,317 Beneficiaries</b> Construction of new houses, upgrading existing water supply schemes and installation of new water delivery systems and improving access roads</p>
<p><b>Health &amp; nutrition</b></p>	<p><b>273,730 Beneficiaries</b> Comprehensive immunisation programmes, medical facilities, awareness programmes on health and nutrition, early childhood development programmes and antenatal and postnatal care</p>
<p><b>Community capacity building</b></p>	<p><b>50,949 Beneficiaries</b> Provision of housing loans, savings schemes, micro-financing facilities as well as training on household financial management and home gardening among others</p>
<p><b>Youth empowerment</b></p>	<p><b>56,335 Beneficiaries</b> Home gardening, language and computer classes, awareness on significant social issues and career awareness programmes</p>

### Give the gift of sight campaign

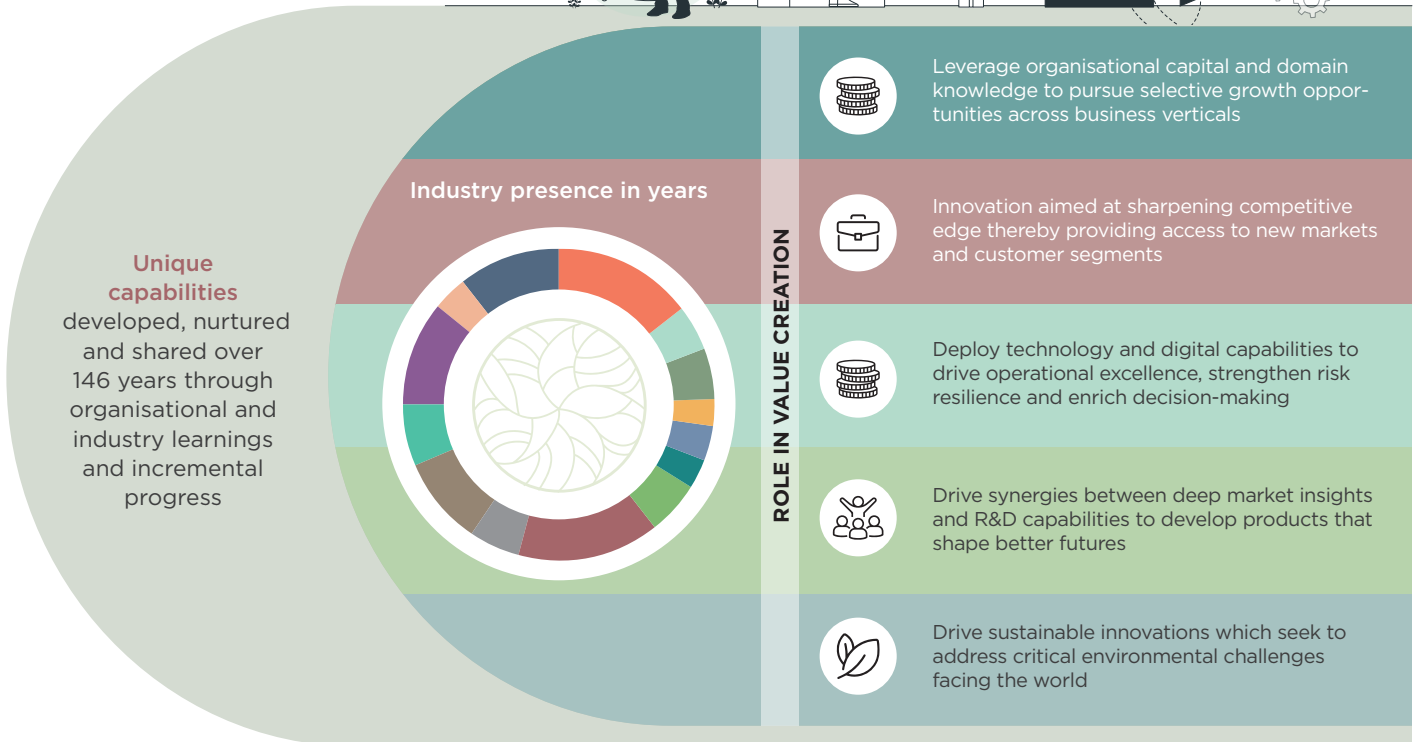

The Hayleys Group partnered with HelpAge in the "Give the Gift of Sight" campaign, committing to restoring vision by sponsoring 260 cataract surgeries for individuals from underprivileged communities, thereby addressing preventable blindness. The initiative combined the efforts of more than 10 Sectors of the Group including Agriculture, Hand Protection and Purification.

### Soorya Sathkara by Hayleys Fentons

In a unique socially and environmentally impactful initiative, Hayleys Fentons launched Soorya Sathkara in commemoration of surpassing the 200MWp rooftop solar PV installation in Sri Lanka. Through this initiative, Hayleys Fentons seeks to install solar PV in 200 children's homes, elderly homes and special needs care centers across the island.

# INTELLECTUAL CAPITAL

We define Intellectual Capital as the integrated products and solutions we offer across our verticals, our appetite and capability for innovation which enables us to persistently meet emerging customer needs and the unique skills, attitudes and values of our team which are passed on through a culture of engagement, mentoring and knowledge sharing.

- Eco Solutions ● Hand Protection ● Purification ● Textiles ● Construction Materials ● Plantations ● Agriculture ● Consumer & Retail
- Leisure ● Industry inputs, Power & Energy ● Transportation & Logistics ● Projects & Engineering ● Tea Exports ● Others

## MEASURING SUCCESS

# INTELLECTUAL CAPITAL

## PRODUCT CAPABILITIES

The Group's extensive product portfolio across its diverse verticals fulfill an array of needs of both retail and industrial customers, fulfilling a variety of needs at every stage of the customer journey. With a Group-wide focus on sustainable innovation, several of our Sectors manufacture products that are designed to address critical social and environmental challenges facing the world today, thereby ensuring that our products contribute towards shaping better futures. The Group's comprehensive product map is graphically illustrated below; further information on the product proposition of the Sectors are given on the Portfolio Reviews from page 114 to 245 of this Annual Report.

## CONVENIENCE, COMFORT AND CONNECTIVITY

### Hand Protection Sector

An array of multi-purpose gloves catering to households and industries

### Eco Solutions Sector

Range of brushware and value-added eco-fibre products

## PURIFICATION APPLICATIONS

### Purification Sector

Safeguarding health and well-being of people and the environment through water and air purification solutions

## LIFESTYLE

### Construction Materials

Aluminium extrusion for sophisticated living

### Leisure

Curating unique hospitality experiences across our hotel and resort portfolio

## NUTRITION AND WELL-BEING

### Agriculture and Plantations

Offer an array of sustainable, high-quality and innovative agricultural products including tea, spices, value-added vegetables and fruits.

## CLEAN ENERGY GENERATION

### Projects & Engineering

Driving Sri Lanka's clean energy transition, as the country's leading solar engineering, procurement

### Industry Inputs, Power & Energy

Renewable energy generation through hydro, solar and wind power projects

## CONVENIENCE, COMFORT AND CONNECTIVITY

### Consumer & Retail

Convenience, connectivity and comfort through a range of consumer durables, mobile phones and consumer electronics

## FACILITATING BUSINESSES

### Industry Inputs, Power & Energy

Supplies an array of industrial raw materials to domestic & export-oriented businesses

### Others Sector

Hayleys Business Solutions International supports businesses.

## GLOBAL CONNECTIVITY

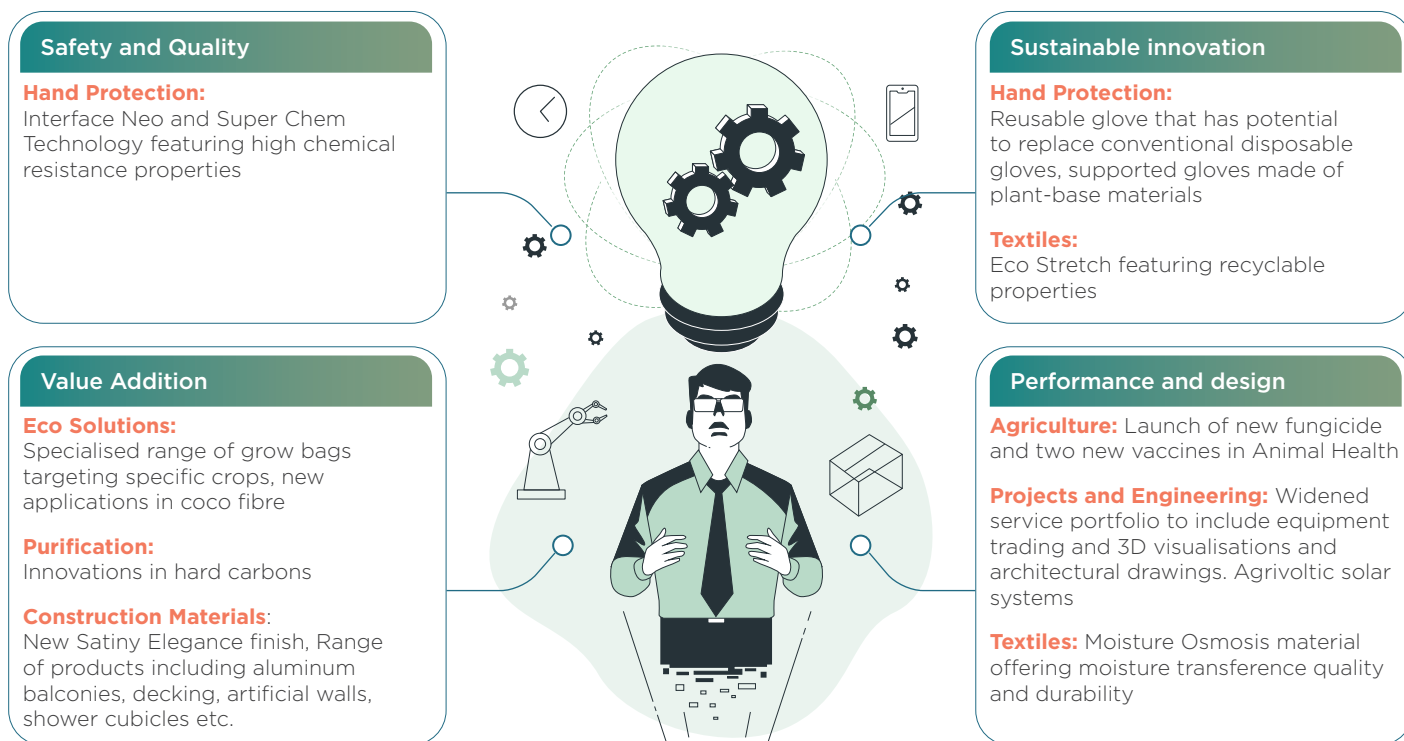

### Transportation & logistics

Connecting local businesses to global value chains through a comprehensive array of transportation and logistics solutions

### INNOVATION MANAGEMENT

All our Sectors are connected by our fundamental strengths in research and development, technology and capabilities which have fuelled our aspirations to drive innovation in products and processes. We encourage new ideas through propagate a culture of learning which stimulates innovation and knowledge sharing. The Group also collaborates with leading research institutions and universities in developing and commercialising research that facilitates innovation. In recent years, we have also sought to relentlessly adapt our product capabilities and processes to shape better futures that address key sustainability issues. In recent times, the Group's R&D interventions have centered on four key dimensions as is illustrated below

### ORGANISATIONAL KNOWLEDGE

Industry insights and domain-specific knowledge gained over an established track record of over 140 years has sharpened the Group's competitive edge and enabled it to nurture a unique base of intellectual capital. With Sectors consistently increasing the depth and breadth of its operations both organically and through acquisitions, this unique base of intellectual capital has deepened, facilitating a high level of adaptability to market conditions, which has in turn enabled resilience in challenging conditions. The Sectors also harness cross-industry expertise in driving solutions and value creation, with successful initiatives being replicated in other sectors or across the organisation.

### NEW PRODUCTS BY SECTOR

## INTELLECTUAL CAPITAL

### Systems and Standards

A host of national and international certifications across its Sectors reflects the Group's commitment to operational excellence and continuous improvement. The requirements of the Group's global customer base have also encouraged sectors to comply with stringent quality certifications, which have contributed towards strengthening internal systems and processes thereby enhancing the Group's intellectual capital base.

### DIGITAL TRANSFORMATION

The Group embarked on a digital transformation journey during the year, strengthening both human and digital capabilities in formulating a medium-to-long term digital roadmap. The roadmap seeks to leverage digital technology, data and people capabilities to achieve operational excellence, enhance customer experience, mitigate risks, empower employees through richer data insights and generate new revenue streams. Group-wide roll out of the digital transformational roadmap will be a key priority in the next financial year.

### WAY FORWARD

- Innovation focused on value addition and sustainability principles
- Culture of learning and knowledge sharing
- Implementation of the Group's digital roadmap

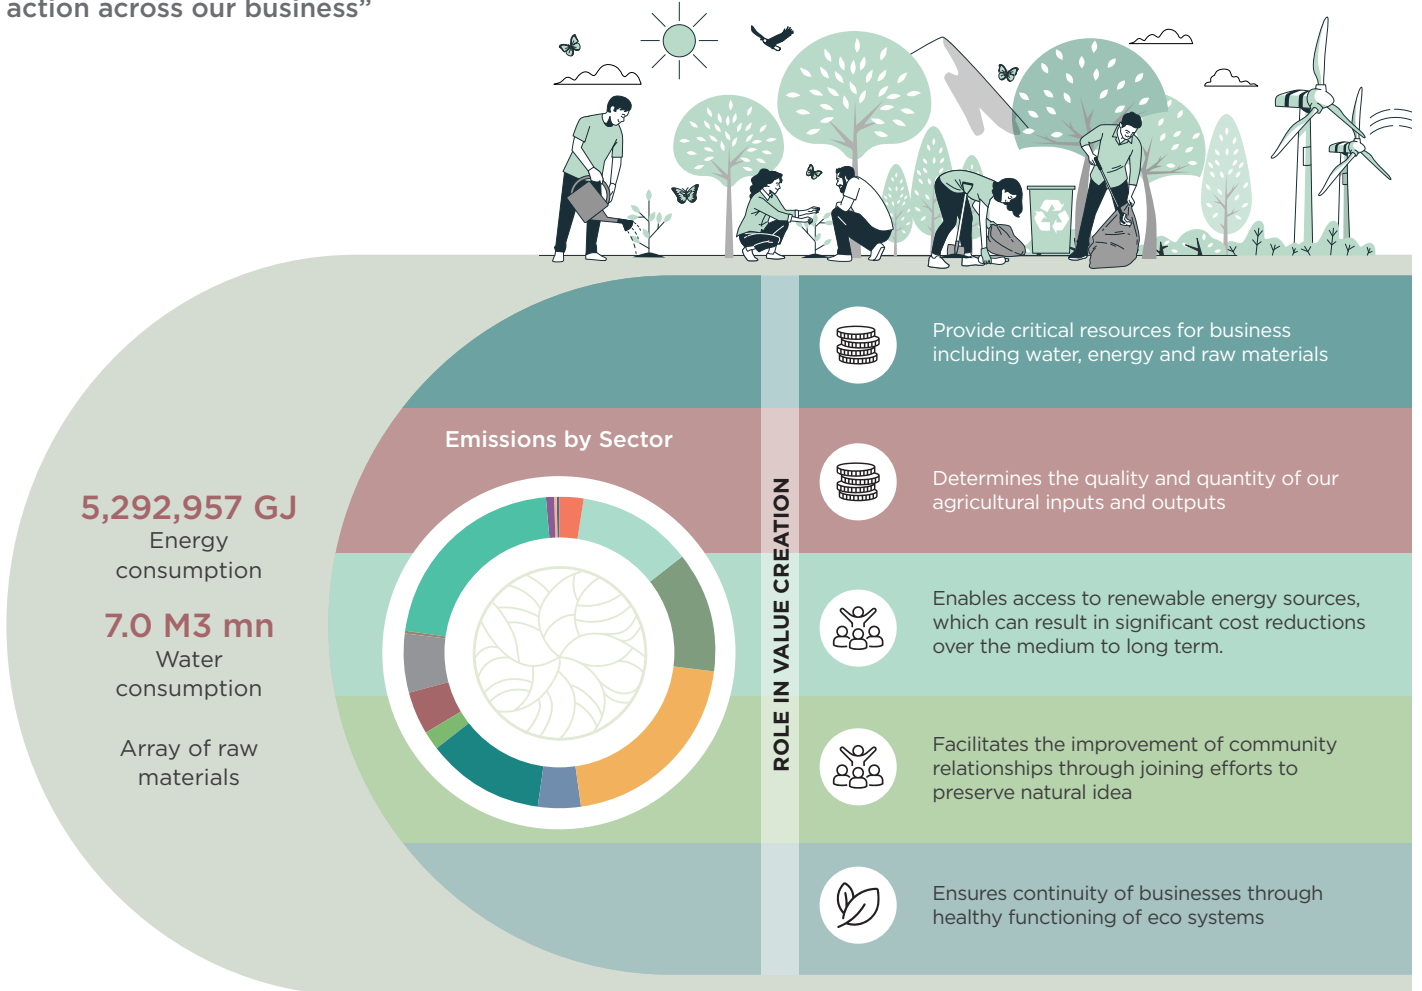

### Adequacy of Intellectual Capital for future plans

A strong pipeline of products, together with ongoing investment in R&D capabilities and a culture of knowledge sharing is expected to further strengthen the Group's intellectual capital in the short-to-medium term. The quality of the Group's intellectual capital has positioned it in good stead to leverage on emerging opportunities, accessing new markets and customer segments.

# NATURAL CAPITAL

As a Group which relies heavily on agriculture-based input materials Hayleys' commercial success is linked to the health of the planet and natural resources. We are deeply committed to driving efforts to keep our operations resilient to environmental risks while adopting environment and climate-positive action across our business"

- Eco Solutions ● Hand Protection ● Purification ● Textiles ● Construction Materials ● Plantations ● Agriculture ● Consumer & Retail
- Leisure ● Industry inputs, Power & Energy ● Transportation & Logistics ● Projects & Engineering ● Tea Exports ● Others

## MEASURING SUCCESS

\*Excluding the emissions arising from new acquisitions during the year

# NATURAL CAPITAL

## APPROACH TO MANAGING ENVIRONMENTAL IMPACTS

The environmental challenges we face today are the most defining ones of this generation and we are responding with innovation, deep commitment and urgency. While environmental consciousness has long-been embedded into our thinking and decision-making, our approach to managing our environmental impacts center on identifying where and how we can make the greatest impact. The Group’s environmental strategy is clearly set out in its ESG Roadmap-the Hayleys Lifecode and supported by a comprehensive suite of policies and certifications.

**CERTIFICATION**

The Lifecode includes environmental policies which have been designed to align with regulatory frameworks, environmental certifications and voluntary

**COMMITMENTS**

Committed to Science-Based-Targets-Initiative (4 companies)  
UNGC Ten Principles

**POLICIES**

The Lifecode includes environmental policies which have been designed to align with regulatory frameworks, environmental certifications and voluntary standards including UN Global Compact Principles 7 to 9.

**REPORTING FRAMEWORKS**

GRI Standards, SASB Standards, TCFD Framework incorporated into the SLFRS S1 and S2 reporting standards

**2030 ENVIRONMENTAL TARGETS**

**30%**  
reduction in Scope 1 & 2 GHG emissions

**ZERO**  
landfill waste

**50%**  
sustainable water sourcing

**100%**  
safe chemical management

**5 Times**  
Enhance biodiversity to 5 times the area occupied

## ENERGY

Reducing energy consumption and increasing our energy efficiency is key to achieving the Group’s emission reduction targets. The Group’s energy strategy in recent years has centered on gradually reducing dependence on fossil fuels through opting for sustainable and renewable energy sources while optimising energy usage across our operations. Energy consumption is tracked and monitored across all operating locations and performance

against reduction targets is reported to sector-level ESG Steering committees at least on a quarterly basis. Key interventions to achieve the Group’s energy targets are set out below:

### Energy efficient infrastructure and operations

Energy efficiency principles are incorporated in the design process of the new building, with due consideration given to temperature, natural light and humidity. Energy saving features include

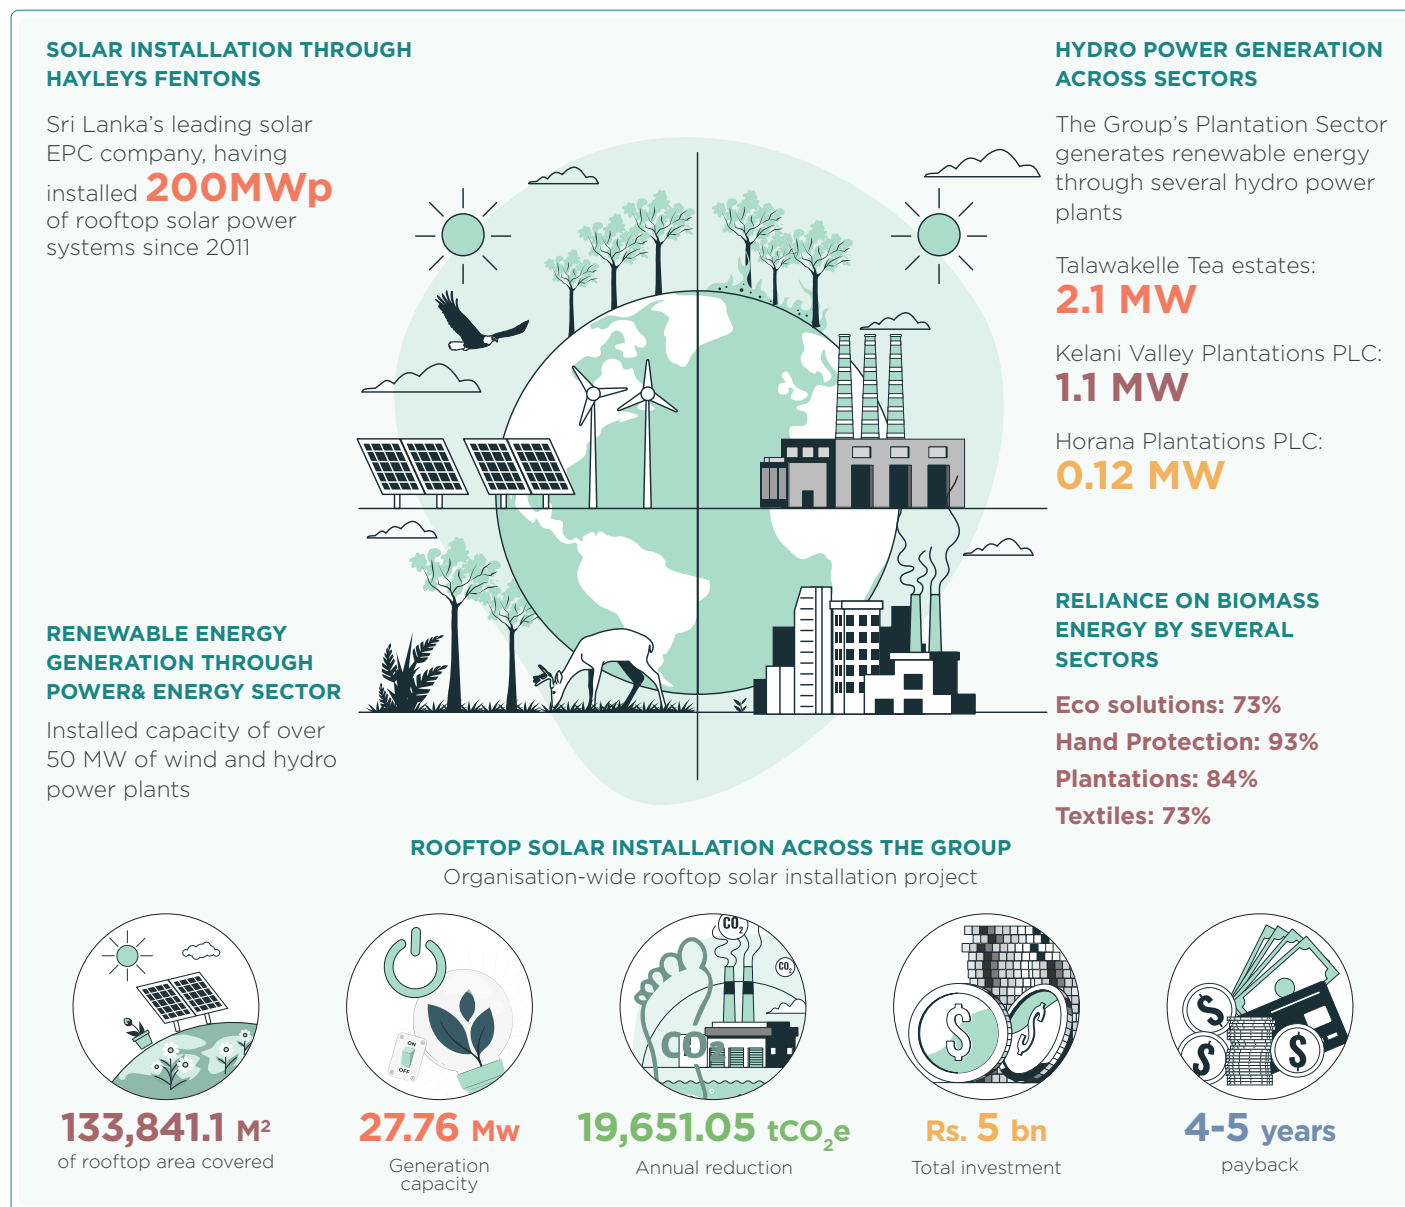

passive design, energy management certifications and energy efficient equipment.

### Transportation services

The Group has deployed 14 buses (at Head Office), along several key commuting routes to facilitate the transportation of employees. During the year, approximately 450 employees utilised this service, which in turn has been estimated to save emissions of approximately 4.84 tonnes Co2e.

### Supporting Sri Lanka's renewable energy transition

As Sri Lanka gears up to meet its net-zero commitments, as articulated in the Net Zero Carbon Roadmap, renewable energy is poised to replace fossil fuels. As a Group, Hayleys is catalysing the country's transition to renewable energy, both through reducing dependence of fossil fuels in its own operations and commercial installations across the country as illustrated below.

### Energy performance indicators

The Group's total energy consumption increased by 10% during the year, with wood log - rubber, wood chip and other alternative biomass emerging as the most significant energy sources with a collective share of 54%. Energy intensity as measured by GJ/Revenue Rs. mn, also increased by 22%. The Group's energy composition continued to tilt towards renewable energy, which accounted for 68% of total energy consumed during the year. In line with the Group's third party verification on its carbon footprint, energy-related information has been restated for 2022/23.

### Performance against targets

**Target 1:** 90% sustainable and renewable energy applications (Actual: 68%)

## NATURAL CAPITAL

	Energy consumption		
	GJ	Y-o-y change(%)	% composition
Eco Solutions	132477	36	3
Hand Protection	2055012	4	39
Purification	240589	-9	5
Textiles	1476777	-2	28
Construction materials	81117	-2	2
Plantations	591950	150	11
Agriculture	30968	-15	1
Consumer & Retail	58507	-21	1
Leisure	117900	24	2
Industry Inputs, Power & Energy	6487	459	-
Transportation & Logistics	487569	13	9
Projects & Engineering	8299	-50	-
Tea Exports	2218	-32	-
Others	3087	-73	-

### ENERGY CONSUMPTION (3 YEAR TREND)

**ENERGY FOOTPRINT**

**10%** increase in energy consumption

**25%** increase in energy intensity

**ENERGY HANDPRINT**

**68%** reliance on renewable energy

**>3.5 mn** renewable energy generation

### EMISSIONS

The Group measures its carbon footprint in line with the WBCSD/WRI Greenhouse Gas (GHG) Protocol Corporate Standard, ISO 14064 and the PAS 2050. The Group has committed to reducing its Scope 1 & Scope 2 emissions by 30% by 2030, to be achieved through Group-wide efforts to increase reliance on renewable energy, reduce energy consumption and reduce dependence on fossil fuels. The Group’s emission reduction aspirations are integrated to its climate strategy, which centers on building a climate-resilient business model while driving continued reductions in the Group’s carbon footprint. Please refer to page 294 of this Report for further information on our climate-related risks and opportunities.

#### Operational interventions

- Increasing reliance on renewable and sustainable energy sources
- Energy efficiency drives across the Group, particularly in the 14 sectors
- Waste to value initiatives driving circularity and decarbonisation across operations

#### Value chain interventions

- Solar installation through Hayleys Fentons
- Emission reductions across supply chains
- Energy efficient solutions for industries
- Energy storage solutions

#### Integrating climate considerations

- Strengthen governance and risk management oversight on climate-risk
- ESG considerations during the Group’s budgeting and financial planning processes
- Developing the Group’s climate action skills

#### Leveraging opportunities

- Access to new markets through low-carbon product solutions (i.e Hand Protection Sector and Construction Materials Sector)
- Driving long-term cost reductions through increased investments in solar

**ENERGY CONSUMPTION BY SOURCE**

**Carbon footprint performance indicators**

The Group’s carbon footprint for 2022/23 was restated following the independent verification on the GHG inventory. The accuracy and completeness of the computation was considerably improved following the verification and the same improvements feature in the GHG computation for 2023/24. Despite the acquisition of new entities and expansion of the business, the Group successfully curtailed the increase in its emissions to 2% reflecting the Group’s increased focus on renewable energy and energy efficiency.

**2%** increase in carbon footprint

**13%** increase in emission intensity

**CONTEXT**

Water security and our ability to safeguard bodies of freshwater resources are increasingly at risk. With the global increase in demand for water, the World Resource Institute projects that there will be a deficit in water supply of about 56\$ by 2030. Currently about 25% of the global population lives in countries that suffer from water stress.

**COMMITMENT**

The Group’s Water Management Policy seeks to conserve and optimise water obtained from various sources, seek avenues of recycling and reusing waste-water and responsible disposal of waste-water generations in its operations.

**WATER**

As a Group which has several water-intensive manufacturing processes, we are cognisant of the potential disruptions to our operations stemming from waster stress. This year,

in preparation for the full adoption of IFRS S1 we are aligning with the CDSB Framework’s Guidance for water-related disclosures as listed below

**CDSB Framework’s Guidance for Water-Related Disclosures**

**Governance:** The governance of water related matters is aligned to that of the Group’s other environmental aspects, with the Group ESG Steering Committee monitoring water-related performance indicators on a quarterly basis. Water withdrawal is monitored across all of the Group’s operating locations and submitted to the Group ESG Division through the Hayleys CUBE. At an operational level, factory managers and/or engineering units are responsible for water management within the respective locations

**Management’s environmental policies, strategy and targets:**

**Context:** Sri Lanka is considered ‘highly water stressed’ with the country consuming 90.8% of its total available renewable freshwater resources. The Group’s interaction with water as a shared source stems primarily from its use in manufacturing operations, in which certain sectors such as Textiles, Hand Protection and Purification are relatively water intensive. Water is also

used for cleaning and employee usage across the Group. The Group’s water sources include groundwater, surface water, pipe borne water and harvested rainwater. Metering is available for main water inputs and wastewater outputs, ensuring the complete and accurate reporting of all relevant date on a timely basis to Hayleys Group ESG Division.

**Primary uses of water in Hayleys**

**Industrial Use**

- Glove manufacturing
- Fabric manufacturing
- Blending of industrial raw materials

**Agriculture**

- Cultivation of tea, rubber and other crops

**Other**

- Sanitation
- Employee use
- Gardening use

# NATURAL CAPITAL

## WATER WITHDRAWAL BY SECTOR

## EFFLUENTS BY METHOD OF DISPOSAL

## EFFLUENTS BY TYPE

## WATER WITHDRAWAL BY SOURCE

**Water discharge:** The Group’s manufacturing processes involve the discharge of wastewater, and effluent treatment plants to responsibly dispose of effluents. Wastewater is typically treated and recycled for re-use for gardening and/or organic farming purposes. Effluents discharged from our operations comply with the requisite water quality standards of BOD, COD, TSS, pH and oil and grease levels are checked on a regular basis by independent assessors to ensure it meets compliance levels.

**Policy and targets:** The Group’s Water Management policy is applicable to all entities within the Group and clearly sets out targets, action plans and deliverables. The policy is in line with the UNGC CEO’s Water Mandate and all relevant laws and guidelines and national and international standards.

## Water-related risks and opportunities

Risk/ Opportunity	Description	Potential business and financial impacts
<b>Physical risk</b>	Fluctuations and limited availability in water supply stemming from the country’s water scarcity	Considerable impacts on the business continuity and manufacturing cost of the Textiles and Hand Protection Sector which are water-intensive operations
<b>Precipitation and rainfall</b>	Changes in precipitation patterns and variability in weather patterns which lead to changes in temperature, water stress and coastal erosion	Implications on the yield, quality and quantity of our Plantation Sector products including tea, rubber and other crops. Impacts on the Agriculture Sector can stem from weaker demand due to crop losses
<b>Market</b>	Shifting customer preference to water efficient products and technologies	Increased pressure from customers (particularly in the European region) who demand water targets and disclosure of performance against targets
<b>Reputational risk</b>	Stakeholder perceptions of the Group’s use and discharge of water and negative media coverage	Adverse implications on community relations due to water stress and potential impacts on social license to operate
<b>Resource efficiency</b>	Increased use of water recycling and reduced water usage and wastage	Opportunity to drive increased efficiencies and curtail costs, particularly in Sectors which are water intensive
<b>Products and services</b>	Development of less-water intense products and services and water-climate adaptation	Sectors such as Textiles can drive customer acquisition and access new markets through water-conscious innovations

**WATER WITHDRAWAL TRENDS**

**Target 1: 30% sustainable water sourcing by 2030:**  
**49%**  
Actual

**Target 1: 30% reduction in water intensity:**  
**12%** (Increased)  
Actual

The Group's total water withdrawal increased by 3.3% during the year to reach 7 mn, driven by increased usage in key sectors of plantations, Industry Inputs power and energy and Projects and Engineering. Total intensity also recorded an increase of 12% during the year.

**MATERIALS AND CIRCULARITY**

The Group consumes an extensive variety of materials across its diverse operations and in recent years has sought to embed the principles of circularity across its business through increasing reliance on recycled and renewable materials. This agenda continues to feature prominently in product design/development phase and progress made in this front is summarised below. Other aspects of the Group's material management include minimising chemical usage, use of eco-friendly raw materials and responsible sourcing.

 <p><b>Use of PET bottle recycled yarn by multiple Sectors</b></p> <p>The Textile Sector and Hand Protection Sectors uses recycled PET yarn as an input for its fabric and glove manufacturing respectively</p>	 <p><b>Warna by Mahogany by Textiles Sector</b></p> <p>A pioneering waste to fashion initiative which extracts dye in house using waste material generated by the local furniture industry</p>	 <p><b>Circular product solutions</b></p> <p>Eco-One is an additive which is applied during the manufacturing process to enhance the biodegradation of plastic and polythene products.</p> <p>Carbon nano tube product for the glove industry, uses carbon black recovered from used tires which in turn leads to significant reduction of crude oil consumption.</p>	 <p><b>Use of recycled Aluminium</b></p> <p>The Construction Materials Sector continues to increase the use of recycled aluminium in its production process, thereby reducing the need for virgin aluminium</p> <p><b>56%</b> Use of recycled aluminium</p>	 <p><b>Use of recycled brass</b></p> <p>The Group's Agriculture Sector sources recycled brass to manufacture components for spray machines</p>
--	---	--	--	---

## NATURAL CAPITAL

The Group’s material consumption is set out below:

Sector	Metric	2022/23
Purification	Coconut charcoal (MT)	101,753
	Coconut Shells (MT)	50,468
Hand protection	Latex (MT)	34,458
Plantations	Green Leaf (MT)	47,458
	Packing Material (MT) TTE+KVPL	142
Eco Solutions	Coconut husks (Nos)	2,480,232
	Fibre pith (MT)	21,530
	Yarn (Kg)	6,536
<b>Non-Renewable materials</b>		
Construction materials	Aluminium billets (MT)	3,352
Plantations	Dolomite (MT)	3,863
	Fertilizer (MT)	4,473
Textile	Yarn (recycled)	1,805
	Yarn (non-renewable and other than recycled) (Kg)	10,685
	Dyes and Chemicals (Kg)	11,358

## WASTE

### CONTEXT

Waste including plastics, e-waste and other types of waste pollutes land and waterways and contaminates the air we breathe. The systems and infrastructure in place is not adequate to effectively collect and redistribute the increasing quantum of materials that are consumed by the global population.

### COMMITMENT

#### Material & waste management policy

The Hayleys Group strives to minimise waste generation and seeks to effectively manage the waste generated through sustainable disposable methods

Key types of waste generated by the Group include agricultural waste, industrial waste, glass, polythene, plastic, food waste and paper among others. The Hayleys Lifecode sets out a clear target of achieving zero landfill waste by 2030. All Sectors have stepped up efforts to engage in the segregation and responsible disposal of waste, in compliance with regulatory requirements and industry best practice. The Group’s waste profile is as follows:

### WASTE BY SECTOR

In addition to circular business models described above, the following large-scale waste management efforts are in place across the Group.

**E-WASTE COLLECTION:**

Singer conducts a largescale, island-wide e-waste collection initiative, through which customers are encouraged to return used electronic items. With over 407 collection points around the island Singer directly contributes towards reducing the country’s landfill waste.

- Televisions: 1898**
- Washing machines: 46**
- Refrigerators: 130**
- Others: 25**

**COMMUNITY WASTE MANAGEMENT IN PLANTATIONS:**

In line with the certification standards of the Rainforest Alliance and ISO 14,001: 2015 Environmental Management System, the Sector conducts ongoing awareness building initiatives and training programmes on the responsible disposal of biodegradable and non-biodegradable waste

**WASTE-TO-ENERGY GENERATION:**

Through a patented green charcoaling technology, Recogen, Haycarb generates electricity using waste which is supplied to the national grid.

**800,000 Kwh of electricity generated**

**ACCELERATING BIODEGRADATION OF PLASTICS:**

Hayleys Aventura’s Eco One solution is an organic additive that accelerates biodegradation of plastic and polythene, thereby drastically shortening the timespan such products are retained in landfills from centuries to a few years.

**Rate of degradation increased to 18 months**

**WASTE-TO-VALUE BUSINESS PROPOSITION:**

Haycarb PLC’s business model is built on a waste-to-value proposition which entails converting waste coconut shells to pursued sustainable innovation strategies that provides solutions to purification of air and water and more recently, in storage of renewable energy

**Waste performance indicators**

The Group’s total waste generation for the year increased by 26% to 20,850 reflecting improved waste reporting across the organisation and increased operational activity in selected sectors. Non-hazardous waste accounted for 76% of the Group’s total waste.

We have enhanced our waste reporting this year, with increased disclosure on type of waste, recovery method and disposal method

**Total waste by type and composition**

Hazardous waste	Quantity (MT)	Non-hazardous waste	Quantity (MT)
Sludge	4428	Food	419
Contaminated materials	30	Paper	232
E-waste	52	Cardboard	1183
Fluorescent lights	1	Polythene	493
Chemical waste/oil	86	Mixed waste	7104
Ash	317	Glass	26
Mixed waste	20	Metal	169
Other	111	Garden waste	46
		Biomass waste	379
		Wet garbage	146
		Other	4414

# NATURAL CAPITAL

## WASTE BY DISPOSAL METHOD

## WASTE BY RECOVERY METHOD

## BIODIVERSITY AND ECO-SYSTEMS

The unsustainable use of land and resources has led to significant losses in biodiversity habitats, severely threatening the balance of the ecosystem and emerging as a key environmental risk facing the world today. The operations of several of our sectors are closely linked to the health of the natural ecosystems surrounding our locations of operations. The Plantations Sector’s tea and rubber estates in the hill country and low country wet zones are particularly rich in biodiversity and we are committed to preserving the natural habitats and ecosystems in these areas.

A high-level overview of the progress made Group’s diverse biodiversity and eco system preservation initiatives during the year summarised below:

**244**  
hectares with rich biodiversity

Calsay estate, Nanuoya borders the Conical Hill National Forest, Agrabopaththalawa

Watershed and catchment areas feeding national rivers Nilwala, Gin, Kotmale Oya and Nanu Oya

Great Western, Radella & Holyrood estates are located near Kikiliyamana Natural Forest Reserve

### Project Kirulu

Project Kirulu the Group’s flagship biodiversity program, seeks to leverage the Group’s extensive land bank, cross-sector synergies and insights on ecosystems to preserve Sri Lanka’s rich and vibrant ecosystems. Actioned by Talawakelle Tea Estates, the programme involves the planting of native, endemic trees with the contribution of Group companies.

### Advantis Blue Carbon

The Transportation Sector’s Project Advantis Blue C seeks increase the national blue carbon sinking capacity by supporting the conservation and replenishment of coastal ecosystems. The initiative is focused on accelerating the natural regeneration of mangroves at Anawilundawa. The Project received the UN Decade of Restoration Flagship Award for Sri Lanka by the UNEP and FAO of the United Nations

### Green belt and Wetland Biodiversity Zone at Hayleys Fabrics:

The Group’s Textile Sector has reserved 20 acres and 9 acres of land adjoining the factory as a Green Belt and Wetland Biodiversity Zone respectively. Conducted under the guidance of the Central Environment Authority, the initiative included a biodiversity survey by the Environmental Ministry Secretariat, which identified 146 plant species belonging to 63 families and 149 animal species, including 2 endemic plant species and 18 endemic animal species.

#### BIODIVERSITY PRESERVATION IN OUR PLANTATIONS SECTOR

- **Project REGROW by Horana Plantations** in partnership with WNPS Plant aims to restore a nine-kilometre-long forest corridor along the Maskeliya Oya creating 55 hectares of new forests in the process. In the future, this initiative will, enable species to move among larger forest patches in an uninterrupted manner.
- **Talawakelle Tea Estate PLC's large-scale tree planting initiative** at St Clair Reservoir, aims to plant and establish secondary forests across significant hectarages with native and endemic plants across Talawakelle Tea Estates' plantations.
- Both these projects obtained Ecosystem Restoration Verification from Preferred by Nature for these two projects, the first of its kind in Asia
- KVPL in partnership with IUCN launched the **Surakimu Ganga initiative** which strives for collaboration between the private, sector and international organisations to adopt nature-based solutions for greening the river basin in We Oya catchment area in the Kelani river.

#### WAY FORWARD

- Widen Scope 3 emission reporting across the Group
  - Ongoing transition to renewable energy with several sectors including Transportation & Logistics, Purification and Hand Protection committing to large solar power projects
  - Align with increasingly stringent environmental regulations including the European Union's Deforestation Regulation and the Carbon Border Adjustment Mechanism
- 

# CLIMATE RISK REPORT

## ABOUT THE REPORT

This Report details the Hayleys Group’s overarching climate strategy including the progress we are making towards our sustainability aspirations, approach to climate risk management and our plans to drive decarbonisation across the Group. The Report is aligned to the requirements set out in the IFRS Sustainability Disclosure Standards; with the application of IFRS S2-Climate Related Disclosures in accordance with IFRS S1 and recommendations of the Task Force on Climate-related Financial Disclosures (TCFD). As discussed in further detail on page 13 of this Annual Report, we have applied the transitional relief adopted for first-time reporters and have opted for qualitative disclosures this financial year. While primarily of interest to providers of financial capital, the Report also includes information relevant to other stakeholders. The Report is structured as follows:

## HIGHLIGHTS OF 2023/24

<p><b>Our commitment</b></p>	<p><b>30%</b> reduction in Scope 1 &amp; 2 emissions by 2030</p> <p><b>10%</b> reduction in Scope 3 emissions by 2030</p>	<p><b>90%</b> reliance on sustainable and renewable energy by 2030</p>	<p><b>4</b> Sectors committed to SBTi</p> <p><b>2</b> Sectors obtained verification of SBTi targets</p>
<p><b>Measurement and assurance</b></p>	<p><b>Improvements in GHG reporting</b></p> <ul style="list-style-type: none"> <li><b>Scope 1:</b> Emissions from refrigerants, fire extinguishers and fertilizer usage included</li> <li><b>Scope 3:</b> Inclusion of upstream/downstream transportation, employee commuting and waste disposal</li> </ul>		<p>External assurance on Group-wide GHG reporting in line with ISO 14064:2008 requirements</p>
<p><b>Transforming our operations</b></p>	<p><b>68%</b> reliance on renewable and sustainable energy</p>	<p><b>Rs. 5 bn</b> investments in solar within the Group</p>	<p>reducing in the use of chemical fertilizer</p>
<p><b>Supporting Sri Lanka’s transition to low-carbon</b></p>	<p><b>50MW</b> installed capacity of solar, hydro and wind plants generating</p>		<p><b>200 MW</b> of rooftop solar installations</p>

**Sri Lanka's climate commitments**

**GLOBAL AND LOCAL CLIMATE AMBITION**

In its sixth assessment report, the Intergovernmental Panel on Climate Change (IPCC) reveals that human-induced global warming of 1.10 C has spurred changes to the Earth's climate that are unprecedented in recent human history. The Paris Agreement, signed into effect by 196 countries in 2015 represents the first-of-its kind legally binding international treaty on climate change, with the overarching aim of stemming the increase in global average temperature to below 20 C above pre-industrial levels. Centered on Nationally Determined Contributions (NDC) which represent country-specific commitments to reduce GHG emissions, actioning the Paris Agreement requires economic and social transformation together with significant technological advancements.

As a signatory to the Paris Agreement, Sri Lanka has committed to achieve carbon neutrality by 2050, as set out in its ambitious Carbon Net Zero 2050 Roadmap and Strategic Plan. The Roadmap seeks to drive cross-sectoral as well as national and sub-national level interventions across six selected sectors; Energy, Industry, Transport, Waste Management, Agriculture and Forestry.

The Hayleys Group supports the Paris Agreement and our emission reduction aspirations center on reducing dependence on fossil fuels, increasing reliance on renewable energy and improving our GHG emissions monitoring. Our Scope 3 emissions are considerably larger than our Scope 1 and 2 emissions, given the depth and breadth of our operations. We are cognisant that accurately capturing the entirety of our Scope 3 emissions is extremely challenging at this juncture and we are adopting a phased approach to identify and measure our Scope 3 emissions. We are acutely aware that reducing our Scope 3 emissions will require extensive

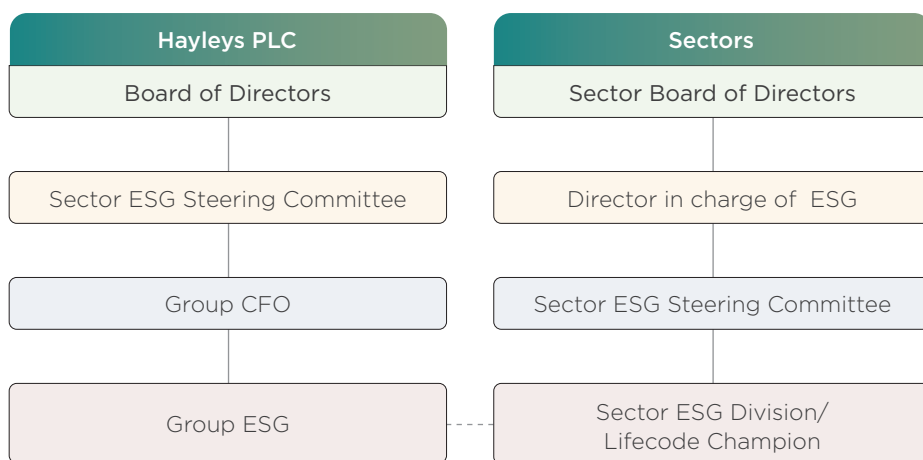

collaboration across our upstream and downstream value chains as well innovation in our product development processes. As our understanding on our Scope 3 emissions increase and we identify opportunities for emission reduction across our value chains, our targets are unlikely to remain static and will evolve as our own maturity in this space grows.

**GOVERNANCE OF CLIMATE-RELATED MATTERS**

The Board provides ultimate oversight on climate-related matters, which is vital in ensuring that the Group achieves its strategic aspirations while creating positive impacts.

**Board and executive oversight of CRROs**

A robust governance structure which includes ESG Steering Committees at both holding company and Sector-level enables climate risk management to be embedded into core strategy and operations. The Group ESG Steering Committee (comprising 3 Executive Directors and 3 members of the Group Management Committee) assists the Board in the discharge of this responsibility through monitoring CRROs, formulating response strategies and assessing progress against the Group's ESG roadmap (including the climate strategy).

# CLIMATE RISK REPORT

## SECTOR-LEVEL GOVERNANCE

Given the diversity of the Group’s sectors, Sector-level ESG Steering Committees were established during the year under review, facilitating more focused and systematic management of industry-specific SRROs and CRROs. Sector-level sustainability-related developments (including SRROs and CRROs) are discussed during quarterly Sector ESG Steering Committee meetings and subsequently tabled during Audit Committee meetings. Sector-level ESG teams/Lifecycle champions work closely with the Group ESG Division ensuring a coordinated approach to oversight, strategy, delivery and reporting of the Group’s ESG aspirations.

### Board’s skills and expertise

When appointing directors, the expertise, skills, industry experience and competencies of each candidate are carefully evaluated to ensure alignment with the Group’s vision, strategic aspirations, risks and opportunities. The Board obtains external professional advice as required to carry out their duties more effectively including guidance on climate and broader sustainability related matters.

### Committee mandates and responsibilities

The mandate of the Group and Sector-level ESG Steering Committees include the following (among others). Provide oversight and monitor the execution of Group and Sector-level CRROs connect to existing business risks. This ensures that material physical and transition risks are an input when formulating and implementing business strategies. The Group’s exposure to climate-related physical and transition risks are listed below.

## Sector-level exposure to physical and transition risks

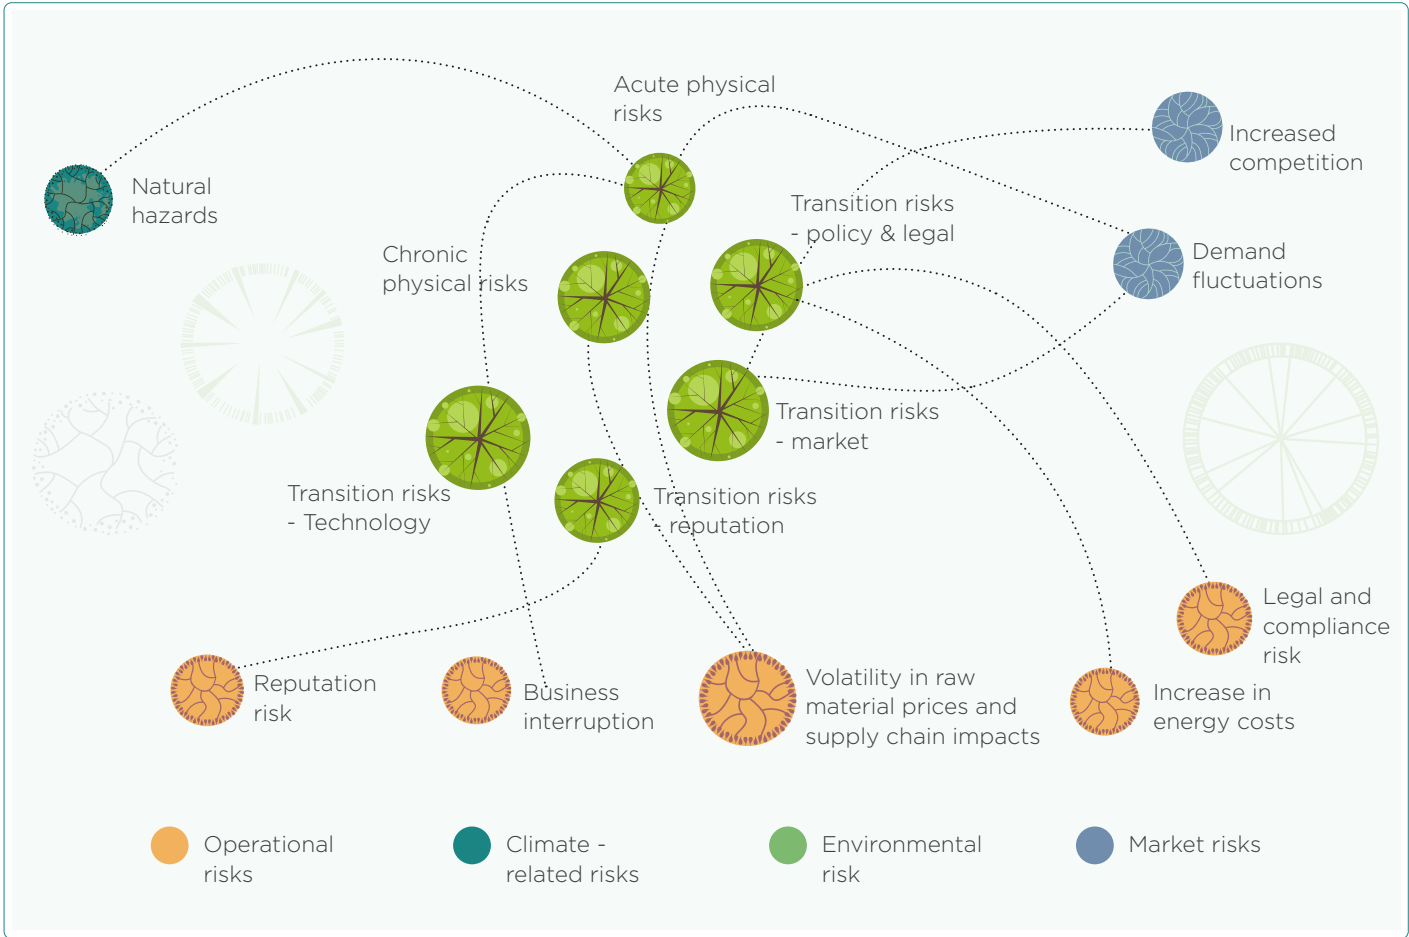

**CLIMATE-RELATED RISKS AND OPPORTUNITIES**

The Group has identified a range of physical and transition risks that could have a significant impact it's financial performance and value creation while informing its strategy. The table below represents a consolidated view of the Hayleys Group; further details on Sector-level risk exposures can be found in the respective Annual Reports. Given the current limitations in resources and capabilities across the Group, we have opted to discuss qualitative financial effects this year and will look to evolve our processes to determining quantitative effects over the next financial years.

**LINK TO OTHER BUSINESS RISKS**

The Group's business risk profile for 2023/24 is explained in detail in the Risks and Opportunities chapter of this Report on page 104. The following infographic demonstrates the link between these strategic, operational and other risks and the climate-related risks identified above. The size of the circle represents the magnitude of the risk.

## CLIMATE RISK REPORT

Identified risks	Description	Time horizon	Vulnerable sectors	Current and
				Business model and value chain
<b>ACUTE PHYSICAL RISKS</b>				
<b>Extreme weather events</b>	Increased frequency and severity of extreme weather events such as floods, droughts and heat waves	Short and medium term	Plantations Agriculture Transportation & Logistics Hand Protection Purification	<ul style="list-style-type: none"> <li>• Direct implications on the quality, yield and quantities of agricultural crops produced and cultivated extent</li> <li>• Implications on cost, quality and security of agricultural input materials</li> <li>• Disruptions to internal operations, supply chains and distribution</li> <li>• Damages to physical assets and infrastructure</li> </ul>
<b>CHRONIC PHYSICAL RISKS</b>				
<b>Rising mean temperatures</b>	Consistent increases in mean temperatures resulting in a higher number of extreme heat days	Medium and long term	Plantations Agriculture Hand Protection Projects & Engineering	<ul style="list-style-type: none"> <li>• Implications on the quality, yield and quantities of selected agricultural crop including tea and rubber and vegetables</li> <li>• Adverse implications on productivity of labour force</li> <li>• Escalation in cooling load requirements</li> <li>• Reduced efficiency of installed energy systems</li> </ul>
<b>Rainfall and precipitation patterns</b>	Fluctuations in precipitation and rainfall patterns	Short, medium and long-term	Plantations Agriculture Hand Protection Industry Inputs, Power & Energy	<ul style="list-style-type: none"> <li>• Implications on the quality, yield and quantities of agricultural crop produced by the Group</li> <li>• Adverse impacts on the continuity of supply, quality and pricing of agricultural inputs</li> <li>• Implications on biomass harvesting, one of the Group's main energy sources</li> <li>• Damage to physical assets from extreme rainfall</li> </ul>
<b>Physical water availability</b>	Fluctuations and limited availability in water supply stemming from the country's water scarcity	Short, medium and long-term	Plantations Agriculture Hand Protection Purification Eco Solutions	<ul style="list-style-type: none"> <li>• Operational disruptions for water-intensive sectors</li> <li>• Implications on the quality, quantity and yields of agricultural produce</li> <li>• Implications on employee productivity and well-being</li> <li>• Disruptions to supply chains</li> </ul>
<b>CLIMATE RELATED TRANSITION RISKS</b>				
<b>Policy and legal</b>	Policy actions that constrain actions contributing to climate change and promote climate adaptation	Medium to long-term	Textiles Hand Protection Plantations Transportation & Logistics Agriculture	<ul style="list-style-type: none"> <li>• Increasing stringency of packaging, carbon, waste and supply chain related compliance standards and regulations, particularly from the European region necessitates investments in reformulating processes, driving product innovation and commitment to reducing emissions</li> </ul>

anticipated impacts	Management response	
	Financial implications	Strategy and decision-making
<ul style="list-style-type: none"> <li>Revenue: Impacted by fluctuations in crop pricing and quantities</li> <li>Operating costs: Cost stemming from operational disruptions, broad-basing supplier base and increased insurance costs</li> <li>Capital expenditure: Repairs to potential infrastructure damage and investments in climate adaptation and mitigation</li> </ul>	<ul style="list-style-type: none"> <li>Crop diversification</li> <li>Climate-smart agriculture solutions</li> <li>Strategic development programmes across supply chains</li> <li>Strengthening insurance arrangements</li> </ul>	<ul style="list-style-type: none"> <li>Financial</li> <li>S&amp;R</li> <li>Manufactured</li> </ul>
<ul style="list-style-type: none"> <li>Revenue: Impacted by fluctuations in the price and quantity of agricultural produce</li> <li>Operating costs: Cost stemming from increased energy consumption for cooling and impacts of reduced labour productivity</li> <li>Capital expenditure: Investments in cooling technology</li> </ul>	<ul style="list-style-type: none"> <li>Crop diversification</li> <li>Geographical diversification of operations and supply chains</li> <li>Explore opportunities in climate resistant crop varieties</li> <li>Energy-efficient cooling technology</li> </ul>	<ul style="list-style-type: none"> <li>Financial</li> <li>Intellectual</li> <li>Human</li> <li>Manufactured</li> </ul>
<ul style="list-style-type: none"> <li>Revenue: Implications stemming from fluctuations in the price and quantity of agricultural produce and changes in demand conditions</li> <li>Operating costs: Expenses associated with repairing damaged infrastructure, increased insurance premiums</li> </ul>	<ul style="list-style-type: none"> <li>Geographical diversification of operations</li> <li>Explore use of climate-resistant crop and seed varieties</li> <li>Broad-basing and geographically diversifying supplier base</li> <li></li> </ul>	<ul style="list-style-type: none"> <li>Financial</li> <li>Intellectual</li> <li>Social &amp; Relationship</li> </ul>
<ul style="list-style-type: none"> <li>Revenue: Adverse impacts stemming from potential reductions in agricultural production quantities</li> <li>Operating costs: Increased costs of procuring alternative water supplies</li> <li>Capital expenditure: Investments rainwater harvesting and effluent treatment plants</li> </ul>	<ul style="list-style-type: none"> <li>Rainwater harvesting and increased re-use of water</li> <li>Water efficiency drives to increase optimisation of water resources</li> <li>Nurturing a culture of water consciousness</li> </ul>	<ul style="list-style-type: none"> <li>Financial</li> <li>Intellectual</li> <li>Social &amp; Relationship</li> </ul>
<ul style="list-style-type: none"> <li>Revenue: Non-compliance with emerging requirements can limit access to selected markets, thereby impacting revenue</li> <li>Operating costs: Increased costs of compliance, carbon taxation, upskilling human capital</li> <li>Capital expenditure: Investments in transitioning to renewable energy sources and modifying manufacturing infrastructure</li> </ul>	<ul style="list-style-type: none"> <li>Strategic emphasis on pursuing renewable energy sources</li> <li>Ongoing monitoring of emerging regulations and formulation of action plans to ensure compliance</li> <li></li> </ul>	<ul style="list-style-type: none"> <li>Financial</li> <li>Human</li> <li>Intellectual</li> </ul>

## CLIMATE RISK REPORT

Identified risks	Description	Time horizon	Vulnerable sectors	Current and
				Business model and value chain
<b>Market</b>	Shifts in supply and demand conditions with climate considerations featuring prominently in decision-making	Short, medium and long-term	Textiles Hand Protection Plantations Purification	<ul style="list-style-type: none"> <li>Increasing eco-consciousness of consumers (particularly Gen Z) and demand for sustainable products</li> <li>Repurposing existing technology and reformulating products to drive sustainable innovation</li> </ul>
<b>Reputational</b>	Risk stemming from changing customer/community perceptions of an organisation's transition to a low-carbon economy	Medium and long-term	Textiles Plantations Leisure Hand Protection	<ul style="list-style-type: none"> <li>Strengthen ESG governance mechanisms to ensure that potential ESG risks are identified and managed appropriately</li> <li>Propagate sustainable practices along supply chains to broaden impact</li> </ul>
<b>Technology</b>	Deployment of technologies supporting the transition to a low-carbon economy	Medium and long-term	Consumer & Retail Purification Transportation & Logistics	<ul style="list-style-type: none"> <li>Reducing dependence on fossil fuels across all operations through transitioning to renewable energy</li> <li>Adoption of technology to optimise resource consumption and reduce wastage</li> </ul>
<b>OPPORTUNITIES</b>				
<b>New products and services</b>	Developing green products and innovations that support the transition to a low carbon economy	Short, medium and long-term	Textiles Hand Protection Construction Materials Projects & Engineering Consumer & Retail Industry Inputs, Power & Energy	<ul style="list-style-type: none"> <li>Product, process and packaging innovations targeted towards reducing lifecycle environmental impacts of products</li> <li>Potential to attract new customers and enter new markets through sustainable and low carbon product solutions</li> </ul>
<b>Energy transition</b>	Transitioning to low emission energy alternatives such as solar, wind, hydro and biofuels	Short, medium and long-term	All Sectors	<ul style="list-style-type: none"> <li>Adoption of low-emission energy alternatives aligned with Sri Lanka Net Zero Roadmap for 2030</li> <li></li> </ul>
<b>Resource optimisation</b>	Opportunities in reducing operating costs through increasing efficiency in production and distribution processes	Short and medium-term	All Sectors	<ul style="list-style-type: none"> <li>Efficiency improvements in energy consumption, materials, water and waste management</li> </ul>

anticipated impacts	Management response	
Financial implications	Strategy and decision-making	Resource allocation
<ul style="list-style-type: none"> <li>Revenue: Opportunity to access new markets with sustainable propositions</li> <li>Operating costs: Increased cost of impact measurement and reporting, upskilling employees</li> <li>Capital expenditure: Increased investments in R&amp;D</li> </ul>	<ul style="list-style-type: none"> <li>Commitment to emission reductions across all Sectors through formal ESG roadmaps</li> <li>Focus on embedding concepts of circularity into all operations and processes</li> </ul>	Financial Intellectual Human
<ul style="list-style-type: none"> <li>Revenue: Potential loss of revenue stemming from loss of customers due to reputational risks</li> <li>Operating costs: Costs of compliance, reputational risk management and brand building</li> </ul>	<ul style="list-style-type: none"> <li>Establish formal grievance mechanisms to proactively identify emerging reputational risks</li> <li>Ongoing compliance to an array of international and local ESG related certifications</li> </ul>	Financial Social & Relationships Human
<ul style="list-style-type: none"> <li>Operating costs: Costs of alternative energy sources and costs associated with discontinuing/displacing conventional technology</li> <li>Capital expenditure: Investments in new green technology</li> </ul>	<ul style="list-style-type: none"> <li>Adoption of energy efficient process improvements</li> <li>Deploying technology to measure and monitor environmental performance</li> <li>Strategic emphasis on shifting sustainable and renewable energy sources</li> </ul>	Financial Manufactured
<ul style="list-style-type: none"> <li>Revenue: Potential for revenue growth through new customer and market access and sharpening competitive edge as a sustainable manufacturer</li> <li>Operating costs: Costs associated with compliance and obtaining new product certifications</li> <li>Capital expenditure: Investments in R&amp;D and process innovations</li> </ul>	<ul style="list-style-type: none"> <li>Pursue opportunities in low-carbon, circular product solutions and sustainable packaging</li> <li>Lifecycle assessments to across product categories to identify avenues to reduce product-level emissions</li> </ul>	Financial Manufactured Intellectual Human
<ul style="list-style-type: none"> <li>Revenue: Growth in solar installation solutions and energy storage</li> <li>Operating costs: Over the long-term the shift to renewable/sustainable energy can reduce costs</li> <li>Capital expenditure: Investments in new physical assets and infrastructure</li> </ul>	<ul style="list-style-type: none"> <li>Ongoing investments in renewable energy solutions</li> </ul>	Financial Intellectual
<ul style="list-style-type: none"> <li>Operating costs: Direct cost savings</li> <li>Capital expenditure: Investments in energy efficient technology, circular solutions, water usage and treatment solutions</li> </ul>	<ul style="list-style-type: none"> <li>Resource optimisation targets across all sectors in line with the Group's ESG Roadmap</li> </ul>	Financial Manufactured Intellectual

# CLIMATE RISK REPORT

## OUR CLIMATE STRATEGY

The Group's climate strategy is designed to mitigate its key physical and transition risks and support climate resilience while fulfilling the environmental aspirations set out in the Hayleys Lifecode. Sector-level initiatives are broadly aligned to the Group climate strategy, thereby facilitating greater impact and a consistent approach across the Group. We intend to review the policy at least every two years to ensure relevance to emerging regulations, evolving customer requirements and shifting risk landscapes. The Group's climate strategy is articulated around the following four levers:

Key actions and achievements in each of these areas is summarised below:

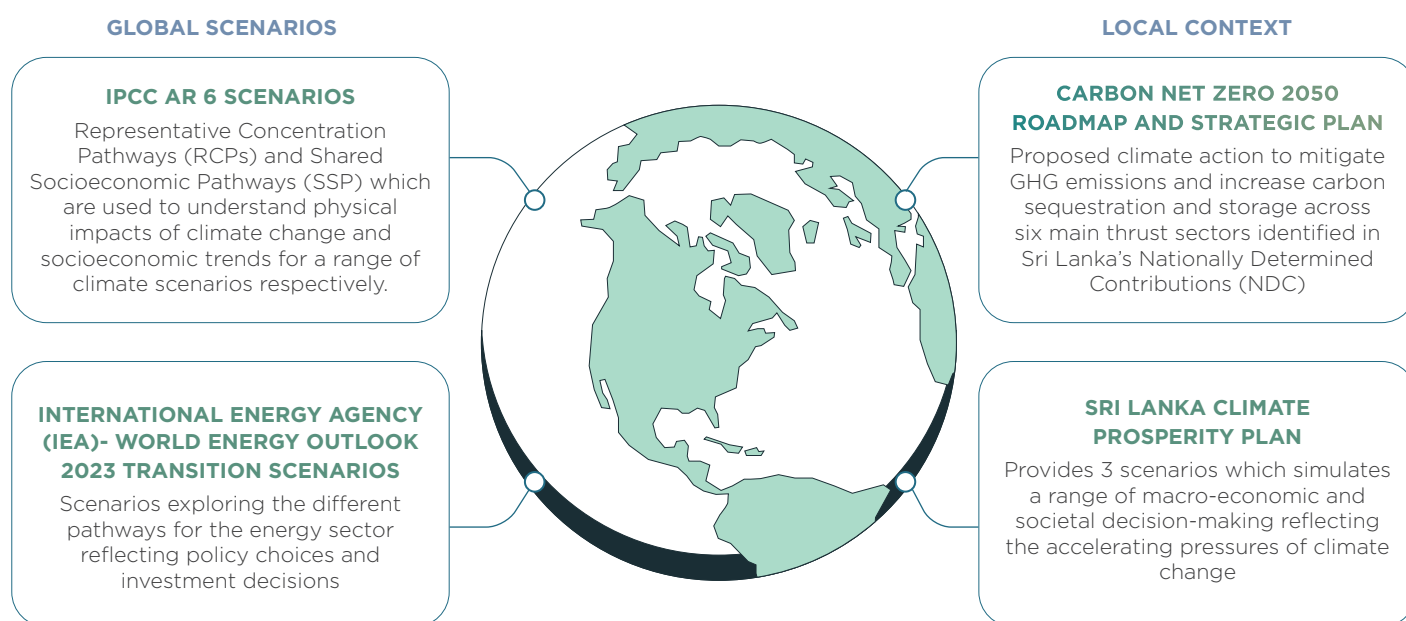

Climate strategy	Progress made in 2023/24
<b>Operational interventions</b>	<ul style="list-style-type: none"> <li>Increasing reliance on renewable and sustainable energy sources, which accounted for 68% of the Group's total energy consumption</li> <li>Energy efficiency drives across the Group, particularly in the hand protection, purification sectors</li> <li>Waste to value initiatives driving circularity across operations which reduce the Group's landfill waste</li> </ul>
<b>Value chain interventions</b>	<ul style="list-style-type: none"> <li>Supporting Sri Lanka's transition to a low-carbon economy through the Group's Projects and Engineering Sector- Hayleys Fentons, which accounts for approximately 30% of Sri Lanka's domestic solar installed capacity</li> <li>Introducing energy efficient solutions for industries through Hayleys Aventura</li> <li>Driving emission reductions across supply chains through initiatives such as,                             <ul style="list-style-type: none"> <li>Haritha Angara in the Purification Sector</li> </ul> </li> </ul>
<b>Integrating climate considerations</b>	<ul style="list-style-type: none"> <li>Establishment of ESG Steering Committees at Sector level with oversight responsibility on driving Sector-level ESG roadmaps</li> <li>Integration of ESG risk assessments with existing risk management processes</li> <li>Integration of ESG considerations during the Group's budgeting and financial planning processes</li> <li>Developing the Group's climate action skills through ongoing training and development programmes</li> </ul>
<b>Leveraging opportunities</b>	<ul style="list-style-type: none"> <li>Pursuing access to new markets through low-carbon product solutions (i.e Hand Protection Sector and Construction Materials Sector)</li> <li>Driving long-term cost reductions through increased investments in solar</li> </ul>

## SCENARIO AND STRESS TESTING

The Group commenced climate-related scenario analysis during the year under review, in line with the requirements of the IFRS S2 – Climate-related disclosures and the guidelines of TCFD. Conducted as a qualitative exercise in the first year of application, scenario analysis is used to assess the potential business implications +of climate change on the Group’s portfolio and assess the range of potential adaptation and transition actions that may be needed to ensure business resilience.

### Methodology

The Group’s scenarios were developed in line with the principles outlined in the TCFD Framework. The selected scenarios are based on international physical and transition climate scenarios and sensitised to reflect the local context based on the country’s climate risk profile and national climate action agenda as listed below. This approach facilitated alignment with international scenarios, ensuring that the global context was considered. A cross-sector scenario team was also established with the aim of fostering knowledge sharing and industry-specific insights. Details on scenario inputs are listed below:

## GLOBAL SCENARIOS

The following global physical and transition climate scenarios were considered when developing the Group’s climate scenarios.

Source	Scenario	Key assumptions
IPCC AR 6	C3/SSP 1-2.6	Low emission scenario with the increase in global warming limited to 20 C by 2100 and net zero status achieved between 2055 and 2060 supported by a near 65% reduction in GHG emissions by 2050
	C6/SSP 2-4.5	Intermediate emission scenario with global temperature projected to increase by 30C in 2100 compared to pre-industrial levels
	C7/SSP 3-7.0	High emission scenario with global temperatures projected to increase by 40C in 2100 compared to pre-industrial levels
IEA 2023	Net Zero Emission (NZE) Scenario	Demonstrates the pathways for the energy sector to help limit the global temperature rise to 1.5 °C through universal access to reliable modern energy services and successful achievement of key energy-related SDGs
	Announced Pledges Scenario (APS)	Assumes that governments will meet, in full and on time, all announced climate related commitments including longer term net zero targets and pledges in Nationally Determined Contributions (NDCs)
	Stated Policies Scenario (STEPS)	Reflect the policies and measures that are actually in place and what governments are doing to meet their targets. The STEPS are associated with a temperature rise of 2.4 °C in 2100 (with a 50% probability).

## CLIMATE RISK REPORT

### LOCAL SCENARIOS

The Sri Lanka Climate Prosperity Plan simulates three scenarios, taking into consideration official climate commitments, adaptation measures and transition pressures.

Local scenario	Key assumptions
<b>Business as usual (BAU)</b>	Continuation of the current development trajectory of the country with limited climate-related interventions
<b>Nationally Determined Contributions (NDC) scenario</b>	Represents core commitments presented in the country's NDC and shows the development pathway if the Paris Agreement NDC targets are met
<b>Climate Prosperity Plan (CPP)</b>	Pathway in which the country achieves maximum utilisation of its domestic renewable energy resources and fully climate-proofs the economy

### GROUP SCENARIOS

The three scenarios developed by the Group for qualitative assessment are summarised in the table below, together with referenceable global and national level scenarios. Given limitations in resources and availability of quantitative models and the complexity of the Group, Hayleys has opted for qualitative scenario analysis this year, as permitted in the transitional relief allowed for the implementation of IFRS- S2. The Group will explore the possibility of implementing quantitative scenario analysis and stress testing over the next few years.

Our scenario	Description and assumptions	Reference global scenarios	Local context
<b>Scenario A- Net Zero</b>	<ul style="list-style-type: none"> <li>Sri Lanka meets its conditional and unconditional NDC commitments achieving rapid decarbonisation of energy systems and technically, socially and financially feasible transition plans.</li> <li>Significant reduction in the demand for fossil fuels and pricing strategies for fuel which in turn leads to steep declines in emissions</li> <li>The increase in global temperature is limited to 20 while Sri Lanka's temperature rise will be lower than the global average, estimated around 1.20</li> <li>Forest cover rebounds beyond the NDC target</li> <li>Sri Lanka will see 70% of its energy requirement fulfilled by renewable sources by 2030, while electricity will be fully generated by low carbon resources</li> <li>Extensive investments in mitigation efforts</li> </ul>	C3/SSP 1-2.6    NZE	CPP
<b>Scenario B-Current pathway</b>	<ul style="list-style-type: none"> <li>The country meets its unconditional NDC commitments, meeting its adaptation ambitions and sectoral reduction targets</li> <li>Limited external investments in technology and funding to drive the transition to low carbon</li> <li>Average temperatures expected to increase by approximately 2.50</li> </ul>	C6/SSP 2-4.5    APS	NDC
<b>Scenario C-Divergence</b>	<ul style="list-style-type: none"> <li>Global and local implementation gap to achieve decarbonisation goals with significant weather-related impacts on businesses and communities</li> <li>No specific climate related interventions and represents a continuation of the current trajectory</li> </ul>	C7/SSP 3-7.0    STEPS	BAU

## RISK FACTORS

The Group's climate scenario analysis identified and prioritised five material risks based on the relative exposure of our Sectors to selected risks. Given that the Group is still at an early stage of evolution in its scenario analysis journey, only these five prioritised risk factors will be considered in its qualitative analysis this year. As the Group further progresses in its scenario analysis journey, a wider pool of risks will be considered. Risks considered this year include,

-  Precipitation and rainfall
-  Temperature
-  Physical water availability
-  Policy and legal developments
-  Market risks

## OUTPUTS

The results presented below represent the Group's qualitative results in climate-related scenario analysis. The table summarises the outcomes of our climate scenario analysis across the selected 3 physical risks and 2 transition risks. We will continue to grow our capacity in this area to identify and assess the possible climate-related outcomes on our business which in turn will support potential management actions and strategic interventions.

Scenarios in which risk is most material			Precipitation and rainfall 			
A	B	C	Summary of qualitative assessment	Response and resilience of our strategy		
	✓	✓	Under scenarios associated with a higher increase in global temperature, more frequent droughts are expected in Sri Lanka's dry and intermediate zones. Climate predictions also project increased variability of rainfall, with the intensity of sub-daily extreme rainfall events escalating and volume of water deposited during future 5-day heavy rainfalls also rising. For the Group as illustrated below, significant implications could be expected across several sectors relying on agricultural raw materials, sectors engaging in plantations and those catering to the agriculture sector through input materials, equipment.	The Plantation Sector is pursuing increased diversification of its crops, given the high sensitivity of tea to weather conditions. Data-driven monitoring of precipitation and rainfall patterns will assist in identifying correlations between these variables and crop quality, yield and quantity. Further investments may be required over the medium-to-long in suitably leveraging technology for precision agriculture techniques and minimising the impact of weather variability.

# CLIMATE RISK REPORT

Scenarios in which risk is most material			Temperature 			
A	B	C	Summary of qualitative assessment		Response and resilience of our strategy	
	✓	✓	<p>The average temperature rise in Sri Lanka is expected to be lower than the rise in global temperatures across all emission pathways . The projected rises are expected push ambient temperatures above 30°C on a much more regular basis, and considerably increase the frequency of temperatures over 35°C. Temperature increases have a direct impact on quality, yield and quantity of agricultural products. In addition, elevated temperatures will impact labour force productivity, escalation in cooling load requirements as well as implications on human health and morbidity.</p>		<p>In Plantations and Agriculture. The Group is pursuing climate-smart agriculture techniques including climate resistant seed varieties and regenerative practices. Crop diversification is also being explored, with the aim of increasing contribution from climate-resistant crops. The Group is also building resilient agriculture based supply chains through capacity building across smallholder networks. In addition, major sectors are also pursuing diversification of supply chains in minimising the rise against climate change.</p>

Scenarios in which risk is most material			Market risks 			
A	B	C	Summary of qualitative assessment		Response and resilience of our strategy	
✓	✓		<p>As a Group with significant interests in global markets, several of our sectors are increasingly seeing escalating customer requirements on environmental and social sustainability and responsible business. These dynamics will necessitate a rewiring of our businesses and reshape business models, presenting both risks and opportunities across our Sectors. Key implications stem from customers' emission reduction journeys (which in turn have an impact on fuel consumption, product usage emissions and end of life emissions), responsible packaging, requirements for reducing waste and driving circularity among others. While in the short to medium term, these may require financial outlays, over the long-term these dynamics could present opportunities to access new markets and sharpen competitive advantage.</p>		<p>Key sectors such as Textiles and Hand Protection are already seeing the implications of evolving customer dynamics and are transforming their business lines accordingly. Ongoing engagement with customers and our global networks have enabled the Group to proactively identify emerging customer requirements on sustainability and cater to them through interventions across operations and supply chains. Over the medium-to-long term, further investments will have to be made in embedding these practices across our operations and value chains</p>

Scenarios in which risk is most material			Policy and legal developments 			
A	B	C	Summary of qualitative assessment	Response and resilience of our strategy		
✓	✓		<p>The Net Zero scenario (A) is aligned with Sri Lanka's climate ambitions as articulated in the Climate Prosperity Plan 2022 and includes policy developments which aims to transition domestic energy supply through renewables, modernisation and sustainable transport, drive climate secure transformations, climate protection against key risks, and technology partnerships among others. Key implications on the Group stem from potential regulations set out in the CPP which could require investments associated with the shift to renewable energy as well as upgrades to existing manufacturing infrastructure and higher costs of fossil fuels. The global regulatory landscape has a direct impact on export-oriented sectors through mechanisms such as the Carbon Border Adjustment Tax (CBA) and packaging regulations under the European Green Deal among others.</p>	<p>As an export-oriented business, Sectors in partnership with the Group ESG Division is proactively monitoring regulatory developments, particularly from the EU. Sectors will require increased investments in product development, packaging innovation, emission reductions along the value chain and supply chain interventions to ensure compliance to the relevant regulatory frameworks. While over the short-term the Groups is prepared to comply with major regulations, investments in processes, resources, technology and capabilities will be required in the medium-to-long term to comply with emerging developments.</p>

Scenarios in which risk is most material			Physical water availability 			
A	B	C	Summary of qualitative assessment	Response and resilience of our strategy		
		✓	<p>Despite favourable geographical positioning, Sri Lanka has in recent years experienced areas of water scarcity with more frequent intermittent droughts, sometimes extending over several months. Globally, these impacts are also expected to damage key staple crop yields, even on lower pathways. In addition to adverse effects for agricultural water supply (which in turn have an impact on crop production and Sectors relying on agricultural input materials) energy generation and human health, water scarcity has a direct impact on the Group's water-intensive manufacturing sectors including Textiles and Hand Protection.</p>	<p>The Group's target is to fulfill 50% of its water requirements through rainwater and treated used water by 2030. However, given increased variability in rainfall and water availability as well as current reuse levels, the Group may require increased investments to achieve this target. Meanwhile, key manufacturing sectors within the Group are also pursuing process changes which limit water usage, thereby increasing the efficiency of water consumption.</p>

# CLIMATE RISK REPORT

## CAPITAL DEPLOYMENT

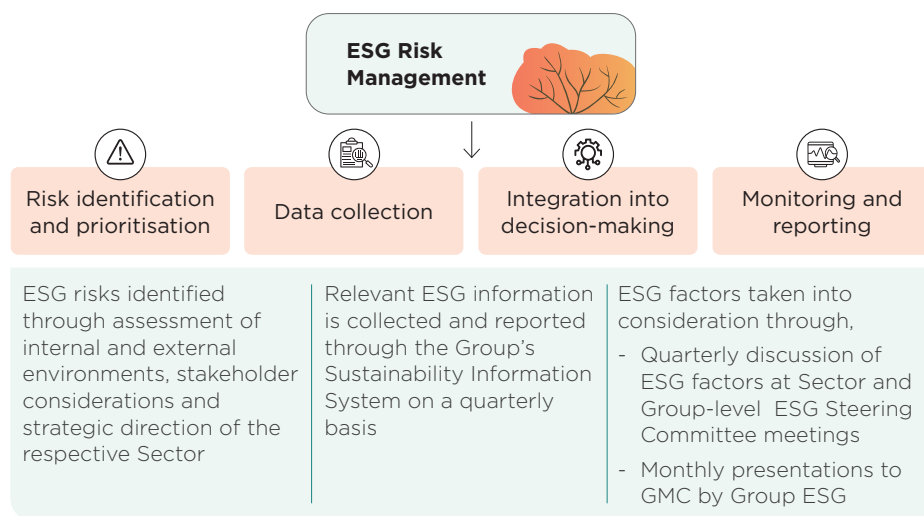

Resources required to drive the Group’s climate agenda, through both mitigation and adaptation are illustrated below:

## RISK MANAGEMENT

Effective management of the Group’s climate risks requires close collaboration between business Sectors and Group risk and ESG functions. Risk identification and management applies to all sectors, geographies and operating locations across the Group as well as the Group’s supply chains and customers. The Group is also currently in the process of integrating mechanisms into its overall enterprise- risk management framework, thereby enabling integration of climate considerations into strategic decision-making. The governance mechanism in place for managing CRROs is given below.

- Horana Plantations PLC
- Transportation and Logistics Sector
- Martin Bauer Global Beverages

Entities excluded in this year's computation are,

- Kenyan operation of Mabroc

#### **Maturity of our Scope 3 emission accounting**

We have gradually improved the coverage of our Scope 3 accounting in line with the recommendations of the GHG Protocol. Given the size, diversity and complexity of the Group, we have focused on 5 categories of Scope 3 emissions for the year, with the intention of further expanding our coverage in the next financial year. Meanwhile, several sectors (particularly Sectors which have committed to SBTi) report all categories.

Sector	Scope 1	Scope 2	Categories captured under Scope 3
Eco Solutions	✓	✓	
Hand Protection	✓	✓	
Purification	✓	✓	
Textiles	✓	✓	All 15 categories covered
Construction Materials	✓	✓	
Plantations	✓	✓	
- Talawakelle Tea Estates

- Horana Plantations			
Consumer & Retail	✓	✓	
Leisure	✓	✓	
Industry Inputs, Power & Energy	✓	✓	
Transportation and Logistics	✓	✓	
Others	✓	✓	

## **METRICS AND TARGETS**

### **Carbon footprint computation methodology**

The Group computes its carbon footprint based on the GHG Protocol-Corporate Accounting and Reporting Standard (revised edition). Hayleys also conducted a Group-wide verification of its carbon footprint in accordance with ISO 14064-1(2018)- Greenhouse Gas (GHG) through engaging Sri Lanka Climate Fund.

### **Scope and boundary**

The Group's carbon footprint computation includes all 14 Sectors and over 180 companies which includes both the Group's local and overseas operations. In accordance with the Group's ESG Roadmap, new acquisitions and operating locations are given a grace period of 1 year to report its emissions. New entities added to the Group's GHG computation during the year are,

## CLIMATE RISK REPORT

### Performance against targets

At a Group level, Hayleys has committed to a 30% reduction in its Scope 1 and 2 emissions and a 10% reduction in its Scope 3 emissions by 2030. Aligned to this target, Sector-level targets have also been established through Sector-level ESG Roadmaps. In addition 2 entities have obtained verification of emission targets by the Science-Based-Targets-Initiative (“SBTI”) while 2 others have committed to the same.

### SBTI TARGETS VERIFIED

Talawakelle Tea Estates PLC  
Hayleys Fabric PLC

### COMMITTED TO SBTI

Kelani Valley Plantations PLC  
Horana Plantations PLC

Sector	Scope 1	Scope 2	Scope 3	Sector Total 2024	% Share by sector (2024)	Sector Total 2023

Others	102	289	200	592	-	1,479
<b>Total by Scope</b>	<b>106,525</b>	<b>71,150</b>	<b>35,403</b>	<b>213,078</b>	<b>100</b>	<b>209564</b>

During the year, the Group's total emissions increased by 2% y-o-y; however, when excluding the new acquisitions during the year (particularly Horana Plantations PLC) the Group's total emissions recorded a 2% decline y-o-y, reflecting the ongoing focus on shifting to renewable energy sources.

# WAY FORWARD

As an election year, we are cognisant of the economic challenges that could arise in the short-term. Despite these risks, we remain cautiously optimistic that the economy will gain momentum over the medium term, supported by continued commitment to the structural reforms, contributions from remittances and the tourism sector and conducive fiscal and monetary policy which will ensure that inflation and exchange rates remain well within budget. Coordinated policy interventions to restore macro-economic stability. The Central Bank expects the economy to grow by 3% in 2024 reaping the benefits of the relatively eased monetary conditions and low inflation environment. Against this backdrop, the Group's key priorities for the 2024/25 financial year is given

Actions and deliverables	
 <p><b>IMMEDIATE TERM</b></p>	<ul style="list-style-type: none"> <li>• With the exchange rate likely to remain at the present levels in the short-term, export oriented businesses will seek to drive increased contributions from value-added products, enhance efficiencies and drive continued cost reductions in order to remain competitive.</li> <li>• Focus will be placed on optimising working capital in these sectors, with the aim of reducing inventory build-up and strengthening liquidity positions.</li> <li>• Product strategies across key verticals will center on premium, value-added offerings which can strengthen the resilience of the operating model in the long-term</li> <li>• Talent retention remains a critical challenge in the current context and we will relentlessly pursue productivity improvements, effective use of underutilised assets as well as skill building and capacity improvements.</li> <li>• As interest rates trend downwards, the Group will continue to leverage its excellent relationships with banks in negotiating favourable terms.</li> </ul>
 <p><b>MEDIUM TERM</b></p>	<ul style="list-style-type: none"> <li>• In the medium term, the Group will continue to direct investments towards strengthening its foreign currency generating capabilities through enhancing export-oriented sectors.</li> <li>• Organic and inorganic growth will be pursued in complementary sectors and businesses, enabling Hayleys to sharpen its competitive edge in selected verticals</li> <li>• Digitalisation remains a key priority over the short-to-medium term as the Group seeks to drive efficiencies, obtain richer data insights and enhance productivity through investments in digital transformation.</li> <li>• As the country's tourism sector posts gradual recovery, we will seek to refine our product and service offering, building a healthy mix between domestic and international travellers</li> </ul>
 <p><b>LONG-TERM</b></p>	<p>As the Group's mature businesses continue to grow, albeit at a relatively slower pace, we will also seek to drive more accelerated growth in new industry sectors such as consumer durables, climate-smart agriculture and leisure which present significant upside potential.</p>

# ANNUAL REPORT OF THE BOARD OF DIRECTORS

## 1. GENERAL

The Board of Directors of Hayleys PLC has pleasure in presenting their Report on the affairs of the Company together with the Audited Consolidated Financial Statements for the year ended 31st March 2024. The details set out herein provide the pertinent information required under Section 168 of the Companies Act No. 07 of 2007, the Colombo Stock Exchange Listing Rules, Code of Best Practice on Corporate Governance 2023 issued by the Institute of Chartered Accountants of Sri Lanka and Finance Companies Corporate Governance Direction No 05 of 2021 issued by the Monetary Board of the Central Bank of Sri Lanka under the Finance Business Act No 42 of 2011.

## 2. REVIEW OF THE BUSINESS

### 2.1 Principal Business activities of the Company and the Group

Hayleys PLC is a holding Company that owns, directly or indirectly, investments in the numerous Companies constituting the Hayleys Group and provides services to its Group Companies. The Group consists of a portfolio of diverse business operations. The main subsidiaries and equity accounted investees of Hayleys PLC are listed on pages 466 to 470.

The Principal activities of the Group are categorised into different business sectors. i.e. Eco Solutions, Hand Protection, Purification Products, Textiles, Construction Materials, Plantations, Agriculture, Transportation & Logistics, Consumer & Retail, Power & Energy, Leisure, Projects & Engineering, Tea Exports and Others. The main activities of the sectors are described in the Portfolio Review pages on 113 to 245 of this Report.

There were no material changes in the nature of the business of the Company and the Group during the financial year. The Directors to the best of their knowledge and belief, confirm that the Company and the Group has not engaged in any activity that contravene laws and regulations.

### 2.2 Review of operations of the and the Group

The Group's businesses and their performance during the year, with comments on financial results, as well as future business developments are appraised in the Reflection from the Chairman (pages 32 to 41) and portfolio review (pages 113 to 245) of this Report. Those also provide an overall assessment of the state of affairs of the Group and the Company with details of important events that took place during the period.

#### Amalgamation of Companies

- During the year under review, Regnis (Lanka) PLC and Singer Industries (Ceylon) PLC amalgamated with their parent company Singer (Sri Lanka) PLC. Minority shareholders of the two amalgamating companies were issued a total of 40,731,422 ordinary shares in Singer (Sri Lanka) PLC. Singer Business School (Private) Limited and Domus Lanka (Private) Limited, two other subsidiaries of Singer (Sri Lanka) PLC also amalgamated with their parent company.

#### Delisting of Shares

- At the EGM held in February 2024, the shareholders of Unisyst Engineering PLC approved to delist the shares of the Company from the Official List of the CSE and accepted the exit offer given by Advantis Projects & Engineering (Private) Limited. The approval of the Securities and Exchange Commission was also received and as at the date of this Report, the process of buying the ordinary shares of the minority shareholders of Unisyst Engineering PLC who wish to sell their shares had commenced.

#### The investment/disposal activities during the year

- Mabroc Teas (Private) Limited ('Mabroc'), a fully owned subsidiary of Kelani Valley Plantations PLC, incorporated Mabroc East Africa Limited in Kenya and invested 70% in its share capital. Mabroc also invested in 24% of the share capital of Livee Polska Sp. Zo.o, a company in Poland.

- Mabroc issued 2 mn ordinary shares to Kelani Valley Plantations PLC for their investment of Rs. 500 mn in Mabroc.
- Sunfrost (Private) Limited issued 160 mn ordinary shares (99%) to Hayleys Agriculture Holdings Limited for their investment of Rs. 1.6 bn in the subsidiary.
- Advantis Express (Private) Limited acquired 49% of the shareholding in I M L Delivery Systems (Private) Limited which was held by I M L (Private) Limited at a consideration of Rs. 23 mn. Advantis Express (Private) Limited also acquired 51% ownership held by Ceylon Ocean Lines Limited (an affiliate Company). Consequently I M L Delivery Systems (Private) Limited became a fully own subsidiary of Advantis Express (Private) Limited.
- Talawakelle Tea Estates PLC acquired 49% of the ordinary shares and 40% of the Preference shares of TTEL Hydro Power Company (Private) Limited at a consideration of Rs. 90.85 mn. Talawakelle Tea Estates PLC also acquired preference and ordinary shares of TTEL Somerset Hydro Power Company Limited at a consideration of Rs. 90.86 mn, making both companies fully owned subsidiaries of Talawakelle Tea Estates PLC.
- Chas. P. Hayley and Company (Private) Limited acquired 100% ownership of Volanka Exports Limited by purchasing 2.9 mn ordinary shares from Volanka (Private) Limited at a consideration of Rs. 31.6 mn.
- Hayleys Fabric PLC acquired 66.6% of the ordinary shares of Hayleys Fabric Solutions Limited resulting in Hayleys Fabric Solutions Limited becoming a subsidiary of Hayleys Fabric PLC.
- Advantis Singapore Pte Ltd (subsidiary of Hayleys Advantis Limited) invested 29% in the share capital of Advantis Leo (Thailand) Limited, a joint venture with Leo Global Logistics of Thailand.

The following new companies were incorporated by the Group companies during the year :

Name of new company	Parent Company	Country of Incorporation
• Advantis Bridge (Private) Limited	• Advantis Singapore Pte Ltd	Sri Lanka
• Harbour Services Lanka (Pvt) Ltd	• Sri Lanka Shipping Company Limited	Sri Lanka
• Mabroc East Africa Limited	• Mabroc Teas (Private) Limited	Kenya
• Hayleys Fentons East Africa Limited	• Hayleys Fentons Limited	Kenya
• Haycarb Singapore Pte Ltd	• Haycarb PLC	Singapore
• Nex Gen Engineering Pte Ltd	• Hayleys Fentons Limited	Singapore
• Hayleys Aventura Singapore Pte. Ltd.	• Hayleys Aventura (Private) Limited	Singapore
• Haycarb Philippines Corporation	• Haycarb PLC	Philippines
• Dipped Products India (Private) Limited	• Dipped Products PLC	India
• Hayleys Hotels Maldives Private Limited	• Hayleys PLC	Maldives
• Advantis Leo (Thailand) Limited	• Advantis Singapore Pte Ltd	Thailand

### 2.3 Financial Statements of the Company and the Group

The Financial Statements of the Company and the Group are given on pages 330 to 443 of this Report.

### 2.4 Auditors' Report

The Auditor's Report on the Financial Statements of the Company and the Group is given on pages 326 to 329.

### 2.5 Accounting Policies and changes during the year

The Financial Statements have been prepared in accordance with the Sri Lanka Accounting and Auditing Standards Act No. 15 of 1995 which requires compliance with Sri Lanka Accounting Standards. The detailed accounting policies adopted in the preparation of the Financial Statements are given on pages 341 to 365. There were no changes to the Accounting Policies used by the Group and the Company during the year.

### 2.6 Entries in the Interests Register

The Company, in compliance with the Companies Act No.7 of 2007, maintains an Interests Register. As further required by the Act, particulars of entries in the interests register of the Company and those subsidiaries which have not dispensed with the requirement to maintain interests registers, as permitted under Section 30 of the Companies Act, are detailed below.

#### 2.6.1 Directors' interest in transactions

The Directors of the Company and its Subsidiaries have made the general disclosures provided in section 192(2) of the Companies Act No.7 of 2007. Note 38 to the Financial Statements dealing with related party disclosures includes details of their interests in transactions.

#### 2.6.2 Directors' interests in shares

Directors of the Company and its Subsidiaries who have relevant interests in the shares of the respective Companies have disclosed their shareholdings and any acquisitions/ disposals to their Boards, in compliance with section 200 of the Companies Act.

#### Hayleys PLC

Details of Directors' shareholdings in the Company are given on page 460. There were no changes in holdings during the period.

#### Dipped Products PLC

90,000 shares were purchased during the year by Mr. R.H.P. Janadheera, Managing Director of Dipped Products PLC.

#### Haycarb PLC

600,163 shares were purchased during the year by Mr. H.S.R. Kariyawasan and Mrs. K.H.S. Kariyawasan (Joint Account), Mr. H.S.R Kariyawasan is a common Director of Hayleys PLC and Haycarb PLC.

#### Alumex PLC

16,600 shares were purchased during the year by Mr. S. C. Ganegoda, Mr. S.C. Ganegoda is a common Director of Hayleys PLC and Alumex PLC.

#### Kelani Valley Plantations PLC

119,853 shares were purchased during the year by Mr. S. C. Ganegoda, who is a common Director of Hayleys PLC and Kelani Valley Plantations PLC.

#### Horana Plantations PLC

109,350 shares were purchased during the year by Mr. S.C. Ganegoda, who is a common Director of Hayleys PLC and Horana Plantations PLC.

#### Hayleys Fabric PLC

39,995 shares were purchased during the period 01st April 2023 to 08th January 2024 by Mr. M. W. R. N Somaratne, Independent Non-Executive Director of Hayleys Fabric PLC (resigned w.e.f. 08th January 2024), out of which 5,000 shares were purchased through margin trading account Sampath Bank PLC/ Mr. M. W. R. N. Somaratne. Further, Mr. Somaratne has disposed 70,000 shares held through Margin Trading Account, Sampath Bank PLC/ Mr. M.W.R.N. Somaratne during the aforesaid period.

## ANNUAL REPORT OF THE BOARD OF DIRECTORS

### 2.6.3 Payment of remuneration to Directors

Executive Directors' remuneration is structured within an established framework by the Board's Remuneration Committee, to whom this task has been entrusted. The Directors are of the opinion that the framework assures appropriateness of remuneration and fairness for the Company. The total remuneration of Executive Directors for the year ended 31st March 2024, which is given in Note 10 includes the value of perquisites granted to them as part of their terms of service.

The total remuneration of Non-Executive Directors for the year ended 31st March 2024, which is given in Note 10, is determined according to scales of payment decided upon by the Board. The Board is satisfied that the payment of remuneration is fair to the Company.

### 2.6.4 Insurance & Indemnity

The Company has obtained a Directors and Officers Liability insurance cover. This covers the liability towards the Directors and Officers of Hayleys Group in respect of past, present and future negligence subject to terms and conditions of the policy.

### 2.7 Directors' Remuneration

Directors' remuneration, in respect of the Company for the financial year 2024 is Rs. 845.39 mn (2023 - Rs. 780.44 mn) consisting of Rs. 828.39 mn for Executive Directors and Rs. 17 mn for Non-Executive Directors.

Directors' remuneration in respect of the Company's Subsidiaries for the financial year 2024 is Rs. 3.40 bn (2023 - Rs. 2.79 bn) consisting of Rs. 3.25 bn for Executive Directors and Rs. 146 mn for Non-Executive.

### 2.8 Corporate Donations

Donations by the Company amounted to Rs. 27.82 mn (2023 - Rs. 9.54 mn) which includes a sum of Rs. 11.54 (2023 - Rs. 27,000) made to Government approved charities. Donations by the Subsidiaries amounted to Rs. 48.96 mn (2023 - Rs. 53.03 mn).

### 3. FUTURE DEVELOPMENTS

Future developments are discussed in the Reflection from the Chairman (pages 32 to 41), Portfolio review (pages 113 to 245) of this Report.

### 4. GROUP REVENUE AND INTERNATIONAL TRADE

The revenue of the Group was Rs 436.83 bn (2023 - Rs. 487.43 bn) in the year under review. A detailed analysis of the Group's revenue, profit and asset allocation relating to different segments of the Group's businesses is given in Note 40 to the Financial Statements.

The Group's exports from Sri Lanka, amounted to Rs. 187.09 bn (2023 - Rs. 234.32 bn) at f.o.b. value in the year under review.

The Group's revenue from International Trade, which includes the revenue of overseas subsidiaries in addition to exports from Sri Lanka, amounted to Rs. 234.07 bn (2023 - Rs. 304.12 bn) in the year under review.

Trade between Group companies is conducted at fair market prices.

### 5. PERFORMANCE AND RESERVES

#### 5.1. Performance

The Group's PBT amounted to Rs. 25.34 bn (2023 - Rs. 42.75 bn). After deducting Rs. 10.49 bn (2023 - Rs. 15.08 bn) for taxation the profit was Rs. 14.85 bn (2023- Rs. 27.67 bn). When an amount of Rs. 7.96 bn (2023 - Rs. 11.32 bn) for non-controlling interests was deducted, the Group profit attributable to owners of the Parent for the year was Rs 6.89 bn (2023 - Rs. 16.35 bn).

#### 5.2 Reserves

Total Group Reserves at 31st March 2024 amounts to Rs. 78.59 bn (2023 - Rs. 77.36 bn) comprising Capital Reserves of Rs. 0.87 bn (2023 - Rs. 0.76 bn), Other components of equity of Rs. 29.81 bn (2023 - Rs. 31.46 bn) and Revenue Reserves of Rs. 47.90 bn (2023 - Rs. 45.13 bn). The composition of reserves is shown in the Statement of Changes in Equity in the Financial Statements.

### 6. PROPERTY, PLANT AND EQUIPMENT

Capital expenditure during the year, on Property, Plant and Equipment (including capital work-in-progress), Biological assets and Intangible assets by the Group and the Company amounted to Rs. 17.60 bn (2023 - Rs. 17.82 bn) and Rs. 420.99 mn (2023 - Rs. 151.96 mn) respectively.

Details relating to capital expenditure on Property, Plant and Equipment (including capital work-in-progress), Investment properties, Biological assets, Intangible assets, are given in Notes 13, 15, 16 and 17 to the Financial Statements.

Extents, locations, number of buildings and valuations of the properties of the Group are given in Statement of Value of Real Estate on pages 454 to 457.

### 7. MARKET VALUE OF FREEHOLD

The freehold land of the Group has in general been subjected to routine revaluation by independent qualified valuers. The most recent revaluations of the lands were carried out as at 31st March 2022. Details of revaluations, carrying values and market values are provided in Note 13 to the Financial Statements. The Statement on Value of Real Estate on pages 454 to 457 gives details of freehold land held.

### 8. ISSUE OF SHARES AND DEBENTURES

#### 8.1 Issue of Shares and Debentures by the Company

The Company did not issue any shares or Debenture during the year ended 31st March 2024.

#### 8.2 Stated Capital and Debentures

The stated capital of the Company, consisting of 750 mn ordinary shares, amounts to Rs. 1,575 mn as at 31st March 2024. There was no change in the stated capital during the year.

The debentures of the Company consist of the following:

Thirty Million (30,000,000) Listed Rated Senior Unsecured Redeemable five year (2019/2024) debentures amounting to Rs.3 bn.

## 9. SHARE INFORMATION

Information relating to earnings, dividend, net assets, market value per share, share trading and distribution of shareholding is given on pages 459 to 461.

## 10. SUBSTANTIAL SHAREHOLDINGS

### 10.1 Major shareholdings

Details of the twenty largest shareholders of ordinary shares with the percentage of their respective holdings are given on page 459.

### 10.2 Public Holding

There were 15,147 (2023 - 16,384) registered shareholders as at 31st March 2024. The percentage of shares held by the public, as per the Colombo Stock Exchange rules being 37.09% (2023 - 37.10%).

## 11. DIRECTORS

### Hayleys PLC

The names of the Directors who held office during the financial year are given below. The brief profiles of the Board of Directors appear on pages 40 to 47.

### Subsidiaries

The names of Directors holding office at the end of the financial year in respect of Subsidiaries, grouped under Sectors, are given below. Names of Directors who ceased to hold office during the year are given within brackets.

Eco Solutions

### Executive Directors

- Mr. A. M. Pandithage (Chairman & Chief Executive)
- Mr. S. C. Ganegoda
- Mr. H. S. R. Kariyawasan
- Mr. L. R. V. Waidyaratne
- Mrs. J. Dharmasena
- Mr. R. J. Karunarajah

### Senior Independent Director

- Dr. H. Cabral, PC

### Independent Non-Executive Directors

- Mr. M. H. Jamaldeen
- Mr. M. Y. A. Perera
- Mr. K. D. G. Gunaratne
- Mr. T.A.B. Speldewinde (Appointed on 03rd January 2024)
- Mr. P. Y. S. Perera (Appointed on 01st April 2024)

In accordance with Section 9.6.3 the Senior Independent Director continues in his role since the Board decided that due to the diversity of operations of the conglomerate, having business verticals in 14 sectors spanning across 18 countries, the most appropriate

arrangement for the Company and the Group would be for the current Chairman and Chief Executive to continue in the role.

The basis on which Directors are classified as Independent Non-Executive is discussed in the Corporate Governance Report.

Mr. S. C. Ganegoda, Mr. L. R. V. Waidyaratne and Mr. H. S. R. Kariyawasan retire by rotation and being eligible offer themselves for re-election.

Mr. T. A. B. Speldewinde who was appointed to the Board on 03rd January 2024 and Mr. P. Y. S. Perera who was appointed on 01st April 2024 will come up for re-election by the shareholders at the Annual General Meeting. Their profiles in pages 40 to 47 set out their other principal commitments and directorships.

Pursuant to section 211 of the Companies Act No.07 of 2007 an ordinary Resolution will be put before the shareholders for the re-appointment of Mr. A. M. Pandithage notwithstanding the age limit of seventy years stipulated by section 210 of the Companies Act.

## 12. DISCLOSURE OF DIRECTORS' DEALING IN SHARES AND DEBENTURES

Directors' dealings in shares are given under Note 2.6.2 of this report.

Directors' holdings, in ordinary shares of the Company are given on page 460.

None of the Directors hold debentures in Hayleys PLC.

## 13. EMPLOYEE SHARE OWNERSHIP PLANS

The Company does not operate any share option schemes.

## 14. DIRECTORS' DISCLOSURE OF INTEREST

Disclosure of interest by the Directors of the Company and its subsidiaries are detailed in Note 2.6 above.

## 15. RELATED PARTY TRANSACTIONS

The related party transactions of the Company during the financial year have been reviewed by the Related Party Transactions Review Committee and are in compliance with the Section 09 of the CSE Listing rules. Please refer page 324 for RPTRC report.

## 16. ENVIRONMENTAL PROTECTION

The Group's efforts to conserve scarce and non-renewable resources, as well as its environmental objectives and key initiatives, are described in the Natural Capital on pages 277 to 287.

## 17. STATUTORY PAYMENTS

The Directors, to the best of their knowledge and belief are satisfied that all statutory payments due to the Government, other regulatory institutions and those related to employees have been made on time and that there are no material non-compliances with law or regulation and any fines which are material, imposed by any government or regulatory authority in any jurisdiction where the Company and Group have operations.

The declaration relating to statutory payments is made in the Statement of Directors' Responsibilities on page 317.

## 18. EVENTS AFTER THE REPORTING DATE

No event of material significance that requires adjustment to the Financial Statements, has occurred subsequent to the date of the reporting date, other than those disclosed in Note 35 to the Financial Statements on page 428.

## 19. GOING CONCERN

The Directors, after considering the financial position, operating conditions, regulatory and other factors including matters addressed in the Corporate Governance Code, have a reasonable expectation that the Company and the Group have adequate resources to continue in operational existence for the foreseeable future. Therefore the going concern basis has been adopted in the preparation of the Financial Statements.

## 20. EXPOSURE TO RISK

The Group has a structured risk management process in place to support its operations.

The Hayleys Board Audit Committee and the sector Audit Committees play a major role in this process. The Risk Management section of this report elaborates these practices and the Group's risk factors.

## 21. APPOINTMENT OF AUDITORS

A resolution for the re-appointment of Messrs Ernst & Young, Chartered Accountants, as auditors of the company for the year 2024/25 will be proposed at the Annual General Meeting.

## 22. AUDITORS' REMUNERATION AND INTEREST IN CONTRACTS

A resolution authorising the Directors to determine their remuneration will be submitted at the Annual General Meeting.

The Auditors, Messrs Ernst & Young were paid Rs. 3.31 mn (2023 - Rs. 2.59 mn), and Rs. 73.93 mn (Rs. 66.58 mn) as audit fees by the Company and its Subsidiaries respectively. In addition, they were paid Rs. 0.91 mn (2023 - Rs. 2.77 mn) and Rs. 43.76 mn (2023 - Rs. 48.85 mn), by the Company and its Subsidiaries respectively, for non-audit related work, which consisted mainly of tax consultancy services.

In addition to the above, Group companies, both local and overseas, engage other audit firms. Audit fees and payments relating to non-audit work in respect of these firms amount to Rs. 91.70 mn (2023 - Rs. 64.45 mn) and Rs. 26.78 mn (2023 - Rs. 39.81 mn) respectively.

The Auditors of the Company and its Subsidiaries, have confirmed that they do not have any relationships (other than that of Auditor) with, or interests in, the Company or any of its Subsidiaries.

## 23. RATIOS AND MARKET PRICE INFORMATION

The information relating to equity and debt as required by the listing rules of the Colombo Stock Exchange are given on pages 459 to 461, and page 16 of this Report.

## 24. EMPLOYEES & INDUSTRIAL RELATIONS

The Group has a structure and a culture that recognises the aspirations, competencies and commitment of its employees. Systems and mechanisms are in place to ensure that high performers achieve career growth and advancement.

Details of Group's human resource practices and employee and industrial relationships are given in Social Performance section of the Sustainability Review.

The number of persons employed by the Group at year-end was 36,266 (2023 - 31,483).

## 25. SHAREHOLDERS

The Group endeavours to ensure equitable treatment to its shareholders. The policy on relations with Shareholders and Investors is available on the Company's website.

## 26. INTERNAL CONTROLS

The Directors acknowledge their responsibility for the Group's system of internal control. The system is designed to give assurance, inter alia, regarding the safeguarding of assets, the maintenance of proper accounting

## ANNUAL REPORT OF THE BOARD OF DIRECTORS

records and the reliability of financial information generated. However, any system can only ensure reasonable and not absolute assurance that errors and irregularities are either prevented or detected within a reasonable time period.

The Board, having reviewed the system of internal controls, covering financial, operational and compliance controls and risk management and having obtained reasonable assurance on their effectiveness, is satisfied with the Group's adherence to and effectiveness of these controls for the period up to the date of signing the Financial Statements.

### 27. BOARD SUB COMMITTEE

The Board had established and maintains the following sub committees;

- Audit Committee
- Related Party Transactions Review Committee
- Nominations and Governance Committee
- Remuneration Committee

Please refer page 319 to 324 for the Board sub committee reports.

### 28. POLICIES

The Company has established policies as required by the Listing Rules of the CSE inter alia Matters relating to Board and Sub Committees, Policy on ESG and Sustainability (Hayleys Lifecode), Policy on Relations with Shareholders and Investors and Policy on Whistle Blowing. These policies are available on the Company's website. The Company will ensure that all policies are in place before the period specified by the CSE.

### 29. CORPORATE GOVERNANCE

The Company has complied with the Corporate Governance rules laid down under the listing rules of the Colombo Stock Exchange. The Corporate Governance Report on pages 50 to 80 discusses this further.

### 30. ANNUAL GENERAL MEETING

The Annual General Meeting will be held at the registered office No. 400, Deans Road, Colombo 10, Sri Lanka on Friday, 28th June 2024 at 1.00 p.m. The Notice of the Annual General Meeting appears on page 488.

# CHAIRMAN & CHIEF EXECUTIVE'S AND GROUP CHIEF FINANCIAL OFFICER'S RESPONSIBILITY STATEMENT

The Financial Statements of Hayleys PLC and the Consolidated Financial Statements of the Group as at 31st March 2024 are prepared and presented in compliance with the requirements of the following:

- Sri Lanka Accounting Standards issued by CA Sri Lanka;
- Companies Act No. 07 of 2007;
- Sri Lanka Accounting and Auditing Standards Act No. 15 of 1995;
- Listing Rules of the Colombo Stock Exchange;
- Code of Best Practice on Corporate Governance 2023 issued by CA Sri Lanka;
- Finance Companies Corporate Governance Direction No 05 of 2021 issued by the Monetary Board of the Central Bank of Sri Lanka under the Finance Business Act No 42 of 2011.

We confirm that the significant accounting policies used in the preparation of the Financial Statements are appropriate and are consistently applied, as described in the Notes to the Financial Statements. The significant accounting policies and estimates that involved a high degree of judgment and complexity were discussed with the Audit Committee and our External Auditors. During the year, the Company opted for the voluntary adoption of SLFRS S1 and S2 Sustainability Disclosure Standards, in line with the transitional relief allowed for first-time adopters.

We have also taken proper and sufficient care in installing systems of internal control and accounting records to safeguard assets and to prevent and detect frauds as well as other irregularities. These have been reviewed, evaluated and updated on an ongoing basis. Reasonable assurances that the established policies and procedures of the Company have been consistently followed were provided by periodic audits conducted by Group's internal auditors. However, there are inherent limitations that should be recognised in weighing the assurances provided by any system of internal controls and accounting.

The Audit Committee of the Company meets periodically with the Internal Auditors and the Independent Auditors to review the effectiveness of the audits and to discuss auditing, internal control and financial reporting issues. The Independent Auditors and the Internal Auditors have full and free access to the Audit Committee to discuss any matter of substance.

The Financial Statements were audited by independent external auditors, Messers Ernst & Young, Chartered Accountants. Their report is given on pages 326 to 329 of the Annual Report.

The Audit Committee approves the audit and non-audit services provided by the External Auditor, in order to ensure that the provision of such services do not impair their independence.

We confirm that,

- the Company and its subsidiaries have complied with all applicable laws, regulations and prudential requirements;
- there are no material non-compliances; and
- there are no material litigations that are pending against the Group other than those disclosed in the Note 32 to the Financial Statements in this Annual Report.

**Mohan Pandithage**

Chairman & Chief Executive

**Milinda Hewagama**

Group Chief Financial Officer

17th May 2024

## STATEMENT BY THE SENIOR INDEPENDENT DIRECTOR

I was appointed by the Board as the Senior Independent Director (SID) in the FY 2019/20. I continue to serve as the SID of the Company since the position of the Chairperson and the Chief Executive are not segregated. The Board decided that due to the diversity of operations of the conglomerate, having business verticals in 14 sectors spanning across 18 countries, the most appropriate arrangement would be for the current Chairman and Chief Executive to continue in the role.

### ROLE OF THE SENIOR INDEPENDENT DIRECTOR

The SID provides guidance to the Chairman on matters of governance of the Company. In effectively fulfilling this duty the SID is required to meet with the Non-Executive Directors and Executive Directors, enabling discussions and communication on governance related matters.

The role of the SID also provides emphasis to transparency on matters relating to governance and calls for a review of the effectiveness of the Board.

The SID makes himself available to any Director or any employee to have confidential discussions on the affairs of the Company, should the need arise.

### ACTIVITIES DURING THE YEAR

In line with the regulatory requirements, I presided over the following meeting and exercised my voting rights where necessary.

The Company currently has Six Independent Non-Executive Directors and there are no Non Independent Non-Executive Directors. In line with the regulatory requirements I presided over the meeting with the Independent Directors without the presence of the Executive Directors. At these meetings the performance of the Chairman and the Executive Directors were appraised.

Discussion topics included matters relating to the Company and the operations of the Board. The outcome of this meeting together with the views, suggestions and recommendations of the Independent Directors were informed to the Chairman and the Board.

The Company strictly adheres to all relevant mandatory requirements while embracing voluntary guidelines and best practices in governance, thereby building stakeholder trust and ensuring integrity across all decision-making.

I believe that I have effectively discharged the duties entrusted to the SID in accordance with the Corporate Governance guidelines.

**Dr. H. Cabral**  
Senior Independent Director

17th May 2024

# STATEMENT OF DIRECTORS' RESPONSIBILITIES

This Statement of Directors' Responsibility is to be read in conjunction with the Report of the Auditors and is made to distinguish the respective responsibilities of the Directors and of the Auditors in relation to the Financial Statements contained in this Annual Report.

The Directors are responsible, under Sections 150 (1), 151, 152 (1), 153 (1) and 153 (2) of the Companies Act No. 07 of 2007 (the Companies Act), to ensure compliance with the requirements set out therein to prepare Financial Statements for each financial year giving a true and fair view of the state of affairs of the Company and the Group as at the end of the financial year and of the profit and loss of the Company and the Group for the financial year.

The Directors are also responsible, under Section 148, of the Companies Act to ensure that proper accounting records are kept to enable determination of the financial position with reasonable accuracy.

The Directors have taken all reasonable steps to ensure that the Company and its subsidiaries maintain adequate and accurate accounting records which capture all transactions and provide an accurate disclosure of the Company's Financial Position.

The Board accepts responsibility for the integrity and objectivity of the Financial Statements presented. The Directors confirm that in preparing the Financial Statements, appropriate accounting policies have been selected and applied consistently while reasonable and prudent judgements have been made so that the form and substance of transactions are properly reflected. They also confirm that the Financial Statements have been prepared and presented in accordance with the Sri Lanka Accounting Standards (SLFRS/LKAS), the Companies Act and the Listing Rules of the Colombo Stock Exchange.

The Directors are of the opinion, based on their knowledge of the Company, key operations and specific inquiries, that adequate resources exist to support the Company on a going concern basis over the next year. These Financial Statements have been prepared on that basis.

The Directors have taken proper and sufficient measures to safeguard the assets of the Group and, in that context, have instituted appropriate systems of internal control and accounting records to prevent and detect frauds and other irregularities. These have been reviewed, evaluated and updated on an ongoing basis.

The Directors have confirmed that the Company satisfied the solvency test requirement under Section 56 of the Companies Act for all dividends paid. Auditors' solvency certificates have been obtained as required.

The External Auditors, Messrs Ernst & Young, Chartered Accountants were provided with all information and explanations they required and were given every opportunity to undertake any inspections they considered appropriate to enable them to form their opinion on the Financial Statements. The Report of the Auditors, sets out their responsibilities in relation to the Financial Statements.

## COMPLIANCE REPORT

The Directors confirm that to the best of their knowledge and belief that all statutory payments relating to employees and the Government that were due in respect of the Company and its subsidiaries as at the Balance Sheet date have been paid or provided where relevant.

By Order of the Board,

**Hayleys Group Services (Private) Limited**  
Secretaries

17th May 2024

# DIRECTORS' STATEMENT ON INTERNAL CONTROLS

The following statement fulfils the requirement to publish the Directors' Statement on internal control as per the Code of Best Practice on Corporate Governance 2023 issued by CA Sri Lanka.

The Board of Directors is responsible for maintaining a sound system of internal controls to safeguard shareholders' investments and the Company's assets. The Board has established an ongoing process for identifying, evaluating and managing the significant risks faced by the Company and Group. This process includes enhancing the system of internal controls as and when there are changes to business environment or regulatory guidelines. The process is regularly reviewed by the Board.

The Board is of the view that the system of internal controls in place is sound and adequate to provide reasonable assurance regarding the reliability of financial reporting, and the preparation of Financial Statements for external purposes and is in accordance with relevant accounting principles and regulatory requirements.

The Board has implemented the following to obtain reasonable assurance that proper systems of internal controls are in place:

- Instituted various committees to assist the Board in ensuring the effectiveness of Company's operations and the operations are in accordance with the corporate strategies and annual budget.
- The Group Management Audit and System Review Department (MA & SRD) to review and report on the internal control environment in the Company and Group. Audits are carried out on all subsidiaries in accordance with the annual audit plan approved by the Audit Committee.

Findings are submitted to the relevant sub audit committees for their review at their periodic meetings and the key observations are tabled at the Group Audit Committee for their review.

- The Audit Committee reviews internal control issues identified by the Group MA & SRD and management, and evaluates the adequacy and effectiveness of the risk management and internal control systems. They also review the internal audit functions with particular emphasis on the scope of audits and quality of internal audits. The minutes of the Audit Committee meetings are tabled at the Board meetings of Hayleys PLC.
- The adoption of new Sri Lanka Accounting Standards comprising LKAS and SLFRS, Processes that are required to comply with new requirements of recognition, measurement, presentation and disclosures were introduced and implemented. During the year, the required processes were put in place to adopt the SLFRS S1 and S2 Sustainability Disclosure Standards. Continuous monitoring is in progress to ensure effective implementation of the required processes.
- The comments made by External Auditors in connection with the internal control system during the financial year 2022/23 were taken into consideration and appropriate steps have been taken to incorporate them where appropriate.

## Conclusion

The Board having implemented the above is aware that such systems are designed to manage rather than eliminate the risk of failure to achieve business objective and can only provide reasonable and not absolute assurance against material misstatements of loss.

The Board of Directors confirm that the financial reporting system of Hayleys PLC has been designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Financial Statements for external purposes has been done in accordance with the Sri Lanka Accounting Standards, requirements of the Company's Act No 7 of 2007 and the Listing Rules of the Colombo Stock Exchange.

The individual and collective financial knowledge and business acumen and the independence of the Committee, are brought to bear on their deliberations and judgments on matters that come within the Committee's purview. Please refer to pages 40 to 47 for full profiles of Audit Committee members.

Hayleys Group Services (Private) Limited, Company Secretaries act as the secretary to the Audit Committee. The Chairman & Chief Executive, Group Chief Financial Officer and Head - Group Management Audit & System Review Department attend all the meetings of the Committee by invitation.

The Committee met 4 times during the year. Other members of the Board and the Group Management Committee, as well as the External Auditors were present at discussions where it was appropriate. The proceedings of the Audit Committee are regularly reported to the Board of Directors.

## CHARTER OF THE AUDIT COMMITTEE

The Audit Committee Charter is periodically reviewed and revised with the concurrence of Board of Directors to make sure that new developments relating to the function of the Committee are included. The Charter of the Committee was last reviewed and approved by the Board in November 2023. The terms of reference of the Committee are clearly defined in the Charter of the Audit Committee.

'Rules on Corporate Governance' under the Listing Rules of the Colombo Stock Exchange, 'Code of Best Practice on Corporate Governance' issued by the Institute of Chartered Accountants of Sri Lanka 2023 and in the case of the subsidiary company, Singer Finance (Lanka) PLC 'Finance Leasing (Corporate Governance) Direction No 05 of 2021 issued by the Monetary Board of the Central Bank of Sri Lanka under the Finance Business Act No 42 of 2011', further regulate the composition, roles and functions of the Board Audit Committee.

## AUTHORITY OF THE AUDIT COMMITTEE

- Recommend appointment, dismissal, service period and audit fee of the external auditors.
- The Audit Committee shall establish and maintain a direct communication channel with the external auditors.
- Resolve any issues regarding financial reporting between the management and the external auditor.
- Pre-approve all auditing and non-audit services performed by the external audit firm and internal audit service providers.
- Seek any information it requires from employees or external parties relating to investigations.
- Meet with the management, external auditors as necessary to carry out the assigned duties

## ACTIVITIES IN 2023/24

### Financial reporting system

The Committee reviewed the financial reporting system adopted by the Group in the preparation of its quarterly and annual Financial Statements to ensure reliability of the processes and consistency of the accounting policies and methods adopted and their compliance with the Sri Lanka Financial Reporting Standards. The methodology included obtaining statements of compliance from Heads of Finance and Directors-in-charge of operating units. The Committee recommended the Financial Statements to the Board for its deliberations and issuance. The Committee, in its evaluation of the financial reporting system, also recognised the adequacy of the content and quality of routine management information reports forwarded to its members.

### Internal Audits

The Committee reviewed the process to assess the effectiveness of the Internal Financial Controls that have been designed to provide reasonable assurance to the Directors that assets are safeguarded and that the financial reporting system can be relied upon in preparation and presentation of Financial Statements.

The Group Management Audit & Systems Review Department reports on key control elements and procedures in Group companies that are selected according to a group annual audit plan. During the year 2023/24, 677 audits were performed covering all 14 sectors of the group. The Committee obtained the significant findings and recommendations together with management's responses of the review of the internal controls carried out by internal auditors and provided recommendations for improvement.

## AUDIT COMMITTEE REPORT

Some of the internal audits were outsourced in financial year 2023/24 to leading audit firms in line with an agreed annual group audit plan. The Committee also invited representatives from the audit firms to make presentations on their observations and findings.

Follow up reviews were scheduled to ascertain that audit recommendations are being acted upon.

The Committee evaluated the Internal Audit Function covering key areas such as scope, quality of internal audits, independence and resources. The Committee appraised the independence of the Group MA&SRD and other internal auditors, in the conduct of their assignments.

### • Risk Management

The Committee obtained and reviewed statements from the Heads of Business Sectors identifying their respective major business risks, mitigatory action taken or contemplated for management of these risks. The COSO Enterprise Risk Reporting Process is presently being implemented within the group.

The Audit Committee also conducted ESG risk assessments during the year, thereby identifying, prioritising and monitoring sustainability related risks and opportunities.

Review of the risk management, internal controls, business continuity planning and information security systems are carried out and appropriate remedial actions are recommended to the board.

### SUBSIDIARY COMPANY AUDIT COMMITTEES

Within the Hayleys Group 12 listed subsidiaries and 5 unlisted subsidiaries have appointed their own Audit Committees comprising Independent Non-Executive Directors and have met four times each during the year 2023/24. These Audit Committees function independent of the Audit Committee of Hayleys PLC but have similar terms of reference. The minutes of their meetings were made available to the Hayleys Audit Committee.

### EXTERNAL AUDITS

The Committee held meetings with the External Auditors to review the nature, approach, scope of the audit and the Audit Management Letters of Group Companies. Actions taken by the management in response to the issues raised, as well as the effectiveness of the internal controls in place, were discussed with the heads of business units. Remedial actions were recommended wherever necessary.

The Audit Committee has reviewed the non audit services provided by the External Auditors to the Group to ensure that their independence as Auditors has not been compromised.

### APPOINTMENT OF EXTERNAL AUDITORS

The current Auditors Messrs Ernst & Young were initially appointed as external auditors in FY 2011/12 and continue to hold that position at present. A partner rotation of the auditors takes place periodically, a rotation of partner took place in 2018/19.

The Audit Committee has recommended to the Board of Directors that Messrs Ernst & Young, continue as Auditors for the financial year ending 31st March 2025 after evaluating the scope, delivery of the audit, resources and the quality of the assurance initiatives taken during the financial year 2023/24.

### COMPLIANCE

The Committee obtained representations from respective CEOs and CFOs of Group Companies on the adequacy of provisions made for possible liabilities and reviewed reports tabled by Group Companies certifying their compliance with relevant statutory requirements. Further, the Committee obtained regular updates from Head of HR and Legal regarding compliance matters.

### ETHICS AND GOOD GOVERNANCE

The Committee continuously emphasised on upholding ethical values of the staff members. In this regard, The Code of Conduct and Ethics ('Hayleys Way'), Whistle-Blowers Policy and Anti Bribery and Corruption Policy were put in place and followed by educating and encouraging all members of the staff.

All appropriate procedures are in place to conduct independent investigations into incidents reported through Whistle-Blowing or identified through other means. The Whistle-Blower Policy guarantees strict confidentiality of the identity of the Whistle-Blowers.

### SRI LANKA ACCOUNTING STANDARDS

Committee reviewed the revised policy decisions relating to adoption of new and revised Sri Lanka Accounting Standards (SLFRS/LKAS) applicable to the Group companies and made recommendation to the Board of Directors.

### Progress of implementation of SLFRS:

The Committee continuously monitored the progress of implementation of SLFRS as per the requirements of Sri Lanka Accounting Standards.

The Committee would continue to monitor the compliance with relevant Accounting Standards and keep the Board of Directors informed at regular intervals.

The Committee has obtained the support of Messrs Ernst and Young, Chartered Accountants, to assess and review the existing SLFRS policies and procedures adopted by the Group.

### SUPPORT TO THE COMMITTEE

The Committee received information and support from management during the year to enable it to carry out its duties and responsibilities effectively.

### Evaluation of the Committee:

An independent evaluation of the effectiveness of the Committee was carried out by the other members of the Board during the year. Considering the overall conduct of the Committee and its contribution on the overall performance of the Group, the Committee has been rated as highly effective.

-  Dr. H. Cabral PC
-  Mr. M.Y.A. Perera (appointed to the committee on 21st April 2023)

## Composition (from 1/11/2023 to 31/03/2024)

-  Mr. M.Y.A. Perera - Chairman
-  Dr. H. Cabral PC
-  Mr. K.D.G. Gunaratne (appointed w.e.f. 1st November 2023)
-  Mr. T.A.B. Speldewinde (appointed to the committee on 17th May 2024)

## Meeting attendance

Mr. A.M. Pandithage	7/7
Dr. H.C. Cabral	11/11
Mr. M.Y.A. Perera	11/11
Mr. K.D.G. Gunaratne	4/4
Mr. T.A.B. Speldewinde	1/1

In terms of the Corporate Governance Rules of the Colombo Stock Exchange, on 1st November 2023, the Nominations Committee of the Company was renamed as the Nominations and Governance Committee and Mr. A. M. Pandithage (Chairman and Chief Executive of the Company and Group) who served as the Chairman of the Committee stepped down from the Committee Chairmanship and Mr. M.Y.A. Perera was appointed as Chairman and Mr. K.D.G. Gunaratne was appointed as a member of the Committee to comply with Rule 9.11.4 of the Listing Rules of the Colombo Stock Exchange. On 17th May 2024, Mr. T.A.B. Speldewinde was appointed to the Committee. During the year the Committee also served as the Nominations and Governance Committee to Listed Companies in the Group until they established their own Nominations and Governance Committees.

### COMMITTEE DUTIES

- The Nominations and Governance Committee evaluates and recommends the appointment of Directors to the Board and Committees considering the required skills, experience and qualifications necessary.
- Consider and recommend (or not recommend) the re- election of current directors considering the Board composition against pre-defined criteria on combined knowledge, experience, performance and contribution made by the Director to meet the strategic demands of the Company and the discharge of the Board's overall responsibilities and the number of directorships held by the Director in other listed and unlisted companies and other principle commitments.
- Establish and maintain a formal and transparent procedure to evaluate, select and appoint / re appoint Directors of the Company.

- Establish and maintain a set of criteria for selection of Directors such as academic / professional qualifications, skills, experience and key attributes required for eligibility taking into consideration the nature of the business of the Company and industry specific requirements.
- Establish and maintain a suitable process for the periodic evaluation of the performance of Board Directors and the Chief Executive of the Company to ensure their responsibilities are satisfactorily discharged.
- Consider if a Director is able to and has been adequately carrying out his or her duties as a Director, taking in to consideration the number of Listed Company Boards on which the Director is represented and other principal commitments.
- Develop succession plans for Board of Directors, CEO/Managing Director and Key Management Personnel.
- Review and recommend the overall corporate governance framework of the Company considering the Listing Rules and other applicable regulatory requirements and industry best practices. Review and update the corporate governance policies/ framework in line with regulatory and legal developments relating to same.
- Receive reports from the Management on compliance of the corporate governance framework of the Company including the Company's compliance with provisions of the SEC Act, Listing Rules of the Colombo Stock Exchange and other applicable laws and reasons for any deviations or non-compliances.

### COMMITTEE ACTIVITIES IN 2023/24

- The Board performance evaluation has been carried out and discussed at Board meetings. Any major issues relating to the Company are updated

## NOMINATIONS AND GOVERNANCE COMMITTEE REPORT

to the Independent Directors by the Chairman. Special Board meetings are called if the need arises to discuss an important or critical matter with the Board.

- Newly appointed Directors are given an induction to the Company prior to their first Board meeting. The orientation programme includes a presentation of the different Sectors and the work carried out in the subsidiary companies. Requirements as per the Listing Rules and applicable rules and regulations are informed to the new Directors. Existing Directors are regularly updated with corporate governance requirements, Listing Rules and other applicable laws.
- Non-Executive Directors have submitted declarations regarding their independence / non-independence. The Board has determined that Directors who have served on the Board for over 9 years are nevertheless independent, after taking into consideration the fact that they do not exert any control over the day-to-day activities of the Company and are capable of acting in an impartial and independent manner on matters deliberated by the Board.
- Each Director provided a signed declaration on his/her fitness and propriety based on the assessment criteria stipulated in the Listing Rules of the Colombo Stock Exchange. The fitness and propriety of the Directors were examined by the Committee.

### RE-APPOINTMENTS/RE-ELECTIONS

One Third (1/3) of all the directors except the Chief Executive, retire by rotation in terms of the Articles of Association and being eligible submit themselves for re-election at the AGM.

Accordingly, the Committee has recommended to re-elect Mr. S. C. Ganegoda, Mr. H. S. R. Kariyawasan, and Mr. L. R. V. Waidyaratne to the Board at the Annual General Meeting to be held on 28th June 2024, based on their performance and the contribution made to achieve the objectives of the Board.

Mr. Ganegoda was appointed to the Board in September 2009, and last re-appointed as a Director in June 2021. His directorships and other principal commitments are given in the profile on page 44.

Mr. Kariyawasan was appointed to the Board in June 2010, and last re-appointed as a Director in June 2021. His directorships and other principal commitments are given in the profile on page 44.

Mr. Waidyaratne was appointed to the Board in April 2013, and last re-appointed as a Director in June 2021. His other directorships and other principal commitments are given in the profile on page 45.

Mr. T. A. B. Speldewinde who was appointed to the Board on 3rd January 2024 and Mr. P. Y. S. Perera who was appointed on 1st April 2024 will come up for re-election by the shareholders at the Annual General Meeting. Their profiles in pages 46 to 47 set out their other principal commitments and directorships.

Due to his extensive experience, deep insights and domain knowledge evidenced through the leadership provided to the Group by the Chairman Mr. A M Pandithage, the Committee has recommended to the shareholders to reappoint Mr. A. M. Pandithage who is over seventy years and who retires in terms of Section 210 of the Companies Act No. 7 of 2007.

None of the Directors who are being proposed for re-election or their family members, have any relationship with the Directors of the Company or shareholders having more than 10% of the shares of the Company.

The Corporate Governance requirements stipulated under the Listing Rules of the Colombo Stock Exchange are met by the Company and details are given in pages 70 to 73.

The Chairman of Hayleys PLC assists the Committee by providing relevant information and participating in its analysis and deliberations, except when his own compensation package is reviewed.

The Remuneration Committee has well defined Terms of Reference. The members of the Committee are Independent Directors and are free from business, operational, personal or other relationships which may interfere with their independent, unbiased judgement.

## COMMITTEE DUTIES

The Committee is responsible to the Board to determine the policy of the remuneration package of the Directors.

The Committee evaluates, assesses and recommends to the Board of Directors on matters that may affect Human Resources Management of the Company and the Group and specifically include:

- Determining the compensation of the Chairman & Chief Executive, Executive Directors and the Members of the Group Management Committee.
- Laying down guidelines and parameters for the compensation structures of all management staff within the Group taking into consideration industry norms.
- Formulating guidelines, policies and parameters for the compensation structures for all Executive staff of the Company.
- Reviewing information related to executive pay from time to time to ensure same is in par with the market/industry rates.
- Evaluating the performance of the Chairman & Chief Executive and Key Management Personnel against the predetermined targets and goals.
- Assessing and recommend to the Board of Directors of the promotions of the Key Management Personnel and address succession planning.
- Approving annual salary increments and bonuses.

## REMUNERATION POLICY

The remuneration policy of the Company/ Group is to attract, motivate and retain a highly qualified and experienced executive team, and reward performance accordingly in the backdrop of industry norms. These compensation packages provide compensation appropriate for each business within the Group and commensurate with each employee's level of expertise and

contributions, bearing in mind the business' performance and shareholder returns.

The remuneration packages which are linked to individual performances are aligned with the Companies/ Group's short term and long-term strategy.

All Non-Executive Directors (other than Directors who are employed by Hayleys PLC) receive a fee for serving on the Board and serving on sub committees. They do not receive any performance related incentive payments.

## COMMITTEE ACTIVITIES IN 2023/24

During the year the Committee reviewed the performance of the Chairman & Chief Executive, Executive Directors and Group Management Committee based on the targets set in the previous year and determined the bonus payable and the annual increments.

The Committee also acted as the Remuneration Committee of the Subsidiary Companies until they established their own Remuneration Committees.

The Committee Reviewed Executives' compensation and implemented market corrections to Executives total compensation in line with the market median.

Recommended the bonus payable and annual increments to be paid to Executive staff based on the ratings of the Performance Management System.

The aggregate remuneration of the Executive and Non-Executive Directors for the Financial Year amounted to Rs. 4.25 bn.

Mr. T.A.B. Speldewinde	-/-

The Board has an established Related Party Transactions Review Committee (RPTRC) which complies with Section 9 of the Listing Rules of the Colombo Stock Exchange and the terms of the Code of Best Practice on Related Party Transactions issued by CA Sri Lanka. The RPTRC of the Company served as the RPTRC of a majority of the Subsidiaries of the Hayleys Group until they formed their own RPTRCs.

The Chairman, the Group Chief Financial Officer, Group Head of Legal and HR and any other Officers as may be required by the Committee attend the meetings by invitation.

The Company Secretaries act as the Secretaries to the Committee. The minutes of the RPTRC meetings are tabled at the Board meetings thereby providing all Directors access to the deliberations of the Committee.

On 17th May 2024 the Board appointed Mr. T.A.B. Speldewinde as the third Independent Non-Executive Director to the Committee.

## COMMITTEE DUTIES

- To review in advance all proposed related party transactions of the Group either prior to the transaction being entered into or, if the transaction is expressed to be conditional on such review, prior to the completion of the transaction.
- Seek any information the Committee requires from management, employees or external parties to with regard to any transaction entered into with a related party.
- Obtain knowledge or expertise to assess all aspects of proposed related party transactions where necessary including obtaining appropriate professional and expert advice from suitably qualified persons.
- To recommend, where necessary, to the Board and obtain their approval prior to the execution of any related party transaction.
- To monitor that all related party transactions of the entity are transacted on normal commercial terms and are not prejudicial to the interests of the entity and its minority shareholders.
- Meet with the management, Internal Auditors/External Auditors as necessary to carry out the assigned duties.
- To review the transfer of resources, services or obligations between related parties regardless of whether a price is charged.
- To review the economic and commercial substance of both recurrent/non recurrent related party transactions.
- To monitor and recommend the acquisition or disposal of substantial assets between related parties, including obtaining competent independent advice' from

independent professional experts with regard to the value of the substantial asset of the related party transaction.

- To ensure that there is an adequate and effective process in place to capture information which is relevant to its review function.

## COMMITTEE ACTIVITIES IN 2023/24

During the year the Committee reviewed the related party transactions and their compliances in Hayleys PLC and its Group Companies and communicated the same to the Board and relevant Companies.

The Committee in its review process recognised the adequacy of the content and quality of the information forwarded to its members by the management.

## DISCLOSURES

A detailed disclosure of all the related party transactions including recurrent and non-recurrent related party transactions which are required to be disclosed under section 9.14.8 of the Listing Rules of the Colombo Stock Exchange has been made in note 38 to the financial statements given in page 430 to 433 to this report.

## TO THE SHAREHOLDERS OF HAYLEYS PLC

### Report on the audit of the Financial Statements

#### Opinion

We have audited the financial statements of Hayleys PLC (“the Company”) and the consolidated financial statements of the Company and its subsidiaries (“the Group”), which comprise the statement of financial position as at 31 March 2024, and the statement of profit or loss, the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, the accompanying financial statements of the Company and the Group give a true and fair view of the financial position of the Company and the Group as at 31 March 2024, and of their financial performance and cash flows for the year then ended in accordance with Sri Lanka Accounting Standards.

#### Basis for opinion

We conducted our audit in accordance with Sri Lanka Auditing Standards (SLAuSs). Our responsibilities under those standards are further described in the Auditor’s responsibilities for the audit of the financial statements section of our report. We are independent of the Group in accordance with the Code of Ethics for Professional Accountants issued by CA Sri Lanka (Code of Ethics) and we have fulfilled our other ethical responsibilities in accordance with the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not

provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor’s responsibilities for the audit of the financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

Key audit matter	How our audit addressed the key audit matter
<p><b>Revenue</b></p> <p>The Group’s revenue for the year amounted to Rs. 436.83 billion and was derived from diverse industry segments as disclosed in Notes 3.22 and 6 to the financial statements.</p> <p>Revenue was a key audit matter due to:</p> <ul style="list-style-type: none"> <li>the materiality of the revenue reported and the significance of the amounts generated from industry specific sales arrangements for products and services; and</li> <li>the considerations to be made on terms attached to sales arrangements, particularly relating to the timing of transferring control over goods sold and services provided.</li> </ul>	<p>Our audit procedures included the following key procedures:</p> <ul style="list-style-type: none"> <li>obtained an understanding of the nature of revenue contracts entered in to by the industry segments of the Group</li> <li>assessed whether the accounting policy for revenue recognition for each industry segment has been appropriately applied.</li> <li>evaluated the design and tested the relevant key controls over revenue. Our procedures included testing the general IT control environment and the relevant key IT application controls relating to the most significant IT systems relevant to revenue.</li> <li>performed analytical procedures to understand and assess the reasonableness of the reported revenues.</li> </ul>

Key audit matter	How our audit addressed the key audit matter
	<ul style="list-style-type: none"> <li>• tested revenue transactions to sales contracts and other supporting documents. Our procedures included testing: <ul style="list-style-type: none"> <li>• revenue transactions at the year-end to determine whether transactions have been recorded in the proper period and to the proper accounts; In particular, we tested how terms of specific sales arrangements for products and services were considered within the revenue recognition process, and</li> <li>• journal entries recognised to revenue.</li> </ul> </li> <li>• We also assessed the adequacy of the related disclosures set out in Notes 3.2 and 6 to the financial statements.</li> </ul>
<p><b>Carrying value of inventories</b></p> <p>As of the reporting date, the carrying value of inventories of the Group amounted to Rs. 85.202 billion net of provision of Rs. 7.424 billion as disclosed in Note 21 to the financial statements.</p> <p>Carrying value of inventories was a key audit matter due to;</p> <ul style="list-style-type: none"> <li>• materiality of the reported inventory balance which represented 19% of the Group's total assets as of the reporting date;</li> <li>• the existence of diverse industry specific inventories; and</li> </ul> <p>the use of significant management judgement over identifying inventories requiring write down to net realisable value (NRV) and in the determination of the provision, as disclosed in Notes 5.6 and 21 to the financial statements.</p>	<p>Our audit procedures to address this area of focus included the following:</p> <ul style="list-style-type: none"> <li>• obtained an understanding of inventories maintained by industry segments, together with key processes and controls relating to inventories;</li> <li>• observed physical inventory counts and reconciled the count results to the inventory listings compiled by management to support amounts reported</li> <li>• tested whether inventories were stated at the lower of cost and net realizable value, by comparing cost with subsequent selling prices;</li> <li>• assessed the reasonableness of judgements applied by management in the write down of inventories to NRV and estimation of the provision for inventories. Our procedures included testing the completeness and accuracy of inventory age reports used as a basis to estimate the provision.</li> </ul> <p>We also assessed the adequacy of disclosures made in relation to the measurement of inventories in Notes 5.6 and 21 to the financial statements.</p>
<p><b>Impairment allowance for current and non-current trade and other receivables in the Consumer &amp; Retail segment of the Group</b></p> <p>The Group has recognised an allowance for expected credit losses of Rs. 7.1 billion for current and non-current trade and other receivables as disclosed in Note 22 in the financial statements. The allowance recorded in the Consumer and Retail segment of the Group amounts to Rs. 3.2 billion.</p> <p>The impairment allowance for current and non-current trade and other receivables in the Consumer &amp; Retail segment of the Group was a key audit matter due to;</p> <ul style="list-style-type: none"> <li>• the degree of judgements, significance of assumptions and level of estimation uncertainty associated with estimating future cash flows management expects to receive from such financial assets.</li> </ul> <p>Such assumptions, judgements and estimates include incorporation of forward-looking information such that expected cashflows reflect current and anticipated future external factors.</p>	<p>Our audit procedures included the following:</p> <ul style="list-style-type: none"> <li>• We evaluated the competence and independence of the firm of chartered accountants performing the component audit of the Consumer and Retail segment.</li> <li>• With the involvement of component auditors where relevant, we <ul style="list-style-type: none"> <li>• assessed the appropriateness of the selection of accounting policies based on the requirements of the SLFRS 09, business understanding and industry practice</li> <li>• evaluated the appropriateness of the management approach over the application and use of practical expedients applied for SLFRS 9</li> <li>• assessed management's processes, systems and controls implemented over impairment assessment, including the completeness, accuracy and relevance of data used</li> </ul> </li> </ul>

## INDEPENDENT AUDITORS' REPORT

Key audit matter	How our audit addressed the key audit matter
	<ul style="list-style-type: none"> <li>assessed the logics and compilation of the overdue information of loans and advances, finance lease receivables and hire purchases,</li> <li>evaluated the appropriateness of the assumptions used based on knowledge and information of the client and the industry and assessed whether the macro-economic factors have been used with the latest available information to assess that the latest economic forecasts have been used, and</li> <li>tested the mathematical accuracy of models applied and post-model adjustments.</li> </ul> <p>We have also assessed the adequacy of the disclosures made in Note 3.9 and Note 22 in the financial statements.</p>

### Other Information included in the 2024 Annual Report

Other information consists of the information included in the Annual Report, other than the financial statements and our auditor's report thereon. Management is responsible for the other information.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### Responsibilities of the management and those charged with governance for the financial statements.

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with Sri Lanka Accounting Standards, and

for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's and the Group's financial reporting process.

### Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SLAuSs will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SLAuSs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal controls of the Company and the Group.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

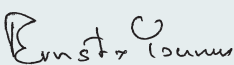

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

#### **Report on other legal and regulatory requirements**

As required by section 163 (2) of the Companies Act No. 07 of 2007, we have obtained all the information and explanations that were required for the audit and as far as appears from our examination, proper accounting records have been kept by the Company.

CA Sri Lanka membership number of the engagement partner responsible for signing this independent auditor's report is 2440.

# NOTES TO THE FINANCIAL STATEMENTS

## 1. CORPORATE INFORMATION

### 1.1 Reporting Entity

Hayleys PLC is a Company incorporated and domiciled in Sri Lanka. The ordinary shares of the Company are listed on the Colombo Stock Exchange of Sri Lanka. Corporate information, the address of the Company's registered office and the principal place of business are given on page 487 in this Annual Report.

### 1.2 Consolidated Financial Statements

The Financial Statements for the year ended 31 March 2024 comprise "the Company" referring to Hayleys PLC as the holding Company and the "Group" referring to companies that have been consolidated therein together with the group's Interests in Equity Accounted Investees.

### 1.3 Nature of Operations and Principal Activities of the Company and the Group

Descriptions of the nature of operations and principal activities of the Company, its subsidiaries and equity accounted investees are given on pages 466 to 470 to the Financial Statements.

Hayleys PLC does not have an identifiable parent of its own. Hayleys PLC is the ultimate parent of the Group.

### 1.4 Approval of Financial Statements

The Consolidated Financial Statements of Hayleys PLC and its subsidiaries (collectively, the Group) for the year ended 31 March 2024 were authorised for issue by the Directors on 17 May 2024.

### 1.5 Responsibility for Financial Statements

The responsibility of the Directors in relation to the Financial Statements is set out in the Statement of Directors' Responsibility Report in the Annual Report.

## 2. BASIS OF PREPARATION

### 2.1. Statement of Compliance

The Consolidated Financial Statements have been prepared in accordance with the Sri Lanka Accounting and Auditing

Standards Act No. 15 of 1995, which requires compliance with Sri Lanka Accounting Standards promulgated by the Institute of Chartered Accountants of Sri Lanka (CA Sri Lanka), and with the requirements of the Companies Act No. 07 of 2007.

### 2.2 Basis of Measurement

The Consolidated Financial Statements have been prepared on the historical cost basis, except for:

- Lands which are recognised as property plant and equipment which are measured at cost on initial recognition and subsequently carried at fair value.
- Land and buildings which are recognised as investment property which are measured at cost on initial recognition and subsequently carried at fair value.
- Financial instruments reflected as fair value through profit or loss which are measured at fair value.
- Financial instruments designated as fair value through other comprehensive income (OCI) which are measured at fair value.
- Consumable biological assets and agricultural produce from bearer biological assets which are measured at fair value, less costs to sell.

Where appropriate, the specific policies are explained in the succeeding notes.

No adjustments have been made for inflationary factors in the Consolidated Financial Statements.

### 2.3 Functional and Presentation Currency

The Financial Statements are presented in Sri Lankan Rupees (Rs), which is also the Company's functional currency. Subsidiaries whose functional currencies are different as they operate in different economic environments are reflected in Note 34 to the Financial Statements.

### 2.4 Materiality and Aggregation

Each material class of similar items is presented separately in the Consolidated Financial Statements. Items of a dissimilar nature or function are presented separately unless they are immaterial.

### 2.5 Comparative information

Comparative information including quantitative, narrative and descriptive information as relevant is disclosed in respect of previous period in the Financial Statements.

In addition, the Group presents an additional statement of financial position at the beginning of the preceding period when there is a retrospective application of an accounting policy, a retrospective restatement, or a reclassification of items in Financial Statements.

### 2.6 Rounding

All financial information presented in Sri Lankan Rupees has been rounded to the nearest thousand (Rs'000), except when otherwise indicated.

### 2.7 Offsetting

Assets and liabilities or income and expenses, are not offset unless required or permitted by Sri Lanka Accounting Standards.

## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### 3.1. Basis of Consolidation

The Consolidated Financial Statements encompass the Company, its subsidiaries (together referred to as the "Group") and the Group's interest in equity accounted investees (Associates and Joint Ventures).

Subsidiaries and equity accounted investees are disclosed in Note 18 to the Financial Statements.

#### 3.1.1 Subsidiaries

Subsidiaries are those entities controlled by the Group. Control is achieved when the Group is exposed, or rights to variable returns from its involvement with the investee and has the ability to affect

## NOTES TO THE FINANCIAL STATEMENTS

those returns through its power over the investee. Specifically, the Group controls an investee if, and only if, the Group has:

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee).
- Exposure, or rights, to variable returns from its involvement with the investee.
- The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights results in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has the power over an investee, including:

- The contractual arrangement(s) with the other vote holders of the investee.
- Rights arising from other contractual arrangements.
- The Group's voting rights and potential voting right.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the Consolidated Financial Statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or Loss and each component of Other Comprehensive Income are attributed to equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the Financial Statements of subsidiaries to bring their accounting

policies in line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities, non-controlling interest and other components of equity while any resultant gain or loss is recognised in profit or loss. Any investment retained is recognised at fair value.

### 3.1.2 Consolidation of subsidiaries with different accounting periods

The financial statements of all subsidiaries in the Group other than those mentioned in Note 36 to the Financial Statements are prepared for a common financial year, which ends on 31 March.

Most subsidiaries with 31 December financial year ends prepare for consolidation purposes, additional financial information as of the same date as the financial statements of the parent.

For subsidiaries which are unable to prepare additional financial information the parent uses the most recent financial statements of the subsidiaries and is adjusted for the effects of significant transactions or events that occur between the date of those financial statements and the date of the Consolidated Financial Statements. The difference between the date of the subsidiary's financial statements and that of the Consolidated Financial Statements will not be more than three months.

The Financial Statements of the associate or joint venture are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investment in its associate or joint venture. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate or joint venture is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate or joint venture and its carrying value, and then recognises the loss within 'Share of profit or loss of equity accounted investees' in the Statement of Profit or Loss.

Upon loss of significant influence over the associate or joint control over the joint venture, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence or joint control and the fair value of the retained investment and proceeds from disposal is recognised in the Statement of Profit or Loss.

### 3.1.3 Investment in Associate

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

The Group's investment in its associate and joint venture are accounted for using the equity method.

The aggregate of the Group's share of profit or loss of an associate is shown on the face of the statement of profit or loss outside operating profit and represents profit or loss after tax and non-controlling interests in the subsidiaries of the associate.

Under the equity method, the investment in an associate is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associate since the

acquisition date. Goodwill relating to the associate is included in the carrying amount of the investment and is not tested for impairment separately. Thus, reversals of impairments may effectively include reversal of goodwill impairments. Impairments and reversals are presented within 'Share of profit of an associate and a joint venture' in the statement of profit or loss.

The statement of profit or loss reflects the Group's share of the results of operations of the associate. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognised directly in the equity of the associate, the Group recognises its share of any changes, when applicable, in the statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and the associate are eliminated to the extent of the interest in the associate.

After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investment in its associate. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value, and then recognises the loss within 'Share of profit of an associate in the statement of profit or loss.

Upon loss of significant influence over the associate, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

### 3.2 Business Combination and Goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, which is measured at acquisition date fair value and the amount of any non-controlling interest in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred and included in administrative expenses.

The Group determines that it has acquired a business when the acquired set of activities and assets include an input and a substantive process that together significantly contribute to the ability to create outputs. The acquired process is considered substantive if it is critical to the ability to continue producing outputs, and the inputs acquired include an organised workforce with the necessary skills, knowledge, or experience to perform that process or it significantly contributes to the ability to continue producing outputs and is considered unique or scarce or cannot be replaced without significant cost, effort, or delay in the ability to continue producing outputs.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

Any contingent consideration to be transferred by the acquirer will be recognised at fair value at the acquisition date. Contingent consideration classified as equity is not re-measured and its subsequent settlement is accounted for within equity. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of SLFRS 9 Financial Instruments, is

measured at fair value with the changes in fair value recognised in the Statement of Profit or Loss in accordance with SLFRS 9. Other contingent consideration that is not within the scope of SLFRS 9 is measured at fair value at each reporting date with changes in fair value recognised in the Statement of Profit or Loss.

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests) and any previous interest held over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the re-assessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in the Statement of Profit or Loss.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill has been allocated to a cash generating unit (CGU) and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed of in this circumstance is measured based on the relative values of the disposed operation and the portion of the cash generating unit retained.

## NOTES TO THE FINANCIAL STATEMENTS

### 3.3 Foreign Currency

#### 3.3.1 Transactions and balances

Transactions in foreign currencies are initially recorded by the Group's entities at their respective functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rate of exchange at the reporting date. Differences arising on settlement or translation of monetary items are recognised in Statement of Profit or Loss. Tax charges and credit attributable to exchange differences on those monetary items are also recognised in Other Comprehensive Income.

Non-monetary assets and liabilities which are measured in terms of historical cost in a foreign currency are translated using exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of gain or loss on the change in fair value of the item (i.e., translation differences on items of which fair value gain or loss is recognised in OCI or Profit or Loss are also recognised in OCI or Profit or Loss, respectively).

In determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which the Group initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, the Group determines the transaction date for each payment or receipt of advance consideration.

#### 3.3.2 Foreign operations

On consolidation, the assets and liabilities of foreign operations are translated into Sri Lanka Rupees at the rate of exchange prevailing at the reporting date and their Statements of Profit or Loss are translated at exchange rates prevailing at the dates of the transactions. The exchange differences arising on translation for consolidation are recognised in OCI. On disposal of a foreign operation, the component of OCI relating to that particular foreign operation is reclassified to profit or loss.

Any goodwill arising on the acquisition of a foreign operation and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition are treated as assets and liabilities of the foreign operation and translated at the spot rate of exchange at the reporting date

#### 3.3.3 Current versus non-current classification

The Group presents assets and liabilities in the Statement of Financial Position based on current/non-current classification. An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in a normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in a normal operating cycle;
- It is held primarily for the purpose of trading;

- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Group classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

### 3.4 Fair Value Measurement

The Group measures financial instruments such as investments which are designated as fair value through Other Comprehensive Income (OCI), financial assets at fair value through Profit or Loss and derivatives; non-financial assets such as owner-occupied land and investment properties, at fair value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in

its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

**Level 1** — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

**Level 2** — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

**Level 3** — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the Financial Statements at fair value on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Fair value related disclosures for financial instruments and non-financial assets that are measured at fair value or where fair values are disclosed are summarised in the following notes:

- Disclosures for valuation methods, significant estimates and assumptions - Note 19.
- Quantitative disclosures of fair value measurement hierarchy - Note 19.
- Property (land) under revaluation model - Note 13.
- Investment properties - Note 15.
- Financial instruments (including those carried at amortised cost) - Note 19.
- Biological assets (Consumable and agricultural produce) - Note 16.

### 3.5 Property, Plant & Equipment

The group applies the requirements of LKAS 16 on 'Property Plant and Equipment' in accounting for its owned assets which are held for and use in the provision of the services or for administration purpose and are expected to be used for more than one year.

#### 3.5.1 Basis of recognition

Property, plant and equipment is recognised if it is probable that future economic benefit associated with the assets will flow to the Group and cost of the asset can be reliably measured.

#### 3.5.2 Basis of measurement

Items of property, plant & equipment including construction in progress are measured at cost net of accumulated depreciation and accumulated impairment losses, if any, except for land which is measured at fair value.

#### 3.5.3 Owned assets

The cost of property, plant & equipment includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the asset to a working condition for its intended use, and includes the costs of dismantling and removing the items and restoring the site on which they are located, and borrowing costs on qualifying assets. Purchased software that is integral to the functionality of the related equipment is capitalised as a part of that equipment.

When significant parts of plant and equipment are required to be replaced at intervals, the Group depreciates them separately based on their specific useful lives.

Revaluation of land is done with sufficient frequency to ensure that the fair value of the land does not differ materially from its carrying amount, and is undertaken by professionally qualified valuers.

Any revaluation surplus is recorded in Other Comprehensive Income and credited to the asset revaluation reserve in equity. However, to the extent that it reverses a revaluation deficit of the same asset previously recognised in the Statement of Profit or Loss, the increase is recognised in the Statement of Profit or Loss. A revaluation deficit is recognised in the Statement of Profit or Loss, except to the extent that it offsets an existing surplus on the same asset recognised in the asset revaluation reserve. Upon disposal, any revaluation reserve relating to the particular asset being sold is transferred to retained earnings.

#### 3.5.4 Subsequent costs

The cost of replacing a component of an item of property, plant & equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably. The carrying amount of the replaced part is derecognised in accordance with the derecognition policy given below.

The costs of the repair and maintenance of property, plant & equipment are recognised in the Statement of Profit or Loss as incurred.

#### 3.5.5 Permanent land development costs

Permanent land development costs which relate to the Group's Plantation Sector are those costs incurred in major infrastructure development and building new access roads on leased lands. The costs have been capitalised and amortised over the shorter of useful lives or remaining lease periods.

## NOTES TO THE FINANCIAL STATEMENTS

Permanent impairment to land development costs are charged to the Statement of Profit or Loss in full or reduced to the net carrying amounts of such assets in the year of occurrence after ascertaining the loss.

### 3.5.6 Derecognition

The carrying amount of an item of property, plant & equipment is derecognised on disposal; or when no future economic benefits are expected from its use. Any gains and losses on derecognition are recognised (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) in the Statement of Profit or Loss. Gains are not classified as revenue.

### 3.5.7 Depreciation

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets, as follows:

Description	Period
Buildings	20 – 50 years
Software	03 – 05 years
Plant & machinery	05 – 20 years
Stores equipment	05 – 10 years
Motor vehicles	04 – 10 years
Furniture, fittings & office equipment	02 – 13 years
Vessels	05 – 25 years

Depreciation of an asset begins when it is available for use and ceases at the earlier of the dates on which the asset is classified as held for sale or is derecognised. The asset's residual values, useful lives are reviewed, and adjusted if appropriate, at each financial year end and adjusted prospectively, if appropriate.

### 3.5.8 Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

#### 3.5.8.1 Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

##### 3.5.8.1.1 Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

Description	Period
Land	02-50 years
Buildings	02-16 years
Machinery & store	
Equipment	20 years
Motor vehicles	02-05 years
Furniture, fittings & office equipment	
Vessels	01-02 years
Mature/Immature plantation	20-33 years

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment as described in Note 3.13 Impairment of non-financial assets.

##### 3.5.8.1.2 Lease liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease

payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

The Group's lease liabilities are included in Interest-bearing loans and borrowings in Note 25 to the Financial Statements.

##### 3.5.8.1.3 Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases. It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

### 3.5.8.2 Group as a lessor

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the Statement of Profit or Loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

### 3.6 Investment Property

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, the investment properties are stated at fair values, which reflect market conditions at the reporting date.

Gains or losses arising from changes in fair values of investment properties are included in the Statement of Profit or Loss in the year in which they arise, including the corresponding tax effect. Fair values are evaluated annually by an accredited external, independent valuer.

Investment properties are derecognised either when they have been disposed of, or when they are permanently withdrawn from use and no future economic benefits are expected from their disposal. The difference between the net disposal proceeds and the carrying amounts of the asset is recognised in Statement of Profit or Loss in the period of derecognition.

Transfers are made to (or from) investment property only when there is a change in use. For a transfer from investment property to owner occupied property the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner occupied property becomes an investment property, the group accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

## 3.7 Intangible Assets

### 3.7.1 Basis of recognition

An Intangible asset is recognised if it is probable that future economic benefits associated with the assets will flow to the Group and cost of the asset can be reliably measured.

### 3.7.2 Basis of measurement

Intangible assets acquired separately are measured on initial recognition at cost. The costs of intangible assets acquired in a business combination is their fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in the Statement of Profit or Loss in the year in which the expenditure is incurred.

### 3.7.3 Useful economic lives and amortisation

The useful lives of intangible assets are assessed as either finite or indefinite. Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired.

The amortisation period and the amortisation method for an intangible asset with finite useful lives are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the Statement of Profit or Loss in the expense category that is consistent with the function of the intangible assets.

Intangible assets with indefinite useful lives are not amortised, but are tested for impairment annually, either

individually or at the cash generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

### 3.7.4 Derecognition of intangible assets

An intangible asset is derecognised upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Any gain or loss arising upon derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Statement of Profit or Loss.

### 3.7.5 Research and development

Research costs are expensed as incurred. Development expenditures on an individual project are recognised as an intangible asset when the Group can demonstrate:

- The technical feasibility of completing the intangible asset so that it will be available for use or sale.
- Its intention to complete and its ability and intention to use or sell the asset.
- How the asset will generate future economic benefits.
- The availability of resources to complete the asset.
- The ability to measure reliably the expenditure during development.

Following initial recognition of the development expenditure as an asset, the asset is carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete and the asset is available for use. It is amortised over the period of expected future benefit. Amortisation is recorded in cost of sales. During the period of development, the asset is tested for impairment annually.

## NOTES TO THE FINANCIAL STATEMENTS

### 3.7.6 Brand name

Brands acquired as part of a business combination, are capitalised if the Brand meets the definition of an intangible asset and the recognition criteria are satisfied. Brand Names, being determined to have an indefinite useful life, are reviewed for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired.

### 3.7.7 Customer list

The present value of the income anticipated from repeat customer lists of travel agents as at the acquisition date is recognised as an intangible asset based on a valuation carried out by an independent valuer. Subsequent to initial recognition, the intangible asset is carried at cost less accumulated amortisation and accumulated impairment losses. Customer lists recognised at the acquisition date are amortised over the period over which income is anticipated to derive from repeat customers and reviewed annually for any impairment in value if there are indicators of impairment.

### 3.7.8 Trade mark

Trade marks purchased, being determined to have an indefinite useful life, are reviewed for impairment, annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired.

### 3.7.9 Other intangible assets

Other intangible assets which are acquired by the Group, with finite useful lives, are measured on initial recognition at cost. Following initial recognition ERP systems are carried at cost less accumulated amortisation and accumulated impairment losses.

### 3.7.10 Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, is recognised in Profit or Loss as incurred.

### 3.7.11 Amortisation

Amortisation of intangible assets with a finite life is recognised in Profit or Loss on a straight-line basis over the estimated useful lives of intangible assets, from the date on which they are available for use. The estimated useful lives are as follows:

Description	Period
Right to generate hydro power	15- 20 years
Right to generate solar power	20 years
Customer List	5 years
ERP Systems	5-10 years

### 3.8 Biological Assets

Biological assets are classified as either mature biological assets or immature biological assets. Mature biological assets are those that have attained harvestable specifications or are able to sustain regular harvests. Immature biological assets are those that have not yet attained harvestable specifications. Tea, rubber, other plantations and nurseries are classified as biological assets.

Biological assets are further classified as bearer biological assets and consumable biological assets. Bearer biological assets include tea and rubber trees, being biological assets that are not intended to be sold or harvested, but are used to grow for purpose of harvesting agricultural produce from such biological assets. Consumable biological assets include managed timber trees those that are to be harvested as agricultural produce or sold as biological assets.

#### 3.8.1 Bearer biological assets

Bearer biological assets are measured at cost less accumulated depreciation and accumulated impairment losses, if any, in terms of LKAS 16 – Property Plant & Equipment.

The cost of land preparation, rehabilitation, new planting, replanting, crop diversification, inter planting and fertilising, etc., incurred between the time of planting and harvesting (when the planted area attains maturity), are

classified as immature plantations. These immature plantations are shown at direct costs plus attributable overheads. The expenditure incurred on bearer biological assets (Tea, Rubber) which comes into bearing during the year, is transferred to mature plantations.

#### 3.8.2 Infilling cost on bearer biological assets

The land development costs incurred in the form of infilling have been capitalised to the relevant mature field, only where the number of plants per hectare exceeded 3,000 plants and, also if it increases the expected future benefits from that field, beyond its pre-infilling performance assessment. Infilling costs so capitalised are depreciated over the newly assessed remaining useful economic life of the relevant mature plantation, or the unexpired lease period, whichever is lower.

Infilling costs that are not capitalised have been charged to the Statement of Profit or Loss in the year in which they are incurred.

#### 3.8.3 Consumable biological asset

Consumable biological assets include managed timber trees those that are to be harvested as agricultural produce or sold as biological assets. Expenditure incurred on consumable biological assets (managed timber trees) is measured on initial recognition and at the end of each reporting period at its fair value less cost to sell in terms of LKAS 41. The cost is treated as approximation to fair value of young plants as the impact on biological transformation of such plants to price during this period is immaterial. The fair values of timber trees are measured

using discounted cash flow (DCF) method taking in to consideration the current market prices of timber, applied to expected timber content of a tree at the maturity by an independent professional valuer. All other assumptions and sensitivity analysis are given in Note 16.

#### The main variables in DCF model concerns

Variable	Comment
Timber content	Estimate based on physical verification of girth, height and considering the growth of each species in different geographical regions. Factor all the prevailing statutory regulations enforced against harvesting of timber coupled with forestry plan of the Group.
Economic useful life	Estimated based on the normal life span of each species by factoring the forestry plan of the Group.
Selling price	Estimated based on prevailing Sri Lankan market price. Factor all the conditions to be fulfilled in bringing the trees in to saleable condition.
Planting cost	Estimated costs for the further development of immature areas are deducted.

The gain or loss arising on initial recognition of consumable biological assets at fair value less cost to sell and from a change in fair value less cost to sell of consumable biological assets are included in Statement of Profit or Loss for the period in which it arises.

Permanent impairments to biological asset are charged to the Statement of Profit or Loss in full and reduced to the net carrying amounts of such asset in the year of occurrence after ascertaining the loss.

#### 3.8.4 Nursery plants

Nursery cost includes the cost of direct materials, direct labour and an appropriate proportion of directly attributable overheads, less provision for overgrown plants.

### 3.9 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and financial liability or equity instrument of another entity.

#### 3.9.1 Financial assets

##### 3.9.1.1 Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (FVOCI) and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under SLFRS 15.

In order for a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows while financial assets classified and measured at fair value through OCI are held within a business model with the objective of both holding to collect contractual cash flows and selling.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

##### 3.9.1.1.1 Business model assessment in the context of Financial Services within the Consumer & Retail Sector

In relation to entities in the Group engaged in financial services, the Group makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

## NOTES TO THE FINANCIAL STATEMENTS

- The stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- How the performance of the portfolio is evaluated and reported to the Company's management;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- How managers of the business are compensated - e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Group's continuing recognition of the assets. Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

### 3.9.1.1.2 Assessment whether contractual cash flows is solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Group considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Group considers:

- Contingent events that would change the amount or timing of cash flows;
- Terms that may adjust the contractual coupon rate, including variable-rate features;
- Prepayment and extension features; and
- Terms that limit the Group's claim to cash flows from specified assets (e.g. non-recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

### 3.9.1.2 Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories;

- Financial assets at amortised cost (debt instruments).
- Financial assets at fair value through OCI with recycling of cumulative gains and losses (debt instruments).

- Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition (equity instruments).
- Financial assets at fair value through profit or loss

### Financial assets at amortised cost (debt instruments)

Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

The Group's financial assets at amortised cost includes trade receivables, short term deposits and cash and cash equivalents.

### Financial assets at fair value through OCI (debt instruments)

For debt instruments at fair value through OCI, interest income, foreign exchange revaluation and impairment losses or reversals are recognised in the Statement of Profit or Loss and computed in the same manner as for financial assets measured at amortised cost. The remaining fair value changes are recognised in OCI. Upon derecognition, the cumulative fair value change recognised in OCI is recycled to Profit or Loss.

The Group's debt instruments at fair value through OCI includes investments in quoted debt instruments included under other non-current financial assets.

### Financial assets designated at fair value through OCI (equity instruments)

Upon initial recognition, the Group can elect to classify irrevocably its equity investments as equity instruments designated at fair value through OCI when they meet the definition of equity under LKAS 32 Financial Instruments: Presentation and are not held for trading. The classification is determined on an instrument-by-instrument basis.

Gains and losses on these financial assets are never recycled to Profit or Loss. Dividends are recognised as other income in the Statement of Profit or Loss when the right of payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at fair value through OCI are not subject to impairment assessment.

This category includes listed and non-listed equity instruments under this category.

#### **Financial assets at fair value through profit or loss**

Financial assets at fair value through Profit or Loss are carried in the Statement of Financial Position at fair value with net changes in fair value recognised in the Statement of Profit or Loss.

This category includes derivative instruments and listed equity investments which the Group had not irrevocably elected to classify at fair value through OCI. Dividends on listed equity investments are recognised as other income in the Statement of Profit or Loss when the right of payment has been established.

A derivative embedded in a hybrid contract, with a financial liability or non-financial host, is separated from the host and accounted for as a separate derivative if: the economic characteristics and risks are not closely related to the host; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the hybrid contract is not measured at fair value through Profit or Loss. Embedded derivatives are measured at fair value with changes in fair value recognised in Profit or Loss. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through Profit or Loss category.

#### **3.9.1.3 Derecognition**

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the Group's Consolidated Financial Position) when:

The rights to receive cash flows from the asset have expired, or

The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of its continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

#### **3.9.1.4 Impairment of financial assets**

The Group recognises an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual

cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognised in two stages. For credit exposures which are determined to have low credit risk at the reporting date and for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

#### **3.9.1.4.1 Impairment model for segments other than the Consumer & Retail sector**

The Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

#### **3.9.1.4.2 Impairment model for the Consumer & Retail sector (Excluding financial services)**

The group measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- Debt securities that are determined to have low credit risk at the reporting date; and
- Other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

## NOTES TO THE FINANCIAL STATEMENTS

Loss allowance for trade receivables is always measured at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the group's historical experience and informed credit assessment and including forward-looking information.

The Group considers a financial asset to be in default when:

- The borrower is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held); or
- Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

### Credit-impaired financial assets

At each reporting date, the group assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- Significant financial difficulty of the borrower or issuer;
- A breach of contract such as a default in payments;
- The restructuring of a loan or advance by the Group on terms that the Group would not consider otherwise;
- It is probable that the borrower will enter bankruptcy or other financial reorganisation; or
- The disappearance of an active market or a security because of financial difficulties.

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

### Write-offs

The gross carrying amount of a financial asset is written off when the Group has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For individual customers, the Group has a policy of writing off the gross carrying amount based on historical experience of recoveries of similar assets. For corporate customers, the Company individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures to recovery of amounts due.

3.9.1.4.3 Impairment model for the Financial Services within the Consumer & Retail sector;

The Company recognises loss allowances for ECL on the following financial instruments that are not measured at FVTPL:

- Financial assets that are debt instruments;

- Lease & loan receivables;
- Financial guarantee contracts issued; and
- Loan commitments issued.
- No impairment loss is recognised on equity investments.
- The Group measures loss allowances at an amount equal to lifetime ECL, except for the following, for which they are measured as 12-month ECL:
- Debt investment securities that are determined to have low credit risk at the reporting date; and
- Other financial instruments (other than lease receivables) on which credit risk has not increased significantly since their initial recognition.

Loss allowances for lease receivables are always measured at an amount equal to lifetime ECL.

The Group considers a debt investment security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'. The Group does not apply the low credit risk exemption to any other financial instruments. Financial instruments for which a 12-month ECL is recognised are referred to as 'Stage 1 financial instruments.

Life-time ECL is the ECL that result from all possible default events over the expected life of the financial instrument. Financial instruments for which a lifetime ECL is recognised but which are not credit-impaired are referred to as 'Stage 2 financial instruments.

### Measurement of ECL

ECL are a probability-weighted estimate of credit losses. They are measured as follows:

- Financial assets that are not credit-impaired at the reporting date: as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive);

- Financial assets that are credit-impaired at the reporting date: as the difference between the gross carrying amount and the present value of estimated future cash flows;
- Undrawn loan commitments: as the present value of the difference between the contractual cash flows that are due to the Group if the commitment is drawn down and the cash flows that the Group expects to receive; and
- Financial guarantee contracts: the expected payments to reimburse the holder less any amounts that the Group expects to recover.

The key inputs used for measurement of ECL are likely to be the term structures of the following variables:

#### Probability of Default (PD)

PD estimates are estimates at a certain date, which are calculated based on statistical models, and assessed using various categories based on homogeneous characteristics of exposures. These statistical models are based on internally compiled data comprising both quantitative and qualitative factors. The Group forecast PD by incorporating forward looking economic variables (unemployment, GDP growth, inflation, interest rate and using lag effect of these variables).

#### Loss Given Default (LGD)

LGD is the magnitude of the likely loss if there is a default. The Group estimates LGD parameters based on the history of recovery rates of claims against defaulted counterparties.

#### Exposure at default (EAD)

EAD represents the expected exposure in the event of a default. The Group derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract including amortisation. The EAD of a financial asset is its gross carrying amount.

The Group has used these parameters from internally-developed statistical models using historical data. All inputs were adjusted to reflect forward-looking information and future economic scenarios.

Impairment losses and releases are accounted for and disclosed separately from modification losses or gains that are accounted for as main adjustment of the financial asset's gross carrying value.

The mechanics of the ECL method are summarised below:

- **Stage 1** : The 12 month ECL is calculated as the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Group calculates the 12-month ECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast EAD and multiplied by the expected LGD and discounted by an approximation to the original EIR.
- **Stage 2** : When a loan has shown a significant increase in credit risk since origination, the Group records an allowance for the LTECLs. The mechanics are similar to those explained above, including the use of multiple scenarios, but PDs and LGDs are estimated over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original EIR.
- **Stage 3** : For loans considered credit-impaired the Group recognises the lifetime expected credit losses. The method is similar to that of Stage 2 assets, with the PD set at 100%.

#### Restructured financial assets

If the terms of a financial asset are renegotiated or modified or an existing financial asset is replaced with a new one due to financial difficulties of the borrower, then an assessment is made

of whether the financial asset should be derecognised and ECL are measured as follows.

- If the expected restructuring will not result in derecognition of the existing asset, then the expected cash flows arising from the modified financial asset are included in calculating the cash shortfalls from the existing asset.
- If the expected restructuring will result in derecognition of the existing asset, then the expected fair value of the new asset is treated as the final cash flow from the existing financial asset at the time of its derecognition. This amount is included in calculating the cash shortfalls from the existing financial asset that are discounted from the expected date of derecognition to the reporting date using the original effective interest rate of the existing financial asset.

#### Credit-impaired financial assets

At each reporting date, the Group assesses whether financial assets carried at amortised cost and debt financial assets carried at FVOCI, and finance lease receivables are credit-impaired (referred to as 'Stage 3 financial assets'). A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired includes the following observable data:

- Significant financial difficulty of the borrower or issuer;
- A breach of contract such as a default or past due event;
- The restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise;
- It is becoming probable that the borrower will enter bankruptcy or another financial reorganisation; or
- The disappearance of an active market for a security because of financial difficulties.

## NOTES TO THE FINANCIAL STATEMENTS

A loan that has been renegotiated due to deterioration in the borrower's condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment. In addition, a retail loan that is overdue for 180 days or more is considered credit-impaired even when the regulatory definition of default is different.

In making an assessment of whether an investment in sovereign debt is credit-impaired, the Company considers the following factors:

- The market's assessment of creditworthiness as reflected in the bond yields.
- The rating agencies' assessments of creditworthiness.
- The country's ability to access the capital markets for new debt issuance.
- The probability of debt being restructured, resulting in holders suffering losses through voluntary or mandatory debt forgiveness.
- The international support mechanisms in place to provide the necessary support as 'lender of last resort' to that country, as well as the intention, reflected in public statements, of governments and agencies to use those mechanisms. This includes an assessment of the depth of those mechanisms and, irrespective of the political intent, whether there is the capacity to fulfil the required criteria.

### Presentation of allowance for ECL in the Statement of Financial Position.

Loss allowances for ECL are presented in the Statement of Financial Position as follows:

- Financial assets measured at amortised cost as a deduction from the gross carrying amount of the assets;
- Loan commitments and financial guarantee contracts: generally, as a provision;

- Where a financial instrument includes both a drawn and an undrawn component, and the Group cannot identify the ECL on the loan commitment component separately from those on the drawn component: the Group presents a combined loss allowance for both components. The combined amount is presented as a deduction from the gross carrying amount of the drawn component. Any excess of the loss allowance over the gross amount of the drawn components presented as a provision; and
- Debt instruments measured at FVOCI - no loss allowance is recognised in the Statement of Financial Position because the carrying amount of these assets is their fair value. However, the loss allowance is disclosed and is recognised in the fair value reserve.

### Write-off

Loans and debt securities are written off (either partially or in full) when there is no reasonable expectation of recovering a financial asset in its entirety or a portion thereof. This is generally the case when the Company determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. This assessment is carried out at the individual asset level. Recoveries of amounts previously written off are included in 'impairment losses on financial instruments' in the Statement of Profit or Loss and OCI.

Financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

## 3.9.2 Financial liabilities

### 3.9.2.1 Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include trade and other payables, bank overdrafts, loans and borrowings, financial guarantee contracts, amounts due to equity accounted investees and derivative financial instruments.

### 3.9.2.2 Subsequent measurement

The measurement of financial liabilities depends on their classification as described below:

#### Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Group that are not designated as hedging instruments in hedge relationships. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognised in the Statement of Profit or Loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss so designated at the initial date of recognition, and only if criteria of SLFRS 9 are satisfied. The Group has not designated any financial liability at fair value through profit or loss.

#### Financial liabilities at amortised cost

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in the Statement of Profit or Loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance costs in the Statement of Profit or Loss.

#### Financial guarantee contracts

Financial guarantee contracts issued by the Group are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the best estimate of the expenditure required to settle the present obligation at the reporting date and the amount recognised less cumulative amortisation.

#### 3.9.2.3 Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit or Loss.

#### 3.9.3 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if,

- There is a currently enforceable legal right to offset the recognised amounts and
- There is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

#### 3.9.4 Derivative financial instruments and hedge accounting

##### 3.9.4.1 Initial recognition and subsequent measurement

The Group uses derivative financial instruments, such as forward currency contracts to hedge its foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

For the purpose of hedge accounting, hedges are classified as cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment.

At the inception of a hedge relationship, the documentation includes identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Group will assess whether the hedging relationship meets the hedge effectiveness requirements (including the analysis of sources of hedge ineffectiveness and how the hedge ratio is determined).

A hedging relationship qualifies for hedge accounting if it meets all of the following effectiveness requirements:

- There is 'an economic relationship' between the hedged item and the hedging instrument.
- The effect of credit risk does not 'dominate the value changes' that result from that economic relationship.
- The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Group actually hedges and the quantity of the hedging instrument that the Group actually uses to hedge that quantity of hedged item.

Hedges that meet all the qualifying criteria for hedge accounting are accounted for, as described below:

#### Cash flow hedges

The effective portion of the gain or loss on the hedging instrument is recognised in OCI in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the Statement of Profit or Loss. The cash flow hedge reserve is adjusted to the lower of the cumulative gain or loss on the hedging instrument and the cumulative change in fair value of the hedged item.

The Group uses forward currency contracts as hedges of its exposure to foreign currency risk in forecast transactions and firm commitments. The ineffective portion relating to foreign currency contracts is recognised as other expense.

The Group designates only the spot element of forward contracts as a hedging instrument. The forward element is recognised in OCI and accumulated in a separate component of equity under cost of hedging reserve.

The amounts accumulated in OCI are accounted for, depending on the nature of the underlying hedged transaction. If the hedged transaction subsequently results in the recognition of a non-financial item, the amount accumulated in equity is removed from the separate component of equity and included in the initial cost or other carrying amount of the hedged asset or liability. This is not a reclassification adjustment and will not be recognised in OCI for the period. This also applies where the hedged forecast transaction of a non-financial asset or non-financial liability subsequently becomes a firm commitment for which fair value hedge accounting is applied.

For any other cash flow hedges, the amount accumulated in OCI is reclassified to Profit or Loss as a reclassification adjustment in the same period or periods during which the hedged cash flows affect profit or loss.

## NOTES TO THE FINANCIAL STATEMENTS

If cash flow hedge accounting is discontinued, the amount that has been accumulated in OCI must remain in accumulated OCI if the hedged future cash flows are still expected to occur. Otherwise, the amount will be immediately reclassified to profit or loss as a reclassification adjustment. After discontinuation, once the hedged cash flow occurs, any amount remaining in accumulated OCI must be accounted for depending on the nature of the underlying transaction as described above.

### 3.10 Fair Value of Financial Instruments

The fair value of financial instruments that are traded in active markets at each reporting date is determined by reference to quoted market prices or dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs.

For financial instruments not traded in an active market, the fair value is determined using appropriate valuation techniques. Such techniques may include:

Using recent arm's length market transactions

Reference to the current fair value of another instrument that is substantially the same

A discounted cash flow analysis or other valuation models.

An analysis of fair values of financial instruments and further details as to how they are measured are provided in Note 19 to the Financial Statements.

### 3.11 Non-Current Assets held for Sale and Discontinued Operations

The Group classifies non-current assets and disposal groups as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use.

Non-current assets and disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Costs to

sell are the incremental costs directly attributable to the disposal of an asset (disposal group), excluding finance costs and income tax expense.

The criteria for held for sale classification is regarded as met only when the sale is highly probable and the asset or disposal group is available for immediate sale in its present condition. Actions required to complete the sale should indicate that it is unlikely that significant changes to the sale will be made or that the decision to sell will be withdrawn. Management must be committed to the plan to sell the asset and the sale is expected to be completed within one year from the date of the classification.

Property, plant and equipment and intangible assets are not depreciated or amortised once classified as held for sale.

Assets and liabilities classified as held for sale are presented separately as current items in the Statement of Financial Position.

A disposal group qualifies as discontinued operation if it is a component of an entity that either has been disposed of, or is classified as held for sale, and:

- Represents a separate major line of business or geographical area of operations;
- Is part of a single coordinated plan;
- to dispose of a separate major line of business or geographical area of operations; Or
- Is a subsidiary acquired exclusively with a view to resale

Discontinued operations are excluded from the results of continuing operations and are presented as a single amount as profit or loss after tax from discontinued operations in the Statement of Profit or Loss.

Additional disclosures are provided in Note 39. All other notes to the Financial Statements include amounts for continuing operations, unless indicated otherwise.

### 3.12 Inventories

Inventories are valued at the lower of cost and net realisable value.

Costs incurred in bringing each product to its present location and condition are accounted for as follows:

All inventory items, except manufactured inventories and work-in-progress are measured at weighted average directly attributable cost.

Manufactured inventories and work-in-progress are measured at weighted average factory cost which includes all direct expenditure and appropriate share of production overhead based on normal operating capacity but excluding borrowing costs.

Net realisable value is the estimated selling price in the ordinary course of business less, the estimated cost of completion and the estimated costs necessary to make the sale.

#### 3.12.1 Agricultural produce harvested from biological assets

Agricultural produce harvested from its biological assets are measured at their fair value less cost to sell at the point of harvest. The finished and semi-finished inventories from agriculture produce are valued by adding the cost of conversion to the fair value of the agricultural produce.

### 3.13 Impairment of Non-Financial Assets

The Group assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs of disposal and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying

amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Group bases its impairment calculation on most recent detailed budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. A long-term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses of continuing operations are recognised in the Statement of Profit or Loss in expense categories consistent with the function of the impaired asset, except for properties previously revalued with the revaluation taken to Other Comprehensive Income. For such properties, the impairment is recognised in Other Comprehensive Income up to the amount of any previous revaluation.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the

assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit or Loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Goodwill is tested for impairment annually as at 31 March and when circumstances indicate that the carrying value may be impaired. Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

Intangible assets with indefinite useful lives are tested for impairment annually as at 31 March at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

### 3.14 Cash and Cash Equivalents

Cash in hand and at bank and short-term deposits in the Statement of Financial Position comprise cash at banks and on hand and short-term deposits with a maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the Consolidated Statement of Cash Flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts and short-term borrowings as they are considered an integral part of the Group's cash management.

## 3.15 Employee Benefits

### 3.15.1 Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to Provident and Trust Funds covering all employees are recognised as an employee benefit expense in profit or loss in the periods during which services are rendered by employees.

The Group contributes 12% and 3% of gross emoluments to employees as Provident Fund and Trust Fund contribution respectively.

### 3.15.2 Defined benefit plans

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The defined benefit is calculated by independent actuaries using Projected Unit Credit (PUC) method as recommended by LKAS 19 - "Employee benefits". The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related liability. The present value of the defined benefit obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. Key assumptions used in determining the defined retirement benefit obligations are given in Note 28. Any changes in these assumptions will impact the carrying amount of defined benefit obligations. Actuarial gains or losses are recognised in full in the Other Comprehensive Income.

Provision has been made for retirement gratuities from the beginning of service for all employees, in conformity with LKAS 19 on employee benefits. However, for entities of the Group operating in Sri Lanka, under the Payment of Gratuity Act No. 12 of 1983, the liability to an employee arises only on completion of 5 years of continued service.

## NOTES TO THE FINANCIAL STATEMENTS

The liability is not externally funded. The settlement of the liability is based on legal liability method or the following basis as applied by the respective entities.

Length of each service (Years) No. of month's salary for completed year of service.

Length of each service (Years)	No. of months salary for completed year of service
Up to 20	1/2
20 up to 25	3/4
25 up to 30	1
30 up to 35	1 1/4
Over 35	1 1/2

### 3.15.3 Short-term benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

### 3.16 Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Group expects some or all of a provision to be reimbursed, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the Statement of Profit or Loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

### 3.17 Grants and Subsidies

Grants and subsidies are recognised where there is a reasonable assurance that the grant / subsidy will be received and all attaching conditions, if any, will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed.

Grants and subsidies related to assets, including non-monetary grants at fair value are deferred in the Statement Financial Position and credited to the Statement of Profit or Loss over the useful life of the asset.

### 3.18 Warranties

The Group provides warranties for general repairs of defects that existed at the time of sale, as required by law. Provisions related to these assurance-type warranties are recognised when the product is sold or the service is provided to the customer. Initial recognition is based on historical experience. The initial estimate of warranty-related costs is revised annually.

### 3.19 Contingent Liabilities Recognised in a Business Combination

A contingent liability recognised in a business combination is initially measured at its fair value. Subsequently, it is measured at the higher of the amount that would be recognised in accordance with the requirements for provisions above or the amount initially recognised less (when appropriate) cumulative amortisation recognised in accordance with the requirements for revenue recognition.

### 3.20 Ordinary shares

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity, net of any tax effects.

### 3.21 Regulatory Provisions

#### 3.21.1 Deposit insurance scheme

In terms of the Finance Companies Direction No. 02 of 2010 - 'Insurance of Deposit Liabilities' issued on 27th September 2010 all Registered Finance Companies are required to insure their deposit liabilities in the Deposit Insurance Scheme operated by the Monetary Board in terms of Sri Lanka Deposit Insurance Scheme Regulations No. 01 of 2010 issued under Sections 32A to 32E of the Monetary Law Act with effect from 1st October 2010.

Deposits to be insured include demand, time and savings deposit liabilities and exclude the following:

- Deposit liabilities to member institutions.
- Deposit liabilities to Government of Sri Lanka.
- Deposit liabilities to Directors, Key Management Personnel and other related parties as defined in Finance Companies Act Direction No. 03 of 2008 on Corporate Governance of Registered Finance Companies.
- Deposit liabilities held as collateral against any accommodation granted.
- Deposit liabilities falling within the meaning of dormant deposits in terms of the Finance Companies Act, funds of which have been transferred to the Central Bank of Sri Lanka.
- Registered Finance Companies are required to pay a premium of 0.15% on eligible deposit liabilities as at end of the month to be payable within a period of 15 days from the end of the respective month.

#### 3.21.2 Reserve fund

Singer Finance (Lanka) PLC, a subsidiary of the Group maintains a reserve fund in compliance with Direction No. 01 of 2003 - Central Bank (Capital Funds) issued to Finance Companies and it will be used for only the purpose specified in the said Direction above. The details of the reserve fund are disclosed in Note 23.1.2.

## 3.22 Revenue from Contracts with Customers

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services.

The Group has several operating segments which are described in Note 41 to these Financial Statements. In all operating segments, the Group has generally concluded that it is the principal in its revenue arrangements, except for agency services described in 3.22.2.3 below, because it typically controls the goods or services before transferring them to the customer.

### 3.22.1 Sale of goods

Revenue from sale of goods is recognised at the point in time when control of the asset is transferred to the customer, generally on delivery of the goods. The Group considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated (e.g., warranties, customer loyalty points). In determining the transaction price for the sale of goods, the Group considers the effects of variable consideration, the existence of significant financing components, non-cash consideration, and consideration payable to the customer (if any).

#### 3.22.1.1 Variable consideration

If the consideration in a contract includes a variable amount, the Group estimates the amount of consideration to which it will be entitled in exchange for transferring the goods to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

#### 3.22.1.2 Significant financing component

The Group receives short-term advances from its customers. Using the practical expedient for short term advances in SLFRS 15, the Group does not adjust the promised amount of consideration for the effects of a significant financing component if it expects, at contract inception, that the period between the transfer of the promised good or service to the customer and when the customer pays for that good or service will be one year or less. Where long-term advances are received from customers, the transaction price for such contracts is discounted, using the rate that would be reflected in a separate financing transaction between the Group and its customers at contract inception, to take into consideration the significant financing component.

#### 3.22.1.3 Warranty obligations

In several sectors, the Group provides warranties for general repairs of defects that existed at the time of sale. These assurance type warranties are accounted for under LKAS 37 Provisions, Contingent Liabilities and Contingent Assets. The Group also provides a warranty beyond fixing defects that existed at the time of sale in several sectors. These service-type warranties are sold either separately or bundled together with the sale of goods. Contracts for bundled sales of goods and a service-type warranty comprise two performance obligations because the promises to transfer the equipment and to provide the service type warranty are capable of being distinct. Using the relative stand-alone selling price method, a portion of the transaction price is allocated to the service type warranty and recognised as a contract liability. Revenue is recognised over the period in which the service-type warranty is provided based on the time elapsed.

#### 3.22.1.4 Loyalty points programme

The Group has loyalty point programmes, in several sectors, which allows customers to accumulate points that can be redeemed against subsequent purchases. The loyalty points give rise to a separate performance obligation

as they provide a material right to the customer. A portion of the transaction price is allocated to the loyalty points awarded to customers based on relative stand-alone selling price and recognised as a contract liability until the points are redeemed. Revenue is recognised upon redemption of products by the customer.

When estimating the stand-alone selling price of the loyalty points, the Group considers the likelihood that the customer will redeem the points. The Group updates its estimates of the points that will be redeemed on a quarterly basis and any adjustments to the contract liability balance are charged against revenue.

#### 3.22.1.5 Non-cash considerations

Certain sectors of the Group have arrangements where customers are offered a scheme where new goods could be acquired through part exchange of old goods.

The Group estimates the fair value of the non-cash consideration by reference to its market price. If the fair value cannot be reasonably estimated, the non-cash consideration is measured indirectly by reference to the stand-alone selling price of the goods sold.

#### 3.22.1.6 Consignment arrangements

Certain Sectors engage in business which includes the delivery of goods to another party but retain control of the goods. Examples of such arrangements may include the delivery of a good to a dealer or a distributor for sale to an end customer of the Group. Revenue on such arrangements are recognised at the point of sale to an end customer net of commission expenses incurred.

### 3.22.2 Rendering of services

Several entities within the Group engage in the provision of services to its customers. The Group recognises revenue from services over time, applying methods to measure progress towards complete satisfaction of the service, because the customer simultaneously receives and consumes the benefits provided by the Group.

## NOTES TO THE FINANCIAL STATEMENTS

### 3.22.2.1 Hospitality revenue

Accommodation revenue generated by the hospitality sector is recognised on the rooms occupied on a daily basis. Food and beverage revenue is recognised at the time of related sale.

### 3.22.2.2 Maintenance services

Certain sectors within the group provide customers with complementary servicing of consumer durable goods sold by the Group within a defined period. Such servicing arrangements are identified as separate performance obligations and revenue is recognised when the complementary services are provided to the customer.

### 3.22.2.3 Agency services

When the Group acts in the capacity of an agent rather than as the principal in a transaction, the revenue recognised is the net amount that it retains for its agency services.

### 3.22.3 Construction and installation contracts

In relation to contracts which involve the construction and installation of assets on behalf of its customers, the Group assesses the nature of the respective contracts as to whether such is reflective of goods or services transferred at a point in time or satisfied over a period of time.

The Group determines that arrangements include transfers of a good or service over time when any of the following criteria are met:

- The customer simultaneously receives and consumes the benefits provided by the entity's performance as the entity performs.
- The entity's performance creates or enhances an asset (e.g., work in progress) that the customer controls as the asset is created or enhanced
- The entity's performance does not create an asset with an alternative use to the entity and the entity has an enforceable right to payment for performance completed to date.

When either of the above criteria is met, the Group recognises revenue on the respective contracts similar to the rendering of services. If an entity is unable to demonstrate that control transfers over time, the presumption is that control transfers at a point in time, and revenue is recognised similar to the sale of goods.

### 3.22.4 Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Group performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

### 3.22.5 Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Group transfers goods or services to the customer, a contract liability is recognised when the payment is made, or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Group performs under the contract.

### 3.22.6 Assets and liabilities arising from rights of return

#### 3.22.6.1 Right of return assets

A right-of-return asset is recognised for the right to recover the goods expected to be returned by customers. The asset is measured at the former carrying amount of the inventory, less any expected costs to recover the goods and any potential decreases in value. The Group updates the measurement of the asset for any revisions to the expected level of returns and any additional decreases in the value of the returned products.

#### 3.22.6.2 Refund liabilities

A refund liability is recognised for the obligation to refund some or all of the consideration received (or receivable) from a customer. The Group's refund liabilities arise from customers' right of return. The liability is measured at the amount the Group ultimately expects it will have to return to the customer. The Group updates its estimates of refund liabilities (and the corresponding change in the transaction price) at the end of each reporting period.

#### 3.22.6.3 Cost to obtain a contract

In several sectors, the Group pays sales commission to its employees and third party representative for sales carried out. The Group applies the optional practical expedient to immediately expense costs to obtain a contract if the amortisation period of the asset that would have been recognised is one year or less. As such, sales commissions are immediately recognised as an expense.

## 3.23 Income relating to Financial Services in Consumer and Retail Sector

### 3.23.1 Interest

Interest income and expense are recognised in Profit or Loss using the effective interest method. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial assets or liability (or, where appropriate a shorter period) to the carrying amount of the financial asset or liability. When calculating the effective interest rate, the Company estimates future cash flows considering all contractual terms of the financial instruments, but not future credit losses.

The calculation of effective interest rate includes all transaction costs and fees and points paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or liability. Interest income is presented in finance income in the Statement Profit or Loss.

### 3.23.2 Hire purchase, lease, loans and advances

The excess of aggregated contract receivables over the cost of the hired assets constitutes the total unearned income at the commencement of a contract. The unearned income is recognised as revenue as it is earned, using the effective interest rate method.

#### 3.23.2.1 Service fee income on hire purchase

Service fee income is recognised over the length of hire purchase agreement using the effective interest rate method. In the event of early termination of the hire purchase contract or cash conversion remaining deferred, service income is recognised when such contract is recognised or converted.

### 3.23.3 Fees and commission

Fees and commission income and expense that are integral to the effective interest rate on a financial asset or liability are included in the measurement of the effective interest rate. Other fees and commission income, including account servicing fees, are recognised as the related services are performed.

## 3.24 Other Income

### 3.24.1 Dividends

Dividend income is recognised in Profit or Loss on the date the entity's right to receive payment is established, which in the case of quoted securities is the ex-dividend date.

### 3.24.2 Grants

Grants are recognised initially as deferred income when there is a reasonable assurance that they will be received and that the Group will comply with the conditions associated with the grant. Grants that compensate the Group for expenses incurred are recognised in profit or loss on a systematic basis in the periods in which the expenses are recognised. Grants that compensate the Group for the cost of an asset are recognised in profit or loss on a systematic basis over the useful life of the asset.

### 3.24.3 Gains and losses

Gains and losses on disposal of an item of property, plant & equipment are determined by comparing the net sales proceeds with the carrying amounts of property, plant & equipment and are recognised net within "other income" in Profit or Loss.

### 3.24.5 Other income

Other income is recognised on an accrual basis.

## 3.25 Expenses

Expenses are recognised in the Profit or Loss on the basis of a direct association between the cost incurred and the earnings of specific items of income. All expenditure incurred in the running of the business has been charged to income in arriving at the profit for the year. For the purpose of presentation of the Statement of Profit or Loss, the function of expenses method is adopted.

Repairs and renewals are charged to Profit or Loss in the year in which the expenditure is incurred.

### 3.25.1 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

## 3.26 Finance income

Finance income comprises interest income on funds invested, dividend income, changes in the fair value of financial assets at fair value through profit or loss, and gains on hedging instruments that are recognised in the Statement of Profit or Loss. Interest income is recognised as it accrues in the Statement of Profit or Loss.

## 3.27 Finance Cost

Finance cost comprise interest expense on borrowings, unwinding of the discount on provisions, changes in the fair value of financial assets at fair value through profit or loss, and losses on hedging instruments that are recognised in the Statement of Profit or Loss.

## 3.28 Tax Expense

Tax expense comprises current and deferred tax. Current tax and deferred tax are recognised in the Statement of Profit or Loss except to the extent that it relates to a business combinations, or items recognised directly in Equity or in Other Comprehensive Income.

### 3.28.1 Current tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date in the countries where the Group operates and generates taxable income.

Current tax relating to items recognised directly in Other Comprehensive Income is recognised in Other Comprehensive Income and not in the Statement of Profit or Loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

### 3.28.2 Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

## NOTES TO THE FINANCIAL STATEMENTS

- In respect of taxable temporary differences associated with investments in subsidiaries, equity accounted investee and interests in joint arrangements, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of deductible temporary differences associated with investments in subsidiaries, equity accounted investee and interests in joint arrangements, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside the Statement of Profit or Loss is recognised outside the Statement of Profit or Loss. Deferred tax items are recognised in correlation to the underlying transaction either in Other Comprehensive Income or directly in equity.

Tax benefits acquired as part of a business combination, but not satisfying the criteria for separate recognition at that date, would be recognised subsequently if new information about facts and circumstances changed.

The adjustment would either be treated as a reduction to goodwill (as long as it does not exceed goodwill) if it was incurred during the measurement period or in the Statement of Profit or Loss.

The Group offsets deferred tax assets and deferred tax liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

### 3.28.3 Value added tax on financial services

VAT on Financial Services is calculated in accordance with the amended VAT Act No. 07 of 2013. The base for the computation of Value Added Tax on Financial Services is the accounting profit before income tax adjusted for the economic depreciation and emolument of employees computed on prescribed rate.

### 3.28.4 Crop insurance levy

As per the provisions of the Section 14 of the Finance Act No. 12 of 2013, the CIL was introduced with effect from 1st April 2013 and is payable to the National Insurance Trust Fund. Currently, the CIL is Payable at 1% of the profit after tax.

### 3.28.5 Sales tax

Expenses and assets are recognised net of the amount of sales tax, except:

- When the sales tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the sales tax is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable.
- When receivables and payables are stated with the amount of sales tax included.

The net amount of sales tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the Statement of Financial Position.

## 4. GENERAL

### 4.1 Events Occurring After the Reporting Date

All material post reporting date events have been considered and where appropriate adjustments or disclosures have been made in the respective notes to the Financial Statements.

### 4.2 Earnings Per Share

The Group presents basic and diluted earnings per share (EPS) for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares.

### 4.3 Statement of Cash Flows

The Statement of Cash Flows has been prepared using the “indirect method”.

Interest paid is classified as financing cash flow. Grants received, which are related to purchase and construction of property, plant & equipment are classified as investing cash flows. Dividend and interest income are classified as cash flows from investing activities.

Dividends paid are classified as financing cash flows. Dividends received by Hayleys PLC, which is an investment company, are classified as operating cash flows and are not disclosed separately in the Company Cash Flow Statement.

### 4.4 Segment Reporting

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group’s other components. All operating segments’ operating results are reviewed regularly by the Chairman and the Board to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available.

Segment results that are reported to the Chairman include items directly attributable to a segment as well as those that can be allocated on a reasonable basis.

Segment capital expenditure is the total cost incurred during the period to acquire property, plant and equipment, and intangible assets other than goodwill.

### 4.5 Changes in Accounting Policies and Disclosures

#### 4.5.1 New and amended standards and interpretations

No significant impact resulted on the financial statements of the Group due to changes in Accounting Standards and disclosures during the year.

### 4.6 Standards Issued but not yet Effective

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Group’s financial statements are disclosed below. The Group intends to adopt these new and amended standards and interpretations, if applicable, when they become effective.

#### 4.6.1 SLFRS 17 Insurance Contracts

SLFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, SLFRS 17 will replace SLFRS 4 Insurance Contracts (SLFRS 4) that was issued in 2005. SLFRS 17 applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply. The overall objective of SLFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in SLFRS 4, which are largely based on grandfathering previous local accounting policies, SLFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of SLFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

SLFRS 17 is effective for annual reporting periods beginning on or after 1 January 2026, with comparative figures required. Early application is permitted, provided the entity also applies SLFRS 9 and SLFRS 15 on or before the date it first applies SLFRS 17.

#### 4.6.2 Classification of Liabilities as Current or Non-current - Amendment to LKAS 1

Amendments to LKAS 1 relate to classification of liabilities with covenants as current or non-current. The amendments clarify that if an entity’s right to defer settlement of a liability is subject to the entity complying with the required covenants only at a date subsequent to the reporting period (“future covenants”), the entity has a right to defer settlement of the liability even if it does not comply with those covenants at the end of the reporting period. The requirements apply only to liabilities arising from loan arrangements.

The amendments are effective for annual periods beginning on or after 1 January 2024

#### 4.6.3 Lease Liability in a Sale and Leaseback - Amendment to SLFRS 16

The amendments to SLFRS 16 Leases specifies the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction, to ensure the seller-lessee does not recognise any amount of the gain or loss that relates to the right of use it retains. A seller-lessee applies the amendment retrospectively in accordance with LKAS 8 to sale and leaseback transactions entered into after the date of initial application.

The amendments are effective for annual periods beginning on or after 1 January 2024

#### 4.6.4 Disclosures: Supplier Finance Arrangements - Amendments to LKAS 7 and SLFRS 7

The amendments clarify the characteristics of supplier finance arrangements and require an entity to provide information about the impact of supplier finance arrangements on liabilities and cash flows, including terms and conditions of those arrangements, quantitative information on liabilities related to those arrangements as at the beginning and end of the reporting period and the type and effect of non-cash changes in the carrying amounts of those arrangements.

## NOTES TO THE FINANCIAL STATEMENTS

The amendments are effective for annual periods beginning on or after 1 January 2024

### 4.6.5 International Tax Reform—Pillar Two Model Rule - Amendments to LKAS 12

The amendments to LKAS 12 introduce a mandatory exception in LKAS 12 from recognising and disclosing deferred tax assets and liabilities related to Pillar Two income taxes. An entity is required to disclose that it has applied the exception to recognising and disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes.

The amendments are effective for annual periods beginning on or after 1 January 2024.

## 5. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of Financial Statements in conformity with SLFRS/LKAS's requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses.

Judgements and estimates are based on historical experience and other factors, including expectations that are believed to be reasonable under the circumstances. Hence actual experience and results may differ from these judgements and estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised if the revision affects only that period and any future periods.

Information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the Financial Statements is included in the following notes.

### 5.1 Going concern

The Directors have made an assessment of the Group's ability to continue as a going concern and is satisfied that it has the resources to continue in business for the foreseeable future. The assessment includes the existing and anticipated effects from the present macro-economic conditions, the circumstances of the external environment, or are inconsistent with historical trends. Management is not aware of any material uncertainties that may cast significant doubt upon the Group's ability to continue as a going concern and the management do not intend either to liquidate or to cease operations of the Group. Therefore, the Financial Statements continue to be prepared on the going concern basis.

### 5.2 Measurement of the recoverable amount of cash-generating units containing goodwill

The Group tests annually whether goodwill requires impairment, in accordance with the accounting policy stated in Note 3.13. The basis of determining the recoverable amounts of cash generating units and key assumptions used are given in Note 17 to the Financial Statements.

### 5.3 Taxation

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits, together with future tax planning strategies.

The Group has Rs. 15.39 bn (2023: Rs. 11.92 bn) of tax losses carried forward. These losses relate to subsidiaries that have a history of losses and may not be used to offset taxable income elsewhere in the Group. The subsidiaries neither have any taxable temporary difference nor any tax planning opportunities

available that could partly support the recognition of these losses as deferred tax assets.

On this basis, the Group has determined that it cannot recognise deferred tax assets on tax losses carried forward and described in Note 11 to the Financial Statements.

### 5.4 Measurement of the employee benefit obligations

The present value of the employee benefit obligations is determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, mortality rates and future pension increases.

Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is the discount rate. In determining the appropriate discount rate, management considers the interest rates of government bonds, and extrapolated as needed along the yield curve to correspond with the expected term of the defined benefit obligation.

The mortality rate is based on publicly available mortality tables. Those mortality tables tend to change only at intervals in response to demographic changes. Future salary increases are based on expected future inflation rates. Further details about employee benefit obligation are provided in Note 28 to the Financial Statements.

### 5.5 Revaluation of property, plant and equipment and investment properties

The Group measures the freehold land (classified as property, plant and equipment) at revalued amounts, with changes in fair value being recognised

in OCI. The freehold lands were valued by reference to transactions involving properties of a similar nature, location and condition. In addition, the Group carries its investment properties at fair value, with changes in fair value being recognised in the profit or loss. For investment properties, valuation methodologies such as market approach, and income approach (the discounted cash flow (DCF) model) for properties lacked comparable market data were used.

The Group engaged a valuation specialist to assess fair values as at 31 March 2022 for the freehold lands and at 31 March 2024 for the investment properties. The key assumptions used to determine the fair value of the properties and sensitivity analyses are provided in Notes 13 and 15 to the Financial Statements.

#### **5.6 Valuation of inventories**

The Group has applied judgment in the determination of impairment in relation to inventories that are slow moving or obsolete. The Group's impairment assessment in relation to such inventories take into account factors such as the use of significant judgement over identifying inventories requiring write down to NRV, including consideration of product life cycles, nature of inventories, future inventory demand and quality/grading assessments, and the existence of significant estimates applied in the determination of NRV, considering expected sales prices and allowance policies based on historical sales.

#### **5.7 Impairment allowance for current and non-current trade and other receivables in the Consumer & Retail segment of the Group**

The Group uses a provision matrix to calculate ECLs for loans and trade receivables. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns (i.e., by geography, product type, customer type and rating, and coverage by letters of credit and other forms of credit insurance).

The provision matrix is initially based on the Group's historical observed default rates. The Group will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions are expected to deteriorate over the next year which can lead to an increased number of defaults in the relevant sectors, the historical default rates are adjusted. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future. The information about the ECLs on the Group's loans and trade receivables is disclosed in Note 22 to the Financial Statements.

## NOTES TO THE FINANCIAL STATEMENTS

### 11.4 General Provisions

Corporate Income Taxes of companies resident in Sri Lanka have been computed in accordance with the Inland Revenue Act No. 24 of 2017 as amended. Corporate Taxes of non-resident companies in the Group have been computed in keeping with the domestic statutes in the respective countries of their residence.

Sri Lankan resident companies in the Group, excluding those which enjoy a tax holiday or concessionary tax rates, were liable to income tax during the year of assessment 2023/24 at the rate of 30%.

### 11.5 Tax Exemptions

#### 11.5.1 In terms of the Inland Revenue Act

Solar One Ceylon (Pvt) Ltd is entitled for a 10 year income tax holiday. Tax holiday period has commenced during the Y/A 2016/17.

Alumex PLC is entitled for an income tax exemption for a period of 10 years for its undertaking associated with sale of construction materials recycled in a site established in Sri Lanka to recycle materials which were already used in the construction industry. The tax holiday period has commenced during the Y/A 2022/23.

Following resident companies in Sri Lanka are enjoying an income tax exemption on profits earned from farming of agricultural produce. The tax holiday period has commenced during the Y/A 2019/20 and will accordingly end with the Y/A 2023/24.

- Kelani Valley Plantations PLC
- Talawakelle Tea Estates PLC
- Horana Plantations PLC.
- Hayleys Agro Bio Tech (Pvt) Ltd.
- Quality Seeds (Pvt) Ltd.

Following resident companies in Sri Lanka are enjoying an income tax exemption on profits earned from qualifying foreign service income:

- Civaro International (Pvt) Ltd.
- Hayleys Energy Services (Pvt) Ltd.
- Sharaf Shipping Agency (Pvt) Ltd
- Sri Lanka Shipping Company Ltd.
- Intermarc Marine (Pvt) Ltd.
- Haycarb PLC
- Innovative Solutions Lanka (Pvt) Ltd
- Hayleys Aventura (Pvt) Ltd
- Hayleys Lifesciences (Pvt) Ltd
- Hayleys Business Solutions International (Pvt) Ltd
- Dipped Products PLC

Following resident companies are entitled for an income tax exemption to the extent of the profits derived from a qualifying foreign source:

- Bonterra Ltd.
- Chas P Hayley & Company (Pvt) Ltd.
- Hayleys Fibre PLC
- Puritas (Pvt) Ltd

### 11.5.2 In terms of BOI Agreements

Companies enjoying Tax Holidays under BOI Law are as follows:

Martin Bauer Hayleys (Pvt) Ltd.	10 year tax holiday ending March 31, 2028
Sun Tan Beach Resorts Ltd.	15 year tax holiday ending March 31, 2030

### On Investment Income

#### 11.5.3 Dividend Income

Many resident companies in Sri Lanka receiving dividend income enjoy the tax exemption on qualifying quantum of such dividend based on the following exemptions:

- Dividend receipt from non-resident entity;
- A dividend paid by a resident company which has entered into an agreement with the BOI and which is engaged in specified qualifying businesses such as offshore business and/or entrepot trade.
- A dividend paid by a resident company to a member to the extent that such dividend payment is attributable to, or derived from, another dividend received by that resident company or another resident company

#### Interest accrued on foreign currency deposits

Many resident companies in Sri Lanka enjoy an income tax exemption on interest income accruing or deriving from moneys lying to its credit in foreign currency in a foreign currency account opened by such company in any commercial bank or in any specialised bank, with the approval of the Central Bank of Sri Lanka.

### 11.6. Concessionary Tax Rates

#### 11.6.1. BOI Companies

##### (A) In terms of the Inland Revenue Act

As per agreements signed with the Board of Investment, the business income of the Companies listed below would be subject to the following concessionary tax rates. Periods indicated below:

Hayleys Neluwa Hydro Power (Pvt) Ltd.	10% up to August, 2024 (Rate applied from September, 2022)
Nirmalapura Wind Power (Pvt) Ltd.	15% indefinitely
TTEL Somerset Hydro Power (Pvt) Ltd.	20% Indefinitely
TTEL Hydro Power Company (Pvt) Ltd.	20% Indefinitely
Neluwa Cascade Hydro Power (Pvt) Ltd	20% indefinitely
Lanka Bunkering Services (Pvt) Ltd.	15% indefinitely
Hayleylines Ltd.	15% Indefinitely
Moceti International Pvt Ltd.	15% Indefinitely
Regnis Appliances (Pvt) Ltd	20% Indefinitely

#### 11.6.2. On Investment Income

##### Dividend Income

In terms of the Inland Revenue Act No. 24 of 2017 as amended, liable dividends declared are subject to a mandatory final Advance Income Tax of 15% at source.

## NOTES TO THE FINANCIAL STATEMENTS

## 12. EARNINGS PER SHARE AND DIVIDENDS PER SHARE

### 12.1 Earnings Per Share

#### Basic Earnings per Share

The calculation of basic earnings per share is based on the profit attributable to owners of the parent and the weighted average number of ordinary shares outstanding during the year.

#### Diluted Earnings per Share

The calculation of diluted earnings per share is based on the profit attributable to owners of the parent and the weighted average number of ordinary shares outstanding after adjustment for the effect of all dilutive potential ordinary shares.

There were no potentially dilutive ordinary shares outstanding at any time during the year /previous year.

Basic/diluted earning per share calculated as follows.

For the year ended 31st March	CONSOLIDATED		COMPANY	
	2024	2023	2024	2023
Profit attributable to equity holders of the Parent (Rs.'000)	6,888,770	16,351,845	1,333,905	1,901,020
Weighted average number of ordinary shares of the parent ( No.)	750,000,000	750,000,000	750,000,000	750,000,000
Basic/diluted earnings per share (Rs.)	9.19	21.80	1.78	2.53

### 12.2 Dividends

For the year ended 31st March	COMPANY	
	2024	2023
Interim/final dividend (Rs'000)	4,012,500	4,012,500
Dividend per ordinary share (Rs.)	5.35	5.35

## NOTES TO THE FINANCIAL STATEMENTS

**13.8** Land owned by the Group was revalued as at 31st March 2022 by independent Chartered Valuation Surveyors. The fair value of the land was determined based on transaction observed in the market, appropriately adjusted for differences in the nature, location or condition of the specific property.

Directors believe that there are no significant differences in the market values compared to the last revaluation date.

**13.9** Lands owned by the Group other than that mentioned above have been stated at cost as the appreciation in value is insignificant. Further information is provided on page 454 to 457.

**13.10** There has been an impairment of property, plant & equipment amounting to Rs. 22.83 mn (2023 - 1.45 mn). Details are as follows.

	2024 Rs.'000	2023 Rs.'000
Machinery & Stores Equipment	15,634	1,448
Furniture, fittings and office equipment	7,198	-
<b>Total impairment</b>	<b>22,832</b>	<b>1,448</b>

The impairment losses on machinery and stores equipment of Rs. 15.63 mn (Rs. 1.45 mn) were recognised in Hayleys Fabric PLC in respect of obsolete machinery. The impairment losses on furniture, fittings and office equipment were recognised in Kingsbury PLC (Rs. 3.7 mn) and Hayleys Advantis (Rs. 3.4 mn) in respect of obsolete items.

**13.11** Property, plant & equipment with a carrying value of Rs. 22,834 mn (2023 - Rs. 26,732 mn) and Rs. Nil (2023 - Nil) for the Group and Company respectively have been pledged as security for term loans obtained. The details are shown in Note 25 to the Financial Statements.

**13.12** The carrying value of revalued lands given above, had the said lands been included at cost, would amount to Rs. 8.47 bn (2023 - Rs. 8.00 bn) for the Group and Rs. Nil (2023 - Nil) to the Company.

**13.13** The cost of fully depreciated property plant and equipment which are still in use at the reporting date is as follows.

For the year ended 31st March	CONSOLIDATED		COMPANY	
	2024 Rs.'000	2023 Rs.'000	2024 Rs.'000	2023 Rs.'000
Buildings	1,702,028	1,226,431	223,770	-
Machinery and store equipment	17,211,629	18,197,909	30,512	30,416
Furniture, fittings and Office Equipment	5,354,289	3,894,971	187,079	174,870
Motor Vehicles and vessels	2,747,524	2,714,960	87,064	86,782
	<b>27,015,470</b>	<b>26,034,271</b>	<b>528,425</b>	<b>292,068</b>

### 13.14 Capital Expenditure Commitments

The approximate amounts of capital expenditure approved by the Directors as at 31st March, 2024 were:

- Capital expenditure contracted for which no provision is made in the Financial Statements for the Group - Rs. 4.4 bn (2023 - Rs. 785 mn) and for the Company Rs. Nil (2023 - Nil).
- Capital expenditure approved by the Directors but not contracted for the Group Rs. 2.4 bn (2023 - Rs. 1.2 bn) and for the Company Rs. Nil (2023 - Nil).

### 13.15 Unobservable Inputs used in Measuring Fair Value

The table below sets out information about significant unobservable inputs used in measuring fair value of land as of 31 March 2022, 2023 and 2024.

Category	District	Valuation Technique	Significant Unobservable Input	Range of Estimate (Weighted Average) for Unobservable Input Rs.'000	Fair Value Measurement Sensitivity to Unobservable Input
Freehold land	Ampara	Open Market basis	Land -Rate per perch	11 to 13	Significant increases / (decreases) in estimated price per perch in isolation would result in a significantly higher / (lower) fair value.
	Matale			22 to 31	
	Puttalam			30 to 3,500	
	Gampaha			45 to 5,500	
	Kurunegala			50 to 600	
	Colombo			90 to 22,000	
	Kegalle			100 to 125	
	Kalutara			100 to 3500	
	Trincomalee			100 to 3750	
	Galle			1000 to 6000	
	Kandy			1175 to 5,000	
	Hambantota			1500 to 3,000	
	Ratnapura			2000 to 4,000	
	Badulla			2500 to 3,500	
Matara	3500 to 4500				
Nuwara Eliya	4000 to 4500				

## 14 RIGHT-OF-USE ASSETS

### 14.1 Consolidated

As at 31st March	Land Rs.'000	Mature/ Immature Plantations Rs.'000	Building Rs.'000	Motor Vehicles Rs.'000	Furniture, fittings & Office equipment Rs.'000	Total 2024 Rs.'000	Total 2023 Rs.'000
<b>At the beginning of the year</b>	5,778,013	85,191	6,179,141	141,427	6,621	12,190,393	11,389,087

## NOTES TO THE FINANCIAL STATEMENTS

## 14.2 Company

As at 31st March	Building	Total 2024 Rs.'000	Total 2023 Rs.'000
<b>At the beginning of the year</b>	127,664	127,664	191,497
Depreciation for the period	(63,832)	(63,832)	(63,833)
<b>At the end of the year</b>	63,832	63,832	127,664

## 15 INVESTMENT PROPERTIES

As at 31st March	CONSOLIDATED		COMPANY	
	2024 Rs.'000	2023 Rs.'000	2024 Rs.'000	2023 Rs.'000
<b>Carrying value :</b>				
<b>At the beginning of the year</b>	1,948,326	2,601,101	94,750	88,850
Additions	422	94,768	-	-
Transfer to Property Plant & Equipment	-	(1,095,000)	-	-
Change in fair value during the year	92,813	347,457	3,700	5,900
<b>At the end of the year</b>	2,041,561	1,948,326	98,450	94,750

## 15.1 Rental Income

For the year ended 31st March	2024 Rs.'000	2023 Rs.'000
Rental income derived from investment properties	53,047	85,457
Direct operating expenses generating rental income	(1,609)	(8,550)
<b>Net profit arising from investment properties</b>	51,438	76,907

## 15.1.1 The Group as a lessor

The Group has entered into operating leases on its investment property portfolio consisting of certain office and manufacturing buildings. All leases include a clause to enable upward revision of the rental charge on an annual basis according to prevailing market conditions.

Future minimum rentals receivable under non-cancellable operating leases as at 31st March are as follows.

For the year ended 31st March	2024 Rs.'000	2023 Rs.'000
Within one year	27,512	46,400
After one year but not more than five years	-	70,915

### 15.1.2 The Company as a lessor

The Company has entered into operating leases on its building rented as office space to other related and non-related companies. All leases include a clause to enable upward revision of the rental charge on an annual basis according to prevailing market conditions

Rental income recognised by the Company during the year is Rs. 472 mn (2023: Rs. 509 mn).

Future minimum rentals receivable under non-cancellable operating leases as at 31st March are as follows.

For the year ended 31st March	2024 Rs.'000	2023 Rs.'000
Within one year	558,703	537,375
After one year but not more than five years	2,234,812	2,149,502

**15.2** Investment properties are stated at fair value. The fair values of investment properties as at 31st March, 2024 based on valuation performed by Mr. P.B. Kalugalgedara (Chartered Valuation Surveyor), an accredited independent, industry specialist are given below.

The valuations had been carried out based on transactions observed in the market.

The details of fair value of investment properties of the Group as follows:

Company	Location	Building area (Sq Ft)	Land in acres	Value of building Rs '000	Value of land Rs '000	Total Rs'000 2024
Eastern Hotels (Pvt) Ltd.	Nilakarai Estate, Nilaweli, Trincomalee	600	23.47	1,380	882,600	883,981
Hayleys Advantis Group	No 121, Sir James Peiris Mawatha, Colombo 2	1,932	-	184,250	-	184,250
Rileys (Pvt) Ltd.	131,Minuwangoda Road, Ekala	91,582	3.80	237,016	637,864	874,880
Hayleys PLC	Kaluwamodara, Bentota	-	0.28	-	98,450	98,450
				422,646	1,618,914	2,041,561

Category	District	Valuation Technique	Range of Estimate Rs'000 2024	Unobservable Input Rs'000 2023
Freehold land	Gampaha	Open market basis (Land Rate per perch)	800 to 1250	750 to 1250
	Kalutara		2000 to 3000	2000 to 3000
	Trincomalee		200 to 235	200 to 215

**15.3** The Group has no restriction on the realisability of its investment properties and has no contractual obligations to purchase, construct or develop its investment properties or for maintenance and enhancement.

## 16 BIOLOGICAL ASSETS

As at 31st March	CONSOLIDATED	
	2024 Rs.'000	2023 Rs.'000
<b>At the beginning of the year</b>	1,313,069	599,064
Increase due to development	16,416	16,654
Change in fair value of biological assets	206,128	138,628
Decrease due to harvest	(25,122)	(32,823)
Acquisition of subsidiary	-	591,546
Transfer to immature/mature plantation	(4,220)	-
<b>At the end of the year</b>	1,506,271	1,313,069

## NOTES TO THE FINANCIAL STATEMENTS

Managed trees include commercial timber plantations cultivated on estates. The cost of immature trees is treated as approximate fair value particularly on the ground of little biological transformation has taken place and impact of the biological transformation on price is not material. When such Plantations become mature, the additional investments since taken over to bring them to maturity are transferred from Immature to Mature.

### Talawakelle Tea Estates PLC

The fair value of matured managed trees were ascertained in accordance with SLFRS 13. The valuation was carried by Messer's KPMG Real Estate & Valuation Services (Pvt) Ltd, chartered valuation surveyors, using Discounted Cash Flow (DCF) methods. In ascertaining the fair value of timber, a physical verification was carried out covering all the estates.

### Kelani Valley Plantations PLC

The fair value of managed trees was ascertained in accordance with LKAS 41. The valuation was carried out by FRT Valuation Services (Pvt) Ltd, using Market Approach. In ascertaining the fair value of timber, a physical verification was carried out covering the estates on sample basis.

### Horana Plantations PLC

The fair value of managed trees was ascertained in accordance with LKAS 41. The valuation was carried by Chartered Valuer Mr. A.A.M.Fathihu - Proprietor of FM Valuers for 2023/24 using Discounted Cash Flow (DCF) method .

## 16.1 Information About Fair Value Measurements Using Significant Unobservable Inputs (Level 3)

### Talawakelle Tea Estates PLC

Non Financial Asset	Valuation technique	Unobservable inputs	Range of unobservable inputs (Probability weighted average.)		Relationship of Unobservable Inputs to Fair Value
			2024	2023	
Consumable managed biological assets	Discounted cash flows	Discounting Rate	15.0%	19.5%	The higher the discount rate, the lesser the fair value
		Optimum rotation (Maturity)	15-25 Years	15-25 Years	Lower the rotation period, the higher the fair value
		Volume at rotation	25 - 190 cu. Ft	25 - 140 cu. Ft	The higher the volume, the higher the fair value
		Price per cu.ft.	Rs. 60/- to Rs. 2,300/-	Rs. 80/- to Rs. 6,000/-	The higher the price per cu. ft., the higher the fair value

Other key assumptions used in valuation

- 1 The harvesting is approved by the PMMD and the Forest Department based on the Forestry Development Plan.
- 2 The prices adopted are net of expenditure
- 3 Though the replanting is a condition precedent for harvesting' yet the costs are not taken in to consideration.

The valuations, as presented in the external valuation models based on net present values, take into account the long term exploitation of the timber plantations. The Board of Directors retains their view that commodity markets are inherently volatile and that long term price projections are highly unpredictable. The Board of Directors is of the opinion that the sensitivity analysis regarding selling price and discount rate variations are as follows;

It does, nevertheless, concern the directors that no estimate of fair value can ever be completely accurate. Moreover, in the case of the group's biological assets, small differences in valuation assumptions can have a quite disproportionate effect on results. Another concern is that, as shown from an international benchmark, there is currently no uniform approach within the plantation sector when it comes to defining the major variables, such as selling price and/or discount rates, in the DCF models resulting in the LKAS 41 values.

The carrying amount of biological assets pledged as securities for liabilities as at the date of the statement of Financial Position is Rs. nil. (2023 - Rs. nil).

#### Kelani Valley Plantations PLC

Non Financial Asset	Valuation technique	Unobservable inputs	Range of unobservable inputs (Probability weighted average.)		Relationship of Unobservable Inputs to Fair Value
			2024	2023	
Consumable managed biological assets	Market Approach	Discounting Rate	15.0%	17.5%	The higher the discount rate, the lesser the fair value
		Optimum rotation (Maturity)	20-25 Years	25-35 Years	Lower the rotation period, the higher the fair value
		Volume at rotation	23-120 cu.ft	25-85 cu.ft	The higher the price per cu. dcm., the higher the fair value
		Price per cu.ft.	Rs.85/- to Rs.5,250/-	Rs. 450/- to Rs. 9,000/-	The higher the price per cu. ft., the higher the fair value

#### Other key assumptions used in valuation

1. It is assumed that the felling of trees will be undertaken at maturity for the period not covered under the Forestry Management Plan. Majority of the timber trees which have reached their maturity at the date of valuation are valued using the adjusted market prices based on the location and accessibility. Remaining timber trees which have not come up to a harvestable age are valued considering their future incremental growth in the coming years and discounting the future value of such trees by appropriate present value discount ratio, which is assumed as the Expected Rate of Return (ERR) of a rational investor, i.e.15%.
2. The price adopted could vary based on the species and the girth of the respective species and are on the spare net of expenditure.
3. Though the replanting is a condition precedent for harvesting, yet the cost are not taken in to consideration.

The valuations, as presented in the external valuation models based on market values, take into account the possible market conditions and long-term exploitation of the timber plantations. Because of the inherent uncertainty associated with the valuation at fair value of the biological assets due to the volatility of the active market prices and other variables, their carrying value may differ from their realisable value. The Board of Directors retains their view that commodity markets are inherently volatile and that active market price projections are highly unpredictable. The sensitivity analysis regarding selling price and discount rate variations are as follows,

#### Horana Plantations PLC

Non Financial Asset	Valuation technique	Unobservable inputs	Range of unobservable inputs (Probability weighted average.)		Relationship of Unobservable Inputs to Fair Value
			2024	2023	
Consumable managed biological assets	Discounted Cash flows	Discounting Rate	14% - 16%	17.5% - 19.5%	The higher the discount rate, the lesser the fair value
		Optimum rotation (Maturity)	25-35 Years	25-35 Years	Lower the rotation period, the higher the fair value
		Volume at rotation	15-65 cu.mt	15-65 cu.mt	The higher the price per cu. dcm., the higher the fair value
		Price per cu.ft.	Rs.325/- to Rs.1688/-	Rs. 325/- to Rs. 1,685/-	The higher the price per cu. ft., the higher the fair value

#### Other key assumptions used in valuation

1. The harvesting is approved by the PMMD and the Forest Department based on the Forestry Development Plan.
2. The prices adopted are net of expenditure.

The valuation, as presented in the external valuation model based on the net present value, takes into accounts the long-term exploitation of the timber plantation. Because of the inherent uncertainty associated with the valuation at fair value of the biological assets due to the volatility of the variables, their carrying value may differ from their realisation value. The Board of Directors retains their view that commodity markets are inherently volatile and their long-term price projection are highly unpredictable.

## NOTES TO THE FINANCIAL STATEMENTS

### 16.2 Sensitivity Analysis

#### Sensitivity variation sales price

Values as appearing in the Statement of Financial Position are very sensitive to price changes with regard to the average sales prices applied. Simulations made for timber show that a rise or decrease by 10% of the estimated future selling price has the following effect on the net present value of biological assets:

Sales Price fluctuation Managed Timber	+10% Rs.'000	-10% Rs.'000
<b>Talawakelle Tea Estates PLC</b>		
<b>As at 31 March 2024</b>	<b>57,334</b>	<b>(57,334)</b>
As at 31 March 2023	41,257	(41,257)
<b>Kelani Valley Plantations PLC</b>		
<b>As at 31 March 2024</b>	<b>37,990</b>	<b>(37,990)</b>
As at 31 March 2023	23,760	(23,760)
<b>Horana Plantations PLC</b>		
<b>As at 31 March 2024</b>	<b>58,434</b>	<b>(58,434)</b>
As at 31 March 2023	56,860	(56,860)

#### Sensitivity variation discount rate

Values as appearing in the Statement of Financial Position are very sensitive to changes of the discount rate applied. Simulations made for timber show that an increase or decrease by 1% of the discount rate has the following effect on the net present value of biological assets:

Discount rate fluctuation Managed Timber	1% Rs.'000	-1% Rs.'000
<b>As at 31 March 2024</b>		
Talawakelle Tea Estates PLC	(4,176)	4,489
Kelani Valley Plantations PLC	(103)	106
Horana Plantations PLC	(23,911)	27,089
<b>As at 31 March 2023</b>		
Talawakelle Tea Estates PLC	(1,091)	1,211
Kelani Valley Plantations PLC	(73)	76
Horana Plantations PLC	(22,999)	26,067

South Asia Textiles Limited	2,104	2,104	VIU
	14,426	14,591	

#### 17.3.1 Remeasurement of goodwill - Horana Plantations PLC (refer Note 37.4 on page 428)

### 17.3.2 CGUs in which the carrying amount of goodwill is 'significant' in comparison with the entity's total carrying amount

As at 31st March	2024		2023	
	Discount Rate	Terminal Growth Rate	Discount Rate	Terminal Growth Rate
Singer (Sri Lanka) PLC	12%-14%	5.0%	14%-23%	3.0%
Hayleys Leisure Group Companies	12%-14%	3.0%	14%-23%	4.0%
The Kingsbury PLC	12%-14%	3.0%	14%-23%	4.0%
Alumex PLC	12%-14%	2.0%	14%-23%	2.0%
South Asia Textiles Ltd.	12%-14%	3.0%	14%-23%	3.0%

**17.3.3** CGUs in which the carrying amount of goodwill is not "significant" individually in comparison with the entity's total carrying amount:

	2024	2023
Discount Rate	12%-14%	14%-23%
Terminal growth rate	2%-5%	2%-4%

#### Projected adjusted EBITDA

Projected adjusted EBITDA has been based on past experience adjusted for the following

- Revenue is expected to continue to grow as increase in market share along with higher margins, and new products and services are introduced.
- Margins are expected to be impacted by negative factors such as the cost of acquiring and retaining customers in increasingly competitive markets and by positive factors such as the efficiencies expected from the implementation of Group initiatives.

#### Terminal Growth Rate

For the purposes of the Group's value in use calculations, a long-term growth rate into perpetuity is applied immediately at the end of the five year forecast period and is based on the lower of

- the nominal GDP growth rate forecasts for the country of operations; and
- the long-term compound annual growth rate in adjusted EBITDA as estimated by management

Long-term compound annual growth rates determined by management may be lower than forecast nominal GDP growth rates due to the following market-specific factors: competitive intensity levels, maturity of business, regulatory environment or sector-specific inflation expectations.

#### Discount rates

Discount rates represent the current market assessment of the risks specific to each CGU, taking into consideration the time value of money and individual risks of the underlying assets that have not been incorporated in the cash flow estimates. The discount rate calculation is based on the specific circumstances of the Group and its operating segments and is derived from its weighted average cost of capital (WACC). The WACC takes into account both debt and equity. The cost of equity is derived from the expected return on investment by the Group's investors. The cost of debt is based on the interest-bearing borrowings the Group is obliged to service. Segment-specific risk is incorporated by applying individual beta factors. The beta factors are evaluated annually based on publicly available market data. Adjustments to the discount rate are made to factor in the specific amount and timing of the future tax flows in order to reflect a pre-tax discount rate

## NOTES TO THE FINANCIAL STATEMENTS

### 17.4 Brand Name / Trade Mark

**17.4.1** The Group has recognised an intangible asset for the Amaya chain of hotels from the acquisition of Hayleys Leisure PLC. "Amaya" brand name is a well established name in the leisure sector. Management is of the opinion that the brand name will be a key attraction in the future booming leisure sector.

**17.4.2** Group has recognised an intangible asset in respect of brand name, trade mark, distribution rights through the acquisition of Singer (Sri Lanka) PLC.

#### SISIL trademark

The company had acquired the "SISIL" trade mark in December 2000, amounting to Rs. 55 million. The management is of the opinion that the aforementioned trademark has an indefinite useful life as their associated brand awareness and recognition has existed over 30 years and the company intends to utilise the said trademark for the foreseeable future. There are no legal, regulatory, contractual, competitive, economic or other factors that may limit its useful life and accordingly, the carrying amount of this trademark is determined after testing for impairment annually. Following assumptions are made to test for any impairment as at 31st March 2024:

	2024	2023
Annual sales growth for next five years	10%	10%
Gross margin	26%	26%
Discount rate	12%	22%
Indefinite Growth Rate after Year 2027/2028	2%	2%

#### UNIC trademark

The company had acquired the 'UNIC' Trade mark in 2006 amounting Rs. 38,512,500/-. This trade mark is also considered to have an indefinite useful life due to the factors mentioned in the preceding paragraph and accordingly, the carrying amount of this trademark is determined after testing for impairment annually. Following assumptions are made to test for impairment as at 31st March 2024:

	2024	2023
Annual sales growth for next five years	8%	8%
Gross margin	27%	27%
Discount rate	12%	22%
Indefinite Growth Rate after Year 2027/2028	2%	2%

#### SONY distribution rights

"The company had acquired the distribution rights of brand 'SONY' in 2014 amounting Rs. 46,431,920/- This assets are now carried at cost subject to annual impairment test and carrying amount as at 31st December 2015 is Rs. 46,431,920/-. This distribution right also considered to have an indefinite useful life due to the factors mentioned in the preceding paragraph accordingly, the carrying amount of this trademark is determined after testing for impairment annually. Following assumptions are made to test for impairment as at 31st March 2024:

	2024	2023
Annual sales growth for next five years	5%	5%
Gross margin	24%	20%
Discount rate	12%	22%
Indefinite Growth Rate after Year 2027/2028	2%	2%

### 17.5 Customer List

Group has recognised an intangible asset in respect of customer relationship through the acquisition of Amaya Leisure PLC.

The established customer lists of Amaya Hotels is acknowledged as a key component in generation of revenue through travel agents and tour operators. The management is of the opinion that the company is capable of retaining the travel agents through business relationship strategies and this would ensure retention and lead to repeat business over the future years and inflow of future economic benefits from them.

## 18 INVESTMENTS

## 18.1 Company Investment in Subsidiaries

	22,179,511	19,199,910

## NOTES TO THE FINANCIAL STATEMENTS

### 19.4 Fair Value Hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

**Level 1:** Quoted (unadjusted) prices in active markets for identical assets or liabilities

**Level 2:** Other techniques for which all inputs that have a significant effect on the recorded fair value are observable, either directly or indirectly

**Level 3:** Techniques that use inputs that have a significant effect on the recorded fair value that are not based on observable market data

As at 31 March 2024, the Group held the following financial instruments carried at fair value in the Statement of Financial Position:

#### Assets measured at fair value

As at 31st March	Notes	2024 Rs.'000	Level 1 Rs.'000	Level 2 Rs.'000	Level 3 Rs.'000
<b>Fair value through OCI</b>					
Quoted equity shares	19.1	8,317	8,317	-	-
<b>Financial assets at fair value through profit or loss:</b>					
Quoted equity shares	19.2	18,425	18,425	-	-
Unit trust	19.2	1,188,609	1,188,609	-	-
<b>Property, plant &amp; equipment</b>					
Freehold land	13	36,521,226	-	-	36,521,226
<b>Investment Properties</b>					
Land and buildings	15	2,041,561	-	-	2,041,561
<b>Financial liabilities at amortised cost</b>					
Deposit	19.3	22,179,511	-	22,179,511	-

As at 31st March	Notes	2023 Rs.'000	Level 1 Rs.'000	Level 2 Rs.'000	Level 3 Rs.'000
<b>Fair value through OCI</b>					
Quoted equity shares (19.1 and 19.2 )	19.1	6,544	6,544	-	-
<b>Financial assets at fair value through profit or loss:</b>					
Quoted equity shares (19.2)	19.2	13,658	13,658	-	-
Unit trust (19.2)	19.2	841,581	841,581	-	-
<b>Property, plant &amp; equipment</b>					
Freehold land	13	36,257,132	-	-	36,257,132
<b>Investment Properties</b>					
Land and buildings	15	1,948,326	-	-	1,948,326
<b>Financial liabilities at amortised cost</b>					
Deposit	19.3	19,199,910	-	19,199,910	-

During the reporting period ended 31 March 2024 and 31 March 2023, there were no transfers between Level 1 and Level 2 fair value measurements.

## Fair Values

Set out below is a comparison by class of the carrying amounts and fair values of the Group's financial instruments that are carried in the financial statements.

As at 31st March	Notes	CONSOLIDATED		COMPANY	
		Carrying value	Fair value	Carrying value	Fair value
		2024		2024	
		Rs.'000	Rs.'000	Rs.'000	Rs.'000
<b>Financial Assets</b>					
Other non- current financial assets					
Fair value through OCI	19.1	92,394	92,394	42,000	42,000
Amortised cost	19.1	303,566	303,566	-	-
Non- current trade and other receivables	22	12,052,092	12,052,092	55,038	55,038
Other current financial assets					
Financial instruments at fair value through profit or loss	19.2	18,425	18,425	10,050	10,050
Amortised cost	19.2	2,157,710	2,157,710	9,910	9,910
Trade and other receivables	22	117,124,113	117,124,113	808,000	808,000
Amounts due from subsidiaries	38.4	-	-	5,379,688	5,379,688
Amounts due from equity accounted investees	38.5	169,803	169,803	7,585	7,585
Short term deposits		21,356,037	21,356,037	505,529	505,529
Cash and cash equivalents		28,175,378	28,175,378	328,528	328,528
		181,449,518	181,449,518	7,146,328	7,146,328
<b>Financial Liabilities</b>					
Interest-bearing borrowings*	25	83,814,247	83,814,247	24,380,604	24,380,604
Other financial liabilities					
Financial liabilities at amortised cost	19.3	22,179,511	22,179,511	-	-
Trade and other payables	29	76,689,226	76,689,226	4,877,641	4,877,641
Amounts due to subsidiaries	38.4	-	-	388,352	388,352
Amounts due to equity accounted investees	38.5	465	465	385	385
Short-term interest-bearing borrowings	31	88,068,606	88,068,606	5,846,926	5,846,926
		270,751,125	270,751,125	34,716,434	34,716,434

\* Include fixed interest loans carried at amortised cost.

The fair value of the financial assets and liabilities is included at the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participant at the measurement date. The following methods and assumptions were used to estimate the fair values:

- The carrying value of available for sale financial instruments at fair value through OCI and financial instruments at fair value through profit or loss at fair value.
- Cash and cash equivalents, short term deposits, trade and other, amounts due to/from subsidiaries, amounts due from equity accounted investees and trade and other payables approximate their carrying values largely due to the short term maturities of these instruments.
- The Fair value of financial assets at amortised cost and financial liabilities at amortised cost is not significantly different from the value based on amortised cost methodology.

## NOTES TO THE FINANCIAL STATEMENTS

An actuarial valuation of the retirement gratuity payable was carried out as at March 31, 2024 by Mr M Poopalanathan, AIA, of Messrs. Actuarial & Management Consultants (Pvt) Ltd. and Mr. Pushpakumar Gunasekara, AIA, of Messrs. Smiles Global (Pvt) Ltd., firms of professional Actuaries. The valuation method used by the actuaries to value the liability is the "Projected Unit Credit Method (PUC)", the method recommended by the Sri Lanka Accounting Standard - LKAS 19 on "Employee Benefits".

### 28.1 Actuarial assumptions

The following key assumptions were made in arriving at the above figure.

As at 31st March	Others		Plantations		Overseas Subsidiaries	
	2024	2023	2024	2023	2024	2023
Rate of discount	12.0%	18.0%	12%	20%	3% - 10%	3% - 8%
Salary increase	11.0%	16.0%	10% - 11%	15% - 16%	1% - 8%	3% - 9%

Assumptions regarding future mortality are based on the A1967/70 for Staff/Executive and A1949/52 for Worker, issued by the Institute of Actuaries, London.

The demographic assumptions underlying the valuation are with respect to retirement age early withdrawals from service and retirement on medical grounds.

**28.2** The Group's and Company employee benefit obligations would have been Rs. 13,446 mn (2023- Rs. 12,323 mn) and Rs. 1,627 mn (2023- Rs. 1,359 mn) respectively, as at the reporting date had the Group calculated its retirement benefit obligation as per the requirements of the Payments of Gratuity Act no 12 of 1983, applying the basis of computation given in page 357 to the Financial Statements.

### 28.3 Sensitivity Analysis - Salary Escalation Rate/Discount Rate

Values appearing in the Financial Statements are very sensitive to the changes in financial and non financial assumptions used.

A Sensitivity was carried out as follows,

#### A one percentage point change in the salary escalation rate

	CONSOLIDATED		COMPANY	
	+1%	-1%	+1%	-1%
The present value of defined benefit obligation (Rs.'000)	16,278,353	14,525,548	1,948,216	1,846,987

#### A one percentage point change in the discount rate

	CONSOLIDATED		COMPANY	
	+1%	-1%	+1%	-1%
The present value of defined benefit obligation (Rs.'000)	14,707,537	16,351,830	1,859,733	1,935,759

**28.4 Distribution of Employee Benefit Obligation over Future Working Lifetime**

As at 31st March	CONSOLIDATED		COMPANY	
	2024 Rs.'000	2023 Rs.'000	2024 Rs.'000	2023 Rs.'000
Less than or equal 1 year	2,545,554	2,135,500	1,034,170	866,406
Over 1 year and less than or equal 5 years	5,538,697	4,909,075	671,277	541,568
Over 5 year and less than or equal 10 years	3,994,191	3,330,911	95,558	75,582
Over 10 years	3,184,023	2,469,762	95,107	76,460
	15,262,465	12,845,248	1,896,112	1,560,016

**29 TRADE AND OTHER PAYABLES**

## NOTES TO THE FINANCIAL STATEMENTS

### 32. CONTINGENT LIABILITIES AND COMMITMENTS

#### 32.1 Contingent Liabilities

##### Company

The contingent liability as at 31st March, 2024 on guarantees given by Hayleys PLC, to third parties amounted to Rs. 1.06 bn (2023 - 1.06 bn). This relates to facilities obtained by subsidiaries.

##### Group

- The contingent liability as at 31st March 2024 on guarantees given by Haycarb Group to third parties amounted to Rs. 8.53 bn (2022/23 - Rs. 7.88 bn). Of this sum, Rs. 7.53 bn (2022/23 - Rs. 7.12 bn) relates to facilities obtained by subsidiaries.

##### Singer Sri Lanka PLC

- The Tax Appeals Commission hearings were concluded on 28th February 2023, and the determinations were consequently issued on the 17th of May 2023 and 23rd May 2023 for all seven quarters for the period from 1st January 2014 to 30th September 2015 - though the Company was not informed of such determinations for a period of approximately one month from such dates. The Tax Appeals Commission in determining the case has confirmed the purported determinations made by the Commissioner General of Inland Revenue for all seven quarters. Accordingly at the time of receiving the said determinations on the 20th of June 2023, the company deposited 10% of the pending assessed value amounting to Rs. 108 mn in lieu of renewing the bank guarantees which were previously given.

The Company after carefully reviewing the situation and based on the advice of tax consultants, is of the opinion that there is no basis for the Company to be made liable for Deemed VAT. Accordingly, the Company has decided to seek the judicial review in the Appellate Court against the determination issued by the Tax Appeals Commission by making an application for a case stated, which was submitted to the Court of Appeal in August 2023. Hence, no provision has been made in the Financial Statements until the matter has been determined by the Court.

- Commissioner General of Inland Revenue has issued an assessment notice on Singer (Sri Lanka) PLC pertaining to an additional VAT on Financial Services liability for the taxable period of 01st January 2016 to 31 December 2016. The assessment was for a VAT on Financial Services payment of Rs. 27 mn and penalty of Rs. 16 mn, totalling to Rs. 43 mn. Subsequently, Commissioner General of Inland Revenue had given the determination on the appeal. As per the same, Rs. 26 mn of VAT on Financial Services liability and a penalty of Rs. 26 mn totalling to Rs. 52 mn is payable as a VAT on Financial Services liability for the period 1st January 2016 to 31st December 2016. The Company after carefully reviewing the situation and based on the advice of tax consultants, was of the opinion that the Company has strong grounds on which to contest the CGIR's determination. Accordingly, the Company decided to appeal to the Tax Appeals Commission against the determination on 17th August 2021. Further, the Company has provided a bank guarantee amounting to Rs. 13 mn to the Commissioner General of Inland Revenue - Tax Appeals Commission on 03rd December 2021.

Commissioner General of Inland Revenue has issued assessment notices on Singer Digital Media (Pvt) Ltd which has been amalgamated with Singer (Sri Lanka) PLC pertaining to an additional Income Tax Liability for the Year of Assessment 2018/2019. The assessment was for an income tax payment of Rs. 86 mn and interest and penalty of Rs. 44 mn and Rs. 16 mn respectively, totalling to Rs. 147 mn.

Since, the Commissioner General of Inland Revenue has failed to make the determination on the appeal, the Company has decided to appeal to the Tax Appeal Commission against the assessment dated 25th May 2022. Further, Company provided a bank guarantee amounting to Rs. 37 mn to the Commissioner General of Inland Revenue - Tax Appeals Commission on 02nd March 2023.

The determination was issued by the Tax Appeals Commission for the year of assessment 2018/2019 on 21st November 2023 confirming the assessment notices issued. The tax authorities has exercised the bank guarantee of Rs. 37 mn on 7th December 2023.

The Company after carefully reviewing the situation and based on the advice of tax consultants, is of the opinion that there is no basis for the Company to be made liable for Income Tax. Accordingly, the Company has decided to seek the judicial review in the Appellate Court against the determination issued by the Tax Appeals Commission by making an application for a case stated, which was submitted to the Court of Appeal in February 2024. Hence, no provision has been made in the Financial Statements until the matter has been determined by the Court.

- Singer (Sri Lanka) PLC has provided bank guarantees amounting to Rs. 337 mn to Director General of Customs to clear imports during the years 2008 to December 2022. The bank guarantee related to alleged additional duty payable on imports, claimed by the customs and is being contested by the Company in courts. The Court of Appeal ordered that the Director General of Customs continue with the investigations. The Company being aggrieved by the decision has filed an appeal, which is pending before the Supreme Court. The Company lawyers are of the opinion that there is no basis that the Company is liable for the additional duty. Based on assessment the probability is higher that the Company would not be required to settle the liabilities. Hence, no provision is made in the Financial Statements
- Singer Finance (Lanka) PLC has provided letters of guarantee totalling to Rs. 2.5 mn against fixed deposits of Rs. 2.5 mn
- Case bearing No. 404 has been filled against Singer Finance (Lanka) PLC by a customer in the District Court of Ampara claiming Rs. 2 mn as damages caused by repossessing and selling of a vehicle leased through the Company. The case will be called on 18th March 2024 for further trial. Further, the Company has received summons for case number 004674/21DMR clamming Rs. 3.8 mn as damages. The case will be called on 13th June 2024 for proxy and answer. The lawyers of the Company are of the view that the ultimate resolution of these litigations would not likely to have a material impact.
- Regnis (Lanka) PLC which is now merged with Singer (Sri Lanka) PLC has provided corporate guarantees to banks on behalf of Regnis Appliances (Private) Limited amounting to Rs. 410 mn for the purpose of obtaining banking facilities
- Regnis (Lanka) PLC which is now merged with Singer (Sri Lanka) PLC cleared a shipment of imported goods during the year 2008 on provision of a bank guarantee to the Director General of Customs amounting to Rs. 7 mn. The bank guarantee relates to alleged additional duty payable on imports which is contested by the Company. The customs inquiry initiated in 2008 is still pending. The Management is of the opinion that there is no basis that the Company is liable for the additional duty and hence, no provision is made in the Financial Statements on additional duty payable on imports which is contested by the Company.

### 32.2 Commitments

Property, plant & equipment	6,171
Trade and other receivables	85,303
Other current assets	49,944
Trade and other payables	(28,415)
Other current liabilities	(29,943)
Net identifiable assets and liabilities	83,060
Non-controlling interests	(42,463)
Gain on bargain purchase	(13,629)
	26,968
<b>37.2 Satisfied by</b>	
Cash consideration	(27,169)
Cash in hand and bank acquired	43,515
Short term borrowings acquired	(43,314)
	(26,968)

### 37.3 Revenue and Profits of acquirees

Since K&A Logistics (Pvt) Ltd. was acquired on March 31, 2024, there is no revenue nor profit generated by the company for the current financial year.

### 37.4 Re-measurement of Goodwill - Horana Plantations PLC

On March 2023, Hayleys Plantations Services (Pvt) Ltd. acquired a stake of 51% in Horana Plantations PLC for a consideration of Rs. 699.98mn and consequently, a Goodwill of Rs. 443.25mn was recorded in the consolidated financial statements. The net assets recognised as at the acquisition date was based on a provisional assessment of the fair value, and the final allocation of purchase price was yet to be finalised by the date the financial statements were approved for issue by the Board of Directors, for the year ended March 31, 2023.

In accordance with SLFRS 3 - Business Combinations, the management has assessed the identifiable assets acquired and liabilities assumed, and recognised an increase in the fair value of Rs. 165mn in mature/immature plantation under property, plant and equipment. As a result, a corresponding decrease in Goodwill of Rs. 165mn was adjusted retrospectively in the Statement of Financial Position as at March 31, 2023.

In March 2024 allocation of purchase price was completed and the acquisition date fair values of assets are as follows.

As at 31st March	Horana Plantations PLC (Provisional amounts) Rs.'000	Finalised valuation Rs.'000	Impact of adjustment for finalised valuation Rs.'000
Property, plant & equipment	2,848,327	3,013,431	165,104
Right-of-use assets	184,743	184,743	-
Biological assets	591,546	591,546	-
Inventories	486,233	486,233	-
Trade and other receivables	206,944	206,944	-
Deferred tax asset/(liability)	(583,026)	(583,026)	-
Employee benefit obligations	(458,832)	(458,832)	-
Deferred Income	(106,475)	(106,475)	-
Trade and other payables	(394,609)	(394,609)	-
Interest Bearing Borrowings	(1,385,272)	(1,385,272)	-
Net identifiable assets and liabilities	1,389,579	1,389,579	-
	2,779,158	2,944,262	165,104

The 2023 comparative information was restated to reflect the adjustment to the provisional amounts in accordance with the valuation report obtained from Mr. A. A. M. Fathihu - Proprietor of FM Valuers, Chartered Valuation Surveyor. As a result, there was an increase in property, plant & equipment of Rs. 165.10 mn, and a corresponding reduction in goodwill of Rs. 165.10 mn was adjusted retrospectively in the Statement of financial Position as at March 31, 2023.

## NOTES TO THE FINANCIAL STATEMENTS

### 40. SEGMENT ANALYSIS

The segment information is based on two segmental formats. The business segment is considered as the primary format and based on the management structure of the Group. The management are of the view that the Chairman is considered the Chief Operating decision maker and resources are allocated and performance assessed based on the sectors, Therefore each sector which falls under the purview of a different GMC member is considered a separate segment.

## 41 FINANCIAL RISK MANAGEMENT

The Group has exposure to the following risk from financial instruments:

- 1 Credit risk
- 2 Liquidity risk
- 3 Market risk

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk, and the Group's management of capital. Further quantitative disclosures are included throughout these consolidated Financial Statements.

### Financial Risk Management Framework

The Board of Directors has the overall responsibility for the establishment and oversight of the Group's financial risk management framework which includes developing and monitoring the Group's Financial risk management policies.

The Group's Financial risk management policies are established to identify, quantify and analyse the financial risks faced by the Group, to set appropriate risk limits and controls, and to monitor Financial risks and adherence to limits. Financial Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. All derivative activities for risk management purposes are carried out by Group Treasury that have the appropriate skills and experience.

The Group Audit Committee oversees how management monitors compliance with the Group's financial risk management policies and procedures, and reviews the adequacy of the financial risk management framework in relation to the risks faced by the Group. The Group Audit Committee is assisted in its oversight role by the Management Audit System Review Department(MASRD). MASRD undertakes both regular and ad hoc reviews of Financial risk management policies and procedures, the results of which are reported to the Group Audit Committee..

### Credit Risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from its operating activities (primarily from trade receivables) and from its financing activities, investments in Government Securities including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments.

### Trade and other receivables

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer.

The Group has established a credit policy under which each new customer is analysed individually for creditworthiness before the Group's standard payment and delivery terms and conditions are offered. The Group's review includes external ratings, when available, and in some cases bank references. Purchase limits are established for each customer, which represents the maximum open amount without requiring approval from the Management; these limits are reviewed quarterly. Customers that fail to meet the Group's benchmark creditworthiness may transact with the Group only on a prepayment basis. Outstanding customer receivables are regularly monitored at the individual sector and Group Management Committee (GMC) level. Further SLEIC cover or other forms of credit insurance is obtained for most exports or in the instance this is not obtained, specific GMC approval is obtained prior to the export.

In monitoring customer credit risk, customers are grouped according to their credit characteristics, including whether they are an individual or legal entity, whether they are a wholesale, retail or end-user customer, geographic location, industry, aging profile, maturity and existence of previous financial difficulties. Trade and other receivables relate mainly to the Group's wholesale customers. Customers that are considered as "high risk" are placed on a restricted customer list and future sales are made on a prepayment basis.

The Group recognises an allowance for expected credit losses (ECLs) for all debt instruments. For trade receivables and contract assets, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

The maximum exposure to credit risk for trade and other receivables at the reporting date is Rs. 129.18 bn (2023 - Rs. 107.01 bn) which is recorded at Note 22 to the Financial Statements.

### Investments

Credit risk from invested balances with the financial institutions are managed by the Group's treasury department in accordance with the Group's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty depending on its credit rating. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through potential counterparty's failure.

## NOTES TO THE FINANCIAL STATEMENTS

### Treasury bills

Singer Finance (Lanka) PLC invests not less than 7.5% of the average of its month end total deposit liabilities and borrowings of the twelve months of the preceding financial year in Sri Lanka Government Treasury Bills and Bonds to comply with the Central Bank of Sri Lanka Direction No. 4 of 2013. .

### Cash and cash equivalents

The Group held cash in hand and at bank equivalents of Rs. 28.18 bn at 31 March 2024 (2023 -Rs. 24.18 bn) which represents its maximum credit exposure on these assets.

Respective credit ratings of banks which group cash balances held are as follows;

- People's Bank – A (lka)
- Standard Chartered Bank – AAA (lka)
- Commercial Bank of Ceylon PLC – A (lka)
- Sampath Bank PLC – A (lka)
- Nations Trust Bank PLC – A- ( lka)

### Liquidity Risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts, bank loans, and finance leases. The Group assessed the concentration of risk with respect to refinancing its debt and concluded it to be low. Access to sources of funding is sufficiently available and debt maturing within 12 months can be rolled over with existing lenders.

Group Treasury receives information from other business units regarding the liquidity profile of their financial assets and liabilities and details of other projected cash flows arising from projected future business. The liquidity requirements of business units and subsidiaries are met through central cash management by Group Treasury to cover any short-term fluctuations and longer term funding to address any structural liquidity requirements. The Group Treasury monitors the cash flows in subsidiary and Group level and obtains adequate bank facilities to meet the funding requirements. The Group does not concentrate on a single financial institution, thereby minimising the expose to liquidity risk through diversification of funding sources. The Group aims to fund investment activities of the individual and group level by funding the long term investment with long term financial sources in terms of equity, debenture or long term loans. Short term investments and working capital are funded using short term loans. Group has been successful in arranging long term funding from overseas lenders as a measure to diversify its funding sources which enabled reducing the sole dependency on domestic market for project financing. The Group also issues debentures in domestic market as a measure to reduce its dependency on local banking system for all its financing requirement and thereby freeing available banking lines for future projects.

The monthly liquidity position is monitored by the Group Treasury. All liquidity policies and procedures are subject to review and approval by Board of Directors. Daily reports cover the liquidity position of both the Group and operating subsidiaries .

The table below summarises the maturity profile of the Group's financial liabilities based on contractual undiscounted payments.

### Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise four types of risk: interest rate risk, currency risk, commodity price risk and other price risk, such as equity price risk. Financial instruments affected by market risk include loans and borrowings, deposits, financial assets designated at fair value through OCI, financial assets at fair value through profit or loss and derivative financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

The sensitivity analyses in the following sections relate to the position as at 31 March 2024 and 2023.

### Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group mainly borrows in the short term to fund its working capital requirement which are linked to floating interest rates. For other funding needs the Group maintains a proper mix of interest rate based on the basis of the predictability of future cash flows. Group Treasury closely monitors the interest rate fluctuations in the market and advises the sectors of the Group on a regular basis on risk mitigatory strategies. The Group hedges its exposure to interest rate risk by using Interest Rate Swaps as appropriate.

### Interest rate sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected. With all other variables held constant, the Group's profit before tax is affected through the impact on floating rate borrowings as follows:

For the year ended 31st March	Increase/ decrease in base point	CONSOLIDATED	COMPANY
		Effect on profit before tax Rs.'000	Effect on profit before tax Rs.'000
<b>2024</b>	+ 200	(3,148,722)	(835,250)
	- 200	3,148,722	835,250
2023	+ 1500	(20,575,063)	(3,888,469)
	- 1500	20,575,063	3,888,469

### Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Group is exposed to currency risk on sales, purchases and borrowings and net investments in foreign subsidiaries that are denominated in a currency other than the respective functional currencies of the Group. These currencies primarily are the Euro, US Dollars (USD), Bangladesh Taka, Chinese Yuan (CNY), Pound Sterling (GBP), Indonesia Rupiah and Thailand Baht.

The Group hedges its exposure to fluctuations on the translation of its foreign operations by holding net borrowings in foreign currencies and by using foreign currency swaps, forwards contracts and hedge accounting. Group Treasury closely monitors the exchange rate fluctuations and advises the sectors on a regular basis on hedging strategies and their timing.

### Foreign currency sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in the US dollar and Euro exchange rate, with all other variables held constant. The impact on the Group's profit before tax is due to changes in the fair value of monetary assets and liabilities.

The Group's exposure to foreign currency changes for all other currencies is not material.

For the year ended 31st March		Increase/ decrease in base point	CONSOLIDATED		COMPANY	
			Effect on profit before tax  Rs.'000	Effect on Foreign currency translation reserve  Rs.'000	Effect on profit before tax  Rs.'000	Effect on Foreign currency translation reserve  Rs.'000

	Euro	+10%	87,056	471,747	-	-
	USD	-10%	3,370,564	(1,232,107)	-	-
	Euro	-10%	(87,056)	(471,747)	-	-
2023	USD	+ 30%	(8,347,928)	4,360,251	-	-
	Euro	+ 30%	(501,685)	1,116,329	-	-
	USD	- 30%	8,347,928	(4,360,251)	-	-
	Euro	- 30%	501,685	(1,116,329)	-	-

### Commodity Risk

The Group is affected by the volatility of certain commodities. Its operating activities require the ongoing purchase and manufacturing process. Due to the significantly increased volatility of the price of the underlying, the management has developed and enacted a risk management strategy regarding commodity price risk and its mitigation. The sectors constantly monitor the Raw material price B204 of Charcoal, Rubber, Aluminum and Yarn for downwards trends and invest in bulk purchase when low prices are prevalent. Management may revise the selling price based on the commodity prices whenever possible.

### Equity price risk

The Group's listed and unlisted equity securities are susceptible to market price risk arising from uncertainties about future values of the investment securities. The Group manages the equity price risk through diversification and by placing limits on individual and total equity instruments. Management of the Group monitors the mix of debt and equity securities in its investment portfolio based on market indices. Material investments within the portfolio are managed on an individual basis and all buy and sell decisions are approved by the GMC. Equity price risk is not material to the financial statements.

## NOTES TO THE FINANCIAL STATEMENTS

### Capital Management

The Board's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Capital consists of share capital, reserves, retained earnings and non-controlling interests of the Group. The Board of Directors monitors the return on capital as well as the level of dividends to ordinary shareholders.

The gearing ratio at the reporting date was as follows

As at 31st March	CONSOLIDATED		COMPANY	
	2024 Rs.'000	2023 Rs.'000	2024 Rs.'000	2023 Rs.'000
Interest Bearing borrowing	56,654,168	59,158,207	14,375,000	13,185,518

The Regulatory Capital requirements for the Finance Companies are set by the Central Bank of Sri Lanka. The details of the computation of risk weighted assets, capital and the ratios of the Singer Finance PLC are given below:

### Capital Adequacy of Singer Finance PLC

Capital adequacy is a measure of financial institutions financial strength and stability. This widely accepted concept tries to specify the limit up to which a business can expand in terms of its risk - weighted assets. Finance companies in pursuit of business expansion, could engage themselves in activities that regularly change their risk profile. In light of this, regulatory capital requirements have been established to avoid undue expansion beyond specified limits keeping a hold on companies' exposure to risk. Capital serves as a comfort to absorb unexpected losses, providing a degree of security to depositors and other key stakeholders. This measure has been introduced by the Central Bank of Sri Lanka to protect the interest of the various stakeholders of the Company while ensuring the maintenance of confidence and stability of the financial system.

The capital adequacy ratio is calculated as a percentage on company's capital to its risk weighted assets as specified by the direction No 03 of 2018 with the effect from 1st July 2018. Based on the Direction No. 03 of 2018 the Listed Finance Companies which are having asset base less than 100 Billion need to have minimum Core Capital Ratio (Tier-I) of 7% and 11% based on the Total Capital Ratio (Tier-II). This minimum requirement increased to 8.5% and 12.5% respectively with the effect from 1st July 2022.

The core capital represents the permanent shareholders', equity and reserves created or increase by appropriations of retained earnings or other surpluses and the total capital includes in addition to the core capital, the revaluation reserves, general provisions and other hybrid capital instruments and unsecured subordinated debts.

The Risk Weighted Assets have been calculated by multiplying the value of each category of asset using the risk weight specified by the Central Bank of Sri Lanka.

Details of the computation and the resulting ratios are given below:

## Background

The Sri Lankan economy returned to stability and growth during 2023, as it progressed towards recovery from a turbulent and catastrophic 2022. Key to this recovery was the agreement with the IMF for Extended Fund Facility, reached in the latter part of 2022. The country is still in default status with the expectation that the external debt restructuring will be completed shortly to set the country on a path to normalcy. Moving into 2024, the country hopes to cement the achievements in economic stability and prospects of resumption of growth; however, political stability will be at the center of agenda, being a year of elections. Constitutionally, the presidential election is due in the latter part of 2024 and the political uncertainty leading to the change of national leadership, the future of IMF programme and the economic reforms will be the key considerations.

The country's economy is challenged by structural issues including the twin deficit, long persisting gap in fiscal revenue and expenditure in the domestic front and current account deficit emanating from constant gap between imports and exports in the external sector. The economic growth derived from non-tradable goods have continued to exert pressure on the exchange rate, leading to long term depreciation of Sri Lankan Rupee. The center of the current crisis is the macro economic imbalances resulting from persistent twin deficit due to long-term policies, which inhibited export led growth for many decades.

Credit is due to the country's political and economic leadership teams including the Ministry of Finance and the Central Bank of Sri Lanka for navigating the complexities to ensure that the economy is heading towards sustainable macroeconomic stability and growth with expectation of increased private sector

participation. The economic reforms are critical, but politically challenging and are being carried-out along with backing from the IMF which has long advocated strengthening market system, removing unproductive subsidiaries, rationalisation of large public sector, privatisation of State-Owned Enterprises (SOEs) and market based pricing for essential services including power and energy. Revenue based fiscal consolidation, independence in implementation of monetary policy, stability in the financial sector and enhancing the governance framework to minimise the corruption and transparency in government affairs are the key to success.

## Political climate and policy direction

The year 2023 was defined by relatively stability in the political climate, with the incumbent president taking full control over the economy, following considerable instability and public unrest due to the economic challenges that eruption in 2022 as well as disastrous decisions taken by the previous administration. During the year, the legislature of the country passed several legislations to strengthen the economic governance; this includes the Central Bank of Sri Lanka Act No. 16 of 2023, which empowers the Central Bank with wider powers and a greater degree of independence in the conduct of monetary policy. The new legislation allows the Central Bank to introduce a flexible inflation targeting framework and implement a flexible exchange rate moving away from traditional quantitative targeting mechanism. Under this framework, the Central Bank of Sri Lanka and Minister of Finance have agreed on a 5% quarterly headline inflation target for the Colombo Consumer Price Index (CCPI), ensuring the long term price stability.

Meanwhile, the International Monetary Fund (IMF) issued its Governance Diagnostic Assessment (GDA) for

Sri Lanka, proposing sixteen essential measures to improve resilience and facilitate greater transparency in the governance process, widely believed to be a major weakness in Sri Lanka. GDA focused on corruption vulnerabilities and governance weaknesses linked to corruption in several macro economically critical priority areas, including anti-corruption, anti-money laundering, and combating the financing of terrorism, fiscal governance (including public financial management, tax policy, revenue administration, state enterprise management, and public procurement), central bank governance, financial sector oversight and enforcement of contracts and protection of property rights. In addition, several major legislations targeting improvement in the governance process including Anti-Corruption Act, No. 9 of 2023 passed in the Parliament.

## Social Climate

Following a socially and economically turbulent 2022, the socioeconomic condition dramatically improved along with the support programme of the government to protect the economically vulnerable segment of Sri Lanka. However, following consecutive quarters of economic contraction, the country saw a major increase in economically vulnerable populations including rise in poverty level for the fourth year in a row, with an estimated 25.9% of Sri Lankans living below the poverty line in 2023.

The country experienced an escalation in the cost of living due to administrative price revisions of utilities, rise in the cost of energy and transport together with depreciation of the Sri Lankan Rupee and unprecedented inflation in 2022. Though those prices are revised in response to fluctuations in international prices and exchange rate, the base remains prohibitively high. Contrastingly, the shortage of most essential items such as energy, medicine and food experienced in 2022 has completely normalised enabling the government to phase out quota system (QR Code based) for retail fuel distribution. This has enabled the general public to completely resume ordinary lifestyle. Uninterrupted power and energy supply facilitates smooth functioning of the economy, normalising the supply chain and functioning of the industrial sector.

Meanwhile, the country continues to experience outward labour migration especially in skilled segment and professional categories. On the other hand, the country is also experiencing a shortage of labour in the industrial sector, particularly in semi and unskilled categories. In the long-term Sri Lanka should opt to reform the labour market reducing the rigidities and opening up labour market with flexible labour laws.

### Economy

The economy exhibited early signs of resuming growth, reporting 1.6% growth in Quarterly GDP at Constant Prices during the second quarter in 2023 after battling with six consecutive quarters of negative growth, longest in the country's modern economic history. Despite an overall GDP contraction of 2.3%, building on the foundation in the previous quarter, the country's GDP grew at an encouraging rate of 4.5% in the fourth quarter of the year. The country's gradual recovery from the crisis is signified by the gradual reduction in headline inflation as measured by the Colombo Consumer Price Index to mere 0.90% in March 2024, well within the target of the Central Bank. Following the softening inflation, the Central Bank commenced easing monetary policy in June 2023, correspondingly market interest rates, as measured by weekly Average Weighted

Prime Lending Rate (AWPR) declined to 10.69% from 21.40% a year ago.

In the external sector, the Sri Lanka Rupee (LKR) continue to strengthen against United States Dollars (USD) and major currencies due to improving foreign exchange inflows following the growth in tourism sector and Workers' Remittance coupled with subdued import demand. The Sri Lankan Rupee appreciated 8% against USD during the financial year to close the year at 301.80. The Government of Sri Lanka gradually relaxed import controls; phasing out all import controls except motor vehicles by October 2023. Simultaneously the Central Bank remained a net buyer of USD during the year to build the Official Reserve Assets to USD 4.96 bn by end of March 2024. The appreciation of LKR against the USD added more pain to exporters, eroding the profits margin of exporters. Nevertheless, unlike in previous situations of the Rupee appreciation, the strength of exchange rate was beyond the intervention of the Central Bank, purely due to smooth functioning of market forces. It is the best interest of the economy and exporters that the Central Bank should allow market forces to determine the fair price of LKR, which is long term healthy for propelling exports and maintaining external competitiveness of the country.

The government was successful in implementing the reforms in energy sector including the implementation of transparent market-based pricing mechanisms and enhanced competition in retail fuel distribution with four more international players entering the domestic market. The electricity sector reforms proposed in the new Sri Lanka Electricity Bill encouraging competition in generation and distribution along with international best practices is another welcoming development.

### Economic Outlook

The Federal Reserve is expected to initiate softening monetary policy towards third quarter of 2024 with signs of sustainable price stability. The global economy grew at 3.2% in 2023. The IMF in its World Economic Outlook report published in April 2024 expects

the growth to remain at 3.2% in 2024 and 2025. The IMF predicts accelerated growth of 0.8% albeit a slower pace in Euro area and 2.7% in the USA; a key market for Sri Lankan exports while growth prospects for emerging markets; main import base of the country will remain at a slow pace of 4.2% in 2024.

The Central Bank expects the economy to grow by 3% in 2024 reaping the benefits of the relatively eased monetary conditions and low inflation environment. Further, the Central Bank expects inflation to remain under control with the existing policy stance while gradual pick of private sector credit growth would add momentum to the GDP growth. Along with the expansionary monetary policy and easing external condition, it is expected that the market interest rates would gradually adjust downwards.

The reforms and restructuring of State-Owned Enterprises (SOEs) and continuation with EEF programme of the IMF are critical for economic resurgence. The Government has expressed confidence in completing the external debt restructuring, an agreement with both official and private creditors by second quarter of 2024 to establish the long-term debt sustainability.

It is encouraging to note that the country is marching towards greater economic integration with South Asia which is the home for quarter of global population and remains the fastest-growing region in the world, with growth projected to be 6.0% in 2024 driven mainly by robust growth in India and recoveries in Pakistan and Sri Lanka.

It is expected that the country will continue with export encouraging policies, embracing open and free market policies with greater private sector participation. Regardless of the presidential election expected in latter part of 2024, the government should commit to the agenda of economic reforms to propel the economy to sustainable path of recovery. Macroeconomic stability and consistency in economic policies are key determinant of long-term growth.

# GLOSSARY OF FINANCIAL TERMS

## Actuarial Gains and Losses

Gain or loss arising from the difference between estimates and actual experience in a company's pension plan.

## Amortisation

The systematic allocation of the depreciable amount of an intangible asset over its useful life.

## Available for Sale

Non derivative financial asset that are designated as available for sale or are not classified as loans and receivable, held to maturity investment or financial assets at fair value through profit and loss.

## Biological Asset

A living animal or plant

## Capital Employed

Shareholders' funds plus non-controlling interests and interest bearing borrowings.

## Capital Reserves

Reserves identified for specific purposes and considered not of the entity, directly or indirectly, including any director (whether executive or otherwise) of that entity available for distribution.

## Cash Equivalents

Liquid investments with original maturity periods of three months or less.

## Contingent Liability

A possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.

## Current Ratio

Current assets divided by current liabilities. A measure of liquidity.

## Current Service Cost

Is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

## Deferred Taxation

The tax effect of timing differences deferred to/from other periods, which would only qualify for inclusion on a tax return at a future date.

## Dividend Cover

Profit attributable to ordinary shareholders divided by dividend. Measures the number of times dividend is covered by distributable profit.

## Dividend Payout

Dividend per share as a percentage of the earnings per share.

## Dividend Yield

Dividend per share as a percentage of the market price. A measure of return on investment.

## DPS

Dividend per share (DPS) is the sum of declared dividends issued by a company for every ordinary share outstanding. The figure is calculated by dividing the total dividends paid out by a business by the number of outstanding ordinary shares issued.

## EBIT

Earnings Before Interest and Tax.

## EBITDA

Earnings before interest expense, tax, depreciation and amortisation (includes other operating income). Note that EBITDA includes interest income, fair value gains and losses on investment property and share of results of equity accounted investees, but excludes exchange gains or losses on its foreign currency denominated debt and cash.

## Effective Tax Rate

Income tax expense divided by profit before tax.

## EPS

Earnings per share (EPS) is calculated as a company's profit divided by the outstanding shares of its common stock.

## Equity

The value of an asset after all the liabilities or debts have been paid.

## Fair Value

The price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

## Fair Value Through Profit and Loss

A financial asset/liability acquired/incurred principally for the purpose of selling or repurchasing it in the near term.

## Financial Asset

Any asset that is cash, an equity instrument of another entity or a contractual right to receive cash or another financial asset from another entity.

## Financial Instrument

Any contract that gives rise to a financial asset of one entity and a financial liability or equity to another entity.

## Financial Liability

Any liability that is a contractual obligation to deliver cash or another financial asset to another entity.

## Gain on Bargain Purchase

The amount of the identifiable assets acquired and liabilities assumed exceeds the aggregate consideration transferred.

## GLOSSARY OF FINANCIAL TERMS

### Gearing

Proportion of total interest bearing borrowings to capital employed.

### Interest Cover

Profit before tax and net finance cost divided by net finance cost. Measure of an entity's debt service ability.

### Key Management Personnel (KMP)

KMP are those persons having authority and responsibility for planning directing and controlling the activities of the entity, directly or indirectly, including any Director (whether executive or otherwise) of that entity.

### Market Capitalisation

Number of shares in issue multiplied by the market value of a share at the reported date.

### Net Assets Per Share

Total equity attributable to equity holders divided by the weighted average number of ordinary shares in issue. A basis of share valuation.

### Non-controlling Interest

Equity in subsidiary not attributable, directly or indirectly, to a parent.

### Other comprehensive income

An entry that is generally found in the shareholders' equity section of the balance sheet.

### Price Earnings Ratio

Market price of a share divided by earnings per share as reported at that date.

### Related Parties

A person or entity that is related to the entity that is preparing its Financial Statements.

### Return on Capital employed

Profit before tax and net finance cost divided by average capital employed.

### Revenue Reserves

Reserves considered as being available for distributions and investments.

### Segments

Constituent business units grouped in terms of similarity of operations and location.

### SoRP

Statement of Recommended Practice.

### Value Addition

The quantum of wealth generated by the activities of the Group measured as the difference between turnover and the cost of materials and services bought in.

### Working Capital

Capital required to finance day- to-day operations, computed as the excess of current assets over current liabilities.

### Surcharge Tax

Surcharge Tax has been calculated in accordance with the provisions of the Inland Revenue Act No. 24 of 2017, which exceeds Rs. 2.00 bn, for the year of assessment 2020/2021.

### Climate-related scenario analysis

A process for identifying and assessing a potential range of outcomes of future climate related events under conditions of uncertainty.

### Sustainability-related risks and opportunities (SRRO)

Risks and opportunities that arise from sustainability-related events that could reasonably be expected to affect the entity's financial performance, position and prospects

### Climate-related risks and opportunities (CRRO)

Risks and opportunities that arise from climate-related events that could reasonably be expected to affect the entity's financial performance, position and prospects

# INDEPENDENT LIMITED ASSURANCE REPORT

KPMG  
(Chartered Accountants)  
32A, Sir Mohamed Macan Markar Mawatha,  
P. O. Box 186,  
Colombo 00300, Sri Lanka.

Tel +94 - 11 542 6426  
Fax +94 - 11 244 5872  
+94 - 11 244 6058  
Internet [www.kpmg.com/lk](http://www.kpmg.com/lk)

We have been engaged by the Directors of Hayleys PLC (“the Company”) to provide limited assurance in respect of the Integrated Report for the year ended 31 March 2024 (the “Integrated Report”). The criteria used as a basis of reporting is the content elements of the International Integrated Reporting Council (IIRC)’s Integrated Reporting Framework (<IR> Framework) as disclosed in this Integrated Report.

## Basis for Conclusion

We conducted our work in accordance with the Sri Lankan Standard on Assurance Engagements SLSAE 3000 (Standard). In accordance with the Standard we have:

- Ensured that the engagement team possess the appropriate knowledge, skills and professional competencies;
- Used our professional judgement to plan and perform the engagement to provide limited assurance that we are not aware of any material misstatements in the Company’s Integrated Report, whether due to fraud or error; and
- Considered relevant internal controls when designing our assurance procedures, however we do not express a conclusion on their effectiveness.

## Our Conclusion

Our conclusion has been formed on the basis of, and is subject to, the matters outlined in this report. We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusions.

We have not been engaged to provide an assurance conclusion on the fitness for purpose or the operating effectiveness

of the Company’s strategy or how the Company creates value, including the governance, strategic management and other key business processes. The procedures we have performed in relation to the Company’s strategy and how the Company creates value are outlined below.

## Limited Assurance Integrated Report

Based on the evidence we obtained from the assurance procedures performed, as described below, we are not aware of any material misstatements that causes us to believe that the Integrated Report, as defined above, for the year ended 31st March 2024, has not in all material respects, been prepared in accordance with the Content Elements of the IIRC’s International Integrated <IR> Framework.

## Board of Directors and Management’s responsibility

The Board of Directors and Management are responsible for:

- Determining that the criteria is appropriate to meet the needs of intended users, being the Company’s members and any other intended users.
- Preparing and presenting of the Integrated Report in accordance with the criteria set out in the IIRC’s <IR> Framework. This includes disclosing the criteria, including any significant inherent limitations.
- Ensuring the Company’s strategy is well presented in the Company’s Integrated Report and reflects how the Company creates value as they operate in practice
- Identifying stakeholders and stakeholder requirements;
- Identifying material issues and reflecting those in the Company’s Integrated Report; and
- Preparation and fair presentation of the Integrated reporting information;

- Design and implementation of internal controls that the Company determines necessary to enable the preparation and presentation of the Integrated Report that is free from material misstatement, whether due to fraud or error.
- Informing us of any known and/or contentious issues relating to the Integrated Report.
- Preventing and detecting of fraud and for identifying and ensuring that the Company complies with laws and regulations applicable to its activities;
- Processes to ensure that the Company personnel involved with the preparation and presentation of the integrated reporting information are properly trained, systems are properly updated and that any changes in reporting is relevant to the Integrated Report information encompass all significant business units. This responsibility also includes informing us of any changes in the Company’s operations.
- The responsibility also includes informing changes in the Company’s Operations since the date of our most recent assurance report on the Integrated reporting information.

## Our responsibility

Our responsibility is to perform an external assurance engagement in relation to the Integrated Report and to issue an assurance report that includes our conclusions.

We conducted our assurance engagement in accordance with Sri Lanka Standard on Assurance Engagements SLSAE 3000: Assurance Engagements other than Audits or Reviews of Historical Financial Information (SLSAE 3000) issued by the Institute of Chartered Accountants of Sri Lanka.

# INDEPENDENT LIMITED ASSURANCE REPORT

We have complied with the independence and other ethical requirements of the Code of Ethics for professional Accountants issued by CA Sri Lanka (Code of Ethics).

SLSAE 3000 requires that we plan and perform the engagement to obtain limited assurance about whether the Integrated Report is free from material misstatement.

The firm applies Sri Lanka Standard on Quality Control (SLSQC) 1 and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding professional compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

## Limited assurance on the Integrated Report

Our limited assurance engagement on the Integrated Report consisted of making enquiries, primarily of persons responsible for the preparation of the Integrated Report, and applying analytical and other procedures, as appropriate. These procedures included:

1. Interviews with executives, senior management and relevant staff to understand the internal controls, governance structure and reporting process relevant to the Integrated Report;
2. Reviewing of the relevant internal policies and procedures developed by the Company, including those relevant to determining what matters most to the Company's stakeholders, how the Company creates value, the Company's external environment, strategy, approaches to putting members first, governance and reporting.
3. Reviewing the description of the Company's strategy and how the Company creates value in the

Integrated Report and enquiring of management as to whether the description accurately reflects their understanding;

4. Assessing of the suitability and application of the Content Elements of the <IR> Framework in the Integrated Report;
5. Assessing of the alignment between the Company's strategy, the disclosures on how the Company creates value and what matters most to the Company's stakeholders.
6. Reviewing Board minutes to ensure consistency with the content of the Integrated Report.
7. Reading the Integrated Report in its entirety to ensure it is consistent with our overall knowledge obtained during the assurance engagement.
8. Obtaining a letter of representation from management dated 17 May 2024 on the content of the Company's Integrated Report.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement, and consequently the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed. Accordingly, we do not express a reasonable assurance conclusion on the Integrated Report.

Misstatements, including omissions, are considered material if, individually or in the aggregate, they could reasonably be expected to influence relevant decisions of the Company.

## Limitations of our review

The Integrated Report includes prospective information. Inherent to prospective information, the actual future

results are uncertain. We do not provide any assurance on the assumptions and achievability of prospective information in the Integrated Report.

## Purpose of our report

In accordance with the terms of our engagement, this assurance report has been prepared for the Company for the purpose of assisting the Directors in determining whether the Company's Integrated Report is prepared in accordance with the IIRC's International <IR> Framework and for no other purpose or in any other context.

## Restriction of use of our report

This report has been prepared for the Company for the purpose of providing an assurance conclusion on the Integrated Report and may not be suitable for another purpose. We disclaim any assumption of responsibility for any reliance on this report, to any person other than the Company, or for any other purpose than that for which it was prepared.

Our report should not be regarded as suitable to be used or relied on by any party wishing to acquire rights against us other than the Company, for any purpose or in any other context. Any party other than the Company who obtains access to our report or a copy thereof and chooses to rely on our report (or any part thereof) will do so at its own risk. To the fullest extent permitted by law, we accept or assume no responsibility and deny any liability to any party other than the Company for our work, for this independent assurance report, or for the conclusions we have reached.

## FORM OF PROXY

### INSTRUCTIONS AS TO COMPLETION :

1. The completed Form of Proxy must be deposited with the Company Secretaries, Hayleys Group Services (Private) Limited, at No. 400, Deans Road, Colombo 10, Sri Lanka not less than forty-eight (48) hours before the start of the meeting. **Delayed Proxy Forms shall not be accepted.**
2. A Shareholder entitled to attend and vote at the Annual General Meeting of the Company, is entitled to appoint a Proxy to attend and vote instead of him/her and the Proxy need not be a Shareholder of the Company.
3. Full name of Shareholder/Proxy holder and their NIC Nos. are mandatory. Your Proxy Form will be rejected if these details are not completed.
4. A Shareholder is not entitled to appoint more than one Proxy to attend on the same occasion.
5. The duly completed Form of Proxy must be dated and signed by the Shareholder.
6. Please indicate with an "X" in the space provided how your proxy is to vote on the resolutions. If no indication is given, the proxy can vote as he/she thinks fit.
7. In the case of a company/corporation the proxy must be executed in the manner prescribed by its Articles of Association or by a duly authorised Director.
8. Where the Form of Proxy is signed under a Power of Attorney (POA) which has not been registered with the Company, the original POA together with a photocopy of same or a copy certified by a Notary Public must be lodged with the Company along with the Form of Proxy.
9. In case of Marginal Trading Accounts (slash accounts), the Form of Proxy should be signed by the respective authorised Fund Manager/Banker with whom the account is maintained.
